Frederick Robt Hall, Johanna Mo.

My dear Maamma:-

Will write you a little note as I have some spare time. Grace and Charles are both going home to-night. Wasn't it funny that I did not see papa? I wish he had heard Mue. Pembroke I know he would have enjoyed it very much. He would have liked the bass singers also I think.

It is getting about time to put on winter hats and so I think I shall have to come home before long to get mine. Emma brought hers back with her last Saturday.

I found when I put on my blue skirt this morning that there was quite a large hole on the hip and when I was down stairs this noon I caught it on a door latch and lost a three cornered piece in it.

It is a lovely day and think I shall go to walk after school.

This evening Emma & I are invited to spend the evening in a girls

room on the next floor. I don't know what we are going to do but I shouldn't be surprised if they made some candy.

I think I never saw the trees when they looked as pretty as they do now from this hill.

Last Saturday night I saw some one who I think was Joe Smith. He was at the Casco Bay S. S. Landing and he helps about loading and unloading the freight ~~box~~ on the Island Steamers. I saw him Monday afternoon when I came up but was not quite sure it was he so did not dare to speak to him.

Miss Whitt is having a class in drawing in this room and I don't know what I am writing about half of the time.

I have got a composition to write. It has got to be done next Tuesday morning and I have not found my subject yet.

We have got to take some line of poetry for our subject and I have hunted all the week for one but have not succeeded in finding anything yet.

I have got an awful cold sore on my upper lip and it bothers me very much. I hope it will get better soon.

I heard that there had been an accident at N. Farnouth. That M. J. Collins and a Dotten fellow ran into each other and got "stove up". What about it?

Do they still like Mr. Pracock? You haven't said much about him. Tell Ernest that I heard yesterday that Mr. Williams is teaching in Mass.

Well it is nearly time to go down to my Geography class and so can't stop to write much more.

When we go to Woodford on our new way we take the electric quite near the Main Synagogue so now I know where it is. We like going on the electric as we do not have as long a time to wait at Woodford and it costs five cents less.

1941

Well I must stop now.

Tell the boys to write as I enjoy their letters.
Mr. Corthell says he wants part of all the
board bills paid up. So if papa wants
to send me some money it will be all
right. It makes no difference how much.
Loveingly, Harriet.

How are the Trues?
