

July 26, 1944

Dear Sumner:

Just a hasty word before I leave for Bob DeWolfe's annual shindig to the lawyers.

I am enclosing a very interesting mathematical computation which is going the rounds and which you may not have seen. The man that thought this up was certainly keen and I am wondering whether he has his figures absolutely correct or he made them fit his idea.

Under separate cover I am sending you the book containing the winning plans in the Pabst Postwar Employment Awards. I am sure you will want to read and to keep it for reference. Frankly much of it is over my head.

Affectionately,
