Hon. Louis P. Gagne,  
Lewiston, Maine

Dear Sir:

Here is a subject that is extremely vital to your community today, because it affects the health of your community. To be on guard against the hazards that lurk in poor sanitation and faulty plumbing, hazards that lead to disease and death, it is vital that at least one member of your staff be kept abreast of the sanitation problems that are facing every community.

This year, as in previous years, the American Society of Sanitary Engineering is offering free of charge a two day educational program -- a Refresher Course for Plumbing Inspectors and Health Officials, to be held on Sunday, August 17th and Monday, August 18th in the Hotel Congress, Chicago, Illinois.

There will be men of outstanding ability on the program who will act as instructors, men whose experience and background makes them authorities in their fields. The subjects in this course will cover designing, manufacturing, installation and many other topics related to public health. The Program enclosed will give you the many topics which are to be placed in the discussion.

As President of the American Society of Sanitary Engineering and being fully acquainted with the contents of this Course, I feel confident that it would be impossible for your plumbing inspector to obtain the schooling and vital information, from any present known source, and the knowledge they will acquire is a necessity in carrying out their duties as plumbing inspectors.

With the dangers that face each community today, with regard to Polio, Typhoid and other such virus disease, I think your office fails in its duty toward its constituents if you fail to attend yourself or send either your Plumbing Inspector, and/or one of your other Health Officials. The sessions are free of charge whether or not the attending person is a member of the Society or not. All you have to arrange for is expenses to and from this course, an investment which will repay your community a thousand fold.

Please advise us of the names of the man or men you are sending, so that we can insure a place for them at this Refresher Course.

Sincerely yours,

*John K. Dorsey*

JOHN K. DORSEY, President

AMERICAN SOCIETY OF SANITARY ENGINEERING
