We plan to have a spread tomorrow night after school if nothing happens. Katherine and Christian are coming over next Saturday night to stay over Sunday. Won't we have some fun? We have planned a good time for Saturday night and I guess we can stick through the rest of the time they are here. The small boy seems to be spreading weren't it? I wouldn't be very much surprised if they had the scholar flu all vaccinated as they are doing it at the other schools. Why don't Ernest & Herman write? Neither of them are going to school and I think they might find time to write once in a while. It is getting late and I saw rather wild so must close and go to bed.

With love to all,

Harriet

Keefe to cut this paper to get it利用率

It is a cloudy morning & it looks as if
My dear Mamma:—

To-morrow will be Washington's birthday but we have a school quite the same. Mr. Dentley keeps a school every day that he possibly can. He would never give us a holiday if he had his way about it.

Grace came last night and tonight all the things you sent. Three things you sent me to eat I thank you very much for the chocolates are the best I ever ate. Have not said this before yet but know that it is good. Transferred my skirt to night after school. Was very glad you sent it back but think you must have had to hurry awfully to get it ready to send.

Sunday the walking was very good and I did not go to church. After dinner Rhoda & Maria came in and we read
Sing nearly all the afternoon.
One of the other girls came me after supper and stayed until nearly nine.
Monday morning we studied most of the time. I wanted Wiggins to have a thing come to see her and we were with them part of the afternoon. Got your letter also the from Otley and me from Mildred Hamilton.
Miss Fickett, (the best teacher in the lot) invited us down to her room in the afternoon Enunci PhD at 8 west. She read something to it was very interesting and we had a very nice time.
Last summer the fire department was called out and we had an awful long time of the girls knew what to do as they are new ones who have never been in the companies before at least most of them are.
Every girl in my company was new at the business and couldn't get anything through their heads. The just stood still and stared at me.
The 27th was Thursday. We made a visit to the city and had a nice time. I met many people and enjoyed myself. The weather was fine and we spent the day at a public garden. Yesterday morning we went out to look for flowers and found some beautiful ones.

At night we went to the movies and had a good time. We stayed until late and returned home.

The weather was cool and pleasant. We went for a walk at night and enjoyed the fresh air.

The next morning we met with friends and had breakfast together.

We had a nice time and are looking forward to the next week.

Sincerely,

Harry
