Manager

Dear Sir:

May 5, 1972

There is, as you must be aware, no established avenue of communications between the student run radio stations in Maine. There is an ever increasing number of these stations and I feel that there should be an avenue of communication or, an association. Such an association could prove very helpful to all concerned. For instance, a weekly newsletter could be published containing news of other stations (management changes, experiments tried, etc.) of other campuses (concerts, recitals, actions taken on outstanding issues, etc.), also it could be a clearinghouse of equipment exchanges and ideas. Then too, we could all get together and hire a wire service with printers in each station, even if you already have such a service, this way you could reduce the price, and use the extra money for something else.

Please take a look at the enclosed proposal, then write back and tell me what you think of the whole thing. If you have any suggestions as to changes or additional ideas mention them too.

Sincerely yours;

Howard S. Allen
