This Poster Session is brought to you for free and open access by the Student Scholarship at USM Digital Commons. It has been accepted for inclusion in Thinking Matters Symposium Archive by an authorized administrator of USM Digital Commons. For more information, please contact jessica.c.hovey@maine.edu.
Clinical Bottom Line:
Evidence suggests that collaboratively implemented handwriting programs can be successfully integrated into a classroom’s curriculum. This leads to improved curricular outcomes regardless of ability, less need for direct services, and improvement in overall academic performance.

Significance:
OT’s have an opportunity to advocate and collaborate with administrators to increase implementation of handwriting programs.
