Dear Ed

We have finally secured funding for our ten watt FM station project from our Student Affairs Committee. We can now proceed with the application for a construction permit.

Please let me know of any additional information or other help that I can furnish to you.

Sincerely,

8/Feb/72 OBSERVER

WGOR Gets \$3000 Funding for Year...

The student run and managed radio station received a boost in the arm last Friday when SAC appropriated over \$3000 in funding in order to get WGOR on the air.

Planned to be located on the Gorham Campus, the station is asking for space in the student lounge exactly opposite the new Coffee House.

The Lounge offices would house turntables, transmitter, storage areas, the administrative offices, and the control room for the FM station. It would cover an area from the front right windows of the lounge to the back door of the student conference room.

Hopefully, the format of the station will be similar to that which identified the station last fall when they were broadcasting out of Anderson Hall.

Right now, the staff is mainly working on getting a construction permit and obtaining an FCC License to allow standard broadcasting.
