Friday, October 11, at 7:30 p.m.

Saturday, October 12, at 7:30 p.m.

Sunday, October 13, at 2:00 p.m.

It's the end of the 19th century. Employed for half a man's salary to analyze astronomical data at the Harvard College Observatory, four courageous women of science pave the way for the next generation of astronomers and astrophysicists, including Cambridge University trained scholar, Cecilia Payne. In this inspiring and time-bending story taken from true events, we experience the struggles and achievements of these remarkable women who imagined the impossible and changed the way we see the universe and ourselves. A Maine premiere by Boston-based playwright, Joyce Van Dyke.
