The University of Southern Maine is accredited by the New England Association of Schools and Colleges which accredits schools and colleges in six New England states. Membership in the Association indicates that the institution has been carefully evaluated and found to meet standards agreed upon by qualified educators.

The University of Southern Maine does not discriminate on the basis of race, color, religion, sex, national origin, handicap, or age in the recruitment and admission of students, the recruitment and employment of faculty and staff, and the operation of any of its programs and activities; and the University practices affirmative action in hiring and in all other conditions of employment for disabled and Vietnam era veterans, as specified by federal and state laws and regulations. The designated coordinator for University compliance with these laws is Kathleen H. Bouchard, Director of Equal Employment Opportunity/Affirmative Action.

The University of Southern Maine reserves the right to revise, amend or change items set forth in this catalog from time to time. Accordingly, readers of this catalog should inquire as to whether any such revisions, amendments or changes have been made since the date of publication. The University reserves the right to cancel course offerings, to set minimum and maximum size of classes, to change designated instructors in courses, and to make decisions affecting the academic standing of anyone participating in a course or program offered by the University of Southern Maine.

The University of Southern Maine supports the efforts of secondary school officials and governing bodies to have their schools achieve regional accredited status to provide reliable assurance of the quality of educational preparation of its applicants for admission.

The University

One aspect of the Maine spirit, as naturalist Henry Beston has described it, "...is a positive enjoyment of adventure, character, and circumstance." This same spirit has also helped guide the development of higher education in the state of Maine. For over 100 years, the predecessors of what today is known as the University of Southern Maine have shared a continuing concern to provide an education appropriate to changing circumstances and responsive to the character and sense of adventure of their students.

In 1878, the Western Maine Normal School was founded at Gorham. Its mission broadened and its student body grew, and in 1945 it became Gorham State Teachers College. Similarly, Portland Junior College, developed in 1933 to bring higher education within commuting distance of a growing population, became the University of Maine at Portland in 1957. The two institutions were joined in 1970 as the University of Maine at Portland-Gorham, and in 1978 became known as the University of Southern Maine. Looking back over the history of those schools and colleges, one can appreciate that the University today is stronger because each of its predecessors grew with the times and the students they served.

Not surprisingly, each college and university in the country likes to think of itself as unique, as offering experiences unavailable at other institutions of higher learning. To be sure, the University of Southern Maine has many characteristics typical of medium-sized, public universities elsewhere in the United States. It comprises six academic units (Arts and Sciences, Law, Education, Nursing, Business, and Basic Studies); it enrolls over 8,000 students, and is the second largest of the seven campuses making up the University of Maine system; it offers five associate and thirty-eight baccalaureate degree programs, as well as graduate and professional degrees in law, nursing, business, computer science, education, and, most recently, public policy and management.

But the University has many unique features, too.

It is both large and small. With 1,100 students resident on the Gorham campus, the University has the characteristics of a rural, New England college; faculty close to hand and facilities set in attractive pastoral surroundings. At the same time, located in Portland, the state's largest city and the center of financial, business, and cultural activities, the University makes available resources, opportunities, and experiences usually found only in much larger institutions.

The student body of the University is the most diverse in the state of Maine. Over one-half are full-time students; more than 57 percent are women, and the average age of an undergraduate is 26. This diversity of age provides a lively and challenging environment for learning: a context in which scholarship and the experience gained from living complement one another.

The University is also the most cosmopolitan of Maine institutions of higher education. There is easy access to the cultural and social resources of Boston and New York, as well as those of Portland. The City of Portland and the University cooperate to provide internships for students in political science, law, sociology, nursing, and related areas. The University's Center for Research and Advanced Study engages in a broad range of ventures with municipal, county, state, and federal agencies, as well as with private foundations and industry. These all serve to provide the student with formal and informal learning opportunities in the areas of the arts, humanities, politics, business, mass communication, and high technology.

Most important, however, the University is a growing and developing institution. At a time when many colleges and universities in the country are struggling with declining enrollments, drastically curtailed resources, and a need to redefine their mission, this University, by virtue of its location, range of student body, quality of faculty, and level of support, is
responding creatively to its particular circumstances and the challenges of its students. Within the past two years, a new Core curriculum has been established: a curriculum which attempts to define the types of skills and the kinds of learning experiences our graduates should have in today’s world. University Convocation, first begun in 1981 and repeated yearly, seeks to address an issue of interest to the times—“The City,” “The Changing Roles of Women and Men,” and in 1984-85, “Peace and War in the Nuclear Age,”—and to engage students, faculty, and citizens in a common discussion across academic disciplines and between the University and the community. New graduate programs in computer science, nursing, and public policy and management reflect a concern with preparing individuals for contemporary careers. The University is attempting to strengthen its commitment to serve the needs of off-campus students, in-service teachers, and professionals on-site in business and industry. The University is thus a major educational force in the overall growth and improvement of southern Maine: an area often described as the northern part of that business, industrial, and cultural corridor stretching from Washington, D.C., through New York and Boston.

But ultimately, however, a university must be judged on the basis of its impact upon its students and in terms of the value it imparts to those who join its community. Students at the University of Southern Maine find themselves challenged by a talented and dedicated faculty, stimulated by a diverse and involved student body, and enriched by the type of environment that Portland, one of the country’s “most livable cities,” affords.

The University of Southern Maine is accredited by the New England Association of Schools and Colleges and has most recently been granted a ten-year accreditation, indicating the University meets or exceeds Association standards; the School of Nursing is accredited by the National League for Nursing; the College of Education by the National Council for Accreditation of Teacher Education; and several departments within the College of Arts and Sciences by specialized accrediting bodies. The University of Maine School of Law is approved by the American Bar Association and the Association of American Law Schools.

In short, the University’s challenging academic program encourages students to seek leadership roles in our always changing society. So it was in 1878; so it remains today.
# Programs of Study

The University of Southern Maine offers five associate and thirty-eight baccalaureate degree programs as well as graduate and professional degrees in law, nursing, business, computer science, education, and public policy and management. For further information regarding graduate programs, please refer to the Graduate Catalog.

*Liberal Studies: Declaration of the major is normally done at the end of the sophomore year with the approval of the Liberal Studies Major Board.

**Self-Designed Major: Approval of this program must be given by the Council for Interdepartmental Majors after students have enrolled at the University.

### Engineering

This University offers the first year of the four-year program common to all engineering majors (with the exception of electrical engineering), and the first and second years in engineering physics. These offerings meet the general requirements of the corresponding programs at the University of Maine at Orono. UMO extends preferred transfer consideration to Maine residents.

### College of Education

The College of Education offers the following four-year programs leading to the degree of bachelor of science:

- Art Education (certification, K-12)
- Elementary Education (certification, K-8)
- Industrial Arts Education (certification, K-12)
- Industrial Technology (non-teaching program)
- Music Education (certification, K-12)
- Vocational/Occupational Education (teaching program)
- Vocational Technology (non-teaching program)
- Secondary Education Mathematics

### School of Nursing

- Nursing (B.S.)
- Therapeutic Recreation (B.S.)

### School of Business, Economics and Management

- Business Administration (B.S.)
  (with majors in business administration, accounting, and economics)
**Associate Degree Programs**

*College of Arts and Sciences*
- Liberal Arts (A.A.)

*School of Nursing*
- Therapeutic Recreation (A.S.)

*School of Business, Economics and Management*
- Business Administration (A.S.)
  (with options in accounting; business computer programming; business management; business marketing; hotel, motel, and restaurant management; and real estate)

*Division of Basic Studies*
- Human Services (A.S.)
  (with options in gerontology, mental health, and developmental disabilities)
- Selected Studies (A.S.)
- Liberal Arts (A.A.)
- Business Administration (A.S.)
  (see above for options)

For further information regarding baccalaureate and associate degree programs, please refer to the appropriate school or college section of this catalog.
The University of Southern Maine is an academic community that welcomes applications for admission from qualified women and men regardless of race, color, creed, national origin, handicap, or age. The Admissions Office invites prospective students to visit the campus and to discuss their educational interests. The Office will provide information about academic programs, help students plan a course of study, discuss admissions requirements, and arrange a tour of the campus. Prospective students are encouraged to telephone or visit the Admissions Office (207-780-5215) located in Corthell Hall on the Gorham campus.

Although secondary school preparation may vary, the following subjects are required for regular admission to the University. In addition to these, further requirements are imposed by certain schools and colleges. (A unit is equivalent to one year of study).

**General subject requirements**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3 units (Algebra I, II and Geometry)</td>
</tr>
</tbody>
</table>

**Applicants to the College of Arts and Sciences must also have:**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Science</td>
<td>2 units (with lab)</td>
</tr>
<tr>
<td>History/Social Science</td>
<td>2 units</td>
</tr>
<tr>
<td>Foreign Language</td>
<td>2 units (one language)</td>
</tr>
</tbody>
</table>

(Biology majors must have three lab units of science. Pre-nursing candidates must have biology and chemistry. Foreign language majors must have three units of a foreign language).

**Applicants to the College of Education must also have:**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Science</td>
<td>2 units (with lab)</td>
</tr>
<tr>
<td>History/Social Science</td>
<td>2 units</td>
</tr>
</tbody>
</table>

(Majors in Secondary Education Mathematics must have four units of mathematics).

**Applicants to the School of Nursing**

Admission is first to the University as a pre-nursing candidate. (See General Subject requirements above). Admission to the upper-division nursing major may be made after the completion of a minimum of 30 credits in the prescribed prerequisites. For further details, please refer to the section, University of Southern Maine School of Nursing.

**Applicants to the School of Business, Economics and Management**

Admission is first to the School of Business, Economics and Management. Each student must then satisfy additional minimum standards of academic performance for admission to a major in the baccalaureate program or to an option in the associate degree program. For further information, please refer to the section, School of Business, Economics and Management.

For specific admissions requirements of art, music, industrial arts, industrial technology, and vocational-occupational education, please refer to the appropriate sections of the catalog.

Admission to degree programs at the University is on a selective basis. The University admits women and men to its baccalaureate and associate degree programs whose academic credentials and life experiences indicate potential for success in higher education.
Each applicant for admission is required to submit a completed University of Maine Application Form and a nonrefundable $15 application fee. The Application Form calls upon the applicant to detail his/her academic, personal, and recreational background. In addition, the candidate is asked to describe in narrative form his/her interest in the University and the specific degree program for which application is being made.

The University will consider applications for the fall semester at any time beginning in the September of the year prior to the fall semester in which the applicant intends to commence academic study. As some degree programs only admit a limited number of students, applicants are urged to submit their credentials at their earliest possible convenience in order to receive consideration. Applications may also be made to enter the University in the spring semester. These, too, should be submitted early so as to receive full consideration.

Offers of admission may be revoked due to unsatisfactory performance in the final semester of high school or college work.

The University recognizes that its prospective students may come with differing academic backgrounds and some with a significant time having elapsed since completion of secondary school. The following categories of admission exist to accommodate students.

Regular Admission Applicants whose academic backgrounds demonstrate the ability to pursue regular, entry-level coursework may be granted regular acceptance to the University. This admissions decision is based upon a comprehensive evaluation of the student's educational record, including standardized test scores (if required), as well as individual talents and activities.

Admission with Conditions Applicants whose academic backgrounds are deficient in some way (e.g., subjects presented, grades, standardized test scores), but who show significant promise, may be granted acceptance with conditions. Such students are fully admitted to the University, and pursue their first year of study under the direction of the Advising and Information Department. Normally, students who are admitted with conditions take a reduced course load for the first few semesters. These students should expect to take longer to complete a degree program at the University than students granted Regular Admission. Students admitted to associate or baccalaureate degree programs with conditions have up to five and six semesters, respectively, to remove their conditions.

To achieve the transition to regular status, the student must complete the minimum proficiency requirements of the University as well as a minimum of 15 credit hours of graded, non-remedial coursework with a grade point average placing the student in good academic standing. Transition to regular status prior to completion of 15 credit hours may be approved if the student earns an exceptional grade point average. The student's assigned academic counselor will assist in initiating the transition.

Admission to Selected Studies Some persons whose educational career has been interrupted for a considerable period of time or whose academic credentials are insufficient to warrant either regular admission or admission with conditions to baccalaureate or associate degree programs, are invited to apply to the Selected Studies Program. The program is a two-year, associate degree course of study that offers the student several options: (1) to complete a self-designed, two-year program; (2) to transfer to another associate or baccalaureate degree program offered by the University; or (3) to apply for transfer to another institution of higher education. The Selected Studies Program is administered by the Division of Basic Studies and is available at any of the four off-campus centers of the University. For further information, please refer to the Division of Basic Studies section of this catalog.
Readmission  Students enrolled in degree programs who either formally withdraw or who fail to register for a particular semester maintain their matriculated status for one academic year from the fifth class day of the next regular academic term. If the non-registered time period is shorter than one academic year, no readmission application is required and the student may register for courses through the Registrar's Office. Readmission following academic suspension requires the approval of the academic dean of the school or college which initiated the suspension.

Early Admission  Students who have completed their junior year of high school may apply for consideration for admission as a fully matriculated freshman within the College of Arts and Sciences. The Early Admission Program seeks to accommodate those students who display both the intellectual ability and the social maturity to succeed in a university course of study.

Students who wish to receive their secondary school diploma after the completion of one year in the Early Admission Program must obtain the prior approval of their secondary school guidance director or principal. Students expecting to receive their secondary school diploma must arrange with the University Registrar to have an official transcript of grades forwarded to the secondary school at the completion of the academic year.

To be eligible for admission, the applicant should have at least a B average and/or rank in the top 20 percent of his or her secondary school class at the end of the junior year. Coursework normally expected to be completed by the end of the junior year includes: three years of English; three years of mathematics beginning at the introductory algebra level; one year of social science/history; one year of biology, chemistry, or physics; and two years of a foreign language. In addition, the applicant should register for and take the Scholastic Aptitude Test (SAT) at the earliest possible date and arrange to have the scores forwarded to the Director of Admissions at the University. The American College Test (ACT) may be submitted in lieu of the SAT for admissions purposes.

Interested applicants should confer with their secondary school guidance counselor or principal regarding eligibility to participate in the Early Admission Program. The student and the principal/counselor should complete the University application, and along with an official transcript, submit it to the Admissions Office, Gorham, Maine 04038.

The Admissions Office in cooperation with the Dean's Office in the College of Arts and Science will review each Early Admission application. Students thus admitted under this program are accorded all the rights and privileges of entering freshmen. Academic advising can be arranged upon request through the College of Arts and Sciences Dean's Office prior to and during the first year of the program.

It is expected that Early Admission Program applicants will apply for the fall semester. Application forms must be submitted as early as possible. For fall semester, all Early Admission applications should be received by April 15.

Admission of International Students  Due to limitations on available financial aid, applications are encouraged only from international students who are able to fund fully their educational expenses from their own resources. To certify this, a Declaration and Certification of Finances Statement must be filed as part of the application process. This form must be fully documented and notarized and should accompany the completed application. Applicants whose native language is not English are required to submit scores of the Test of English as a Foreign Language (TOEFL). In addition international students must submit test results of the Scholastic Aptitude Test (SAT). SAT scores are not required of applicants who have completed at least one year of university or college study at an English-speaking institution of higher education.
1985 admission, all international student admission credentials must be filed with the Admissions Office no later than April 15, 1985.

Enrollment as a Special Student  The University encourages members of the local community to take advantage of its diverse course offerings. Special Students (those not enrolled in a degree program of study) may take regular credit courses for self-interest and enrichment. Special Students are enrolled each semester on a space-available basis and are not eligible for student financial aid awards, guaranteed student loans, veterans' benefits, or participation in athletics. Interested persons are invited to contact the Advising and Information Department (AID), Payson Smith Hall, on the Portland campus or the off-campus center nearest them for further information.

Admission from Secondary School  Applicants applying to the University during their senior year in secondary school, or who have been graduated for less than three years and have had no collegiate attendance, must arrange for their secondary school transcript to be sent to the Office of Admissions. Scores from the Scholastic Aptitude Test (SAT) of the College Board must also be submitted. Achievement tests of the College Board are not required. The American College Test (ACT) may be substituted for the SAT for admission purposes.

Admission of Adult Candidates  Applicants who have graduated from secondary school for more than three years must arrange for their secondary school transcript to be sent to the Office of Admissions. Although Scholastic Aptitude Test (SAT) scores are not required for admission of adult candidates, they may be submitted for placement purposes as such scores may be used to declare minimum academic proficiencies.

From Outside the University of Maine System  Applicants who have attempted 12 semester hours of credit or more beyond the secondary school level are classified as transfer students and must submit their collegiate transcripts together with secondary school and SAT records. Those transfer candidates who have earned 30 or more semester hours of collegiate credit must submit their collegiate transcripts for evaluation, but may forego submitting secondary school transcripts and SAT scores.

Students applying for transfer from regionally accredited institutions of higher education must have a grade point average which places them in good academic standing. Transfer credit may be given for coursework completed at a regionally accredited institution of higher education only if a grade of C— or better has been achieved in courses that are comparable to ones offered in the student's proposed degree program at the University of Southern Maine.

Students applying for transfer from non-regionally accredited institutions of higher education must have a minimum 2.75 grade point average (on a 4.0 scale) to be considered for admission. No transfer credit will be awarded for coursework completed at non-regionally accredited institutions of higher education. Students may, in individual cases, petition the dean of the appropriate school or college, for consideration of such coursework.

From Within the University of Maine System  Applicants who have completed coursework at other campuses of the University of Maine System should procure an Application Form from the Admissions Office of any University of Maine campus. Students should request that their transcripts be sent to the USM Admissions Office. This will be done at no cost to the student.

Students must have a minimum grade point average which places them in good academic standing to be eligible for consideration for trans-
Evaluation and Placement

Evaluation of Transfer Credits Undergraduate coursework completed at other institutions of higher education will be evaluated for transfer credit on the basis of the following: (1) comparability of courses taken with courses at the University; (2) whether or not the previous institution was regionally accredited; (3) grades achieved in previous coursework. Credit is not transferred for courses in which the lowest passing grade was earned (exception: grades of D are transferable if earned at another campus of the University of Maine). Courses for which credit is awarded through another institution's credit by examination policy may be granted transfer credit provided both earned credits and grades appear on the transcript and the course is applicable to the student's work at this University. The applicability of transfer credits to a student's intended major field of study shall be determined by the Office of Transfer Affairs in conjunction with the appropriate academic department, school, or college.

Placement Examination Program All newly admitted students with a SAT Mathematics score below 450 or a Test of Standard Written English (TSWE) score below 43 must take the Placement Examinations. The requirement applies to (1) new baccalaureate and associate degree students; (2) transfer students with less than 30 transfer credits; and (3) readmitted students with less than 30 credits. Special students are encouraged to take the Placement Examinations and should contact their academic counselor for details. Copies of the publication, Placement Examination Program, are available at the Testing and Assessment Center, 209 Deering Avenue, Portland campus, the Advising and Information Department, and all off-campus centers.

Prior Learning Evaluation

The University recognizes several procedures for the assessment of learning acquired outside a sponsored collegiate setting. This may include, standardized examinations (e.g., CLEP), or credit for learning gained through paid or unpaid employment, self-directed study, or through avocational talents and skills. For further details regarding the following options, students should contact the Office for Prior Learning Assessment, 110 Payson Smith Hall, Portland campus (780-4067).

Advanced Placement The University participates in the Advanced Placement Program of the College Entrance Examination Board. Applicants interested in advanced placement with credit should make arrangements to take the Advanced Placement Tests given by the C.E.E.B. in May of each year. The tests may be taken in the junior and senior years of secondary school. Students who score a 3 or better on this test may in certain circumstances be granted credit for an introductory course in an appropriate subject area.

College Level Examination Program In certain cases, credit may be given a student who receives a satisfactory score on a CLEP examination, either the General Examinations or the Subject Examinations. These are as follows:

General Examination The University will grant credit in the following areas for a score of 500 or higher on these CLEP general examinations: English (3 credits, will Satisfy ENG 100); Humanities (6 credits); Social Science/History (6 credits); Mathematics (6 credits); and Natural Science (6 credits).
The five general examinations are designed primarily for incoming freshmen rather than for transfer students with advanced standing credit at the introductory level.

Subject Examinations Any subject area CLEP examination which is equivalent to a USM course approved to satisfy a requirement of the Core curriculum may be applied to satisfy the Core requirement in that subject area.

The following departments, schools, and colleges have established policies relative to the acceptance of CLEP subject credit: College of Arts and Sciences (Biological Sciences, Chemistry, History, Mathematics/Computer Science, Political Science, Psychology, and Sociology); School of Business, Economics and Management; School of Nursing; and the College of Education (Industrial Education and Technology, Educational Psychology, and Human Growth and Development). Interested candidates should contact the Office for Prior Learning Assessment or the appropriate school, college, or department for further information.

Challenge Examinations Students in the School of Nursing who successfully challenge selected upper-division courses may receive credit for prior learning.

Portfolio Assessment The University has recently established a program for assessing learning based on an individual student's portfolio. Currently available on a limited basis only, this program involves a detailed and comprehensive documentation of prior learning, an interview with a faculty assessor, and specific performance or demonstration as appropriate. Details may be obtained from the Office for Prior Learning Assessment.

Armed Services Experience The University recognizes credit based on the American Council on Education's Guide to the Evaluation of Educational Experiences in the Armed Services. Interested students should provide a DD 214 form and other appropriate credentials for evaluation. Details may be obtained from the Office of Prior Learning Assessment.

New England Regional Program In cooperation with the New England Board of Higher Education the University offers undergraduate programs of study to qualified candidates from the New England states. Tuition rates for regional candidates approved by the Board of Trustees will be that of in-state tuition plus a surcharge of 25 percent. Because the listing of programs varies from year to year, candidates should check the most up-to-date listings. The following schedule represents the fields of study available at the University in the New England Regional Student Program for 1984-85. The 1985-86 listing will be available from the New England Board of Higher Education during the fall of 1984. Check with your guidance counselor or the Board at 45 Temple Place, Boston, Massachusetts 02111.

Tuition and Fees 1984-85

The financial requirements of the University, changing costs, state and legislative action, and other matters may require an adjustment of these charges and expenses. The University reserves the right to make adjustments to the estimated charges and expenses as may from time to time be necessary in the opinion of the Board of Trustees up to the date of final registration for a given academic term. The applicant acknowledges this reservation by the submission of an application for admission or by registration.

Schedule of Expenses

**Application Fee**  An application fee of $15.00 must accompany each application at each campus unless the student has previously matriculated at this campus.

**Matriculation Fee** A one-time fee of $15.00 for each student who elects to pursue a degree program within the University of Maine.

**New Student Advising and Orientation Fee** A one-time fee of $25.00 is required of all new degree candidates.

**Student Activity Fee (Compulsory)** Undergraduate students taking 6 to 12 credit hours are required to pay a $9.00 Student Activity Fee. Students taking 12 or more credit hours are required to pay $18.00. This fee is charged each semester.

Optional meal plans available for off-campus students.

**Other Charges**

**USM Health Services Fee and Insurance Package (Optional)**

This optional fee is available to all students who are carrying at least three credit hours. Students may elect this fee of $100.00 per year (includes $42.00 USM Health Services Fee and $58.00 Insurance Fee) with their fall semester bill.

**Student Health Services Fee (Optional)**

Students may elect this fee of $42.00 per year with their fall semester bill. This service may be purchased independently of the insurance package.

**Late Fee**

A late fee of $25.00 is charged to all students who fail to satisfy their financial obligations with the Business Office when due and payable. This fee will also be assessed to students whose registration checks are returned and not cleared by the specific deadline. Students will also be liable to a $25.00 reinstatement fee if their registration is revoked for any reason.
Books and Supplies
The cost of books and supplies varies according to the course for which a student is registered. Books and supplies are not billed on the semester invoice. Payment for them must be made directly to the Bookstore at the time of purchase.

Applied Music Fees
The fees are outlined in the music section of the catalog.

Commencement Fee
A one time fee ($15.00) for each degree candidate, to be paid six weeks prior to Commencement.

Tuition for Other Classifications of Students

Auditing of Courses
Tuition and fees are charged for audited courses at the usual hourly rate, except for a student who is already paying the maximum tuition.

Adding Courses
All adds must be paid for at the time of the add, if it results in an additional charge. The $25.00 late fee will apply if not done so.

Tuition and Fee Grants
Tuition and fee grants will be restricted to those specifically authorized by the Board of Trustees and include tuition grants for Maine residents over 65 years of age who wish to register for undergraduate courses at any campus of the University of Maine.

Deposits

A deposit of $25 is due when the applicant is notified of acceptance by the Director of Admissions. If a residence hall room is requested, an additional $75 is due. These deposits will be applied toward the student's account when the student registers, and are subject to the refund policy listed below.

The deposits are forfeited if an applicant withdraws after June 1 for the fall semester or after January 1 for the spring semester. If a freshman, transfer, or readmission applicant notifies the Director of Admissions of withdrawal prior to June 1 for September enrollment or January 1 for spring semester, the deposits will be refunded. Notification must be in writing.

Students desiring to live in a residence hall must pay a room deposit of $75.00 during the spring in order to ensure that rooms will be reserved for them in the fall. The deposit will be applied to the fall semester bill. If it is found that residence hall accommodations are not desired, the deposit will be refunded if the Office of Residence Life is notified by June 1. After June 1, the $75.00 is nonrefundable.

Payment of Bills

Students who preregister may receive a bill through the mail. However, the University is not obligated to send out such a bill. The student is responsible for paying fees in full or completing financial agreements as noted below by the appropriate due date stated in this catalog or registration instructions. Failure to do so will result in the student being assessed the $25.00 late fee.

All University bills, including those for room and board in University buildings, are due and payable on or before August 31 for the fall semester and on or before January 11 for the spring semester. Bills may be paid at the business office at either campus by mail or in person. Checks should be made payable to University of Maine.

A $5.00 penalty is imposed if any institutional charges are paid by check which is returned because of an irregularity for which the person submitting it is responsible.

Scholarships and grants, other than University awards, which are to be used for tuition payments, should be confirmed with the Business Office on or before the first day of classes in order to receive proper credit against outstanding bills and to avoid a $25 late fee.

Students not on an authorized deferred payment of fees plan and who have not paid their tuition and fees in full by the due date, may have their registration for that semester cancelled. This means specifically that a student will receive no credit for any courses taken during that semester.
Refund Policy

Students who are allowed to register in error may have their registrations cancelled. Any fees paid by that student will be refunded to the student or credited against other charges due the University by that student.

Transcripts of records and/or permission to register for succeeding semesters will be withheld from students who have not paid all bills and all loans due the University or who have not made arrangements for proper settlement. Included among these bills are damage to University property, charges or fines owed for violation of the University motor vehicle regulations, and library fines.

Installment Program

Students whose circumstances are such that payments of their semester bill in full at the time prescribed would present a real hardship, will be permitted to use the installment program.

The program requires that one-half of the semester bill, plus any previous balance and a nonrefundable $10.00 finance charge be paid at the time prescribed above. The balance is to be paid in three consecutive monthly installments commencing 30 days after the first day of semester classes.

The privilege of using the program will be withdrawn and the full balance will be immediately due and payable if payments are not made promptly as scheduled. A student must be registered for and maintain a minimum of six credit hours at USM in order to use this plan.

Refund Policy

Student charges will be refunded to students who are withdrawing from the University of Maine in accordance with the schedules and provisions set forth below.

Tuition Refunds

For purposes of calculating tuition refunds, the attendance period begins on the opening day of scheduled campus classes, includes weekends and holidays, and ends on the date the student notifies the Registrar in writing.

| Withdrawal after first week | 0% |

Provisions

No part of an advance deposit is refundable after June 1. Although such deposits are applicable to tuition charges for students who remain enrolled, they are forfeited by students who withdraw.

In no case will tuition be reduced or refunded because of voluntary absence from classes.
Refunds for involuntary withdrawals, e.g., extended illness or military service, will be considered by the campus on a case-by-case basis.
University fees are not refunded, including the Student Activity Fee.

**Room Refunds**

For purposes of calculating room refunds the attendance period begins on the opening day of scheduled campus classes, includes weekends and holidays, and ends on the date the student provides written notification.

**Provisions**

No part of an advance deposit is refundable after June 1. Although such deposits are applicable to room charges for students who remain in the dormitory, they are forfeited for students who withdraw.

This room refund policy pertains to students who are withdrawing from the University of Maine. Refunds, if any, for students who remain enrolled but vacate a dormitory room will be governed by the terms and conditions of campus residence hall contracts. Refunds for involuntary withdrawals, e.g., extended illness or military service, will be considered by the campus on a case-by-case basis.

**Board Refunds**

Students who withdraw from the University will be charged for meals at the established daily rate through the date of clearance.

**Add/Drop**

Students may drop courses during the first two weeks of classes without incurring any financial obligation for tuition charges. After this time, no adjustment to tuition charges for courses dropped will be made. For students who withdraw from the University, the Refund Policy is applicable.

All courses added must be paid for at the time of the add unless the maximum charge is applicable or the tuition charge is offset by a drop during the first two weeks of classes in order to avoid a $25 late fee.

*For purposes of calculation of tuition refunds, the attendance period begins on the opening day of scheduled campus classes, includes weekends and holidays, and ends on the date the student notifies the Registrar in writing.*
A student is classified as eligible, or not eligible, for in-state tuition at the time of acceptance to the University. The decision, made by the campus Business Manager, or other official designated by the campus, shall be made in accordance with these rules upon information furnished by the student's application and any other relevant information. No student, having once been registered as an out-of-state student, is eligible for in-state tuition classification unless he or she has been a resident of the State of Maine for at least one year immediately prior to registration for the term for which in-state tuition eligibility is claimed, and also has become legally domiciled in Maine before such registration. If the student is enrolled for a full academic program, as defined by the University, it will be presumed that the student is in Maine for educational purposes and that the student is not in Maine to establish a domicile and the burden will be on the student to prove that he or she has established a Maine domicile by the time of such registration.

In general, members of the Armed Forces and their dependents will be granted in-state tuition rates during such periods of time as they are on active duty within the State of Maine.

The domicile of a student who is an unmarried minor follows that of the parents or legally appointed guardian of the student. In such cases, the domicile of the parent with whom the student lives or to whom custody has been granted by court order, or of the student's legally appointed guardian, shall be the domicile of the student.

If a student classified as an out-of-state marries a person who is domiciled in the State of Maine and asserts the establishment of a domicile in Maine, that student shall be presumed to be eligible for in-state tuition status at such student's next registration.

To change tuition status, the following procedures are to be followed:

A. Submit "Request for Change of Tuition Status" form to the Business Manager, or other designated official. If the Business Manager's (or such other official's) decision is considered incorrect by the student:

B. The student may appeal that decision in the following order:

1. To the Executive Director for Budget and Institutional Research or equivalent official as designated by the campus.
2. To the President of the campus.
3. To the Treasurer of the University, whose decision shall be final.

In the event that the campus Business Manager, or other designated official, possesses facts or information indicating a change of status from in-state to out-of-state, the student shall be informed in writing of the change in status and will be given an opportunity to present facts in opposition to the change. The student may appeal the decision of the Business Manager or other designated official as set forth in the preceding paragraph.

No request for change in tuition status will be considered unless filed on or before September 1 for the fall semester, or on or before January 1 for the spring semester. All applications shall be prospective.

Student Financial Aid

To acquire a higher education a student must invest a significant amount of money, as well as time and talent. For many, college costs represent the single largest and most important expenditure they will ever make. For some, these costs are a serious obstacle. The University assists students by offering various forms of financial aid. During the 1983-84 academic year, almost $7,000,000 was available from aid programs. The average student aid award was $2,400. In addition, the University helped 2,500 students borrow more than $4,500,000 in low interest loans from commercial lenders. Over 150 students found jobs with the assistance of the Job Locator Program and earned more than $230,000. Students may also choose to participate in the Reserve Officer Training (ROTC) program and receive $100 per month during their junior and senior year.
Eligibility for Aid

Financial need exists when the student and his/her family do not have enough money to pay college costs. Since the federal government provides most of the funds the University allocates to students, need is determined in accordance with a formula approved by the U.S. Department of Education.

It is important to remember that financial aid is intended to supplement a student's resources. A basic principle of financial aid programs is that the student and his/her family are expected to contribute, when able, from income and assets to meet college costs.

No student should fail to apply for admission because she or he cannot afford a college education. The Office of Student Financial Aid administers a strong and versatile program. When a student's financial resources are insufficient to meet educational expenses, grants, loans, or employment can usually be made available. If funds are not available from the University, the Office of Student Financial Aid helps students explore other potential sources of aid.

Application Procedures

Students are encouraged to apply as early as possible after January 1. Many find it convenient to apply at the same time a federal income tax return is completed. While no deadline exists for entering students, early application is encouraged. Continuing students should apply before April 15th.

All students must complete a College Scholarship Service Financial Aid Form (FAF). The FAF is available from most high school guidance offices or the Student Financial Aid Office. The FAF includes detailed instructions for completion. If these instructions are insufficient, please contact the Student Financial Aid Office for help.

Students under age 28 must have a parent sign the FAF. If the student is dependent, this attests to the accuracy of the parent's financial information. If the student is independent, the signature certifies this. Students and the parents of dependent students are required to submit copies of tax returns and other financial records to verify information reported on the FAF.

When completing the FAF all undergraduate students, who do not have a bachelor's degree, must apply for a Pell Grant. Students may also use the FAF to apply for state scholarships.

Any student who attended any vocational school or college, other than the University of Southern Maine, must also submit a Financial Aid History (FAH) form. This form, available from the Office of Student Financial Aid, is completed by the student and sent to the school(s) previously attended. The FAH must be completed even if the student did not receive aid from other school(s) attended.

How Financial Aid is Allocated

The University begins reviewing student aid applications in early spring. Once a student is accepted by the Admissions Office, a completed FAF is received, and the University is told how much federal aid it will have for students, a notice of eligibility is sent. If a student receives outside scholarship funds, the amount of aid from the University may have to be reduced.

The amount a student receives is determined by subtracting the student's resources from a budget computed by the Office of Student Financial Aid. This budget is based on typical living and educational costs for a student in a given situation. It may be adjusted if unusual non-discretionary expenses exist.

Even after a student is allocated aid, the amount may be adjusted if the student's financial situation changes. Students and parents should promptly report any of the following to the Student Financial Aid Office: a change in income; a change in marital status; a change in the number of dependents; a change in residence; a change in the number of credit hours attempted; and the receipt of financial aid from sources other than the University.

20
Students are offered aid in a package which may consist of grant and/or loan and/or work-study. Students who have a bachelor's degree usually receive only loan and work-study funds.

**Pell Grants**  This is a federally funded program to help needy students. Grants vary between $200 and $1,900 per academic year.

**Supplemental Educational Opportunity Grants**  This is a federally funded program to help needy students. Grants range from $200 to $2,000 per academic year.

**University and Miscellaneous Scholarships**  These are funded by the University and private donors. Awards range from $100 to $2,000 and are given on the basis of financial need.

**Work-Study Employment**  This is a program funded by the University and the federal government. Eligible students may earn between $400 and $3,000 per year. A student's financial need governs the amount that can be earned.

**National Direct Student Loans**  Funded by the federal government, the University, and former borrowers repaying loans, this program lends money to needy students. No repayment is required until after the student ceases his/her education. Once repayment begins, the student is charged 5% simple interest on the amount borrowed. While the monthly repayment amount varies with the amount borrowed, a minimum of $30 must be repaid each month. Loans vary between $200 and $1,500 annually.

**Nursing Student Loans**  Funded by the federal government, the University, and loans repaid by former borrowers, money is lent to needy nursing students. Repayment terms are similar to those of the National Direct Student Loan.

**Guaranteed Student Loans**  This is a program sponsored by the federal and state governments that allows students to secure low-cost loans. Contact your local bank, credit union, or savings and loan institution for more information.

**Guaranteed Parent Loans**  This is a program sponsored by the federal and state governments that allows parents and some students to secure relatively low-cost loans. Contact your local bank, credit union, or savings and loan institution for more information.

**Indian Scholarships/Tuition Waivers**  This is a program funded by the University that pays tuition, mandatory fees, and on-campus room and/or board. All one-quarter blood North American Indians who have lived in Maine for at least one year are eligible. The residency requirement may be waived for members of the Passamaquoddy, Penobscot, Malacite, or Micmac Tribes. Certification of tribal status is required.

For more information, contact the Office of Financial Aid, University of Southern Maine, Corthell Hall, College Avenue, Gorham, Maine 04038 or telephone 207-780-5250.

Offers of financial aid are conditional upon receipt of funds from all funding sources. The Office of Student Financial Aid reserves the right to revise offers of financial aid at any time during the year based on availability of funds and/or changes in regulation and/or procedures mandated by University, state, or federal authorities.
Student Life and Services

The University offers a wide range of academic and extracurricular services to supplement, enhance, and support students as they progress toward their educational goals. The breadth of these services is designed to accommodate the needs of a diverse student population.

Academic Advising

The University provides academic advising throughout a student’s educational career. With the assistance of faculty from the schools and colleges of the University, the Advising and Information Department (AID) conducts a New Student Advising Program for all newly admitted degree students. Upon declaring a major and being accepted by the appropriate department, students are assigned a faculty advisor in that academic department. Students are strongly encouraged to maintain regular contact with their academic advisors throughout their career at the University.

First Enrollment Advising and Registration

All newly admitted students are invited to participate in the New Student Advising Program conducted during the summer prior to the student’s first fall semester. This program is repeated in December for those students entering the University for the first time in January. The program allows the new student to register for his/her first semester of coursework with the benefit of a personal interview with an academic advisor. During that interview, such issues as the Core curriculum requirements and the requirements of the major may be fully discussed.

Continuing Academic Advising

Following initial advising and registration, students, during their first semester at the University, are assigned for permanent advising to the department of their declared academic major. Students are encouraged to maintain close contact with their department advisor once this assignment has been made.

For certain students, however, the assignment of a permanent department advisor may be delayed. For such students the following arrangements are made.

Students who have not declared a major are provided academic advising by the Advising and Information Department (AID). The AID academic counselor assists the student in the development of educational goals and the selection of an appropriate major. Students should be ready to declare a major before completing 60 credits of coursework at the University.

Students “admitted with conditions” are assigned to the AID staff for academic advising during the period they complete the conditions required for regular admission to the University. Upon completion of these requirements, the student is assigned an advisor in his/her major department.

Pre-nursing students receive academic advising during their freshmen and sophomore years from the AID staff. Upon acceptance by the School of Nursing Undergraduate Admissions Committee, the student is assigned an advisor in the School of Nursing.

Special (non-degree) students (those who are enrolled in courses at the University on a space-available basis and who have not applied for admission) are advised by the AID staff.

Students having questions regarding general academic policies and procedures, as well as about other aspects of University programs, are encouraged to contact the AID office in Payson Smith Hall on the Portland campus (780-4040) and in Corthell Hall on the Gorham campus (780-5340).

The Office of Student Testing and Assessment is responsible for evaluating entry-level skills of students and the development of measures to assess student needs and interests. The Office administers national exami-
nations, and coordinates the Prior Learning Assessment Programs through the Office of Prior Learning Assessment.

Students are encouraged to contact the Office of Student Testing and Assessment (780-4383) for general information regarding the various assessment programs available, and the Office of Prior Learning Assessment (780-4067/5376) for specific information about prior learning assessment programs.

University Library and Media Services (ULMS), administratively merged in 1982, maintain collections representing more than 500,000 items. The Portland campus library and the Portland Media Center are located in Luther Bonney Hall. The Gorham campus library and Gorham Media Center are located in Bailey Hall. Together, the four facilities provide staff, collections, equipment, services, and programs to the academic community of the University, to the citizens of the state of Maine, and to the international bibliographic community. This broad effort thus supports the educational, public service, and scholarly activities of the University community.

The University Library acquires, catalogs, and circulates a great variety of print and non-print material, provides interpretive and instructional reference services, offers computerized searching of more than 200 databases, offers a computerized, international, interlibrary loan network currently locating over 11 million titles, includes the University Archives, and provides patrons with microfilm and microfiche reading machines.

Media Services works directly with faculty in designing, developing, and evaluating classroom instruction, circulates and maintains video camera/recorders, and provides other materials supporting the academic mission of the institution. Media Services produces slides, graphics, video and audio programs, transparencies, and related classroom support material.

ULMS contracts with public libraries in Bath and Saco, to provide books, journals, reference assistance, and interlibrary loan services to off-campus students and faculty. Dyer-York Library in Saco, and Patten Free Library in Bath, serve the USM Saco and Bath Centers. Negotiations are underway to provide similar academic support services in Sanford. Off-campus students and faculty are also encouraged to use the ULMS facilities in Portland and Gorham.

The Counseling and Career Development Department, through a staff of professional psychologists and counselors, assists students with personal counseling services on both a walk-in, as well as an appointment basis. As a part of this service, the office provides appropriate psychological testing, referral services, and maintains an effective liaison with community medical and mental health agencies. (780-4050)

The Counseling and Career Development Department offers career counseling, vocational testing, and part-time and full-time job placement services for University students. The staff provide a complete information service, guidance information, computerized terminal services, appropriate career inventory and testing, in addition to referrals. The department also offers internship opportunities related to academic majors. (780-4050)

Services for students with a handicapping condition are provided through the Office of Counseling and Career Development. In addition to counseling and placement services, direct academic support (including, where necessary, readers and interpreters) is provided. A specially equipped bus provides round-trip transportation daily between the campuses for wheelchair-bound individuals. (780-4050)
Health Services

The University offers two health care facilities for students, one in Portland and one in Gorham. In Portland, a clinic operates from 8 a.m. to 4:30 p.m., Monday through Friday. (780-4211) On the Gorham campus full in-patient services are available seven days a week, twenty-four hours per day, during the academic year. Physician services are available at both locations, and students are offered a variety of health services as well as health insurance options. (780-5411 and 780-4211)

Student Services at Off-Campus Centers

Students attending one of the University of Southern Maine off-campus centers (Bath, Intown, Saco, Sanford) may take advantage of the range of support services available at these locations. Services include academic advising, financial aid assistance, veterans' counseling, registration assistance, admissions information. Also offered are a variety of social, general interest, and student government-related activities. All off-campus services are offered in cooperation with the appropriate on-campus department to ensure consistency and smooth transition.

International Students

International students are served for immigration documentation as well as academic and personal counseling by the Office of the Dean for Educational Services. (780-4035)

Exchange Study Opportunities

The University offers a variety of national and international exchange opportunities for its students. Students are able to spend a semester or a year at any one of over 40 universities in the United States. International opportunities exist in England, Ireland, Holland, and Sweden. For further information regarding the National Student Exchange Programs, contact the Registrar's Office, 780-5236. For information regarding international programs, contact the International Studies Office at 780-5313.

Veterans

Services to veterans are provided through the Department of Advising and Information and include, in addition to certification and liaison with the Veterans' Administration, counseling and academic advising. (780-4040)

Student Activities, Student Union, and Student Government

Many organizations and clubs exist within the University to serve a variety of student interests and needs. These organizations range from political, social, and educational to special purpose groups.

The Student Senate administers student programs and supervises organizations including the student newspaper, Free Press; the student radio station, WMPC; the literary journal, Portland Review of the Arts; and the yearbook, The Reflection. Through its Student Activities Board the Student Senate sponsors concerts, lectures, films, and other activities throughout the academic year.

The Student Union facilities on both campuses provide quiet areas for study and conversation, in addition to offices for student government and Student Activities organizations. For further information on Student Activities contact the Coordinator of Student Activities. (780-4090 or 780-5470)

Fraternities and Sororities

Ten social fraternities and sororities are active on the Gorham campus of the University. Four of the fraternities maintain off-campus houses and all organizations are involved in philanthropic and social activities. (780-5242)

Residence Halls

The University provides on-campus housing in Gorham for approximately 1,100 students in nine residential units, ranging in size from 15 to 180 students. Accommodations are either in single sex or coeducational dormitories, with a variety of visitation and quiet hour options as selected
Food Services

Dining facilities may be found at four separate locations on the two campuses. In Gorham, the main University dining facility is glass-enclosed, providing vistas toward the Sebago Lake region, and accommodates approximately 650 diners. Also on the Gorham campus, the University Pub offers short-order fare through late evening hours. In Portland, the University offers a cafeteria seating 250 and dining room facilities for an additional 80 people. The College Room operates as a short-order restaurant during late afternoon and evening hours, Monday through Thursday. A number of musical and theatrical events are held regularly throughout the year in each of the four food service locations. Students may use their meal program cards on either campus. For information contact the Office of Residence Life. (780-5240)

Intramural and Recreation Programs

Both group and individual sports competition and recreational activities are available. The Gorham and the Portland gymnasiums are the main facilities for free play, as well as basketball, flag football, badminton, racquetball, and other league competition sports. Programs in such areas as aerobic dance, Lifeline, and bodyshop and weightlifting are also available. For further information contact the Coordinator of Intramural and Recreation Programs, Gorham Gymnasium, 780-5431.

Off-Campus Housing

The University maintains lists of available rooms and apartments off-campus for the benefit of students. The lists are available in the Department of Residence Life on the Gorham campus or the Office of Advising and Information on the Portland campus. (780-5240 and 780-4040)

Child Care Services

The University Day Care Center/Preschool Program serves 30 children, ages 2½ to 6. There are two classrooms that are divided by age and staffed by four experienced and qualified teachers. Priority is given to children of University students, employees, and faculty. The Center provides full day care in a warm, supportive, and developmentally oriented program. A wide range of materials is available. Two snacks, lunch, and a rest time are provided. The Drop-In Program is designed to accommodate children (ages 2½ to 6) of University students needing only a few hours of care during classes. The curriculum is oriented to the ages and number of children. Reservations are encouraged. Application method: contact the Day Care Center office at 773-0881. You will be advised about eligibility and available space.

Intercollegiate Athletics

The University offers the following sports for men: cross country, soccer, basketball, and baseball. Sports offered for women include: field hockey, volleyball, basketball, and softball. Tennis and golf are both open to both men and women. The University is a member of the National Collegiate Athletic Association, the Western Maine Athletic Conference, the National Association of Intercollegiate Athletics, and the Maine Association of Intercollegiate Athletics for Women. As members of these organizations, student athletes have an opportunity to qualify for and participate in state, regional, and national tournaments. Contact 780-5430.
To be eligible for a baccalaureate degree from the University, a student must meet the following:

I. minimum proficiency requirements
II. Core curriculum requirements
III. school or college major requirements

The Core curriculum requirements apply to all students who entered the University in September 1982 and thereafter. (Transfer students should refer to the section, “Transfer Students and the Core Curriculum,” p. 37.)

Minimum Proficiency Requirements

Every baccalaureate degree student who is admitted to the University must produce evidence (no credit granted) of both a minimum writing proficiency and a minimum mathematics proficiency. All freshmen students, readmitted students, and transfer students with less than 30 credits, admitted for the 1983-84 academic year and thereafter, must complete both the Mathematics Placement Examination and the Writing Placement Examination before registering in a mathematics or English course. (Details of these examinations may be obtained from the Office of Student Testing and Assessment). Ways of satisfying the Minimum Proficiency Requirements are summarized as follows:

A. Evidence of Minimum Writing Proficiency
   Do One
   1. Score 43 or above on the Test of Standard Written English (TSWE)
   2. Pass the Writing Placement Examination
   3. Successfully complete ENG 009 (Developmental English)(no degree credit)

B. Evidence of Minimum Mathematics Proficiency
   Do One
   1. Score 450 or above on the quantitative subtest of the Scholastic Aptitude Test (SAT)
   2. Score 500 or above on the General Mathematics Test of the College Level Examination Program (CLEP). (This will also satisfy the Core Quantitative Decision Making requirement.)
   3. Pass the Mathematics Placement Examination
   4. Successfully complete MAT 011 (Intermediate Algebra). (Credit for this course may apply only toward associate degrees.)
   5. Successfully complete a 100 level mathematics course (MAT 100—MAT 131 inclusive). Enrollment must be approved by an AID counselor or the chair of the Department of Mathematics and Computer Science. (A passing grade in the course will satisfy both the Mathematics Proficiency requirement and the Core Quantitative Decision Making Requirement.)

For information regarding the Core curriculum, including a list of courses approved to satisfy the Core, please refer to the following chapter.

Course Numbering

001-009 No Degree Credit
010-099 Associate Degree Program
100-199 Introductory Level
200-399 Intermediate Level
400-499 Senior Level, others by permission
500-599 Undergraduate and Graduate Students
600-699 Graduate and Professional Students Only

Note:

1. All courses carrying number 010-099 carry credit and quality points toward an associate degree.
2. All courses with number 100 or greater carry credit and quality points toward both associate degrees (A.A. and A.S.) and baccalaureate degrees (B.S., B.A., B.F.A.).
3. Matriculated baccalaureate students should not register for courses with numbers less than 100.

4. Associate degree students who wish to transfer to a baccalaureate program should see their prospective dean for a transcript evaluation and complete a Change of Major form. Some programs require a minimum grade point average (GPA) for transfer into a four-year program. Generally up to 60 credits (but not quality points) of courses numbered 010-099 with grades C or better may be included towards a baccalaureate degree at the discretion of the dean.

**Registration**

The registration process is conducted by the Registrar, Advising and Information Department (AID), and Business Office. It includes selection of courses, completion of proper forms, and payment of University charges. Newly admitted students are notified by the Admissions Office of their orientation, advising, and registration schedule. The Advising and Information Department coordinates the new student academic advising and initiates the registration procedure by approving course schedules prior to processing by the Registrar and Business Office.

Continuing degree students may preregister in priority order, based on the number of credits earned through the previous semester. Preregistration is conducted near the end of each semester for the following semester. Eligible students who fail to preregister must then wait until the open registration period which immediately precedes each semester. Non-degree students may register only during the open registration period which immediately precedes each semester. Non-degree students must have approval from the Advising and Information Department prior to registration. No student may register for more than 18 credits in one semester without the permission of the advisor and dean. No registration is complete unless all related financial obligations to the University are satisfied. No registration will be accepted after the second week of classes.

**Grading System**

Grades at the University are given in terms of letters, with the option of a plus or minus designation, representing levels of achievement. The basis for determining a grade is the relative extent to which the student has achieved the objectives of the course. The student’s work in each course is graded as follows:

- A High honors
- B Honors
- C Satisfactory, successful, and respectable meeting of the course objectives
- D Low-level work, below the average required for graduation for an undergraduate, and a failing grade for a graduate student. In addition, individual departments may limit the number of D grades accepted, as stated in the departmental sections of this catalog. The paragraphs on Minimum Grade and Academic Suspension and Repeated Courses should also be noted.
- F Failure to meet the course objectives
- P Pass; given only for certain courses open to the pass-fail option
- I Incomplete; a temporary grade given when the student, because of extraordinary circumstances, has failed to complete the course requirements. Incomplete grades must be resolved by the end of each semester; the Registrar shall notify faculty members involved, and their department chair, of students who have carried unresolved incompletes on their transcript for one semester. If the incomplete is not resolved by the instructor, an I grade will be automatically counted as an F in the grade point average and so indicated on the student’s permanent record. Under special circumstances,
the instructor may request that the dean extend the time limit for a specific period.

**INC**  Permanent Incomplete. When a temporary incomplete (I) grade is not resolved to a normal letter grade, a permanent incomplete may be assigned in extraordinary circumstances as determined by the instructor and the dean. In unusual circumstances wherein the faculty member is no longer available, the dean may exercise this function.

**L**  Stopped attending. The grade of L may be assigned to students who stopped attending a course without officially dropping the course. The grade of L will be computed as an F for purposes of the student's grade point average.

**MC**  Missing Grade. Occasionally, faculty assign students invalid grades for a course, or fail to submit a grade for a particular student in a course. In these cases, the Registrar's Office will note this act by designating a missing grade, or MC instead of a grade for the course. Missing Grades must be resolved by the end of each semester. The Registrar shall notify faculty members involved, and their department chair of students who have carried unresolved MCs on their transcript for one semester. If the missing grade is not resolved by the instructor, an MC grade will be automatically counted as an F in the grade point average and so indicated on the student's permanent record. Under special circumstances, the instructor may request that the dean extend the time limit for a specific period.

**W**  Withdrawal after the second week through the sixth week of a semester. If a student has not officially withdrawn by the end of the sixth week of the course, one of the above regular grades, normally F, will be assigned. The W notation may be obtained after the sixth week under unusual circumstances if so determined by the instructor and the dean. A threat of failure is not considered to be an unusual circumstance.

**Y**  Satisfactory progress after one semester of a two-semester course; grade and credits to be given upon completion of second semester.

**AU**  Student attended courses on a noncredit basis.

---

**Grade Point Averages**

The academic standing of each student is computed by the Registrar at the end of every semester. The following table represents the rating scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A−</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B−</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C−</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

To compute the grade point average for a semester, first multiply the grade points earned in each course by the number of credit hours assigned to that course. The resulting product is the number of quality points for that course. Then divide the total number of quality points earned during the semester by the total number of credits carried in that semester. The result is carried out to four decimal places to produce the grade point average for that semester.

To compute the cumulative grade point average, divide the total quality points earned by the total credits attempted in all semesters.
Dean's List

At the end of each semester, full-time, undergraduate degree students (12 semester hours or more) with grade point averages of 3.2 or above will be placed on the Dean's List. Those students on the list, whose names appear in the Public Directory of the University, will have their names released to the news media.

Minimum Grade and Academic Suspension

Minimum cumulative grade point averages for all undergraduate programs at the University are as follows:

<table>
<thead>
<tr>
<th>Associate Degree Programs</th>
<th>For Good Standing</th>
<th>For Probationary Standing</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-15 credit hours</td>
<td>1.60</td>
<td>1.35</td>
</tr>
<tr>
<td>16-30 credit hours</td>
<td>1.80</td>
<td>1.60</td>
</tr>
<tr>
<td>31-45 credit hours</td>
<td>2.00</td>
<td>1.80</td>
</tr>
<tr>
<td>Baccalaureate Degree Programs</td>
<td></td>
<td></td>
</tr>
<tr>
<td>0-30 credit hours</td>
<td>1.70</td>
<td>1.50</td>
</tr>
<tr>
<td>31-60 credit hours</td>
<td>1.80</td>
<td>1.60</td>
</tr>
<tr>
<td>61-90 credit hours</td>
<td>1.90</td>
<td>1.70</td>
</tr>
<tr>
<td>91 or more credit hours</td>
<td>2.00</td>
<td>1.80</td>
</tr>
</tbody>
</table>

Students may be suspended from the University by the dean of the appropriate academic unit. Students who have two consecutive semesters of probationary standing may be suspended at the discretion of the dean. Ordinarily, a student may be suspended by the dean in consultation with the department chair or the student's advisor if the student's semester average falls below 1.0. While under suspension, students may not take coursework to be applied for credit at the University either at the University of Southern Maine or at other institutions without permission of the dean of the suspending academic unit. Suspensions are imposed for a minimum of one academic semester. Other standards vary from college to college and are outlined in the letter of suspension directed to the student from the appropriate dean. For details concerning disciplinary suspension and dismissal, consult the Disciplinary Code, published in the Student Handbook.

Students with majors or minors in English, history, political science, or psychology in the baccalaureate program of the College of Arts and Sciences, or the secondary education mathematics program of the College of Education must achieve at least six credits with grades of B or better in their major or minor requirements. No grades of D will count toward fulfillment of the major or minor requirements in these programs.

Students in the School of Nursing, please refer to the sections entitled Prerequisites to the Nursing Major and Academic Policies—Upper Division Nursing Major in the School of Nursing portion of this catalog.

Industrial arts education majors must maintain a 2.5 cumulative index prior to and throughout the professional sequence, i.e., IEA 380, IEA 381, and EDU 324. No more than one D grade will be accepted in the technical and professional courses required of industrial arts majors.

Unsatisfactory Progress

A student who is a degree candidate is expected to complete and pass the courses for which he or she is registered during a given semester. A student who fails or withdraws from more than two courses during a semester may be placed on academic probation or suspended by the dean of the college, school, or division.

Academic Dismissal

Students placed on academic suspension for a second time are dismissed from the University. In rare cases, students may be readmitted if they can provide evidence of significant academic improvement to the dean of their school or college. Such evidence would normally include high quality academic coursework at another institution. For details of disciplinary dismissal, consult the Disciplinary Code, published in the Student Handbook.
Class Membership

As a minimum of 120 credit hours for graduation is required in most four-year programs, at least 30 credits should be earned each year. To progress satisfactorily through the University, a full-time student is expected to carry at least 15 credit hours each semester. Permission must be obtained from the advisor and the appropriate dean to carry more than 18 credit hours.

For standing as a sophomore, a student shall have completed at least 19 percent of the hours required for graduation, for junior standing 44 percent, and for senior standing 69 percent. Exceptions are the industrial arts education and industrial arts technology programs with respective percentages of 20 percent and 53 percent.

The required number of credit hours by classes, schools, and colleges are:

<table>
<thead>
<tr>
<th>School or College</th>
<th>Sophomore</th>
<th>Junior</th>
<th>Senior</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Schedule Changes

Once a semester commences, a period of one week is permitted to add courses and select or reverse the pass-fail option. A period of two weeks is permitted to drop courses with no grade notation. This procedure enables the student to make the necessary changes in the planned curriculum. A student dropping a course after the second week through the sixth week of classes will receive the grade notation of W. If a student has not officially withdrawn by the end of the sixth week of the course, he or she will be assigned a regular grade, normally F. The W notation may be assigned after the sixth week under unusual circumstances if so determined by the instructor and the dean. All students who register for a course and neither complete the course objectives nor officially withdraw in any one of the procedures described above will be graded F in the course and must assume all financial obligations associated with it.

Students who find that their names are not on the instructor’s official list should check immediately with the Registrar’s Office to make necessary corrections in the registration records.

Pass-Fail Option

The purpose of the pass-fail grade option is to encourage a student to broaden his or her educational experience with a reduced risk of lowering the overall grade point average. The student’s choice is kept confidential and the instructor grades the student in the same manner as the rest of the class. The Registrar will retain the instructor’s submitted grade on file. If the grade is A, B, C, or D it will be converted to a P. Grades of F or I will be handled in the normal way.

Courses taken to satisfy Core curriculum, major, or minor requirements may not be taken pass-fail. Undergraduate degree candidates may register for a maximum of six hours of pass-fail credits in any one semester, up to a maximum of 18 hours of the total credit hours required for graduation.

Students may exercise the pass-fail option only during the registration period or during the add period each semester. The pass-fail option, once contracted, may be reversed only during the add period.
Repeated Courses

When a student repeats a course and earns a grade of A, B, C, D, F, or P, the initial grade remains on the transcript but only the later grade is used in computing the grade point average or for credit. No course in which one of the above grades has been earned may be repeated more than once without written permission of the dean or director of the appropriate school, college, or division. This policy does not apply to courses specifically designed to be repeated.

Auditing Courses

Students who register to audit a course receive no credit for the course but will have an audit grade recorded on their transcripts. Audit courses must be declared at registration.

Independent Study

Junior and senior students may elect independent study in their major for one to six credits. Normally, no more than three credits may be earned in a semester. The student submits an independent study application which includes a detailed description of the proposed program of study. Permission of the instructor and approval by the department chair are required. The approved independent study form is filed with the Registrar during the registration period.

Variable Credit Courses

A student should complete the necessary form during registration at the Registrar's Office. Variable credits may be obtained only for those courses so designated.

Grade Report

Grade reports are mailed to all students at their home address of record approximately two weeks after the end of each semester. Final grades cannot be secured in advance from the Registrar.

Permanent Academic Record

The permanent academic record is maintained by the Office of the Registrar for all students of the University. While the grade report is the unofficial notification to the student, academic dean, and advisor of the student's academic achievements for a given semester, the only true and valid documentation of academic work and student status is an official transcript of the academic record, stamped with the Registrar's signature and embossed with the seal of the University of Maine. The transcript is available only with the signature of the student and will be released to that student or a designee only if there are no outstanding charges against his or her account with the Business Office. There is a charge of two dollars for a single transcript and one dollar for each additional copy ordered at the same time. Other types of transcripts are: Unofficial—Issued Directly to Student, available at no charge to an active student, but limited to one per semester and only after grades are posted for that semester; Placement Transcript provided for the student's placement folder. This is unofficial, but may be reproduced by the Counseling and Career Development Office for prospective employers at no additional cost.

Academic Record Changes

Considerable care is taken to ensure that course registration and grades entered on a student's permanent record are accurate. Any student who suspects an error has been made should take the matter up immediately with the Registrar's Office. Records are assumed to be correct if a student does not report to the Registrar's Office within one year of the completion of the course. At that time, the record becomes permanent and cannot be changed.

Coursework at Other Institutions

Matriculated students at the University are expected to secure written approval from the appropriate dean prior to taking coursework at another institution. Such credits outside the University of Maine system count towards the total degree hours required but are not figured in the cumulative grade point averages.
A candidate for the baccalaureate degree must (a) receive passing grades in courses required by the University, the school or college, and the major department; (b) accumulate the number of credit hours required by the school or college in which the student is registered; (c) achieve an accumulative average of not less than 2.00; (d) meet the requirements of the major department; (e) complete an Application for Degree with the Office of the Registrar at the beginning of the semester of graduation.

In all undergraduate divisions of the University, a minimum of 30 credit hours including at least 9 hours in the major field, must be completed while registered in the school or college from which the degree is sought. A student may earn 6 of these 30 credit hours at another campus of the University of Maine. Unless special permission is granted by the dean of the school or college concerned to pursue work elsewhere, the work of the senior or final year must be completed at this University.

Graduating seniors are cited for graduation honors on the diploma and on the transcript. Students who have achieved a cumulative index of 3.50 or higher graduate summa cum laude; those with a cumulative index of 3.25 to 3.49 inclusive graduate magna cum laude; and those with a cumulative index of 3.00 to 3.24 inclusive graduate cum laude. The cumulative index for the purpose of graduation with distinction is based on the student’s total college record.

Transfer students (including those transferring within this University from a two-year to a four-year program) must maintain a cumulative average of 3.0 or above for coursework in the baccalaureate program, and must earn at least 30 credits, normally the final 30 credits, at the University.

A second bachelor’s degree may not be granted a student until he or she has completed an additional year of college work, as represented by a minimum of 30 semester hours above the requirements for the first degree. Such work must be completed in accordance with all other University regulations.

It is the responsibility of the Office of the Dean of the school or college in which the second degree is sought to provide the approval for undertaking the second degree and certifying the completion of all requirements prior to receipt of the second degree.

Students who have already earned one baccalaureate degree and are undertaking work for a second baccalaureate degree are not required to satisfy any of the Core curriculum requirements.

To withdraw from the University, a student must secure an official withdrawal slip from the Registrar’s Office and complete an exit interview with a member of the Educational Services staff.

If a student withdraws from the University during the first two weeks of the semester, there will be no courses or grades recorded. Students withdrawing after the second week through the sixth week will receive a W grade for each course in which the student was enrolled. Students withdrawing after the sixth week will receive regular grade designations as determined by the instructors. Under unusual circumstances, grades of W can be assigned after the sixth week if approved by both the instructor and the dean.

Students in good standing who have withdrawn from the University and who wish to return at a later date should follow the instructions given under Matriculation Status (Leave of Absence).

Information concerning financial obligations to the University relative to the withdrawal policy will be found on page 17.
Matriculation Status (Leave of Absence)

Matriculated degree candidates who withdraw from all coursework in a given semester maintain their matriculated status for one year from the fifth school day of the next regular academic term. Matriculated degree candidates who do not register for a given semester maintain their matriculated status for one year from the fifth school day of the semester for which they did not register. If a student resumes attendance during the time period specified above, no readmission process is required. The student should contact the Registrar's Office for registration instructions.

If a student wishes to resume studies as a degree candidate after the time period specified above, an application for readmission must be filed with the Admissions Office.

Suspended students must follow the instructions provided in the section below.

Re-enrollment after Academic Suspension

Matriculated degree candidates may apply for re-enrollment at the University in accordance with the stipulations outlined in their letter of suspension. If re-enrollment is requested within one year from the fifth school day of the next regular academic term following the suspension, the student need only receive the approval of the dean. Students wishing to re-enroll should contact the dean's office from which the suspension was issued.

If a student wishes to resume studies as a degree candidate after the time period specified above, an application for readmission must be filed with the Admissions Office.

Change of Major within a School or College

Permission to change from one major to another is granted by the dean and head of the department in which the student expects to major. A form for the change may be obtained from the Registrar’s Office. A change-of-major form must be filed with the Registrar’s Office. Requests from undeclared candidates, pre-nursing, and admitted with conditions candidates must be processed by the Advising and Information Department.

Change of College or School

Information on the procedure for change of college or school may be obtained from the Registrar’s Office or Advising and Information Department.

Double Majors

When a student completes the basic requirement for graduation from schools or colleges and the course requirements for two majors, the student should request the dean to notify the Registrar, who will record the double major on the student’s transcript.

Attendance Policy

The attendance policy is left to the discretion of the faculty member. Each semester, it is the responsibility of the faculty member to inform the students in each class of the attendance requirements for that class.

Examination Policy

The examination policy states that it is the responsibility of the faculty member to inform the students in each class of the examination requirements for that class. Usually, two to four preliminary examinations are administered in each course and count heavily toward the final grade. Giving a final exam is not mandatory; however, in classes where they are given, the examinations must be scheduled within the specific final exam period. A time for make-up exams is also scheduled. Take-home exams are also due within the final exam period. By action of the Faculty Senate, no test or exam may be scheduled during the last week of classes.

Absence from a Final Examination

Students who miss a final examination and are failing the course at the time will usually be given the grade of F instead of being marked I for the semester grade. A student who misses a final examination should immediately contact the instructor to apply for a special examination.
Information regarding an independent study term is provided in the section of the catalog dealing with the College of Arts and Sciences.

The University complies totally with the Family Rights and Privacy Act of 1974 (the Buckley Amendment). For the complete University Confidentiality Policy, consult the Office of the Registrar on either campus.

Freshmen and new transfer students (including transfers from other campuses of the University of Maine system) must satisfy the graduation requirements set out in the catalog in effect for the first semester of their attendance as a matriculated student. Students who terminate their matriculation at the University forfeit the right to pursue a degree according to the provisions of the original catalog and are bound instead by the catalog in effect for the first semester of attendance as a re-admitted student.

At the student's choice, a later catalog may be selected for graduation requirements; but a student may not select an earlier catalog.

Students must complete all degree requirements within a ten-year period unless approval is given otherwise by the dean of the school/college/division. In some cases, academic units have time limits that are shorter than ten years. If so, that time limit will be noted in the appropriate school/college/division section of this catalog.
The Core Curriculum

The term "core" refers to the innermost part or heart of an object. The core of a fruit, for example, is the vegetative center which contains and protects the seeds of future growth. Applied to the process of education, a core curriculum refers to that nucleus of educational experiences which makes possible and sustains broad intellectual growth. The University believes that a mastery of certain broad competencies, an experience of different academic disciplines, and an appreciation of the interconnectedness of knowledge are the core or heart of future intellectual development.

The Core curriculum comprises three parts:

A. The basic competence component stresses the development of skills of communication, quantitative decision making, and analysis/philosophy.

B. The methods of inquiry/ways of knowing component adds breadth and content to the Core curriculum. Courses in this area help the student understand the methods of different academic disciplines, the ways those disciplines understand human experience, and the relationships among them. The student will also develop his or her ability to think and analyze independently, to identify the major sources of an academic discipline, and to recognize the ethical and philosophical issues inherent in the discipline.

In particular, this part of the Core curriculum includes courses in fine arts, humanities, social sciences, and natural sciences. Courses in the fine arts seek to vitalize the human spirit and to prepare an individual to participate intelligently in an aesthetic experience through performance-centered and history-centered classes. The humanities seek to understand, interpret, and criticize the acts and creative works of civilization. This is accomplished through a study of literature which reflects the richness of the written word as an expression of human ideals, aspirations, and reflections, and through a study of other times/other cultures which provides a link with the past and a perspective on our own culture by a comparison with other cultures. Courses in the social sciences attempt to describe, analyze, and evaluate fundamental social institutions, behavior patterns, and issues of societies and their individual members. Through lecture and laboratory, courses in the natural sciences promote an understanding of the natural sciences, their methods and accomplishments, and their role in a technological society.

C. The interdisciplinary component seeks to overcome a fragmented view of experience which may result from a division of knowledge into academic disciplines and departments. The interdisciplinary course helps the student integrate knowledge and skills across these traditional lines by focusing on an important issue, major event, or specific region and demonstrating how new knowledge and insight can be gained thereby.

Core Curriculum Requirements

A. Basic Competence

1. English Composition Do one
   a. Successfully complete ENG 100 or ENG 101 (3 credits)
   b. Score 59 or above on the TSWE (no credit)
   c. Score 500 or above on the CLEP General or English Composition Test (3 credits)
   d. Satisfy composition standards in ENG 100 or ENG 101 by the second week (no credit)

2. Quantitative Decision Making Do one
   a. Successfully complete MAT 100 or above (3 credits)
Core Curriculum Regulations

b. Successfully complete computer skills course
   BUS 290 or COS 100 or above (3 credits)
c. Successfully complete statistics courses MAT 120, PSY 201, or SOC 307 (3 credits)
d. Pass a locally administered examination (no credit)

3. Skills of Analysis/Philosophy  Do one
   a. Successfully complete a PHI 100 level course (3 credits)
   b. Successfully complete a skills of analysis course
      (a list of courses satisfying this requirement will be published prior to registration.) (3 credits)

B. Methods of Inquiry/Ways of Knowing
   1. Fine Arts  Do one each
      a. Performance-centered arts (3 credits)
      b. History-centered arts (3 credits)
      (The courses in the fine arts must be selected from different departments.)

   2. Humanities  Do one each
      a. Literature (3 credits)
      b. Other Times/Other Cultures (3 credits)
      (The two courses in the humanities must have different course prefixes.)

   3. Social Science  Do two
      (The two courses in social science must be selected from different departments.) (6 credits)

   4. Natural Science  Do one
      (The natural science course must include a laboratory.) (4 credits)

C. Interdisciplinary
   The interdisciplinary component includes a COR 100 level interdisciplinary course and a senior seminar. (The senior seminar is not offered at present, and students are not currently bound by this part of the interdisciplinary requirement.)

   The COR 100 level interdisciplinary course should be taken before the completion of 60 credits. A list of these courses may be found on page 40. Each COR interdisciplinary course carries as a prerequisite the successful completion of the Minimum Writing Proficiency. In addition, it is strongly recommended that the student satisfy the Basic Competence English Composition requirement prior to or concurrently with the COR interdisciplinary course.

   1. The student has primary responsibility for ensuring that she/he completes all the requirements of the minimum proficiency requirements and the Core curriculum requirements.

   2. Courses completed in a student's major department may not be used to satisfy a Core curriculum requirement in the area of Methods of Inquiry/Ways of Knowing.

   3. The student should satisfy the basic competence requirements before the completion of 60 credits.

   4. The student should satisfy the COR 100 level interdisciplinary course before the completion of 60 credits.

   5. The COR 100 level interdisciplinary course may be used to satisfy either the Basic Competence Skills of Analysis/Philosophy requirement or one of the Methods of Inquiry/Ways of Knowing requirements.

   6. Courses taken to satisfy the Core curriculum requirements may not be taken on a pass-fail basis.
Transfer Students and the Core Curriculum

All transfer students into a baccalaureate degree program are expected to meet the Core curriculum requirements as outlined above. The following guidelines should be noted:

A. Basic Competence

1. The English Composition requirement can normally be satisfied by transfer credit for an equivalent English composition course. If no such course is available for transfer credit, the student should refer to the other options noted under the Core curriculum requirements.

2. The Quantitative Decision Making requirement can normally be satisfied by transfer credit for an equivalent mathematics, computer science, or statistics course. If no such course is available for transfer credit, the students should refer to the other options noted under the Core curriculum requirements.

3. The Skills of Analysis/Philosophy requirement can normally be satisfied by transfer credit for a course which deals with logic, reasoning, or analytical thinking. If no such course is available for transfer credit, the student should refer to the other options noted under the Core curriculum requirements.

B. Methods of Inquiry/Ways of Knowing

These requirements can normally be satisfied by transfer credit for equivalent courses in each of the four areas. Equivalent courses will be determined at the time of admission and transfer evaluation. Any CLEP examination which satisfies a course approved for the Core curriculum will satisfy the Core curriculum requirement in that area. When a specific requirement cannot be satisfied by transfer credit, the student is expected to take the appropriate course(s) from the list below.

C. Interdisciplinary

All transfer students granted less than 60 credits at the time of admission to the University are required to take the COR 100 level interdisciplinary course. Students granted 60 or more credits are exempt from this Core curriculum requirement.

Transfer students should complete the Basic Competence Requirement as early as possible after admission to the University.

Courses Approved to Satisfy Core Curriculum Requirements

A. Basic Competence

1. English Composition ENG 100 or ENG 101

2. Quantitative Decision Making MAT 100 or above
   COS 100 or above, BUS 290
   MAT 120, PSY 201, SOC 307

3. Skills of Analysis/Philosophy PHI 100 level course
   HTY 377 Chinese Thought
   ENG 110 Straight and Crooked Thinking

B. Methods of Inquiry/Ways of Knowing

1. Fine Arts
   a. Performance-centered arts:
      ART 141 Fundamental Design I
      ART 151 Fundamental Drawing I
      ENG 201 Creative Writing
      ENG 202 Fiction Writing
      ENG 203 Poetry Writing
      ENG 302 Fiction Workshop
      ENG 303 Poetry Workshop
MUS 110 Fundamentals of Music
MUS 130 Music Theory I
MUS 150 Applied Music Freshmen I
MUS 160 Applied Music Freshmen I
MUS 400 Chamber Orchestra
MUS 402 University Concert Band
MUS 405 The Chamber Singers
MUS 408 Wind Ensemble
THE 120 Acting I Fundamentals of Acting: Movement and Improvisation
THE 121 Acting II Fundamentals of Acting: Scene Work
THE 122 Contemporary Dance I
THE 222 Contemporary Dance II
THE 135/1 Stagecraft I & Lab
THE 290 Oral Interpretation

b. History-centered arts
ART 101 Approaches to the Visual Arts
ART 111 History of Art I
ART 112 History of Art II
MUS 100 Music Appreciation and History
MUS 102 Music of the Portland Symphony
MUS 103 Introduction to Jazz
MUS 120 History of Music I
MUS 121 History of Music II
MUS 202 Music in America
MUS 203 Music in the 20th Century
MUS 205 Chamber Music Literature
MUS 220 History of Music III
MUS 221 History of Music IV
THE 101 Introduction to Drama
COR 103 Revolution in the Arts 1850-1918

2. Humanities
a. Literature
CLS 283 The Epic Hero in Ancient Literature
CLS 284 The Tragic Hero in Ancient Literature
ENG 120 Introduction to Literature
ENG 160 Poetry
ENG 161 Fiction
ENG 162 Drama
ENG 220 Ancient Masterpieces
ENG 222 The Bible
ENG 223 The Epic Hero in Ancient Literature
ENG 250 Chaucer and the Medieval World
ENG 255 The English Renaissance
ENG 260 Shakespeare
ENG 261 Shakespeare
ENG 265 The Neoclassical Age
ENG 270 Major Romantic Writers
ENG 275 Eminent Victorian Writers
ENG 280 The American Renaissance
ENG 290 The Modern Age: British
ENG 291 The Modern Age: American
ENG 295 Contemporary Women Writers
ENG 327 Modern Short Story: Themes and Methods
ENG 328 Modern Novel: Themes and Methods
ENG 394 Experimentation in Modern Poetry
FRE 251 Introduction to French Literature I
FRE 281 Masterpieces of French Literature (in English translation)
FRE 283 Contemporary French Thinkers (in English translation)

**Interdisciplinary COR Course Descriptions**

**COR 101 Three Crises in Western Civilization**
An interdisciplinary investigation of three turning points in Western culture: Greece about 400 B.C.; Europe about 1600 A.D.; and Europe about 1900 A.D. The course is team-taught and consists of lectures, panel presentations, discussion sections, and films. Cr 3.

**COR 102 Human Ecology**
An interdisciplinary study of the function and evolution of ecosystems, models for decision making, and human-environmental interactions. The course is team-taught and consists of lectures, discussions, workshops, and films. The course is an examination of the way in which human beings interact with the world around them. Three aspects of ecology are examined in detail: energy, population, and the impact that populations have on the environment. Throughout the course the emphasis is upon people; therefore, the dynamics of human populations, people's use of energy, and the impact that human beings have on the systems of which they are a part are the dominant themes. The environment is viewed as a system which people act upon and which acts upon people. Cr 3.

**COR 103 Revolution in the Arts (1850-1918)**
A study of the changes in art, music, and theatre from 1850-1918 in light of cultural and historic events. The team-taught course uses lectures, slides, live and recorded music, and theatrical dramatizations. No prerequisites. Cr 3.

**COR 104 Women and Men: Perspectives on Gender**
This course is designed as an interdisciplinary investigation of the various perspectives on the complexity of gender issues. Special at-
attention will be focused on theoretical explanations for sex similarities and differences in contemporary and cross cultural society. The course will be team-taught and will consist of lectures, films, small group discussions, and experiential activities. Cr 3.

COR 105 Work in America
An interdisciplinary course designed to provide students with historical, cultural, social, and individual perspectives on work in America. Each student will also examine their own values, motivations, and goals as they relate to their working careers and to their personal and professional development. The course is team-taught. It will consist of lectures, films, discussion sections, inventories, experiential activities, the writing of journals, and the completion of annotated bibliographies and analytic papers, as appropriate. Cr 3.

COR 106 War and Peace in the 20th Century
This course analyzes basic causes of war—psychological, political, social, economic—and problems of maintaining peace in the 20th century. After a look at important theorists of war, it focuses on World War I, World War II, and the Vietnam war as case studies and then examines current nuclear and peace issues within the framework of the Cold War. It aims at helping students living in the nuclear age make informed decisions about the life and death issues confronting them as citizens. Cr 3.

COR 107 Man, Society, and Technology
An interdisciplinary examination of the interaction of man, society, and technology. The relationships of technology to social, philosophical, and physiological issues will be studied from the perspective of single and combined disciplines. Interpretation, analysis, and evaluation of technological alternatives in cultural and environmental contexts will receive particular attention. The course will be team-taught and consist of lectures, readings, small group discussions, films, guest speakers, and research papers. Cr 3.

COR 108 Poverty in America
An interdisciplinary examination of the issues associated with poverty and oppression in America. The course seeks to de-mystify common attitudes about the nature and causes of poverty and to examine the major social policy implications for improving the situation of the poor. As a consequence, students should be able to make informed decisions about poverty-related issues that ultimately influence political action. Cr 3.
Women’s Studies Program

Coordinator: Joanne H. Clarey, 124 Luther Bonney, Portland

The Women’s Studies Program is an interdisciplinary academic program focusing on the study of women, their experiences, and accomplishments. It is dedicated to the investigation of knowledge, theories, and research about women’s roles and function in society and the perspectives which can be brought to these by new systems of thought.

Until recently, research, theory, and course content have failed to explore with depth or objectivity the conditions, contributions, and quality of women’s lives. New scholarship on and by women documents the need to revise existing theory, examine issues surrounding gender, and study women’s experiences and accomplishments.

The Women’s Studies Program offers an interdisciplinary concentration leading to a bachelor of arts degree through the Self-Designed Major Program in the College of Arts and Sciences.*

The curriculum in women’s studies offers an exciting, rigorous series of courses that provide students a body of scholarship that focuses on women and the examination of society and culture from women’s perspectives, investigates alternative methods of intellectual inquiry, and explores the formulation of future inclusive paradigms for a fuller understanding of humanity. The women’s studies curriculum is designed to examine critically the issues surrounding gender, the origins of gender differentiation, the gendering of knowledge, and the attitudes and expectations related to gender in various societies and historical periods.

Since the philosophy and goals of women’s studies transcend any one discipline, the core of the curriculum is interdisciplinary. Elective courses in women’s studies focusing on women, gender issues, sex roles, or feminist issues are available from various departments and colleges throughout the University. These elective courses enhance the interdisciplinary dimension of the self-designed major in women’s studies and serve to broaden perspective on and application of women’s studies theory and research.

Graduates with a bachelor of arts degree with an interdisciplinary concentration in women’s studies are prepared for graduate studies in a variety of disciplines. They are also prepared for careers in social service, affirmative action and equal employment programs in government, education or industry, personnel or career advising, women’s centers, agencies, and programs, human service agencies dealing with families and related issues, public service and communication areas.

*See listing for Self-Designed Major requirements on page 51.

Self-Designed Major in Women’s Studies

The minimum number of credits (exclusive of the University’s Core curriculum) required for the self-designed major: 39.

The women’s studies self-designed major consists of a minimum of 21 hours of required courses and 18 hours of women’s studies elective or related courses.

Major Credit and Grade Policy
There are prerequisites for many of the women's studies self-designed major and elective courses. See departmental course listings for specific information. Certain courses may require the instructor's or coordinator's permission. Others will accept permission of the instructor in lieu of the prerequisite. In some cases, waivers or equivalents for required courses will be accepted. No grade of D will count toward fulfillment of the women's studies self-designed major. Courses taken pass/fail are not acceptable.

Curriculum Summary and Guide
The curriculum core in women's studies is structured to offer introductory, intermediate, and advanced level courses that provide comprehensive knowledge of the history, theories, research, methodology, and applications of women's studies. The first-year student is encouraged to complete Core curriculum requirements, including the Core interdisciplinary course, Women and Men: Perspectives on Gender. In the second year, Introduction to Women's Studies, providing a substantial overview of research and theories relevant to the field of women's studies from a variety of disciplines, should be taken along with Psycho-Social Development of Women, which provides a comprehensive and comparative examination of traditional and feminist theories of women's psychological and social development and behavior through the life span. It is suggested that desired electives in women's studies or related courses be taken as well. Those who desire to minor in another discipline should begin the suggested sequence for that minor during the second year. The third year,
History of Women, Classics of Feminism, Feminist Ethics, and electives in women's studies are suggested. These courses offer students an interdisciplinary knowledge of women which adds to the foundation already established and provides additional experience with and application of basic theoretical and critical analytical concepts. Comparative Feminist Theories, Seminar in Research on Women, and Field Experience/Internship in Women's Studies are recommended for the fourth year, providing an advanced experience in theory, research, and practical application. During this year, students will complete elective requirements and any minor requirements.

Summary

Year I
Core curriculum requirements
COR 104 Women and Men: Perspectives on Gender (if available)

Year II
Complete Core curriculum requirements
Introduction to Women's Studies (fall)
Psycho-Social Development of Women (spring)
Women's studies electives (fall and spring)
Begin any minor requirements
Begin any minor requirements

Year III
History of Women (fall)
Feminist Ethics (spring)
Classics of Feminism (fall)
Women's studies electives (fall and spring)
Continue minor requirements

Year IV
Seminar in Research on Women (fall)
Comparative Feminist Theories (spring)
Field Experience/Internship (fall and/or spring)
Women's studies electives (fall and spring)
Complete minor and elective requirements

Declaration of Major
Students are encouraged to explore a variety of disciplines and courses before declaring a self-designed major in women's studies. It is recommended that a minimum of 30 hours of ARS courses, including at least one women's studies course, be completed before application is made. Consistent with ARS requirements, it is recommended that students declare a major prior to completion of 53 credits and prior to completion of 30 percent of the proposed major.

ARS 130 Introduction to Women's Studies
This course examines women in society from an historical and cross-cultural, perspective. Biological, sociological, psychological, economic, political, cultural and feminist theoretical influences on women's socialization and roles will be studied as well as women's contributions to society in the past and present. The goal of the course is to provide a scholarly and substantial overview of the new research and theories relevant to women's studies and a comprehensive investigation of the forces that interact to produce the varied parameter of women's past, the rapidly changing roles of women and men in today's world, as well as the possibilities for the future. Cr 3.

ARS 230 Psycho-social Development of Women
This course is designed to introduce, investigate, and critique traditional developmental theory as well as the current research which seeks to expand the basic knowledge of women's development and the ways in which women learn. Emphasis will be placed on the study of psychological, cognitive, moral, and sociological development of women from conception through the life span. The interaction of biological and environmental factors will be considered as new theories and research related to women's development over the life span are explored. Prerequisite: ARS 130 or permission of the instructor. Cr 3.
ARS 330 Advanced Seminar in Research for Women
This seminar will explore feminist research and methodology from an interdisciplinary perspective. Similarities and differences between feminist and traditional research, sex biases and the role of values in research, and new research paradigms will be examined. Emphasis will be on applying critical and scholarly feminist approaches to selected issues and topics related to women through involvement in a major research project. Prerequisites: ARS 130, ARS 230 or permission of instructor. Cr 3-6.

ARS 430 Comparative Feminist Theories
This comparative course focuses on five selected theories, only four of which would ordinarily be described as feminist. The first theory, conservatism, is based upon the concept of a female biological imperative as natural and inevitable. The other four theories—liberal feminism, traditional marxism, radical feminism—build their argument both against this background of conservatism and through their on-going dialogue with each other. The practical implications of these theories for women and men will be examined within the three dimensions of work, family, and sexuality. Prerequisite: ARS 130, 230, 340 or permission of instructor. Cr 3.

ARS 440 Field Experience/Internship in Women's Studies
This course is designed to provide an opportunity for students to relate feminist theory and philosophy to practice. The links between community and campus, social action and research will be emphasized through experiential learning. Requirements include 120-240 hours of work in a community or government agency or private organization, in addition to meeting with other interns in seminars and scheduled meetings with a supervisor. Prerequisite: self-designed major in Women's Studies, senior standing, and permission of the instructor. Cr 3-6.

ARS 330 Advanced Seminar in Research for Women
This seminar will explore feminist research and methodology from an interdisciplinary perspective. Similarities and differences between feminist and traditional research, sex biases and the role of values in research, and new research paradigms will be examined. Emphasis will be on applying critical and scholarly feminist approaches to selected issues and topics related to women through involvement in a major research project. Prerequisites: ARS 130, ARS 230 or permission of instructor. Cr 3-6.

HTY 299 History of Women: The Feminist Movement
A survey of women's roles during critical historical periods and in specific cultures will be examined with emphasis placed on a socio-cultural investigation of the feminist movement. Students will be introduced to the methods and materials of oral history and the relevance of folk sources to the study of women's history and culture. Cr 3.

ARS 350 Feminist Ethics
This course is an introduction to feminist ethics. The first part of the course explores some of the diverse approaches to feminist ethics, examines both the distinctiveness of each approach and similarities among them, and investigates why such diversity exists and to what extent it is necessary. The second part of the course explores specific issues and areas of ethical reflection, such as power, sexuality, dualism, nonviolence, and means of social change. Prerequisite: ARS 130 or permission of instructor. Cr 3.

ARS 360 Classics of Feminism
This course focuses on writings, considered essential to the feminist movement and to the understanding of women. Individual works will form the basis for an extensive examination of the social, political, philosophical, psychological, and personal issues interacting with and influencing women's experiences. Readings by de Beauvoir, Wollstonecraft, Freidan, Millett, Morgan, Rich, Daly, Chodorow, Dinnerstein, and others will be included. Cr 3.

ARS 330 Advanced Seminar in Research for Women
This seminar will explore feminist research and methodology from an interdisciplinary perspective. Similarities and differences between feminist and traditional research, sex biases and the role of values in research, and new research paradigms will be examined. Emphasis will be on applying critical and scholarly feminist approaches to selected issues and topics related to women through involvement in a major research project. Prerequisites: ARS 130, ARS 230 or permission of instructor. Cr 3-6.

ARS 430 Comparative Feminist Theories
This comparative course focuses on five selected theories, only four of which would ordinarily be described as feminist. The first theory, conservatism, is based upon the concept of a female biological imperative as natural and inevitable. The other four theories—liberal feminism, traditional marxism, radical feminism—build their argument both against this background of conservatism and through their on-going dialogue with each other. The practical implications of these theories for women and men will be examined within the three dimensions of work, family, and sexuality. Prerequisite: ARS 130, 230, 340 or permission of instructor. Cr 3.

ARS 440 Field Experience/Internship in Women's Studies
This course is designed to provide an opportunity for students to relate feminist theory and philosophy to practice. The links between community and campus, social action and research will be emphasized through experiential learning. Requirements include 120-240 hours of work in a community or government agency or private organization, in addition to meeting with other interns in seminars and scheduled meetings with a supervisor. Prerequisite: self-designed major in Women's Studies, senior standing, and permission of the instructor. Cr 3-6.

ARS 330 Advanced Seminar in Research for Women
This seminar will explore feminist research and methodology from an interdisciplinary perspective. Similarities and differences between feminist and traditional research, sex biases and the role of values in research, and new research paradigms will be examined. Emphasis will be on applying critical and scholarly feminist approaches to selected issues and topics related to women through involvement in a major research project. Prerequisites: ARS 130, ARS 230 or permission of instructor. Cr 3-6.
Convocation

In 1984-85 the University of Southern Maine will sponsor its fourth year-long Convocation, a series of lectures, debates, workshops, programs and cultural events focused on an important contemporary theme. Previous themes have been “The City,” the “Changing Roles of Women and Men,” and “The Age of the Computer.” The 1984-85 theme is “Peace and War in the Nuclear Age.”

The University community has chosen this issue as a focus for Convocation because it is of central importance to the life of every citizen. The University provides, as no other setting does, the appropriate resources and environment of open inquiry requisite for thoughtful and comprehensive consideration of this theme.

All students, faculty, and staff are encouraged to participate in Convocation by offering ideas, by supporting and sponsoring events in collaboration with the Convocation Committee, by sharing in the organizing and planning tasks, and by teaching or enrolling in courses related to the theme. It is hoped that every member of the University community and many members of the Greater Portland community will find this shared enterprise intellectually rewarding. Students are encouraged to engage in independent study and research within the framework of the Convocation theme.

For further information contact Convocation Scholar, Anne P. Young, Emeritus Professor of History, or Alyce O’Brien, Executive Director for University Relations and Administrative Chair of Convocation.
College of Arts and Sciences

Dean: Robert J. Hatala
Assistant Dean for Student Academic Services: Kathie L. Benton;
Assistant Dean for Administration: Maurice J. Chabot

The College of Arts and Sciences offers a wide variety of majors and programs leading to graduate and professional study, and directly to careers. The College offers courses and programs of study to students in all schools of the University for intellectual development and aesthetic enrichment.

Departmental Organization

The College of Arts and Sciences is composed of the following departments:

- Art
- Biological Sciences
- Chemistry
- Communication
- English
- Foreign Languages and Classics
- Geography-Anthropology
- Geosciences
- History
- Mathematics and Computer Science
- Music
- Philosophy
- Physics and Engineering
- Political Science
- Psychology
- Social Welfare
- Sociology
- Theatre

Baccalaureate Degree Programs

Programs of study leading to a bachelor of arts (B.A.) degree are available in the areas listed below. In addition, bachelor of fine arts (B.F.A.) is offered by the Art Department; bachelor of science (B.S.) is offered by the Departments of Chemistry, Art, Mathematics and Computer Science, and Music; and bachelor of music in performance (B.M.) is offered by the Music Department.

- Art
- Biology
- Chemistry
- Communication
- Computer Science
- Criminology
- Earth Science
- Economics
- English
- French
- Geography-Anthropology
- Geology
- History
- Liberal Studies
- Mathematics
- Music
- Philosophy
- Political Science
- Psychology
- Self-Designed
- Social Science
- Sociology
- Social Welfare
- Theatre

Requirements for all Baccalaureate Degree Candidates

To be eligible for a baccalaureate degree from the University, a student must meet the following:

I. minimum proficiency requirements
II. Core curriculum requirements
III. departmental or program requirements
IV. minimum of 120 credits of accepted courses
V. minimum of 2.0 cumulative grade point average

Minimum Proficiency Requirements

Every baccalaureate degree student who is admitted to the University must produce evidence (no credit granted) of both a minimum writing proficiency and a minimum mathematics proficiency. These requirements are described in the Academic Policies section of this catalog.
Core Curriculum Requirements
Every baccalaureate degree student who is admitted to the University is required to meet the Core curriculum requirements. These are set out on page 35.

Departmental or Program Requirements
The College requires that every baccalaureate degree student fulfill the requirements of a major program. Students normally declare a major program prior to completing 53 credits.
Fine arts students, especially in the Departments of Art and Music, usually must begin their program earlier owing to portfolio and audition requirements. Students planning to major in a science are urged to obtain an advisor in the appropriate department and begin the required course sequence as early as possible.

Selecting a major is an important and often difficult decision. Students who are undecided about a major should take courses in programs that interest them before making a final decision. Undecided students are encouraged to consult the Advising and Information Department as well as those departments which interest them prior to declaring a major.

Individual departmental or program requirements are described in the sections that follow.

Associate of Arts Degree Program in Liberal Arts (60 credits)

A two-year program leading to the associate of arts degree (A.A.) in liberal arts is available in conjunction with the Division of Basic Studies. Graduates of this program may transfer into a baccalaureate degree program.

To be eligible for the associate of arts degree in liberal arts from the University, a student must meet the following:
I. minimum proficiency requirements
II. Core curriculum requirements
III. electives from the College of Arts and Sciences

A list of courses approved for satisfying the requirements of the Core curriculum may be found on page 37.

Students who wish to transfer into a baccalaureate degree program should ensure that their electives are from courses carrying a number of 100 or higher. They may also wish to consult the major requirements of baccalaureate programs in which they are interested.

Academic Majors for the College of Education

The College of Arts and Sciences offers certain liberal arts majors for students in the College of Education. These are: art education (K-12); mathematics (secondary education); and music education (K-12).

In addition, liberal arts concentrations (36 credits) for students in elementary education are being developed by certain departments of the College of Arts and Sciences. These will be available as interdisciplinary sequences in the liberal studies major. Students should contact the Office of the Dean of the College of Education for further information.

Other Educational Opportunities

Independent Study Term
Students who have an academic project which they feel would contribute significantly to their program may, with the approval of a faculty sponsor, the appropriate department, and the dean, apply for a semester of independent study. General guidelines for the independent study term may be obtained from departments or the Office of the Dean of the College of Arts and Sciences.

Double Majors
Students interested in a double major should consult the appropriate departments and obtain a declaration of major form from the Registrar’s Office.
Interdepartmental Major Programs

College of Arts and Sciences Majors

Minors are available in the following departments: art history, biology, chemistry, communication, English, foreign language, geography/anthropology, geology, history, mathematics and computer science, music, political science, and sociology.

Chair: Remo H. Ricuputi, 150 Science Building, Portland
Faculty Council: Albee, Bearce, Crochet, diBenedetto, Freeman, Louden, Pendleton, Steinman

All interdepartmental major programs are approved and administered by the Faculty Council for Interdepartmental Majors. Within these programs it is possible for a student (or a group of students), in consultation with appropriate faculty advisors, to develop and propose interdepartmental major programs to the Faculty Council. Faculty members may also propose interdepartmental majors to the Faculty Council.

Individualized Programs

Two programs are available for individual students whose academic needs cannot be met through other academic department majors.

The liberal studies major is a structured, generalized program in the College of Arts and Sciences for students who choose not to specialize in an academic discipline. Students interested in such an option may apply to the Faculty Council for Interdepartmental Majors at the normal time for declaring a major. Guidelines for this program may be obtained from the Office of the Dean of the College of Arts and Sciences or from the chair of the Council.

The self-designed major allows a student to design a multi-disciplinary program not currently available through a department major. Persons wishing to pursue such an option should apply to the Faculty Council for Interdepartmental Majors for approval, normally during the student's sophomore year.

A self-designed major program must be as comprehensive as departmental majors in the College of Arts and Sciences. Coursework outside the College may be included, but the major must consist mainly of courses within the arts and sciences.

Deadlines for submission of completed proposals are September 15, February 15, and April 15. Students may obtain applications, program descriptions, and guidelines from the Office of the Dean of the College of Arts and Sciences or from the chair of the Council.

Group Contract Programs

Group contract majors offered through the self-designed major program require appropriate courses offered by program-related departments. These majors allow a number of students to be enrolled in the same program.

Students interested in majoring in any of the following programs may obtain additional information and guidelines in the Office of the Dean of the College of Arts and Sciences or from the appropriate office indicated.

Students and faculty interested in designing and proposing group contract majors are encouraged to do so and should obtain additional information from the Office of the Dean of the College of Arts and Sciences or from the chair of the Faculty Council for Interdepartmental Majors.

Biotechnology Program
Steering Committee: Gainey, Holmes, Otter, Ricci, Smith, Stebbins
The Biotechnology Program is an interdisciplinary degree program designed to provide students with a liberal arts education emphasizing cellular and molecular biology. An integral part of this program is a semester-long, full-time internship at one of several local biotechnology firms which will provide students with practical experience in biotechnology.

Students may apply for admission to the program at the end of their freshman year (after completion of one year of chemistry and one year of biology coursework). The committee will recommend the most qualified students for admission to the program. Minimum requirements are a "B" average in all coursework required for the program. The number of students admitted to the program will be determined by the committee; however, students will not be admitted unless there is a reasonable expectation of their being placed in an internship.

Students will be required to maintain a 2.5 GPA in required coursework to remain in the program. Students who do not maintain this average will be placed on probation for one semester; if no improvement is noted, they will be dismissed from the program. Required coursework with a grade of "D" will not be counted toward fulfilling the program requirement.

Complete details and guidelines may be obtained from the program coordinator.

Self Designed Major in Biotechnology
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 76.5 or 77.5
Biology (21.5 credit hours)
1. 2 semesters freshman biology (BIO 105, 106, 107)
2. Genetics (BIO 201)
3. Microbiology (BIO 311, 312)
4. Cell and Molecular Biology (BIO 409, 410)

Chemistry (27 credit hours)
1. 2 semesters freshman chemistry (CHY 113, 114, 115, 116)
2. 2 semesters Organic Chemistry (CHY 251, 252, 253, 254)
3. Biochemistry (CHY 361 or BIO 491, CHY 362)
4. Analytical Chemistry (CHY 231, 232)

Internship (12 credit hours)

Physics (9 or 10 credit hours)
1. 2 semesters introductory physics
   (PHY 121, 122, 123, 124 or PHY 111, 112)

Mathematics (7 credit hours)
1. 1 semester Calculus (MAT 152)
2. 1 semester Statistics (MAT 120)

Foreign Languages Study Programs
The self-designed major of the College of Arts and Sciences provides students with a flexible opportunity to tailor their major to their interests and needs in foreign language study. In order to help students prepare their application for approval by the Faculty Committee for Interdepartmental Majors, five possible models are presented. Additional information may be obtained from the chair of the Department of Foreign Languages and Classics.
**Self-Designed Major in Foreign Languages**

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 36.

For a major in foreign languages, students may choose any two of the following languages and take these courses in the language of their choice:

- Spanish: SPA 321, 322, 351, 281
- German: GER 321, 322, 351, 352, 281
- French: FRE 321, 323, 291, or 292; any two of 361, 362, or 363.
- Classical Languages: GRE 251, 252, LAT 251, 252, and either GRE 470 or LAT 470

In addition, the student is required to take two foreign language Core courses bringing the total of credits required to 36.

**Self-Designed Major in Classical Studies (Concentration in either Greek or Latin)**

The minimum number of credits (exclusive of the University's Core curriculum) for the major: 36.

Core Course
- Language and Literature

**Concentration in Greek**
- GRE 251 Introduction to Literature
- GRE 252 Introduction to Literature
- GRE 470 Independent Study
- LAT 251 Introduction to Literature
- LAT 252 Introduction to Literature

Civilization and Literature in Translation
- CLA 281 Epic
- CLA 282 Tragedy
- CLA 291 5th Century Athens

Related Courses (electives)
- ARH 111 History of Art I
- ARH 212 Classical Art
- HTY 231 Ancient History I
- HTY 232 Ancient History II
- PHI 310 Ancient Philosophy
- POS 289 Political & Social Thought I

**Concentration in Latin**
- LAT 251 Introduction to Literature
- LAT 252 Introduction to Literature
- LAT 470 Independent Study
- GRE 251 Introduction to Literature
- GRE 252 Introduction to Literature

Civilization and Literature in Translation
- CLA 281 Epic
- CLA 282 Tragedy
- CLA 292 Rome

**Self-Designed Major in French Studies**

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 36.

Core Course
- French Language and Literature
  - Any two
  - FRE 321 Workshop in Writing French
  - FRE 323 Workshop in Speaking French
  - FRE 305 French Phonetics
Any two
FRE 361 The French Novel
FRE 362 French Poetry
FRE 363 The French Theatre
One French literature course from the 400 level.

French Civilization and Literature in Translation
FRE 291 and 292 French Civilization
Select one
FRE 283 Contemporary French Thinkers
FRE 284 Avant-Garde Theatre in France
FRE 285 18th Century Literature in France and England

Electives (any three)
LAT 101-102 Beginning Latin
HTY 242 French Revolution and Napoleon
HTY 244 20th Century Europe
POS 235 Democratic Governments of Europe
ARH 316 Modern Art
MUS 203 Music in the 20th Century
SOC 361 Sociology of Franco-Americans

Self-Designed Major in German Studies
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 36.
Core Course
German Language and Literature
GER 321-322 Composition/Conversation
GER 351-352 Survey of Literature
GER 281 The German Novelle
GER 470 Independent Study
Social Sciences (any three)
HTY 244 20th Century Europe
HTY 256 World War I and World War II: European War and Diplomacy
HTY 272 Germany to 1945
HTY 273 Germany since Hitler
HTY 412 Totalitarianism: Nazism and Communism
Humanities (any two)
PHI 340 History of Late Modern Philosophy
PHI 275 Theories of Language
ARH 411 Philosophy of Art
MUS 220 History of Music III
ENC 341 Critical Approaches to Literature
ENC 396 Modern Novel: Themes and Methods

Self-Designed Major in Hispanic Studies
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 36.
Core Course
Spanish Language and Literature
SPA 321-322 Composition/Conversation I & II
SPA 351-352 Introduction to Hispanic Literature I & II
SPA 281 Masterpieces of Hispanic Literature
SPA 470 Independent Study
History
HTY 181-182 Latin America I & II
Social Science (any two)
HTY 381 Latin America and the United States
HTY 383 The Society and Culture of Latin America
ANT 221 South American Indian

Humanities (select one)
ARH 311 Topics in Art History
ARH 315 Western Art (1790-1880)
PHI 275 Theories of Language

Course substitutions can be made in the electives upon prior approval of the Faculty Council for Interdepartmental Majors.

The social science self-designed major is a multi-disciplinary program offered by the Departments of Economics, Geography-Anthropology, History, Political Science, and Sociology. Each student must take a minimum of 31 credits, 21 of which must be in a particular subject area.

Students must meet the following requirements within the discipline selected for concentration:

a. Geography-Anthropology—to include GEO 101, GEO 102 or GEO 201, ANT 101 or ANT 103, and at least 3 courses in geography or anthropology at the 300 level or above. (21 credits)
b. History—to include at least 21 credit hours at the 200 level or above. (21 credits)
c. Political Science—21 credit hours as arranged with advisor
d. Sociology—to include SOC 100, SOC 300, SOC 305; or SOC 307, SOC 312, or SOC 356. (21 credits)
e. Economics—to include ECO 201, ECO 202, ECO 301, and ECO 302, and three advanced economics courses. (21 credits)

Program descriptions and guidelines are available in the Office of the Dean of the College of Arts and Sciences or from the chair of the Council.

For information regarding the women's studies self-designed major, please see p. 43.

Graduate Programs
The College of Arts and Sciences offers a master of science degree in computer science. For details, refer to the Graduate Catalog.

College of Arts and Sciences Courses
The College also offers courses on a variety of topics and themes which are not sponsored by individual departments. The courses currently offered are:

ARS 121 The Religious Dimension
This course will explore the religious dimensions of our lives in a number of different ways. We will develop a personal and satisfying definition of religion, investigate the expressions of religion in the whole life, gain understanding of the experience of various religious communities, and explore our own personal identities. The focus will be through Western religious thought, a study of myths, and exploration of the perceptions on religion by Carl G. Jung. Cr 3.

ARS 122 Career Development
This course is designed for upper-level students to investigate the world of work in terms of their own personal-professional goals. Emphasis is placed upon the career-planning process in relation to current opportunities. Activities will assist students to formulate and clarify realistic job objectives as well as plan appropriate strategies to achieve employment. Experiences will include inventory-awareness exercises, career exploration with field visitations, and preparation with resume construction and interviewing procedures. Cr 1.

ARS 123 Topics of Human Sexuality
The purpose of this course is to provide individuals with a thorough understanding and accurate information concerning their sexu-
ality. The course will show the subtle complex interrelationship among sociology, biology, philosophy, psychology, theology, behavior, and interpersonal relationships as they pertain to sexuality. Topics to be discussed include sexual growth and development, sexual attitudes, sexual anatomy and physiology of males and females, human sexual response cycle, sexual attraction, love and relationships, contraception, homosexuality and bisexuality, alternative forms of sexual behavior, sexual fantasies, sexual dysfunctions and problems, sexual history and research.

ARS 124 Patterns in Comparative Religion
This course seeks to stimulate a broadened understanding of religion through an examination of such typical religious phenomena as rites associated with birth, life-stages, death, sacred times, sacred places, myths, and religious symbolism. Course materials, including lectures, readings, and other sources, will be drawn from the major religions of the world as well as from ancient and regional traditions. Throughout the course, particular emphasis will be given to a sympathetic, rather than judgmental, examination of religious traditions. No prerequisites. Cr 3.

ARS 223 Attitudes of Human Sexuality
The purpose of this course is to allow individuals to understand better their sexual feelings, attitudes, and relationships. Emphasis will be placed on developing skills necessary in dealing with one's own sexuality, as well as the sexuality of others. Topic areas will include sexual communication skills, body images and sensory awareness, values clarification, male and female sexual identity, sexual assertiveness, overcoming sexual dysfunctions, sexual lifestyles, understanding sexual deviancy, sexual scripting. The course will rely heavily on lecture, group process and role playing. Prerequisite: ARS 123. Cr 3.
Art

Chair of the Department: Michael G. Moore, 201 Academy Building, Gorham
Professors: Bearce, Ubans; Associate Professors: Franklin, Hewitt, M. Moore, Rakovan; Assistant Professors: J. Moore, Schiferl

The department offers three bachelor's degrees: the bachelor of arts (B.A.), the bachelor of fine arts (B.F.A.), and the bachelor of science (B.S.). The requirements for the B.F.A. heavily involve the student in studio art courses and prepare him/her for graduate school or suitable professions. The B.S. gives the student preparation in several studio areas and professional education, and leads to teacher certification, grades K-12, in the state of Maine. The B.A. is designed to provide a broad liberal arts education and to prepare students for graduate study in allied fields. In all of the programs, the faculty strive to promote the student's creative abilities.

Specifically, the department goals are a.) to provide a broad and challenging foundations program, which will enable students to develop a self-awareness, an historical perspective, and insight into the meaning and application of creative media in the visual arts; b.) to develop the capacity for critical analysis, the ability to investigate and experiment, and to make judgments within a framework of reason; c.) to develop an art vocabulary appropriate to the visual arts; d.) to develop an overview and understanding of literature on art; e.) to develop an open attitude for viewing and creating art; f.) to develop basic proficiencies in a variety of art media, as well as an in-depth competency in selected art areas; g.) to develop understanding of nonverbal communication skills; and h.) to provide an enriching gallery program for students, faculty and staff, and the greater Portland community.

Above all, the faculty helps students develop an intelligent and cosmopolitan attitude about art, and encourages self-reliance in developing their own artwork and other creative endeavors.

Students wishing to apply for admission to the Department of Art should observe the following procedures. Formal application should be made to the Director of Admissions, Admissions Office. Current degree candidates enrolled at the University, wishing to transfer into the Department of Art from another discipline, must obtain a change of major form and submit this form with an up-to-date transcript to the chair of the Department of Art.

By following these procedures a student is identified as a candidate for matriculation in the Department of Art. All candidates must complete the art core (consisting of Fundamental Design I & II, Fundamental Drawing I & II, and History of Art I & II) before matriculating as an art major in the Department of Art.

In order to become a full-time matriculated art major in one of the three degree programs, a portfolio of original works must be submitted to the Department for evaluation. This must be done subsequent to or during the semester in which art core requirements are completed. The portfolio should consist of 12 works in varying media, including one self-portrait drawn from life. The entire portfolio should indicate the applicant's current interest and may include prints, drawings, paintings, posters, photographs, and films, but 35mm slides or photographs of three-dimensional work should be submitted rather than the work itself. The Department cannot accept responsibility for damage or loss, and asks that no glass, three-dimensional work, or work larger than 20" x 24" be submitted.
Portfolio deadlines and application forms may be obtained from the Admissions Office or the Department of Art.

Final notification of a decision will come from the Department of Art approximately two weeks after the portfolios have been evaluated.

Students already enrolled in the University who wish to change their major to art also must follow the departmental admission procedures concerning submission of portfolio, as described above.

Bachelor of Arts (B.A.)
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 90.

Art Core (18 credits)
- ART 141 Design I
- ART 142 Design II
- ART 151 Drawing I
- ART 152 Drawing II
- ARH 111 History of Art I
- ARH 112 History of Art II

Art History Requirements (9 credits)
- ARH 411 Philosophy of Art (may substitute PHI 220)
- ARH Elective
- ARH Elective

Studio Art Requirement (18 credits of ART courses)

Electives (45 credits)
- No more than 60 credit hours with ART designation may be used to fulfill 90 credit-hours degree requirement.

Bachelor of Fine Arts (B.F.A.)
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 90.

Art Core (18 credits)
- ART 141 Design I
- ART 142 Design II
- ART 151 Drawing I
- ART 152 Drawing II
- ARH 111 History of Art I
- ARH 112 History of Art II

Studio Art Requirement (45 credits)
- 9 credits in Drawing above the 152 level
- 6 credits from each of the following two categories: three-dimensional—ceramics, sculpture; two-dimensional—painting, printmaking, photography
- 24 credits ART electives

Art History Requirement (9 credits)
- ARH 411 Philosophy of Art (may substitute PHI 220)
- ARH Elective
- ARH Elective

Electives (18 credits)
- A concentration of 12 credits in painting, printmaking, ceramics, drawing or other (specified by the Department) area is required. In addition, B.F.A. candidates are required to have an exhibit of their work during their senior year.

Bachelor of Science in Art Education
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 92.

Art Core (18 credits)
- ART 141 Design I
- ART 142 Design II

**Electives (12 credits)**

- Includes 2 credits of physical education

**Minor in Art History**

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 21.

The minor consists of ARH 111; ARH 112; and ARH 411, and 12 credits of art history courses (noted by ARH prefix) above the 200 level including:

a.) at least one of the following areas: Classical, Medieval, Renaissance; and
b.) at least one in either of the following areas: 19th-Century Western Art, 20th-Century Western Art

---

**Art History**

**ART 101 Introduction to Art**

Selected experiences using original works, lecture, panel discussion, slides, films, and other means to confront the student with the significance of the visual arts in human history. The aim of the course is to involve students in direct experiences affecting their own perception of visual form. **Cr 3.**

**ART 416 Exhibitions & Gallery Management**

Problems in the operation of an art gallery. Various exhibition, installation and handling techniques; design and distribution of promotional material. Practical experience in connection with the operation of the USM Art Gallery. Prerequisite: art core courses. **Cr 3.**

**ARH 111 History of Art I**

Examination and discussion of the early epochs of art from prehistoric cultures through the Renaissance. Special attention is directed to the relationships of historical and theoretical knowledge to creative expression. Divergent viewpoints of the art historian, the critic, and the artist are explored. The first half of an overview of the visual arts emphasizing the interrelationships of cultural values and the forms of art. Prerequisite: preference given candidates for matriculation in the Department of Art, or those with permission of the instructor. **Cr 3.**
ARH 112 History of Art II
A continuation of ARH 111 from the Renaissance through the 20th century. In both semesters of the course, examples of architecture and sculpture, paintings, etc. are used as the basis of inquiry. Prerequisite: preference given candidates for matriculation in the Department of Art, or those with permission of the instructor. Cr 3.

ARH 212 Classical Art
A survey of ancient art and architecture with special emphasis on discussing the key monuments of Greek and Roman art and their influence on later artistic periods. Prerequisite: ARH 111. Cr 3.

ARH 213 Medieval Art
A survey of the various medieval styles from the Early Christian through the Gothic period with a special section on Islamic art. The relationship of culture to art will be examined for architecture, painting and sculpture. Prerequisite: ARH 111. Cr 3.

ARH 214 Renaissance Art
An examination of the art and architecture of the fifteenth and sixteenth centuries both north and south of the Alps. Emphasis will be given to the cultural traditions, historical events and theoretical foundations which contributed to the development of Renaissance art. Prerequisite: ARH 112. Cr 3.

ARH 215 Seventeenth and Eighteenth Century Art
The course will survey the Baroque and Rococo movements in painting, sculpture, and architecture. The impact of the Academies and academic art and the Enlightenment will be given special attention. Prerequisite: ARH 112 Cr 3.

ARH 217 Oriental and Non-Western Art
A survey of some of the major styles in Asian art (India, China, Japan) followed by an overview of the art of tribal Africa and Indian art of the Americas. The emphasis will be on an understanding of the art through the cultural factors which influenced its development. Prerequisite: none. Cr 3.

ARH 218 Women in Art
A focus on women in the arts; their images, ideals, dialogues, politics, and history through contemporary trends. The course will be enhanced with slides, films, video, tapes, papers, panels and discussions. Prerequisite: permission of instructor. Cr 3.

ARH 273 Film as Image and Idea
An approach to the appreciation of motion pictures and allied arts through the understanding and analysis of the context, range, and resources of this, the only major form of creative expression conceived and developed entirely within the Industrial Age. Principles of evaluation, illustrated through the development of motion pictures to their present state. Prerequisite: permission of the instructor. Cr 3.

ARH 315 Western Art (1790-1880)
A study of the major movements of the first half of the modern era covering the period between 1790-1880. Prerequisite: ARH 112. Cr 3.

ARH 316 Modern Art
A continuation of ARH 315 covering the period from 1880-1950 and including the growth and development of the modern "isms." Prerequisite: ARH 112. Cr 3.

ARH 317 Contemporary Art (1950-Present)
An examination and discussion of development in the visual arts since 1950. Prerequisite: ARH 112. Cr 3.

ARH 411 Philosophy of Art
An investigation into the theories of art and beauty found in the writings of philosophers, painters, writers, and critics which form the basis of understanding of the fine arts. Readings and discussion of writers from ancient to modern times. Prerequisite: ARH 112. Cr 3.

ARH 412 Topics in Art History
A seminar on a selected topic in art history which will be the focus of in-depth research and discussion. Prerequisite: Permission of the instructor. Cr 3

ARH 418 Independent Study in Art History
An opportunity for the student who has demonstrated competence in a specific area of study to work independently with scheduled tutoring from a faculty member of the student's choice. Prerequisite: permission of instructor and Art Department chairman. Cr 1 to 6.
ART 141 Fundamental Design I
A studio introduction to the basic elements of two-dimensional and color relationships.

ART 142 Fundamental Design II
A studio introduction to the basic elements of three-dimensional relationships, and "the aggregate," an extended project interrelating the two and three-dimensional. Prerequisite: ART 141.

ART 151 Fundamental Drawing I
A studio introduction to drawing, including the basic elements of line, tone, design, and representation.

ART 152 Fundamental Drawing II
A continued introduction to drawing, using the basic graphic elements studied in Drawing I.

ART 233 Textiles
Introductory exercises with elementary weaves, the harness loom, backstrap, and inkle looms, and tapestry weaving. The student is encouraged to experiment with fibre construction. The emphasis is on fundamentals. Prerequisite: art core courses.

ART 251 Drawing III
Extensive combining of media. Stress on role of images, both object and model. Prerequisite: ART 152.

ART 261 Painting
An introduction to basic aspects of the painting process as related to visual perception and technique. Prerequisite: art core courses.

ART 271 Photography
Photography as a creative medium. Introduction to basic skills in the use of the camera and darkroom equipment. Investigation and practice in the fundamental techniques and processes of black and white photography as an art form. Prerequisite: art core courses.

ART 281 Printmaking
Introduction to the rudimentary materials and methods of basic printmaking media such as intaglio, lithography, relief and serigraphy. Prerequisite: art core courses.

ART 291 Sculpture
A foundation course directed towards the developing awareness of basic elements of sculptural form and the discipline of making objects. Prerequisite: art core courses.

ART 331/332 Intermediate Ceramics
Application of design principles in production of ceramicware with a concentration on advanced problems in wheel-thrown forms and hand-building sculptures. Prerequisite: ART 231.

ART 351/352 Intermediate Drawing
Continued drawing with emphasis on independent direction. Prerequisite: ART 251.

ART 361/362 Intermediate Painting
Continued investigation of the painting process using both assigned problems and arrangements of the student's own invention. Use of a variety of media. Prerequisite: ART 261.

ART 363 Painting/Watercolor
Watercolor, wash, dry-brush, ink and wash, gouache, and other techniques in watermedia. Emphasis on individual concepts and personal expression. Prerequisite: ART 261.

ART 365/366 Intermediate Watercolor
Continuation of Painting/Watercolor with emphasis on personal expression. Prerequisite: ART 363.

ART 371/372 Intermediate Photography
Exploration of concepts and techniques of photography with emphasis on individual forms of expression. Prerequisite: ART 271.

ART 381/382 Intermediate Printmaking
Application of the basic knowledge of printmaking as it concerns image making, with an emphasis on at least two of the media studied in ART 281. Prerequisite: ART 281.

ART 391/392 Intermediate Sculpture
The theory and practice of sculptural composition using a variety of techniques with traditional and new materials. Prerequisite: ART 291.

ART 407 Advanced Problems in Art
An opportunity for the student to do advanced work in the discipline of his/her choice, culminating in a related project. Prerequisite: permission of instructor and Art Department chairman.

ART 408 Independent Study in Art
An opportunity for the student who has demonstrated competence in a specific area of study to work independently with scheduled tutoring from a faculty member of the student's choice. Prerequisite: permission of instructor and Art Department chairman.
ART 412 Topics in Studio Art
A course on a selected topic in the studio arts. To be offered at least once each year. Prerequisite: permission of the instructor. Cr 3.

ART 431/432 Advanced Ceramics
Investigation and realization of advanced ceramics projects with an emphasis on personal development and professional attitudes. Prerequisite: ART 331 and 332. Cr 3/3.

ART 451/452 Advanced Drawing
Making personal and complete drawings and series of drawings. Emphasis on individual concepts and personal expression. Prerequisite: ART 351 and 352. Cr 3/3.

ART 461/462 Advanced Painting

ART 471/472 Advanced Photography
Investigation of advanced photography projects with emphasis on personal expression and individual concepts of image-making. Prerequisite: ART 371 and 372. Cr 3/3.

ART 481/482 Advanced Printmaking
Study and realization of personally developed imagery through advanced investigation of preferred print-making media. Prerequisite: ART 381 or ART 382. Cr 3/3.

ART 491/492 Advanced Sculpture
Continuation of Intermediate Sculpture with emphasis on the pursuit of personal imagery. Prerequisite: ART 391 and 392. Cr 3/3.

Art Education

AED 221 Practicum in Art Education
An introduction to art education theories and processes through reading, writing, discussion, observation, and clinical experiences with children. The examination of the relationship between art-making and learning is relevant to prospective art and classroom teachers. Prerequisite: sophomore standing or above. Cr 3.

AED 321 Principles and Procedures in Art Education
History and philosophy of art education, theories of child art, relationship of goals to art education strategies, development of a workable set of beliefs about art education through readings, writings, discussion, observation, interview, and field experiences. Intended for the art education major. Prerequisite: AED 221 and art core courses. Cr 3.

AED 407 Advanced Problems in Art Education
An opportunity for the student to do advanced work in art education related problems. A total of 6 credits may be taken. Prerequisite: completion of the sequence of courses in the related discipline and permission of the instructor and Art Department chair. Cr 1 to 6.

AED 412 Topics in Art Education
A course on a selected topic in art education to be offered at least once a year. Prerequisite: permission of the instructor. Cr 3.

AED 421 Seminar in Art Education
This seminar examines art curriculum design and evaluation. Critical issues in art education for the emerging art education professional today are explored through discussion, writing, and readings. This course is to be taken while student teaching. Cr 2.

AED 428 Independent Study in Art Education
An opportunity for the student who has demonstrated competence in a specific area of study to work independently, with scheduled tutoring from a faculty member of the student's choice. Prerequisite: permission of instructor and Art Department chair. Cr 1 to 6.
Biological Sciences

Chair of the Department: Louis F. Gainey, Jr., 306 Science Building, Portland

Health Education Advisor: Patricia M. O'Mahoney-Damon, 206 Science Building, Portland. Professor: Najarian; Associate Professors: Gainey, Greenwood, Holmes, Mazurkiewicz, Ricupit, Schwinck; Assistant Professors: Dorsey, O'Mahoney-Damon, Otter

A four-year program leading to a B.A. in biology is offered. The program provides students with a liberal arts education emphasizing the sciences. The required biology courses expose the student to an examination of life from the molecular level to the biotic community. Other biology courses may be elected to suit individual interests and needs. The required courses in chemistry and physics reflect the interdisciplinary status of biology today. Graduates of this program have found careers in biological and medical research laboratories, field biology and pharmaceutical sales, or have furthered their education by entering graduate medical, dental, optometry, veterinary, and law schools, as well as schools for allied health professions.

Pre-medical Students

Almost every American school of medicine, veterinary medicine, and dentistry requires for admission a baccalaureate degree (major optional), two years of biology; two years of chemistry; one year of physics; a course in calculus; satisfactory performance on a national professional aptitude test; and a recommendation from a committee at the baccalaureate institution. At this campus, the Health Professions Pre-professional Evaluation Committee is comprised of faculty from the Departments of Biology, Chemistry, and Physics and is responsible for evaluating, comparing, and recommending students. For further information contact Patricia O'Mahoney-Damon, 206 Science Building, Portland.

Bachelor of Arts

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 64.5. A GPA of 2.0 in required biology courses is necessary for successful completion of the major.

All four of the following are required:

- BIO 105, 106 Elements of Biology and Laboratory Biology
- BIO 107 Biological Diversity
- BIO 201 Principles of Genetics

One course (lecture and laboratory combination) from each of the following areas:

AREA 1: Organismal Biology

- BIO 203, 204 Comparative Vertebrate Embryology and Laboratory
- BIO 205 Comparative Vertebrate Anatomy
- BIO 231 Botany
- BIO 351, 352 Invertebrate Zoology and Survey of Invertebrates

AREA 2: Community-Ecosystems

- BIO 331, 332 Ecological Principles and Laboratory
- BIO 341, 342 Limnology and Laboratory
- BIO 371, 372 Fisheries Biology and Laboratory

AREA 3: Functional Biology

- BIO 401, 402 General Physiology and Laboratory
- BIO 403, 404 Comparative Physiology and Laboratory
**AREA 4: Cellular Biology**

**Minor in Biology**

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: **18**.

The minor consists of BIO 105, BIO 106, BIO 107; or BIO 105, BIO 106, BIO 211, BIO 212; plus electives numbered 200 or above to equal 18 hours in biology coursework.

---

**BIO 019 Biological Basis of Human Activity**

A course designed to elucidate the basic biological constraints of human performance. This course does not serve as a prerequisite for BIO 107 or BIO 211. Associate degree credit only.  

Cr 3.

**BIO 101 Biological Foundations**

An introduction to the areas of current biological interest: molecular and cellular biology, genetics and development, and evolution and population biology. Intended primarily for students selecting a laboratory science to satisfy the Core Curriculum or for those students not intending to take other courses in the Biological Sciences. This course cannot be used as a prerequisite for other biology courses. Offered fall and spring semesters.  

Cr 3.

**BIO 102 Biological Experiences**

Laboratory studies to complement and illustrate the concepts presented in BIO 101. Prerequisite: BIO 101 or concurrently. Offered fall and spring semesters.  

Cr 1.

**BIO 105 Elements of Biology**

An introduction to the structure and function of living systems from the cell to the ecological communities. This course is a prerequisite to all higher numbered courses offered in the Department of Biological Sciences. Offered fall and spring semesters.  

Cr 3.

**BIO 106 Laboratory Biology**

Laboratory experiences illustrating concepts and principles introduced in BIO 105. Prerequisite: BIO 105 or concurrently. Offered fall and spring semesters.  

Cr 1.

**BIO 107 Biological Diversity**

Integrated lecture/laboratory course on the evolution and diversity of life. Three hourly lectures and one three-hour laboratory/week. Prerequisites: grades of C or higher in BIO 105 and BIO 106.  

Cr 4.5.

**BIO 201 Principles of Genetics**

A study of heredity through a discussion of the mechanism and control of gene action. Current research on the nature of mutations
and the role of genes in development, behavior, and populations will be examined. Prerequisite: grade of C or higher in BIO 105. Fall semester. Cr 3.

BIO 202 Experimental Genetics
Practical laboratory experience in techniques used in genetics. Prerequisite: BIO 201 or concurrently. Cr 2.

BIO 203 Comparative Vertebrate Embryology
The embryonic origin and evolutionary relationships of vertebrate structure. Prerequisite: grade of C or higher in BIO 105. Spring semester. Cr 2.

BIO 204 Comparative Vertebrate Embryology Laboratory
Laboratory experiments and observations on amphibian, chick, and mammalian embryos. Prerequisite: BIO 203 or concurrently. Spring semester. Cr 2.

BIO 205 Comparative Vertebrate Anatomy
The comparative study of vertebrate organ systems from an adaptational and evolutionary point of view. Lecture three hours/week; one four-hour laboratory/week. Prerequisite: Grade of C or higher in BIO 105 and BIO 106. Cr 5.

BIO 207 Human Heredity and Embryology
This course presents the fundamental principles of genetics and embryology as they apply to humans. The influence of nutrition, drugs, viruses and physical agents on development will be discussed. Prerequisite: grade of C or higher in BIO 105. NOT open to students who have passed BIO 203. Cr 3.

BIO 211 Human Anatomy and Physiology
The study of functional anatomy and physiology of the human. Prerequisite: grade of C or higher in BIO 105. Spring semester only. Cr 3.

BIO 212 Practical Human Anatomy and Physiology
Laboratory studies of the structure and functions of the human body including histology and physiological experiments. NOT open to those who have completed BIO 205. Prerequisite: grade of C or higher in BIO 106; BIO 211 or concurrently. Cr 1.5.

BIO 217 Evolution
A study of the processes of biological evolution. Prerequisite: grade of C or higher in BIO 105. Cr 3.

BIO 231 Botany
A study of structure, function, development, reproduction, and environmental adapta-

tions of representative non-vascular and vascular plants. Lecture three hours/week; one three-hour laboratory/week. Prerequisite: grade of C or higher in BIO 105 and BIO 106. Cr 4.5.

BIO 241 Plant Physiology
A study of the physiological activities of plants, and their growth and development as influenced by internal and external factors. Prerequisites: BIO 107, one year of college chemistry or permission of the instructor. Cr 3.

BIO 242 Plant Physiology Laboratory
Laboratory examination of phenomena in plant physiology. Prerequisite: concurrent with BIO 241. Cr 1.5.

BIO 251 History of Biology
A chronological survey of developments in biological investigations from earliest records to the present day. Prerequisite: grade of C or higher in BIO 105. Cr 3.

BIO 281 Microbiology and Human Disease
Fundamentals of microbiology with emphasis on infectious diseases of people, including bacteria, rickettsia, fungi, viruses, protozoa and helminths. Prerequisites: grade of C or higher in BIO 105, and college chemistry. Cr 3.

BIO 282 Microbiology and Human Disease Laboratory
Laboratory techniques in the cultivation, identification and control of microorganisms. Prerequisites: BIO 281 or concurrently. Cr 2.

BIO 291 Ornithology
The basic biology of birds: life histories, migration, behavior, and economic importance, with emphasis on species found in Eastern North America. (Students supply their own binoculars or spotting scopes.) Prerequisite: grade of C or higher in BIO 101. Spring semester only. Cr 3.

BIO 311 Microbiology
A consideration of protozoa, fungi, bacteria, and viruses of medical and biological importance. Prerequisites: grade of C or higher in BIO 105, one year of college chemistry. Cr 3.

BIO 312 Microbiological Laboratory
The laboratory isolation and examination of microorganisms by various techniques. Prerequisites: grade of C or higher in BIO 106, BIO 311 or concurrently. Cr 2.

BIO 321 Histology
A lecture and laboratory course in which the microscopic anatomy of animal tissues is
studied. Two hours of lecture and 4 hours of lab. Prerequisites: grade of C or higher in BIO 105 and BIO 106. (offered irregularly.) Cr 3.

BIO 331 Ecological Principles
The interrelationships of living organisms and their environments, including man's impact on ecosystems. Prerequisite: grade of C or higher in BIO 107. Fall semester only. Cr 3.

BIO 332 Field Ecology
Field and laboratory studies demonstrating basic concepts of ecology. Numerous field trips. Prerequisites: BIO 331 or concurrently. Cr 2.

BIO 335 Entomology
Integrated lecture-laboratory course on the biology of insects and their impact on man. Prerequisite: grade of C or higher in BIO 107. Cr 3.

BIO 341 Limnology
The study of inland waters with special concern for the factors that influence the living populations within these waters. Prerequisite: grade of C or higher in BIO 107. Cr 3.

BIO 342 Field Limnology
Practical application of the methods and materials used to study inland waters and their associated living populations. Prerequisite: BIO 341 or concurrently. Cr 2.

BIO 345 Pathophysiology
A study of the physiological, genetic, biochemical and environmental basis of noninfectious diseases. Prerequisite: grade of C or better in BIO 211 or permission of instructor. Fall only. Cr 3.

BIO 351 Invertebrate Zoology
The morphology, physiology, and phylogenetic relationship of non-backboned animals. Prerequisite: grade of C or higher in BIO 105. Cr 2.

BIO 352 Survey of Invertebrates
Laboratory experience on the anatomy, physiology, and behavior of invertebrate animals. Prerequisite: BIO 351, or concurrently. Cr 2.

BIO 361 Parasitology
The life histories and host-parasite relationships of animal parasites, with emphasis on those of humans. Prerequisite: grade of C or higher in BIO 105. Cr 2.

BIO 362 Parasitological Laboratory
The morphology and life cycles of parasitic protozoa, helminths, and arthropods. Prerequisite: BIO 361, or concurrently. Cr 2.

BIO 371 Fishery Biology
A study of the principles, theories, and methods used in fishery biology; historic and contemporary fish culture practices, and environmental modifications affecting fishery resource production. Freshwater, estuarine, and marine fisheries will be considered. Prerequisites: grade of C or higher in BIO 107. Fall semester only. Cr 3.

BIO 372 Fishery Biology: Lab and Field
Practical laboratory and field experiences of methods and techniques used in fishery biology. Prerequisites: BIO 371 or concurrently. Fall semester only. Cr 2.

BIO 381 Cell Biology
Structure and function of cells on the cellular, subcellular and molecular levels. Prerequisites: grade of C or higher in BIO 105, 106; one year of college chemistry, or instructor's permission. Cr 3.

BIO 401 General Physiology
A study of physiological processes and their regulation in animals. Prerequisites: grade of C or higher in BIO 105; one year of college chemistry; one semester of physics, or permission of instructor. Cr 3.

BIO 402 General Physiology Laboratory
Laboratory examination of physiological mechanisms in animals. Prerequisites: BIO 401 or concurrently. Cr 2.

BIO 403 Comparative Physiology
Physiological and biochemical basis of environmental adaptation. Prerequisite: one year college biology with grade of C or higher, one year college chemistry, junior standing. Cr 3.

BIO 404 Comparative Physiology Laboratory
Laboratory experiments on the physiological basis of environmental adaptation. Emphasis is on marine organisms. Prerequisite: BIO 403 or concurrently. Cr 2.

BIO 407 Comparative Animal Behavior
The physiological, genetic, evolutionary and environmental basis of behavior in invertebrates and vertebrates. Emphasis is on the neurophysiological and hormonal controls of behavior. Prerequisites: grade of C or higher in BIO 105; BIO 201 or BIO 211. Cr 3.

BIO 409 Cell and Molecular Biology
A study of the eukaryotic cell at the level of organelles and molecules. The biochemical aspects of cell growth and reproduction are emphasized. Prerequisites: two semesters of college biology with a grade of C or higher. CHY 251. Cr 3.
BIO 410 Cell and Molecular Biology Laboratory
A course in which the techniques of cell fractionation and biochemical analyses are applied to the eukaryotic cell. Prerequisite: BIO 409 or concurrently. Cr 2.

BIO 415 Histochemistry
A laboratory course offering practical experience in histological and histochemical techniques. Prerequisites: grade of C or higher in BIO 105, 106, CHY 251. (offered irregularly.) Cr 3.

BIO 421 Biology Seminar
Weekly oral reports and discussions by students and staff, on biological topics of current interest. Prerequisite: 16 hours of biology or permission of instructor. May be repeated. Cr 1 or 2.

BIO 441 Problems in Biology
Independent library or laboratory studies on a special topic, as mutually arranged by instructor and student. Prerequisite: by arrangement. Credit Arranged.

BIO 491 Biochemistry
A lecture course in which the biological strategies for synthesis, energy utilization, information transfer, and control systems are examined at the molecular level. Prerequisites: CHY 253 or permission of instructor. Cr 3.

Chemistry

Chair of the Department: John S. Ricci, 370 Science Building, Portland
Professors: Hatala, Smith, Sottery; Associate Professor: Ricci; Assistant Professors: Matson, Stebbins

The field of chemistry is concerned with the structure of matter, its transformations, and the energy changes related to these transformations. Departmental aims are to contribute to the student's understanding of chemistry's place within the sciences and in today's industrial and business world, and to provide students concentrating in this field with a thorough and practical education which will be useful in teaching or in industrial, technical, or graduate work.

To achieve these aims the Department of Chemistry offers a four-year program with two tracks leading to baccalaureate degrees (B.A. in chemistry or a B.S. in applied chemistry). Since the chemistry courses in each track are the same for the first two years it is possible to switch tracks through the junior year. Students interested in a chemistry major are strongly urged to consult with a member of the chemistry faculty to discuss the total program and should pay particular attention to the pre- and co-requisites necessary for different courses.

Bachelor of Arts: Chemistry

The minimum number of credits in chemistry and related areas (exclusive of the University's Core curriculum, required for the major in this track: 59.

The courses include: CHY 113 & 114; 115 & 116; 231, 232; 251 & 252; 253 & 254; 371 & 372, 373 & 374; and two of the following four offerings: 321, 351, 361 or 377, 378 (a minimum of 38 hours within the department). In addition PHY 121, 122; 123, 124; MAT 152, 153; COS 140 (FORTRAN) or a math/computer science course approved by the Chemistry Department are required (a total of 21 more hours).

Additional requirements for graduation include minimum standards of academic excellence and a demonstrated proficiency in technical writing. To graduate as a chemistry major a student must maintain a mini-
The minimum number of credits in chemistry and related areas (exclusive of the University's Core curriculum) required for the major in this track: 62.

The courses include: CHY 113 & 114; 115 & 116; 231 & 232; 251 & 252; 253 & 254; 371 & 372; 321 or 361 (a minimum of 30 hours within the department). In addition PHY 121 & 122; 123 & 124; MAT 152; COS 140 (FORTRAN) or a math/computer science course approved by the Chemistry Department are required (a total of 17 hours). In addition, a candidate for the B.S. degree must elect 15 hours of CHY 400, Independent Study.

Additional requirements for graduation include minimum standards of academic excellence and a demonstrated proficiency in technical writing. To graduate as a chemistry major a student must maintain a minimum overall grade point average (GPA) of 2.0, and a GPA of 2.0 in all courses required for the chemistry major. Proficiency in technical writing can be demonstrated by a writing sample or by passing a one-credit course in the topic.

As a general rule, candidates for the B.S. degree in applied chemistry should complete the majority of their formal coursework at the University by the end of their junior year. The fourth year in the B.S. program consists partly of the intensive independent study and field experience in a specific application of chemistry. After a reasonable orientation period, the student will participate in the day-to-day operations of a laboratory (or alternative facility) as a functioning member of the staff. Supervision of the applied chemistry major during this period will be provided by a suitable qualified staff member of the host facility and by a member of the chemistry faculty, who will also supervise the independent study.

Minor in Chemistry
The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 17. The minor consists of CHY 113, 114, 115, 116, 231, 232, 251 and 252.

Students who apply for admission to the chemistry program should have completed college preparatory courses in chemistry, physics, and mathematics. At least two years of algebra and a semester each of geometry and trigonometry are recommended as part of the student's high school program. (Freshmen in the applied chemistry program who lack this preparation in mathematics are required to take MAT 140, Precalculus Mathematics.)

CHY 100 Foundations for College Chemistry
A course designed to help students who are inadequately prepared to complete successfully the CHY 113-116 (Chemical Principles) sequence, either on the basis of their own perceptions or of their scores on two chemistry placement tests. The course will review basic chemical principles commonly presented in high school chemistry and emphasize solving mathematical problems commonly done in freshman college-level chemistry. Two lectures and one recitation session per week. No prerequisite. Offered each semester. Cr 2

CHY 101 Introduction to Chemistry
General topics in chemistry including introductory units on matter and its properties; measurement; elements and compounds; atomic structure; solutions, dispersions, and water; osmotic pressure; chemical bonds; chemical nomenclature; stoichiometry; radiochemistry; gases; acids, bases and buffers; and energy relationships in chemical processes. Three lectures per week (usually concurrent with CHY 102). Prerequisite: one year of high school chemistry (taken during the past five years) or a satisfactory grade level on the proficiency test administered by
Students will perform experiments to illustrate features of organic molecules; subgrade of Co or better in CHY 101. Not appropriate for chemistry or biology majors.

CHY 102 Introduction to Laboratory Measurement
Experiments will be designed to teach students how to perform accurate and reliable measurements using the major parameters of mass and volume. Topics to be covered include: physical and chemical changes; separation of a mixture; analysis of an ionic solution; properties of water; gases; acids, bases and buffers; titration. One recitation and two laboratory hours per week. Corequisite: CHY 101. Not appropriate for chemistry or biology majors.

CHY 103 Introduction to Organic and Biochemistry
Stress will be placed upon topics of special importance for students of the health sciences: nomenclature of organic compounds; electronic distribution in organic molecules; structural features of organic molecules; substitution, elimination, and addition reactions; oxidation reduction reactions; carbohydrates; lipids; proteins and amino acids; enzymes; nucleic acids; metabolism; summary of some aspects of nutrition; pharmaceuticals; medical applications of radiochemistry. Three lectures per week (usually concurrent with CHY 104). Prerequisite: grade of C or better in CHY 101. Not appropriate for chemistry or biology majors. Spring.

CHY 104 Introductory Organic and Biochemistry Laboratory
Students will perform experiments to illustrate aspects of organic chemistry of importance to living systems, as well as elementary principles of biochemistry. Topics include separation and identification of organic compounds; qualitative reactions of lipids, proteins, and nucleic acids; introduction to enzyme chemistry. One recitation and two laboratory hours per week. Offered spring semester. Corequisite: CHY 103. Not appropriate for chemistry or biology majors.

CHY 109 General Chemistry
A study of selected fundamental concepts and theories of chemistry: atomic structure, periodic classification, electronic structure, chemical bonding, molecular structure, chemical reactions, chemical equations and quantitative relations, gases, kinetic theory, changes of state, solutions, acids and bases are discussed. Three lectures per week. No prerequisites.

CHY 110 General Chemistry Laboratory
Laboratory experiments to illustrate material presented in CHY 109 lectures. One hour of recitation and two hours of laboratory per week. Corequisite: CHY 109.

CHY 113 Principles of Chemistry I
A presentation of fundamental principles of chemical science. These principles will be presented in quantitative terms and illustrated by examples of their applications in laboratories and in ordinary non-laboratory experience. This course and CHY 114 (normally taken concurrently) provide the basis for further study of chemistry for all students except those in health sciences. Three lectures per week. Fall.

CHY 114 Laboratory Techniques I
Laboratory experiments to illustrate the principles which are presented in CHY 113 lectures. One recitation and two laboratory hours per week. Corequisite: CHY 113. Fall.

CHY 115 Principles of Chemistry II
A presentation of topics of chemistry additional to those presented in CHY 113. This course is designed to provide a solid foundation for all further studies in chemistry and is a prerequisite for all upper-level chemistry courses. Prerequisite: grade of C or better in CHY 113. Spring.

CHY 116 Laboratory Techniques II
Laboratory experiments to illustrate the principles presented in CHY 115 lectures. One recitation and two laboratory hours per week. Prerequisite: grade of C or better in CHY 114. Corequisite: CHY 115. Spring.

CHY 140 Energy, Man, and Environment
This course presents a study of man's energy needs, and the alternative energy sources available. In addition, the impacts on the environment of the utilization of various energy sources will be considered. No prerequisite.

CHY 141 Environmental Chemistry
The role of chemistry and the chemical industry in creating many environmental problems; the application of chemistry to aid in the solution of environmental problems. Prerequisite: one semester of an introductory college-level chemistry course or one year of high school chemistry completed within the last three years.

CHY 231 Analytical Chemistry
A survey of modern analytical principles and instrumental techniques with emphasis on environmental, clinical, and industrial applications. Two lectures per week. Prerequisite: a grade of C or better in CHY 115. Spring.

CHY 232 Analytical Chemistry Laboratory
Quantitative experimental determination by means of gravimetric, volumetric, and instrumental methods. Classical procedures and modern instrumentation, including spec-
CHY 251 Organic Chemistry I
An intensive treatment of organic chemistry. Topics include: nomenclature; structure and stereochemistry; reaction types: substitution, addition, elimination and oxidation-reduction; reaction mechanisms and factors influencing them; spectroscopic techniques of structure determination (mass, nuclear magnetic resonance, ultraviolet-visible and infrared). Three lectures per week. Prerequisite: a grade of C or better in CHY 115. Fall. Cr 3.

CHY 252 Organic Chemistry Laboratory
Experiments will be performed to illustrate the basic laboratory skills of crystallization, extraction, distillation, and melting and boiling point determinations. The preparation and isolation of compounds by the Friedel-Crafts and Grignard reactions will be performed. The latter part of the semester will comprise an introduction to organic qualitative analysis. One recitation and three laboratory hours per week. Prerequisite: a grade of C or better in CHY 116. Prerequisite or corequisite: CHY 251. Fall. Cr 2.

CHY 253 Organic Chemistry II
A continuation of CHY 251, but with a more extensive (and intensive) investigation of the principal categories of organic reactions. Extensive problem-solving in such areas as structure determination, spectroscopy, and stereochemistry. The structures and fundamental chemical reactions of lipids, carbohydrates, proteins and nucleic acids will be presented. Three lectures per week. Prerequisite: a grade of C or better in CHY 251. Spring. Cr 3.

CHY 254 Organic Chemistry Laboratory II
A continuation of the experiments begun in CHY 252 on organic qualitative analysis, including solubility tests, classification tests, and preparation of derivatives. Interpretation of spectra will be introduced to assist in the process of identification of unknowns. One recitation and three laboratory hours per week. Prerequisite: a grade of C or better in CHY 252. Prerequisite or corequisite: CHY 253. Spring. Cr 2.

CHY 321 Inorganic Chemistry
Descriptive chemistry of the inorganic compounds, structure, bonding and ligand field theory. Three lectures per week. Prerequisite or corequisite: CHY 371. Alternate years. Cr 3.

CHY 322 Inorganic Chemistry Laboratory
Preparation and characterization of inorganic compounds. One recitation and three laboratory hours per week. Prerequisite or corequisite: CHY 321. Not offered every year. Cr 2.

CHY 351 Advanced Organic Chemistry
The major areas of discussion include: synthetic organic chemistry; linear free energy relationships; photochemistry; stereochemistry; an introduction to natural products (steroids, alkaloids, and terpenoids); electrocyclic reactions; spectroscopy; and the literature of organic chemistry including the use of online retrieval services. Three lectures per week. Prerequisite: grade of C or better in CHY 253. Alternate years. Cr 3.

CHY 361 Biochemistry
A consideration of the structure, function, and transformations of the principal compounds of biological importance, and of the applications of chemical principles to these studies. Three lectures per week. Prerequisite: grade of C or better in CHY 253. Fall. Cr 3.

CHY 362 Biochemistry Laboratory
Experiments will be performed to illustrate material presented in CHY 361. One recitation and three laboratory hours per week. Prerequisite or corequisite: CHY 361 or permission of the instructor. Fall. Cr 2.

CHY 371 Physical Chemistry I
Introduction to the principles of theoretical chemistry: classical and statistical thermodynamics, molecular energetics, quantum phenomena and equilibrium. Candidates for the B.S. degree elect this course in the fall semester of the junior year. Three lectures per week. Prerequisites: grade of C or better in CHY 231, MAT 152, and PHY 123. Fall. Cr 3.

CHY 372 Physical Chemistry Laboratory I
Experiments illustrative of theoretical principles pertinent to chemical processes, such as thermochemistry, absorption phenomena, and physical properties of gases and liquids. One recitation and three laboratory hours per week. Prerequisite: grade of C or better in CHY 232. Prerequisite or corequisite: CHY 371. Fall. Cr 2.

CHY 373 Physical Chemistry II
Additional principles of theoretical chemistry: reaction kinetics, surface chemistry, electrochemistry, quantum mechanics and spectroscopy. Three lectures per week. Prerequisite: a grade of C or better in CHY 371. Spring. Cr 3.
CHY 374 Physical Chemistry Laboratory II
Experiments illustrating material presented in CHY 373. One recitation and three laboratory hours per week. Prerequisite or corequisite: CHY 373. Spring. Cr 2.

CHY 377 Instrumental Analysis
A consideration of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Topics include absorption and emission spectroscopy in the ultraviolet, visible and infra-red regions, chromatography, electrochemistry, mass spectrometry, and magnetic resonance. Two lectures per week. Prerequisite or corequisite: CHY 371 or permission. Alternate years. Cr 2.

CHY 378 Instrumental Analysis Laboratory
Experiments will be performed in low resolution ultraviolet and infrared absorption spectroscopy, flame spectroscopy, and atomic absorption. Prerequisite: a grade of C or better in CHY 371. One hour of pre-lab recitation and three laboratory hours per week. Alternate years. Cr 2.

CHY 400-498 Independent Study
Independent study required of all B.S. majors in applied chemistry. An intensive exposure to a selected area of applied chemistry through an internship served in an appropriate clinical, industrial, government, or research facility. The site and problem are to be selected by the student in conference with a faculty advisory committee and a representative of the training facility. Offered fall, spring, and summer. Variable credit; maximum: 15.

Communication

Chair of the Department: Leonard Shedletsky, 218 Bailey Hall, Gorham
Associate Professor: Shedletsky; Assistant Professors: Hanisko, Kivatisky, Sayers

The development of communication understanding and skills, like communication itself, is a continual process. The study of communication involves the examination and exploration of processes by which verbal and/or nonverbal information is transmitted from one information processing system to another, the physical and social-psychological factors which affect the transmission and reception of the messages, and the consequences of feedback on the systems. The systems could be individuals, groups, organizations, societies, cultures, or cybernetic mechanisms. During human transactions, symbolic information such as words and behaviors are transmitted and processed by the participants. Machine-based communication focuses on the transmission and processing of electronic data. The Department of Communication emphasizes the study of human transactions in its coursework. However, students may focus their degree programs on other areas of communication theory by supporting their program with courses from appropriate departments, schools, or colleges within the University.

In order to understand the interdisciplinary nature of communication, majors may take courses in such fields as philosophy, business, sociology, psychology, education, and political science. The Communication Internship Program allows majors to study a particular aspect of communication in the field. This allows for applying knowledge acquired in the classroom to a practical setting. Since communication is essential to most forms of human endeavor, communication majors may prepare for employment or further study in education, government, business, law, health care, and the media.
Programs and Requirements

Bachelor of Arts

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 45.

Communication majors will examine the different levels of communication analysis by completing the following required courses.

- COM 102 Introduction to Communication
- COM 290 Small Group Communication
- COM 330 Interpersonal Communication Theories
- COM 390 Organizational Communication
- COM 495 Theories of Communication: Seminar

In addition, 15 credit hours must be selected from other departmental courses offerings. These courses may be chosen from the following:

- COM 100 Research
- COM 150 Business Communication
- COM 171 Interpersonal Communication
- COM 190 Media and Children
- COM 265 Intrapersonal Communication
- COM 272 Persuasion
- COM 275 Theories of Language
- COM 280 Mass Media and Human Interaction
- COM 295 Communication Development in Children
- COM 310 Nonverbal Communication
- COM 320 Intercultural Communication
- COM 420 Communication and Cognition
- COM 430 Communication Internship
- COM 485 Sex-Related Differences in Communication
- COM 490 Theories of Mass Communication
- COM 491 Independent Study

Fifteen additional credits of coursework should be selected from departments having courses consistent with the student's interests and goals. Such courses must be approved by the student's departmental advisor. Those students who wish to enter graduate study will be advised, in addition to the above requirements, to take a sequence of research courses.

Minor in Communication Theory

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 18.

For students interested in a minor in communication theory, the Department offers the following concentration: COM 102, COM 290, COM 295, COM 330, COM 390, COM 495.

COM 100 Research

A lecture course designed to acquaint students with the sources and methods of scholarly research. Course will provide students with basic knowledge to carry out projects in secondary and primary research, from conception to execution. Research project required. Cr 3.

COM 102 Introduction to Communication

This course is designed to provide students with a conceptual framework of the basic elements of human communication. Students will examine different levels of communication analysis, learn to chart and analyze communication behavior, and discuss the effects of communication on themselves and others. Topics discussed will include communication theory, self-concept, interpersonal communication, nonverbal behavior, small group interaction, and mass communication. Students will be encouraged to adapt communication principles to their various fields of endeavor. Cr 3.

COM 150 Business Communication

A lecture-discussion course in business communication, emphasizing industrial, managerial, and labor communication. Investigation of theory, models, nets, barriers to communication, and other topics, including basic methods and techniques of internal business communication. Cr 3.

COM 171 Interpersonal Communication

An experiential learning-based course designed to acquaint the student with the elements of interpersonal communication, its basic nature and function. The course in-
COM 190 Media and Children
This course will examine media designed for the child audience. The class will view the wide spectrum of children's media, and critically examine them in terms of their potential prosocial and antisocial effects. The readings and discussions will cover various theories and research models that address themselves to the impact of media on the young audience.

COM 265 Intrapersonal Communication
This course examines our ability to use what we know and feel in order to send, receive, and store information. Whether stimuli come from an external source or from within the self, the focus of intrapersonal communication is on the ways in which we process those stimuli, our ability to make sense out of our experiences, to remember, to retrieve information from memory, and to create messages—at whatever level of consciousness, and no matter how many people are involved, in face-to-face or mediated communication. Prerequisite: COM 102 or permission.

COM 272 Persuasion
A course designed to help students understand the basic principles of persuasion. The course deals with persuasion as a social phenomenon. The perspective from which the course is offered is the analysis of persuasion as a behavioral process. As such, the course will investigate the social science research which relates to persuasion. Students will examine the attempts made by others to persuade them, as well as the attempts they make to persuade others. Further, the course will deal with the issue of ethics in persuasion. Although this issue will be illusive, it is hoped that each student will give this topic adequate thought.

COM 275 Theories of Language
The purpose of this course is to instigate thinking about the nature of language. The course is premised upon the conviction that, because language is such a central concern of so many disciplines and because various disciplines have made important contributions to our understanding of it, language can only be studied adequately via an interdisciplinary approach. The student will be introduced to some of the foremost efforts to comprehend language in the fields of psycholinguistics, philosophy, and linguistics. Through these disciplines, we intend to raise and pursue questions concerning the nature of language, its structure and function, its relation to man's perception of reality, and its relation to the mind. Prerequisites: COM 102, any PH 100 level course, or permission of the instructor.

COM 280 Mass Media and Human Interaction
Mass Media and Human Interaction concentrates on the history and effects of mass communication in our society. Through readings and independent research, the student will explore the content and social consequences of our rapidly changing telecommunication technology. Media to be discussed include print, broadcasting, and cable.

COM 290 Small Group Communication
A discussion-participation course designed to familiarize students with the theories and techniques of small-group communication. Students will examine role behavior, group norms, conflict, group development, problem solving, communication flow, and other variables relevant to actual small-group interactions.

COM 295 Communication Development in Children
This course will examine the structural and the functional development of children's communication behavior. Syntactic, semantic, and pragmatic aspects of communication development will be explored from both learning and acquisition theory perspectives. This course includes a final project of the student's creation. Freshmen must have instructor's permission.

COM 310 Nonverbal Communication
A study of the effects of nonverbal factors on the process of human communication. Proxemics, body motion, paralanguage, metacommunication, and other specific areas of nonverbal behavior will be explored and examined. Each student will be required to conduct a research project and prepare a scholarly paper related to a particular area of nonverbal communication. Prerequisite: COM 102 or permission of the instructor.

COM 320 Intercultural Communication
A study of communication as an agent of cooperation/conflict between cultures, such as between nations, races, and societies. Focus is upon institutional agencies, such as the U.N., and upon simulations of intercultural communication, such as R. B. Fuller's World Game, the Geophysical Year, and others. Appropriate consideration is given to intercultural communication, such as cultural exchanges, diplomacy performing groups, lecturers, consultants and similar cross-cultural relationships. Prerequisite: COM 102 or permission of instructor.
COM 330 Interpersonal Communication Theories
A study of the current thinking in interpersonal communication with emphasis upon specific theories of human interaction. Students will engage in behavioral observations, experiential learning activities, group research projects, individual study, and will complete a final project on a selected topic in interpersonal communication. Prerequisite: COM 102 or COM 290. Offered each spring semester. Cr 3.

COM 390 Organizational Communication
A lecture-discussion course with a practical field study required. The class will examine factors relevant to communication within organizations and will discuss such topics as organizational roles, information flow, decision making, leadership, and the nature of organizational change. Prerequisite: COM 290 or permission of the instructor. Cr 3.

COM 420 Communication and Cognition
A seminar designed to explore the relationship between communication and thought processes. The nature of consciousness is explored through a consideration of the acquisition, retention, and retrieval of information. Special attention is given to experimental analysis of thought processes. Prerequisites: junior, senior, or permission of the instructor. Cr 3.

COM 430 Communication Internship
An in-depth study of experiences in specific areas of communication which is conducted in the field. Students will focus their efforts in an area related to their choice of communication expertise (i.e., organizational communication, mass communication, intercultural communication). Prerequisite: a precise definition of the project, and director’s consent. Cr var.

COM 490 Theories of Mass Communication
A discussion of significant factors related to communication theory. Contemporary theories of mass communication, the mass media, audience analysis, and the role of mass communication in society will be among the topics examined in the course. Students elect to examine an aspect of mass communication which is of interest to them, and present their findings in research papers and projects. Prerequisite: COM 280 or permission of the instructor. Cr 3.

COM 491 Independent Study
A concentrated program of research or study on a particular topic of the student’s choice, with approval of a communication faculty advisor. Periodic conferences with the advisor are required. Enrollment by permission of faculty sponsor only. Cr 3-6.

COM 485 Sex-Related Differences in Communication
This seminar on sex-related differences in communication is designed primarily to evaluate critically the research literature. It is concerned with whether or not males and females differ in their actions of sending, receiving, and interpreting messages. The course examines gender-role stereotyping, empirical findings on sex-related differences in communication behavior (e.g., talking, interpersonal style, touching, eye contact, etc.), and explanations for sex differences. Critiques of some major theoretical positions are discussed (e.g., sex differences in dominance, aggression, cognition, and brain organization). Prerequisite: junior or senior standing. Cr 3.

COM 495 Theories of Communication: Seminar
This course is designed for upperclass students who are majoring or minori ng in communication studies. Based on a seminar format, students in this course will explore in depth several advanced theories of communication, mechanistic through interactive, with examples and application for each. Open to juniors and seniors having at least 12 credit hours of communication coursework. Cr 3.
Programs and Requirements

Criminology

Coordinator: Piers Beirne, 120 Bedford Street, Portland

The bachelor of arts in criminology is a four-year degree offered by the Department of Sociology. Criminology is the study of the complex relations among crime, law, and society. Traditionally, criminologists have sought to understand why particular individuals or groups engage in criminal activities. Recently, however, the study of crime has been expanded to include the structures and processes whereby certain behavior is defined as criminal. This includes examination of the ideas, ideals, and ideologies embedded in definitions of crime and expressed in our everyday perceptions of crime and criminality.

The curriculum in criminology is a rigorous series of courses that provides students with a comprehensive knowledge of traditional and modern criminological thought. The core of the curriculum is an integrated set of required courses. These courses are designed as a cumulative set of experiences and must therefore be taken in sequence. Elective courses enable students to place their criminological interests in a broader sociological perspective.

Many students in the program are interested in law studies or in social service occupations related to criminal or juvenile justice. The program also prepares students for a wide variety of other career options and provides an excellent basis for graduate study in criminology, other social sciences, and law.

Bachelor of Arts

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 40.

The criminology major consists of 28 hours in required courses, 9 hours of sociology electives, and 3 hours of cognate electives.

Students are reminded that they must complete the requirements of the College of Arts and Sciences and the University Core curriculum.

Required Courses

CRM 215 Criminology
SOC 205 Methods of Social Research
SOC 300 Sociological Theory I
CRM 301 Criminological Theory I
CRM 302 Punishment and Discipline
SOC 336 Law and Society
SOC 375 Deviance
CRM 401 Comparative Criminology
PHI 240 Political Philosophy

OR

PHI 260 Philosophy of Law

Sociology Electives (select 9 hours)

SOC 310 Social Change
SOC 312 Class and Inequality
SOC 315 Self and Society
SOC 350 Urban Sociology
SOC 353 Social Movements
SOC 355 Politics and Society
SOC 356 Order and Control
SOC 357 Bureaucracy in Modern Society

Cognate Electives

An advanced level course in a related discipline to be selected in consultation with the student's advisor.

Major Credit and Grade Policy

There are prerequisites for most major credit courses. See the depart-
mental course listings for particulars. Courses to be taken for major credit at other institutions must be approved in advance. Grades of C- or better must be achieved in all courses for major credit. Courses taken pass/fail are not acceptable. The coordinator of the program routinely requests faculty teaching major courses to submit a list of those students doing less than C work at mid-semester. These students are strongly encouraged to meet with their professor, and may be required to meet with the coordinator for counseling.

Curriculum Summary and Guide

The curriculum is a series of structured and integrated core experiences for the student. The Criminology and Law and Society courses introduce students to some of the basic concepts, theories, and perspectives in the field, and convey basic empirical knowledge about the structure and processes of American law and the agencies of control in modern society. The Criminology course primarily focuses on the sources of crime data, the reasons why certain behavior is defined as criminal, and the consequences of criminal labeling.

The Law and Society course focuses on the features that distinguish law from other rules of social behavior, with particular emphasis on the doctrinal and institutional aspects of American criminal law. The Methods and Research course provides students with the elementary investigative tools of social inquiry. These three courses should be taken during the second year of a student's career at the University.

The theory sequence of Sociological Theory and Criminological Theory forms the core of the third year of study. The Deviance course, also taken during the third year, provides an added dimension to the social nature of rule creation, deviation, and enforcement. These core courses are complemented, in the third year, by elective courses.

The fourth year includes a sequence of Punishment and Discipline and Comparative Criminology. Together, these serve as a senior experience for students. During this year students will complete elective requirements.

Summary

Year I:
SOC 100, Core curriculum requirements

Year II:
Complete University Core curriculum requirements
Criminology (fall or spring)
Methods of Research (fall or spring)
Law and Society (spring)

Year III:
Sociological Theory (fall)
Criminological Theory (spring)
Deviance (spring)
PHI 240 or 260 and electives

Year IV:
Punishment and Discipline (fall)
Comparative Criminology (spring)
Complete elective and cognate requirements

Declaration of Major

Consistent with the general policies of the College of Arts and Sciences, the Criminology program does not normally accept formal declaration of major before the second semester of the sophomore year.

Students in or beyond the second semester of their sophomore year should complete a major declaration form. At the same time, their record will be evaluated and a final, binding version of their major requirements will be written. To be accepted as a formal major, the student must have been at the University for at least one full semester, be in good standing, and have demonstrated satisfactory performance in major courses.

Students are invited, before this time, to list their major with the Regis-
transfer and to be advised through the Criminology Office. This listing, however, should be considered a declaration of intent.

Transfer students must also formally declare their major even though they enter with junior or senior standing.

Supplementary information is published each semester by the Criminology Office to assist students in planning their course schedules. The information includes a summary of major courses for freshmen and sophomores, listings and descriptions of special courses, and general information for majors.

To obtain these publications, or for other information, write to: Coordinator, Criminology Program, University of Southern Maine, 96 Falmouth Street, Portland, Maine 04103 or telephone: (207) 780-4105.

Transfer Students
Transfer students and students contemplating transfer into the criminology program are urged to meet with department faculty as early as possible for an evaluation of their progress and their requirements in the major.

Required Courses

CRM 215 Criminology
This course focuses on the difficult question, "what is crime?" and on problems concerning the measurement and distribution of crime. The criminology course examines some of the popular misconceptions and myths about crime, the creation and utility of official and unofficial crime statistics, popular presumptions about the causes of crime, and the institutional responses to crime in our society. The course is also listed as SOC 215. This course is one of the two basic courses in the Criminology program, along with Law and Society (SOC 336). Prerequisite: SOC 100 or permission of instructor. Cr 3.

CRM 301 Criminological Theory
This course focuses on the development of criminological theory from 1930 to the present. The course is historical in nature and addresses such fundamental problems as why certain behavior is defined as criminal, the causes of crime, and the consequences for the individual of being labeled as a criminal. Offered spring semesters. Prerequisite: SOC 300 and CRM 215. Cr 3.

CRM 302 Punishment and Discipline
This course distinguishes between different forms of discipline, such as punishment, therapy, conciliation, and repression. It traces the development of punishment as the definitive style of discipline in modern societies. Specific historical emphasis is given to the emergence of the doctrine of the rule of law. The development of the modern police and the modern prison are traced as responses both to the necessity of social control and to crises generated by social disorder and political instability. Offered fall semesters. Prerequisite: CRM 301. Cr 3.

CRM 401 Comparative Criminology
This course focuses on the application of American criminological theory in cross-cultural contexts. Specific emphasis is given to the problems of cultural relativism and intellectual imperialism while providing an integrative senior experience for majors. Offered spring semesters. Prerequisite: CRM 301 and CRM 302. Cr 3.

Optional Courses

CRM 390 Independent Projects
Individually arranged reading and/or research for juniors and seniors concentrating on a particular subject of concern under the advice and direction of a faculty member. Apply to program coordinator. Cr 3.

CRM 395 Internship
The course is designed to provide work/action experience and insight into professional roles in a variety of community agencies and organizations. The primary emphasis of the internship is the application of the social science perspective, substantive knowledge, and methodology to understand and illuminate a particular organizational situation. Thus, the internship can be understood as a participant observation experience within the context of social science research. It is primarily designed as a field experience for upper-level social science majors with
substantive background or coursework in the area of internship placement. In addition to field placement, students are expected to meet for a series of internship seminars, for which readings and reports will be required. Offered each semester. Contact departmental internship coordinator for details.

Cr 3 or 6.

CRM 412 Research in Criminology
Independent or group-organized research project or activity under the direction of a faculty member. Open to advanced students with some training or experience in research methods. Apply to the program coordinator. Cr 3.

Economics

Coordinator: Robert C. McMahon, 227 Luther Bonney, Portland

The undergraduate program in economics is designed to prepare students broadly for careers such as civil service, law, management, public affairs, and labor relations. Economics is a social science and as such must be studied in the perspective of a broad training in the liberal arts and sciences. Many students who plan to attend graduate and professional schools will find the undergraduate economics program to be valuable training for advanced academic work. Within the economics program, courses are available in such fields as: microeconomic analysis, money and banking, macroeconomic analysis, international trade, comparative economic systems, public finance, and economic development.

Programs and Requirements

Bachelor of Arts

The minimum number of credits (including the University’s Core curriculum) required for the major: 120.

Students interested in receiving a bachelor of arts degree in economics may not take more than 42 hours of economics courses or 21 hours of business courses for credit toward a bachelor of arts degree.

Students in this program are required to take MAT 110, MAT 120, and POS 101. Successful completion of either of the mathematics courses and of the POS 101 course will satisfy parts of the Core curriculum requirement.

In fulfilling the Core social science requirement, students may not take an ECO course. Students who fulfill the English Composition Competency requirement of the Core curriculum without earning academic credit must complete three credits of ENG or PHI electives.

Requirements in Economics and Business (36 credits)

Business

ACC 201 Principles of Financial Accounting

Economics

ECO 201 Principles of Economics I
ECO 202 Principles of Economics II
ECO 301 Macroeconomic Analysis
ECO 302 Microeconomic Analysis
ECO electives which may include GEO 303 and HTY 338

Electives (41 credits)

An economics minor and a more math-oriented economics major are offered by the School of Business, Economics and Management.

Economics course descriptions may be found in the School of Business, Economics and Management section of this catalog.
English

Chair of the Department: L. Morrill Burke, 321 Luther Bonney, Portland
Professors: Jaques, Rosen, Rutherford, Slavick; Associate Professors: Ashley, Baier, Burke, Carner, Carper, Coffin, Gish, Reuter, Selkin; Assistant Professor: Abrams

In the study of literature, students learn to appreciate the possibilities of language for serious and often moving expression. Through writing practice, students learn to use language effectively. The understanding of language is fundamental to an understanding of what we do, and the quality of language in a society determines and reflects its moral and political condition.

The English major serves those interested in preparing for any profession or vocation where an understanding of experience is important, from the law and medicine to social work and politics. The range of English courses is large, and will prepare the student to think and write clearly and creatively, talents vital to success in any field. For information and counsel regarding the major or appropriate courses for non-majors, students should visit English offices in Gorham (200 Bailey Hall) or Portland (411 Luther Bonney Hall).

Students not majoring in English who want to satisfy the Humanities Core requirement in English should begin with English 120, except when English 120 is waived. Courses numbered below 120 cannot be used to satisfy the Humanities Core requirement.

Bachelor of Arts

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 48.

The English major begins with a course in writing (100 or 101) and an introduction to the study of literature (120). The student then selects more advanced English courses (and up to 6 credits in approved courses of other departments) to complete the 48-credit major requirement. The English major curriculum is designed to assure that the student has a familiarity with many of the outstanding literary achievements of Western culture, a knowledge of how the language has developed, and a sensitive appreciation of works by the great representative writers and critics in major periods of English and American literature. Elective and independent study courses will permit the student to go more deeply into subjects of personal interest, including creative expression.

While the Department does not require courses in other disciplines, majors are strongly advised to develop a reading proficiency in a foreign language and to elect or satisfy Core requirements with History of Western Civilization I and II (HTY 101 and 102), History of England (HTY 261), a course in American history (HTY 131, 132, 133, or 134), a lower-level philosophy course (PHI 101, 102, 103, 104, 106, 109), one or more history of philosophy courses (PHI 310, 320, 330, 340, 350, 360), an art course (ARH 101, 111, 112), a music course (MUS 100, 120, or 121), and one or more theatre courses (THE 101, 340, 341, 361, or 362).

English majors must meet the following English Department requirements. All courses must be passed with a grade of C- or better and six hours with a grade of B or better; at least nine hours must be taken from the 300-400 level offerings.

1. ENG 100 or 101 or waiver; ENG 120 (0 credits toward major)
   A student may, with an advisor's approval, substitute the third Introduction for Majors course, or a second Classical and Biblical Backgrounds course for ENG 120.

2. Introduction for Majors (6 credits required)
   ENG 160 Poetry (required of all majors)
   ENG 161 Fiction
   ENG 162 Drama
Majors who do not take the Fiction course (161) or the Drama course (162) must take an upper-level course in the omitted genre. For Drama, a course other than Shakespeare must be selected.

3. Writing Courses (3 credits required)
   ENG 209 Business and Report Writing may not be used to satisfy this requirement.

4. Classical and Biblical Backgrounds (3 credits required)

5. Linguistics and Related Courses (3 credits required)

6. Criticism Courses (3 credits required)

7. Major Figures (6 credits required)
   The two major figures courses should be selected as follows:
   3 or 6 credits from Chaucer (ENG 250), Shakespeare (ENG 260 or 261), or Milton (ENG 356); 0 or 3 credits from another major figure or major figures seminar.

8. Periods of Literature Courses (15 credits required)
   At least one course from five of the following six areas is required:
   Continental and World Literature; Medieval Period; Renaissance; Neo-classical and Romantic Periods; 19th Century British and American Literature; Modern British and American Literature. Major figure courses other than Shakespeare also fulfill Periods of Literature requirements.

9. Electives (credits in courses numbered above 160 to complete the 48-credit major required)

Note: The requirements of the English major program may be waived in favor of an interdepartmental major that is approved in advance by the English Department Curriculum Committee.

Prerequisites and Course Waivers

ENG 100 or 101, or an equivalent or waiver, is a prerequisite for any English language or literature course, including ENG 120. For English-major and general-interest courses numbered 130 to 199, ENG 100 or 101 (or an equivalent or waiver) and ENG 120 or permission of the instructor are prerequisites. For courses numbered 200 to 499, prerequisites are ENG 100 or 101 (or an equivalent or waiver), and ENG 120. Certain advanced courses, as indicated in the course listings, and all Independent Study courses require the instructor's permission.

Note: Non-majors and students with special interests are encouraged to seek the instructor's permission to take any course for which they feel qualified. ENG 120 may be waived for a few exceptional students who pass a qualifying examination administered by the English Department, and for transfer students with certain literature course credits. English majors may, with their advisor's approval, substitute a third genre course (ENG 161 or 162) or a second Classical and Biblical Backgrounds course for ENG 120.

The Honors Degree in English

For a B.A. degree in English with honors, a student must achieve a B+ or better average, and he or she must successfully complete a seminar where a major paper is required (or a department-approved Independent Study course if a suitable seminar is not being offered).

Minor in English

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor is 18.

The Department offers an English minor which requires 18 credits of upper-level (160 and above) courses in a program planned with an English faculty advisor and approved by the director of English Minor Programs. The goal of the program is to give students not simply a collection of courses, but a coherent experience with English courses chosen to suit their needs and interest, whether in literature generally, creative writing, American literature, language and composition, or another area of study.

Each program must meet these specific requirements beyond ENG 100/101 and ENG 120/122 (or waivers): a 200-level writing or language/
linguistics course; three 200-level literature courses (one must be selected from those numbered 220 to 265, one from 270 to 291); one 300- or 400-level course.

Further information about the minor is available in the English Department offices.

Teaching Specialties for Elementary Education

Students in elementary education in the College of Education may complete 30 hours of English in an approved program for an academic major or 18 approved hours for an academic minor. Details of such programs may be obtained from the appropriate faculty advisors in the College of Education.

Internships, Job Opportunities, and Exchange Programs

Students of English are encouraged to take advantage of a variety of internship opportunities as part of their program. Internships allow academic credit for work experiences that use and enhance English skills. Also, students are invited to discuss job opportunities for those with training in English, and to examine pamphlets and books on the subject, in the English office at Gorham.

English majors are encouraged to apply for semester or year-long exchanges in English departments at Whitelands College, London, and Nijmegen University, The Netherlands.

100-Level Courses

**ENG 100 College Writing**

Classes meet regularly to analyze professional and student writing as a way of sharpening awareness of how to use language effectively. The writing assignments encourage students to apply the principles discussed in class to their own work. To complete the course successfully, the student must pass a departmental exit examination. The exit examination is an integral part of the course; it may not be taken as a waiver examination. Passing the departmental examination does not, however, guarantee that the student will pass the course. Each instructor has his or her own standards. Students may not take both ENG 100 and 101 for credit. This course cannot be used to satisfy a humanities requirement. (Every semester). Prerequisite: writing proficiency. Cr 3.

**ENG 101 Independent Writing**

A course especially designed for the mature student who has been well prepared in writing by high school or previous experience and who has the discipline to work independently. The course is conducted primarily in individual weekly conferences, though classes meet occasionally. Independent Writing focuses on problems of style, presentation, and minor mechanical difficulties. To complete the course successfully, the student must pass a departmental exit examination as well as satisfy the requirements of the instructor. Student may not take both ENG 100 and 101 for credit. This course cannot be used to satisfy a humanities requirement. (Every semester). Prerequisite: writing proficiency. Cr 3.

**ENG 102 Term Paper Writing**

This course will teach the student to write a research paper. The choice of subjects will be worked out by instructor and student. The student will learn how to develop a topic, prepare a working bibliography, become familiar with library resources, take notes in an orderly and meaningful fashion, and then write a final paper after having polished a number of rough drafts. Cr 1.

**ENG 103 Basic Grammar and Usage**

This course is designed to teach the student current practice in grammar and usage as opposed to formal grammar. The student will master the many matters of agreement, punctuation, etc., needed in writing college papers. Cr 1.

**ENG 110 Straight and Crooked Thinking**

The analysis, interpretation, and evaluation of various kinds of arguments and ways to reach logical decisions, with a first-hand study of the reasoning found in editorials, political tracts, speeches, literary essays, scientific papers, and magazine articles. This basic course employs a new non-symbolic approach to practical reasoning expressed in natural language; its emphasis is on direct application to realistic cases. Exercises and readings are designed to aid undergraduates in reports, essays, and term papers. The ma-
terials for critical analysis have a broad appeal for future lawyers, administrators, executives, business people, and scholars. Regular oral reports; brief written exercises in critical reasoning and analysis; final examination based on actual specimens of contemporary argument. Prerequisite: ENG 100/101 or permission of instructor. Cr 3.

ENG 120 Introduction to Literature
A general introduction to the various literary genres—poetry, the short story, drama—which will include a study of critical terminology, close textual reading, and practice in writing. (Every semester). Prerequisite: ENG 100 or 101 or waiver. Cr 3.

ENG 130 The Literature of Sport
Contemporary fiction, poetry, and drama on The Game, its players and watchers, its heroes and losers, its joy and sadness reflected in the works of such writers as Cheever, Updike, Algren, Wain, Roth, Shaw, Schulberg, Wright, Ellison, McCullers, Dickey, Williams, Moore, Ferlinghetti, Sillitoe, and many others. The social and cultural implications of sports, now and in the immediate future, will also be weighed. These include the ritualistic side of competition and spectacle; the blurring of professional and amateur; flaws in America’s hero image; kid teams and adult ambitions; college conferences and academic standards; racism and nationalism in the Olympics; thrills, violence and gate receipts; winner-loser psychology; sex stereotypes; mass versus elite leisure; machismo politics and femnile. Readings will include two anthologies, a novel, a play, a collection of recent essays by social anthropologists. Cr 3.

ENG 131 The Literature of Business
The drama of business as reflected in the fiction of important writers like Twain, Norris, Dreiser, and Warren. The course will focus on significant moments and problems in America’s economic history and on the way these have been represented by writers who have concerned themselves with subjects like the exploitation of the West, the Robber Barons, manipulation in the stock market, and cycles of economic euphoria and disillusionment. Cr 3.

Eng 150 Topics in Literature
A selection of courses varying in content from term to term. Under consideration for coming semesters: Utopian Literature, Radicalism and Revolt in Fiction, Feminism in the World Novel, Native American Literature, and Popular Semantics. Descriptions of current offerings are available in the English office. More than one section may be taken for credit. Cr 3.

ENG 160 Poetry
An intensive course in the close reading of many of the most significant poems in English. Attention will be given to important elements of poetry, including versification and the use of metaphor; characteristics and conventions of poetry written in different periods, early and contemporary, will also be explored. Required of English majors and recommended for all students seeking to understand a principal area of our cultural heritage. (Every semester). Cr 3.

ENG 161 Fiction
An intensive course in the close reading of many kinds of fiction, with an emphasis on the tradition of psychological realism. The different styles and approaches to narrative that characterize writing by men and women in different eras, and the qualities that give superior writing its position of esteem in our culture, will be studied. (Every fall). Cr 3.

ENG 162 Drama
Significant representative plays from several periods, including the contemporary, will be studied. Conventions of stagecraft at different points in the drama’s history will be explored, and attention will be given to how dramatic and literary techniques, like the use of action, stage effects, and dialogue, contribute to the often profound meanings that plays can convey. (Every spring). Cr 3.

Writing Courses

ENG 200 Advanced Essay Writing
Study of various forms of discourse with concentration on exposition. Provides experience in logical analysis and in the uses of persona, appeals to the reader, stylistic and fictional devices, and other strategies. (Every semester). Prerequisite: a grade of B in ENG 100 or 101, or permission of the instructor. Cr 3.

ENG 201 Creative Writing
An introduction to the principles and practice of writing fiction, poetry, and drama. Emphasis is on fresh observation and meaningful selection of concrete details and their uses in the different genres. Recommended for beginners. (Every semester). Prerequisites: ENG 100 or 101 and ENG 120. Cr 3.

ENG 202 Fiction Writing
A course for those who have already, in a course such as Creative Writing or on their own, written several pieces of fiction and are ready for more advanced work. Emphasis will be on writing well-developed short stories and on understanding the basic elements of fiction. A better-than-average competence

ENG 203 Poetry Writing
A course for those who, in a creative writing course or on their own, have developed basic skills of careful, thoughtful observation and a preference for concrete details to convey emotional meanings, and who are interested in developing a sense of how poetry has been written in the past by major poets and how it is being created in the present. Emphasis will be on imitation of past and present writers and exercises that stress the elements of poetry, as well as on the development of personal approaches. Suggested preparation: ENG 201. (every semester). Cr 3.

ENG 204 Playwriting
A lecture-practicum course designed to acquaint the student with playwriting principles. Emphasis is placed on the one-act play form. Students will be required to complete a series of creative exercises culminating with writing a one-act play. Prerequisites: THE 101 and THE 361 or 362 or 363. This course is also listed as THE 335. Cr 3.

Journalism Courses

ENG 210 Newswriting
This course includes news and feature writing with intensive practice in journalistic-writing techniques, accuracy, judgment, and style. (every fall). Prerequisite: ENG 100/101. Cr 3.

ENG 310 Advanced Newswriting
A continuation of Newswriting. (every spring). Cr 3.

ENG 410 Independent Study in Journalism
Cr var.

Classical and Biblical Backgrounds

ENG 220 Ancient Masterpieces
A study of selected major works of classical times which will provide students with a background for understanding the most influential books of our culture. Included are Homer, Plato, Greek dramas, Virgil. (every semester). Cr 3.

ENG 222 The Bible
The Bible, the single most influential work (or group of works) in Western culture, will be considered as a literary text. Under such headings as plot, character, genre, theme, and symbol, the Old and New Testaments in the Authorized or King James translation will be examined, with emphasis on the books which have had the greatest literary influence (e.g., Genesis, Exodus, Job, Matthew, Luke, Revelation). The course will also discuss the history of the text, translation, and influence. (every fall). Cr 3.

CLA 283 The Epic Hero in Ancient Literature
Intensive readings in English translations of Gilgamesh, Iliad, Odyssey, Argonautica, Aeneid; discussion, papers. Cr 3.

CLA 284 The Tragic Hero in Ancient Literature
Intensive reading of selected plays in English translation by Aeschylus, Sophocles, Euripides, Seneca; discussion, papers. Cr 3.

The following Foreign Languages and Classics courses carry English major credit as electives. Note that these courses cannot count both toward the English major and toward the Core curriculum requirement.

CLA 291 The Golden Age of Greece
CLA 292 Rome, from Republic to Empire
FRE 281 Masterpieces of French Literature I
FRE 282 Masterpieces of French Literature II
FRE 283 Contemporary French Thinkers
FRE 284 Avant-Garde Theatre in France
FRE 285 18th-Century Literature in France and England

ENG 209 Business and Report Writing
Primarily for juniors and seniors majoring in business administration. Training in clear and effective writing of formal reports, business communications, and related materials. (every semester). Cr 3.

ENG 302 Fiction Workshop
An advanced course requiring the completion of short stories or a substantial part of a novel. Prerequisites: ENG 202 and instructor's permission. May be repeated for 3 additional credits with instructor's permission. Cr 3.

ENG 303 Poetry Workshop
A course for advanced students who, after experimenting with different approaches and styles, are developing their own themes and voices as poets. Work toward a completed chapbook-length manuscript of high-quality work will be the basis for the course grade. Prerequisites: ENG 203 and instructor’s permission. May be repeated for 3 additional credits with instructor’s permission. Cr 3.

ENG 400 Independent Study in Creative or Expository Writing
Cr var.
Linguistics and Related Courses

ENG 230 History of the English Language
This course includes a survey of the prehistory of the language as well as a detailed study of the Old, Middle, and Modern English and the forces which shaped these stages. Some methods of modern linguistic science are utilized in examining current usage. Change and development of the language are emphasized. (every fall). Cr 3.

ENG 231 Modern Grammars
Designed to acquaint students with the three most common forms of English grammatical analysis: traditional, structural, and transformational. The mechanics of the various analyses will be examined, and comparisons will be made to determine what tentative combination best explains the structure of English. (alternate springs). Cr 3.

ENG 232 Introduction to Linguistics
A general introduction to modern linguistic science, including studies in the development of language, phonology, morphology, the dictionary, and varieties of English usage. Also examined are the various grammatical philosophies and their methods—traditional, structural, and transformational. (alternate springs). Cr 3.

ENG 233 Structural Linguistics
The course first analyzes the structure of many languages: i.e., Mexican and Central American Indian languages, including dialects of Chontal, Aztec, Mayan. The course uses the acquired analytical skills to explore the nature of language itself. (alternate falls). Cr 3.

ENG 234 Semantics
Interpretation of literature by means of analysis of the language used. Recommended for prospective teachers of literature and English. (alternate falls). Cr 3.

ENG 333 Structural Linguistics and Culture
The course analyzes the languages and culture (art, religion, poetry) of pre-literate societies, particularly the American Indian. Cr 3.

ENG 430 Independent Study in Linguistics
Cr var.

ENG 431 Seminar in Linguistics
An advanced course focusing on specialized problems in language study, including Old English. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: Old English, Beowulf, Modern Linguistic Theorists. Cr 3.

Criticism Courses

ENG 240 History of Literary Criticism
A study of the great literary critics, their methods and approaches, from Plato and Aristotle to the present day. Among the many figures included are Sidney, Johnson, Coleridge, Arnold, and T.S. Eliot. (alternate springs). Cr 3.

ENG 341 Critical Approaches to Literature
This course will provide a basic introduction to the major critical interpretative perspectives indispensable for the sensitive reader (moral, philosophical, formalistic, psychological, mythological, archetypal, and exponential). It will be structured around a close reading of specific works from several genres. It will also study literary terms, prosody, prose style, and the relation of literature to the other arts. (alternate springs). Cr 3.

ENG 440 Independent Study in Criticism
Cr var.

ENG 441 Seminar in Critical Studies
An advanced course focusing on specific problems or historical movements in literary criticism. Emphasis is on applying various scholarly approaches to important, limited subjects. Typical subjects: myth and myth criticism, psychoanalytic theory as myth. Cr 3.

Continental and World Literature

ENG 225 Continental Masterpieces
A study of some of the masterworks of medieval and renaissance culture, including Dante's Divine Comedy and Cervantes' Don Quixote. (every spring). Cr 3.

ENG 325 Medieval Epic and Romance
The development of medieval traditions of epic and romance with readings of major works from England, Germany, France, Spain, and Italy (in translation). Focus of the
course varies; it may be taught as an Arthur­
ian literature course, for example. (3-year cy­
acle, spring). Cr 3.

ENG 326 Satire
A thorough exploration of its backgrounds in
Classical literature and an attempt to define
satire as a mode will be followed by discussion
of important satires in English and other
languages. Cr 3.

ENG 327 Modern Short Story: Themes and
Methods
Detailed consideration of from six to ten
short story collections reflecting contempo­
rary themes and narrative methods. Al­
though selections will vary, the recent reading
list has included Jorge Luis Borges, Franz
Kafka, Anton Chekhov, James Joyce, Tho­
mas Mann, Virginia Woolf, and Isaac Babel.
A necessarily wide range of themes are con­
fronted: the corruption of reality by dream;
personal inadequacy, alienation, and para­
noia; self-deceit; varieties of ignorance and
cowardice; the moral insight afforded the
artist; violence as a mode of self-discovery.
Students are responsible for a term paper, a
classroom report, and weekly review of some
critical article. Prerequisite: junior class
standing or permission of the instructor. (al­
ternate springs). Cr 3.

Medieval Period

ENG 250 Chaucer and the Medieval World
An exploration of Chaucer's historical, philo­
sophical, and literary world through his ma­
jor comic narrative, Canterbury Tales.
(every fall). Cr 3.

ENG 350 Medieval English Literature
A survey of genres popular from the twelfth
to the fifteenth centuries (including debates,
lyrics, romances, allegories, drama), with
emphasis on the literature of fourteenth­
century England. Major readings will in­
clude Chaucer's Troilus, the Pearl, and Sir
Gawain and the Green Knight. (3-year cycle,
spring). Cr 3.

ENG 352 Medieval Drama
This course will introduce the theatre of the
medieval world, which ranges from the li­
turgical, ritual drama of the church, to the
morality plays, performed by traveling com­
panies, and the mystery cycles, produced by
civic and guild pride in the 15th century. At­
tention will be paid to the aesthetic and theo­
logical principles underlying this conjunction
of farce and high seriousness in the plays as
well as to distinctly medieval techniques of
staging and production. (3-year cycle,
spring). Cr 3.

ENG 450 Independent Study in Medieval
Literature
Cr var.

ENG 451 Seminar in Medieval Studies
An advanced course focusing on individual
writers or particular literary themes or prob­
lems. Emphasis is on applying various critical
and scholarly approaches to important, lim­
ited subjects. Typical subjects: Continental
humanism, Dante, Continental influences on
English literature. Cr 3.

Renaissance

ENG 255 The English Renaissance
A study of the principal writers of the English
Renaissance exclusive of Shakespeare, with
emphasis on major figures like Spenser,
Donne, and Milton, but with some attention
to other figures. (every fall). Cr 3.

ENG 356 Milton
Study of Milton's major poetry and selected
prose with attention to critical and historical
background. (every spring). Cr 3.

ENG 357 British Drama to 1642
Shakespeare's predecessors, contemporaries,
and followers to 1642. (3-year cycle, fall). Cr 3.

ENG 455 Independent Study in Renaissance Literature Cr var.

ENG 456 Seminar in Renaissance Studies
An advanced course focusing on individual

Shakespeare

ENG 260, 261 Shakespeare
ENG 260 and 261 each feature close readings of approximately seven of Shakespeare's plays, and focus attention both on philosophical and theatrical meanings. The division of plays within the two courses is largely arbitrary. Its intent is to permit students to take a second course in Shakespeare without repeating the readings of the first course. Neither course is introductory or prerequisite to the other. The main difference is that ENG 260 will include a section on the major history plays (Richard II; 1, 2 Henry IV); ENG 261 will include a section on the dramatic fairytales or "romances" that Shakespeare wrote at the end of his career (The Winter's Tale; The Tempest). Beyond that the courses will include the following major plays assigned to each course:

ENG 260: As You Like It, Twelfth Night, Hamlet, Macbeth. (every fall). ENG 261: Romeo and Juliet, Midsummer Night's Dream, Othello, King Lear. (every spring).

Each course: Cr 3.

ENG 460 Independent Study in Shakespeare Cr var.

ENG 461 Seminar in Shakespeare Studies
An advanced course in Shakespeare which emphasizes the application of various critical and scholarly approaches to important aspects of the poet and dramatist's work. Typical subjects: allegorical elements in Shakespeare's plays, Shakespeare and the daemonic. Cr 3.

Neoclassical and Romantic Periods

ENG 265 The Neoclassical Age
The principal writers from the Restoration to the Romantic Period are studied. Emphasis is on the achievements of major figures, including Dryden, Pope, Swift, and Johnson. (alternate fall). Cr 3.

ENG 366 Restoration and 18th-Century Drama
A study of Restoration and early 18th-century drama with emphasis on innovations in the post-Elizabethan theatre and on changing definitions of the tragic and comic hero. Playwrights studied will include Davenant, Dryden, Otway, Etherege, Shadwell, Cibber, Wycherley, Congreve, Farquhar. (3-year cycle, fall). Cr 3.

ENG 369 The Earlier English Novel
The principal novelists from Defoe through Smollett. Cr 3.

ENG 465 Independent Study in the Neoclassical Period

Cr var.

ENG 466 Seminar in Neoclassical Studies
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: Swift, the poetry of Alexander Pope, Thomas Gray, and the poets of sensibility. Cr 3.

ENG 270 Major Romantic Writers
A study of the major British poets and essayists of the Romantic period (approximately 1785-1832) and of the nature of the Romantic movement. Readings selected from among Blake, Burns, Wordsworth, Coleridge, Keats, Byron, Shelley, Lamb, DeQuincey, Beddoes, Hunt, Peacock, etc.; also Mary Shelley's Frankenstein. (alternate fall). Cr 3.

ENG 370 Fiction of the Romantic Period
The novels of Jane Austen; readings in Murat, Peacock, Edgeworth, Lewis, Godwin, Mary Shelley, Scott. (alternate spring). Cr 3.

ENG 470 Independent Study in the Romantic Period

Cr var.

ENG 471 Seminar in Romantic Studies
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: William Blake, the gothic novel, Wordsworth and Coleridge. Cr var.
Nineteenth-Century British and American Literature

ENG 275 Eminent Victorian Writers
Major writers of the Victorian era, including Tennyson, Browning, Arnold, George Elliot, Harriet Martineau, Thackeray, and Dickens are studied; attention is given to Victorian controversies; emphasis is on the novel as the greatest achievement of the period. (every fall). Cr 3.

ENG 285 Earlier Women Writers
The aim of this course is twofold, to introduce students to the wealth of major works by women writers and to consider in detail the voices of women on women and society. Women novelists and poets have explored the entire range of human experience, of social, political, and philosophical issues as well as personal experience. This course will discuss the ways in which they have treated such issues as they relate to women's own lives. Although specific content may vary from semester to semester, the course will introduce students to the wealth of major works by women writers and consider the voices of women on women and society. Readings are likely to emphasize nineteenth-century writers like Jane Austen, George Eliot, Charlotte Bronte, and Elizabeth Gaskell. (alternate spring). Cr 3.

ENG 280 The American Renaissance
Major American writers of the mid-19th century. Includes critical study of major works by Emerson, Thoreau, Hawthorne, Melville, Whitman, and Dickinson with attention to the social and literary backgrounds. (alternate fall). Cr 3.

ENG 375 The Victorian Novel
The principal novelists from Austen to Hardy. (alternate spring). Cr 3.

ENG 377 Victorian Poetry
Extensive reading in the poetry of Tennyson, Browning, Arnold, Swinburne, Clough, the Rossettis, Meredith, Morris, Hardy, Hopkins, and Housman. Lectures and class discussions will involve several critical approaches—biographical, sociological, psychological, archetypal, symbolical, formalistic and exponential. Collateral readings in 19th-century intellectual history—the Romantic revolt, the Industrial readings, the science-religion debate, aestheticism, artistic alienation, Utilitarianism, and Darwinism. Brief oral reports and two short papers. (alternate spring). Cr 3.

ENG 475 Independent Study in the Victorian Period
Cr var.

ENG 476 Seminar in Victorian Studies
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Cr 3.

ENG 280 The American Renaissance
Major American writers of the mid-19th century. Includes critical study of major works by Emerson, Thoreau, Hawthorne, Melville, Whitman, and Dickinson with attention to the social and literary backgrounds. (alternate fall). Cr 3.

ENG 381 Colonial American Literature
A study of early American writers of religious prose, fiction, and poetry. A course in early American history is recommended background. Cr 3.

ENG 382 The Earlier American Novel

ENG 389 Writers of Maine
Historical and literary analysis of writers in and about Maine. The emphasis will be on the literary quality of the best-known men and women writers and the place in history both past and present of the lesser-known writers. Extra credit in the course will be given for a report about any off-campus project related to an author and a particular locality in Maine. English majors should have already taken a survey of American literature; prospective teachers will prepare an annotated bibliography of one author of their choice. (every year). Cr 3.

ENG 480 Independent Study in American Literature
Cr var.

ENG 481 Seminar in Earlier American Literature
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: backgrounds of American thought, Hawthorne and Melville, Twain and James, Thoreau. Cr 3.

Modern Literature

ENG 290 The Modern Age: British
The purpose of this course is to define and discuss the nature of Modernism as it developed in 20th-century Britain. Both technical change and innovation and changes in themes and attitudes will be considered.

What kind of world, for example, does a poem like The Waste Land or a novella like Heart of Darkness portray? What assumptions underlie them? What changes in poetic narrative form do they demand? The class will emphasize early Modern (pre-World
War II) but will attempt to discover, as well, how contemporary British literature has developed since then. The course will include such writers as Joyce, Conrad, Yeats, MacDiarmid, Woolf, Lessing, and Beckett. (alternate fall).

ENG 291 The Modern Age: American
The purpose of this course is to examine the nature of Modernism as it developed in 20th-century America. Early precursors such as Whitman and Twain will be considered with a view to determining what special issues and techniques developed to express an American Experience. Emphasis, however, will be on major recent writers such as Faulkner, Hemingway, Fitzgerald, Pound, Williams, Katherine Anne Porter, Flannery O'Connor, and selected contemporary poets. (alternate fall). Cr 3.

ENG 295 Contemporary Women Writers
The focus of the course is on 20th-century novelists and/or poets. Specific readings and thematic approaches will vary depending on instructor. The course has been taught, for example, with an emphasis on the regional and ethnic cultures from which American women writers come, reading works by Kate Chopin, Willa Cather, Eudora Welty, Alice Walker, Toni Morrison, Maya Angelou, Leslie Silko, Maxine Kingston, Grace Paley, and Anne Sexton. (alternate spring). Cr 3.

ENG 290 Modern British Poetry
Modern British poetry has taken diverse forms and concerns itself with a wide range of themes. This course, however, will focus on two or three selected major figures such as Hardy, Yeats, Eliot, MacDiarmid, Auden, and Thomas with the aim of placing them in the larger context. The class will examine and discuss early changes in poetic forms, the impact of World War I poets and the Georgians, the developments in contemporary Britain. The primary focus will then be to consider in depth the two or three major figures, defining what determines their particular voice and vision of reality. The selected poets will vary with the semester. (alternate spring). Cr 3.

ENG 391 Modern American Poetry
This course will focus on two or three major poets such as Stevens, Frost, Marianne Moore, Pound, and Williams. The course will also, however, seek to place them in a historical perspective, both in technical development and specifically American themes and conceptions of reality. There will be some examination of poets like Whitman and Dickinson, who stand at the beginning of modern American poetry, as well as contemporary poets like Strand, Snyder, Kinnell, and Bly. The primary focus will then be to examine the selected figures against the broader context, with the purpose of defining their unique voices and forms. The selected poets will vary with the semester. (alternate spring). Cr 3.

ENG 392 Twentieth-Century British Novels
Selected novels from the late 19th century to the present. (alternate fall). Cr 3.

ENG 393 Twentieth-Century American Novels

ENG 394 Experimentation in Modern Poetry
This course explores the tradition of experimentation in modern poetry from Rimbaud to the present day. It draws from a range of figures such as Cavafy, Ponge, and Calvino in an effort to bring into focus the achievement of such English and American figures as Eliot, Williams, Auden, Moore, and contemporaries like Dorn and Berryman. Cr 3.

ENG 397 American Drama
A study of the drama in the United States. A brief history of early American playwrights followed by a close study of major figures, with O'Neill as the center. Others: Maxwell Anderson, Robert Sherwood, Tennessee Williams, Arthur Miller, and Edward Albee. (This course is also listed as THE 460). Cr 3.

ENG 398 The Southern Renaissance

ENG 490 Independent Study in Modern Literature
Cr var.

ENG 491 Seminar in Modern British Literature
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: Joyce's Ulysses, modern Scottish literature. Cr 3.

ENG 492 Seminar in Modern American Literature
An advanced course focusing on individual writers or particular literary themes or problems. Emphasis is on applying various critical and scholarly approaches to important, limited subjects. Typical subjects: the image of Blacks in American literature, the fugitive poets, Fitzgerald, Hemingway, and Faulkner. Cr 3.
Experimental Courses

Occasionally the English Department offers special courses not listed individually in the catalog. They appear in the current Schedule of Courses under the designation 199, 299, 399, or 499. Such courses will usually be experimental: pursuing original research, testing new alignments of figures or materials, or trying out courses before including them in the department curriculum.

Foreign Languages and Classics

Chair of the Department: Mara Ubans, 514 Luther Bonney Hall, Portland
Professor Duclos; Associate Professors: Crochet, Dalvet, di Benedetto, Lepelley, Rolfe, Ubans; Assistant Professor Plasencia

A foreign language major offers a uniquely rich and diverse humanities background. The study of languages sensitizes us to other cultures and the relativity of values, it frees us from the confines of monolingualism and provincialism, it increases our understanding of and competence in our native language and, most important, it is an inquiry into language as language: the structure, system, code by which we interpret the world to ourselves and others. Through in-depth study of literature we develop skills of close reading and literary analysis, and in composition courses we hone our writing skills.

A foreign language is also a valuable and marketable skill in many professions, especially international relations and trade, government service, travel, social services, the arts, and teaching.

The Department offers a major in French and broader, interdepartmental majors in foreign languages, classical studies, French studies, German studies, and Hispanic studies. Also classics, French, German, and Spanish minors are available which augment other majors in the College of Arts and Sciences. Courses in Italian are offered on a regular basis. The Department also offers a number of courses in English translation requiring no knowledge of a foreign language and open to any student interested in foreign or classical literature and civilization. These courses are numbered 281-299. Courses in this category may be credited towards a major or a minor in the Department if the readings, exams, and papers are done in the target language.

Independent study courses, numbered 470, are available to qualified students with the permission of the instructor and the department chair.

Policies

Beginner courses (101-102) are for students who have never studied the language. Courses numbered 103 are a review of this beginner’s level. Intermediate level courses (201-202 for modern languages, 251-252 for the ancient languages) are for students with two successful years of high school language study. Those whose background does not fit any of these categories, especially Franco-Americans and students with Hispanic, German, or Italian backgrounds, should consult an instructor in the language before registering. Courses numbered 105-206 give students a reading proficiency in French or German for research in their field, grad-
uateschool language requirements, or cultural enjoyment.

It is the policy of the Department that a student may receive 6 credits but no more for the elementary and intermediate levels each. The courses can be taken in any combination. (This does not apply to students in FRE 107-108.) Elementary level: any two courses from 101, 102, 103, or 105. Intermediate level: any two from 201, 202, or 206.

The Department grants credit in French, German, Greek, Latin, and Spanish to an enrolled student who presents evidence of competency in one of those languages by completing the appropriate Advanced Placement Examination of the College Entrance Examination Board. For more details, contact the chair of the Department.

Language Laboratory

The language laboratory is located on the Portland campus in Payson Smith Hall, Room 203, and is open every weekday from 9 a.m. to 3 p.m. Students enrolled in beginner’s or intermediate courses may register for supervised language practice amounting to a minimum of one hour a week in the laboratory; they will receive one extra credit (on a pass/fail basis) for regular and active attendance. Since the work done in the language lab is coordinated with classroom work, only the students enrolled in a language course can take the corresponding lab section for credit. Credit for the lab is granted only if the student passes the course. Any exception to this has to be approved by the chair of the Department. All students are welcome to use the language lab facilities for their own purposes, without credit.

Students are also urged to get extra practice in French, German, Italian, and Spanish by participating in informal conversation tables sponsored by the Department. Tutoring is available, often at no cost to the student. For information, see the Department secretary in Luther Bonney 411.

All major programs in the Department of Foreign Languages and Classics require that the student fulfill the requirements of the Core curriculum.

Bachelor of Arts in French

The minimum number of credits (exclusive of the University’s Core curriculum) required for the major: 36.

Core Course (to be announced by the Department)

Language

FRE 321 French Composition/Workshop in Writing French
FRE 323 French Conversation/Workshop in Speaking French

FRE 465 Survey of French Literature

Electives (or any two of the above courses)

FRE 221 Practice in Writing
FRE 223 Practice in Conversation
Summer and junior year studies in France or French Canada are encouraged and acknowledged by transfer of credits.

All majors already engaged in studies of French literature should maintain an active effort to reach fluency in speaking French through constant practice, use of the language laboratory, and participation in informal conversation tables. They are expected to have reached proficiency in speaking and writing French before their graduation.

Each student’s progress will be reviewed periodically by the French faculty. All majors must achieve at least 12 credits of B or better grades in their major courses. No grade of D will count toward fulfillment of a French major.

**Group Contract in Foreign Languages**

The group contract major of the College of Arts and Sciences provides students with a flexible opportunity to tailor their major to their interests and needs in foreign language study. The following group contract majors are offered:

- **Foreign Languages**
- **Classical Studies** (concentration in either Greek or Latin)
- **French Studies**
- **German Studies**
- **Hispanic Studies**

Please refer to p. 52 of this catalog or contact the chair of the Department of Foreign Languages and Classics for additional information.

**Minors**

The minimum number of credits (exclusive of the University’s Core curriculum) required for the minor: 9.

Since the knowledge of a foreign language, or languages, is valuable to all majors in other CAS disciplines, the Department offers minor programs in Classics (Latin or Greek), French, German, and Spanish. A given program consists of nine credits at the 300 level (200 level in classics) or above, selected from the following courses:

- **Classics Minor (Greek)**
  - GRE 251, 252, 310; CLS 291
- **Classics Minor (Latin)**
  - LAT 251, 252, 310; CLS 292
- **French Minor**
  - FRE 321, 323, 305, 361, 362 or 363
- **German Minor**
  - GER 321, 322, 351, 352, 281
- **Spanish Minor**
  - SPA 321, 322, 351, 352

**Literature and Civilization in English Translation**

- **CLA 283 The Epic Hero in Ancient Literature**
  - Intensive readings in English translations of *Gilgamesh, Iliad, Odyssey, Argonautica, Aeneid*; discussion, papers. Cr 3.

- **CLA 284 The Tragic Hero in Ancient Literature**
  - Intensive reading of selected plays in English translation by Aeschylus, Sophocles, Euripides, Seneca; discussion, papers. Cr 3.

- **CLA 291 The Golden Age of Greece**
  - The literature, history, politics, philosophy, art, and architecture of the fifth century B.C. with particular attention to the achievements of Athens. Lectures, discussion, papers, museum trip. Cr 3.

- **CLA 292 Rome, from Republic to Empire**
  - The literature, history, politics, philosophy, art, and architecture of Rome in the first century B.C. Lectures, discussion, papers, museum trip. Cr 3.

- **FRE 281 Masterpieces of French Literature I**
  - Novels and plays representative of French literature from the beginning of the 19th century to the present. No knowledge of French is necessary. Cr 3.

- **FRE 282 Masterpieces of French Literature II**
  - Novels and plays representative of French literature from the Middle Ages to the end of the 18th century. No knowledge of French is necessary. Cr 3.
FRE 283 Contemporary French Thinkers
Readings and discussion of recent works of French literature selected for their philosophical and ethical importance: Saint-Exupéry, Sartre, Camus, de Beauvoir, Teilhard de Chardin and others. No knowledge of French is necessary. Cr 3.

FRE 284 Avant-Garde Theatre in France
Study of plays and theoretical texts in English translation from Jarry to Beckett. No knowledge of French is necessary. Cr 3.

FRE 285 18th-Century Literature in France and England
A study of the emergence of the bourgeoisie and its relationship to literature in 18th-century France and neighboring countries. The social and moral evolution of the family, sentimentality, and middle class revolt will be discussed. Special attention will be paid to the literary interchange between France and England. Readings in Prevost, Marivaux, Rousseau, Diderot, Richardson, Goldsmith, Sterne, Goldoni. (In English). Cr 3.

Classics: Greek and Latin
GRE 101 Beginning Greek I

GRE 102 Beginning Greek II
Selections from Euripides’ Alcestis. Prerequisite: GRE 101. Cr 3.

GRE 251 Introduction to Greek Literature I
A study of Plato’s Apology, Crito and selections from the Phaedo. Prerequisite: GRE 102 or equivalent. Cr 3.

GRE 252 Introduction to Greek Literature II
A study of selected books from Homer’s Iliad or Odyssey. Prerequisite: GRE 251. Cr 3.

GRE 310 Seminar in Greek Literature
Readings in Greek prose and poetry; a different author will be read each semester. Translation, supplementary reading, paper. Prerequisite: GRE 252. Cr 3.

GRE 470 Independent Study

LAT 101 Beginning Latin I

LAT 102 Beginning Latin II
Continuation of LAT 101. Cr 3.

LAT 251 Introduction to Latin Literature I
Selected readings from masters of Latin prose and poetry. Prerequisite: LAT 102 or equivalent. Cr 3.

LAT 252 Introduction to Latin Literature II
Continuation of LAT 251. Cr 3.

LAT 310 Seminar in Latin Literature
Readings in Latin prose and poetry; a different author will be read each semester. Translation, supplementary reading, paper. Prerequisite: LAT 252. Cr 3.

LAT 470 Independent Study

French
FRE 101 Beginning French I
Beginner’s course in French. Initiation in the four skills of language learning: listening comprehension, speaking, reading, and writing. Students are encouraged to register also for laboratory practice (one more credit). Cr 3. (With lab, Cr 4.)

FRE 102 Beginning French II
Continuation of FRE 101. Cr 3. (With lab, Cr 4.)

FRE 291 French Civilization: An Historical Approach
Aspects of the society, institutions, arts, literature, and religion of France, from the origins to the end of the 19th century. No French is spoken in the classroom. Cr 3.

FRE 292 French Civilization: Contemporary France
Institutions, education, society, economy, politics of France. No French is spoken in the classroom. Cr 3.

GER 281 The German Novelle
The study of the genre of the novelle and its development through the major literary movements from the early nineteenth century to the present. Authors read vary, but normally include Goethe, Tieck, E. T. A. Hoffmann, Kleist, C. F. Meyer, Storm, Musil and Mann. No knowledge of German is necessary. Cr 3.

SPA 281 Masterpieces of Spanish Literature
The study of fiction, poetry, and essays representative of Hispanic literature of the 19th and 20th centuries. No knowledge of Spanish is necessary. Cr 3.

FRE 103 Review of Elementary French
Elementary French for students with some previous study of the language who feel the need for a refresher course before entering FRE 201. Cr 3.

FRE 105 Reading French
Beginner’s course in French aiming exclusively at a reading knowledge of the language. No French spoken. Recommended also as preparation for language tests required by graduate schools. Cr 3.
FRE 107-108 Intensive Beginning French
Intensive beginner's course, in the four skills of language learning: listening comprehension, speaking, reading and writing, with abundant opportunity for conversation in the classroom and for laboratory practice. The course meets every weekday for a 50-minute period. Cr 5.

FRE 201 Intermediate French I
Review of grammatical structures. Further development of listening comprehension, speaking, reading and writing skills. Students are encouraged to register also for laboratory practice (one more credit). Prerequisite: FRE 102, FRE 103, or two years of high school French. Cr 3. (With lab, Cr. 4.)

FRE 202 Intermediate French II
Continuation of FRE 201. Cr 3. (With lab, Cr 4.)

FRE 206 Readings in French
Further practice of the skill acquired in FRE 105 through an accelerated reading of books on various topics (fiction, history, science, etc.). Prerequisite: FRE 105, 102, 103, or instructor's permission. Cr 3.

FRE 221 Practice in Writing
Advanced study of the French language. Proficiency in writing, vocabulary development and idiomatic expression are the objectives of the course. Prerequisite: FRE 202 or equivalent. Cr 3.

FRE 223 Practice in Conversation
Intensive oral practice, expository reports, debates, class discussions. Prerequisite: FRE 202 or equivalent. Cr 3.

FRE 251 Introduction to French Literature
Reading and discussion of representative literary works in the major genres (novel, drama, poetry). Techniques of close reading and explication de texte are studied. Designed to give a general background for the major as well as to provide a representative sampling for the non-major. Prerequisite: FRE 201 or equivalent. Cr 3.

FRE 305 French Phonetics
A formal study of the French sound system and an initiation into phonetic transcription with practical and remedial work in pronunciation. Prerequisite: FRE 202 or equivalent. Cr 3.

FRE 321 Workshop in Writing French
Practice of free composition and translation. Prerequisite: FRE 221 or equivalent. Cr 3.

FRE 323 Workshop in Speaking French
Practice of French conversation for advanced students. Prerequisite: FRE 223 or equivalent. Cr 3.

FRE 361 The French Novel
A study of novels and short stories, especially of the 19th and 20th centuries, and of the various critical approaches to fiction. Prerequisite: FRE 251 or equivalent. Cr 3.

FRE 362 French Poetry
A study of works by famous French poets and of the critical approaches to French poetry. Prerequisite: FRE 251 or equivalent. Cr 3.

FRE 363 The French Theatre
A study of representative works by the major playwrights of France in the classical, romantic, and modern periods and of critical approaches to drama. Prerequisite: FRE 251 or equivalent. Cr 3.

FRE 460 Quebecer Literature
Reading and discussion of novels, short stories, poems, and plays by contemporary French Canadian writers Gabrielle Roy, Gérard Bessette, Jacques Godbout, M. Claire Blais, Marcel Dube, Saint-Dénis Garneau, Alain Grandbois, and P. M. Lapointe. Prerequisite: FRE 231. Cr 3.

FRE 461 17th-Century Literature
A seminar in 17th-century French literature based on selected themes which will vary each time the seminar is offered. The theme will be announced the year that the course is given. Cr 3.

FRE 462 18th-Century Literature
A study of the critical and revolutionary thought of the major 18th-century French thinkers (Montesquieu, Voltaire, Rousseau, Diderot) in an attempt both to define the role of the Enlightenment in the downfall of the Ancien Régime and to determine its place in the history of ideas. Cr 3.

FRE 463 19th-Century Literature
A seminar in 19th-century French literature based on selected themes which will vary each time the seminar is offered. The theme will be announced the year that the course is given. Cr 3.

FRE 464 20th-Century Literature
A seminar in 20th-century French literature based on selected themes which will vary each time the seminar is offered. The theme will be announced the year that the course is given. Cr 3.

FRE 465 Survey of Literature
An opportunity for senior students to review and complete their previous studies of French literature by surveying its development and styles through the centuries. Cr 3.

FRE 470 Independent Study
GER 101 Beginning German I
Beginner's course in German. Initiation in the four skills of language learning: listening comprehension, speaking, reading, and writing. Students are encouraged to register also for laboratory practice (one more credit).
Cr 3. (With lab, Cr 4.)

GER 102 Beginning German II
Continuation of GER 101.
Cr 3. (With lab, Cr 4.)

GER 103 Review of Elementary German
Elementary German for students with some previous study of the language who feel the need for a refresher course before entering GER 201. If possible, register also for laboratory practice (one more credit).
Cr 3. (With lab, Cr 4.)

GER 105 Reading German I
Elementary course in German aiming exclusively at a reading knowledge of the language. No German spoken.
Cr 3.

GER 201 Intermediate German I
For students who have completed GER 102 or 103 or the equivalent. Review of grammar. Classroom practice aiming at fluency in speaking and reading. Students are encouraged to register also for laboratory practice (one more credit). Prerequisite: GER 102 or 103.
Cr 3. (With lab, Cr 4.)

GER 202 Intermediate German II
Continuation of GER 201.
Cr 3. (With lab, Cr 4.)

GER 206 Reading German II
Further practice of the reading skill acquired in GER 105. Recommended also as preparation for language tests required by graduate schools. Prerequisite: GER 105, 102, 103 or instructor's permission.
Cr 3.

GER 321 Composition and Conversation in German I
Systematic training in correct pronunciation and usage, and in vocabulary building, with written and oral practice. Prerequisite: GER 202 or equivalent.
Cr 3.

GER 322 Composition and Conversation in German II
Continuation of GER 321. Reading and discussion of historical, journalistic, and literary material covering life in Germany from World War I to the present. Prerequisite: GER 321 or equivalent.
Cr 3.

GER 351 Introduction to German Literature I
Reading and discussion of selected works representing the major literary movements from Enlightenment to Realism. Readings are in German; class discussions and exams are in English. Prerequisite: GER 202 or GER 106 or an equivalent reading ability of German.
Cr 3.

GER 352 Introduction to German Literature II
Reading and discussion of selected works representing the major literary movements from Naturalism to the present. Readings are in German; class discussions and exams are in English. Prerequisite: GER 202 or GER 106 or an equivalent reading ability of German.
Cr 3.

GER 470 Independent Study

ITA 101 Beginning Italian I
Beginner's course in Italian. Initiation in the four skills of language learning: listening comprehension, speaking, reading, and writing.
Cr 3.

ITA 102 Beginning Italian II
Continuation of ITA 101.
Cr 3.

ITA 201 Intermediate Italian I
Reading of short stories and essays reflecting the wealth and variety of Italian culture. Classroom practice of conversation. Prerequisite: ITA 102.
Cr 3.

ITA 202 Intermediate Italian II
Continuation of ITA 201.
Cr 3.

SPAN 101 Beginning Spanish I
Beginner's course in Spanish. Initiation in the four skills of language learning: listening comprehension, speaking, reading, and writing. Students are encouraged to register at the same time for laboratory practice (one more credit).
Cr 3. (With lab, Cr 4.)

SPAN 102 Beginning Spanish II
Continuation of SPA 101.
Cr 3. (With lab, Cr 4.)

SPAN 103 Review of Elementary Spanish
Elementary Spanish for students with some previous study of the language who feel the need for a refresher course before entering SPA 201. If possible, register also for laboratory practice (one more credit).
Cr 3. (With lab, Cr 4.)
SPA 201 Intermediate Spanish I
For students who have completed SPA 102 or the equivalent. Review of grammar. Classroom practice aiming at fluency in reading and speaking. Students are encouraged to register also for laboratory practice (one more credit). Prerequisite: SPA 102 or equivalent. Cr 3. (With lab, Cr 4.)

SPA 202 Intermediate Spanish II
Continuation of SPA 201. Cr 3. (With lab, Cr 4.)

SPA 321 Composition and Conversation in Spanish I

SPA 322 Composition and Conversation in Spanish II
Continuation of SPA 321. Cr 3.

SPA 351 Introduction to Hispanic Literature I
A survey of the important periods and trends in Spanish literature with reading of representative works. Prerequisite: SPA 202. Cr 3.

SPA 352 Introduction to Hispanic Literature II
Continuation of SPA 351. Cr 3.

SPA 470 Independent Study

Geography-Anthropology

Chair of the Department: Franklin D. Hodges, 300a Bailey Hall, Gorham
Associate Professors: French, Hodges, Tizon, Yesner

The program leading to a major in geography-anthropology emphasizes the integration of the two disciplines. Among the elements that are integrated in the majors are common interests in the relationship between human populations and their natural environment, decision-making strategies of human groups, and the health and nutritional status of human societies. The major is a 36-hour interdisciplinary program wherein students are expected to take courses from both geography and anthropology. The program of study, beyond the basic requirements should be planned carefully, in close consultation with the student’s departmental advisor, and should be approved by the latter. Such an arrangement allows for flexibility according to the student’s interests while also providing close guidance and a control of educational quality by the department.

The Department offers the following programs: bachelor of arts in geography-anthropology; applied geography minor in planning; and anthropology minor in health and human services. All students with majors or specific discipline minors in the social sciences must achieve at least six credits with grades of B or better in the requirements of those majors or minors. No grades of D will be counted toward fulfillment of the major or minor requirements. Except for Independent Studies, no required course may be repeated more than one time.

All students are reminded that, in addition to meeting departmental requirements for the major, they must also meet the University’s minimum proficiency requirements and the Core curriculum requirements. (These may be found on page 35 of this catalog.)

Bachelor of Arts in Geography-Anthropology
The minimum number of credits (exclusive of the University’s Core curriculum) required for the major: 36.
All students must take: ANT 101, GEO 101, GEO 201, and GYA 400 or GYA 350-351.
Students electing to concentrate in anthropology must take:
GEO 104 or GEO 303
ANT 102
ANT 103
ANT 210 or ANT 305
AND
12 ANT hours
Students electing to concentrate in geography must take:
ANT 103 or ANT 210
ANT 213
GEO 102
GEO 104
AND
12 GEO hours
Additionally, all geography-anthropology majors are required to take:
three hours of research writing or the equivalent; three hours of quantitative methods or the equivalent.

Beyond these basic requirements, the student must set up a program of geography-anthropology courses to fulfill the remaining credits of the total 36 credits for the major with his/her advisor. All courses in that program must be approved in advance by the advisor.

Applied Geography Minor in Planning
The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 18.
Required courses: GEO 101, GEO 104, GEO 311
Choice of one from: GYA 350-351, GEO 400
Choice of one from: GEO 204, GEO 205
Choice of one from: GEO 209, GEO 210

Anthropology Minor in Health and Human Services
The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 18.
Required Courses: ANT 101, ANT 102, ANT 302, ANT 303, GEO 401
Choice of one from: GYA 350-351, ANT 400

Archaeology Laboratory
The Archaeology Laboratory located in 317 Bailey Hall provides facilities for research in archaeology and related areas. Current facilities include human skeletons, fossil human skulls, a comparative faunal collection, and various research collections, primarily from Maine and Alaska. The Archaeology Laboratory also houses a small library including books, journals, slides, and maps. Opportunities are available for independent student research projects, and work-study positions are available in the laboratory each semester.

Cartography Laboratory
The Cartography Laboratory located in 323 Bailey Hall provides facilities for map making and air photo interpretation. The room is open for faculty and student use daily. There is a map collection available including Maine maps, topographic maps, and various world regional maps. Student proctors are present at most hours of the day to offer assistance.

Special Programs: Museum of Culture Change
The Museum of Culture Change provides a unique experience for students and the community. It is designed to tell the story of human culture through works created by man through the ages. The museum collection is visited each year by students, faculty, and the surrounding community. Field expeditions, materials, and facilities are also available to those interested in museum activities. Further information about the Museum of
Culture Change may be obtained from Director Robert French, Department of Geography-Anthropology, or from the office of the Dean of CAS. The Geography-Anthropology Department offers GYA 100 Museum Aide for one credit hour in conjunction with this project.

**Geography-Anthropology**

GYA 100 Museum Aide
Museum aides serve on volunteer projects relating to research classification, maintenance and display of artifactual materials. Since the museum solicits input from students, their contributions are expected to show originality and complement the goals of the Museum of Cultural Change. A minimum of thirty (30) hours of service each semester is required for credit. Cr 1-3.

GYA 106 The Local Environment
This is a field-oriented course that deals with the application of fundamental geographic concepts in the interpretation of areal development. The local area serves as the “laboratory” and provides models of geographic interaction that have applications on a broader scale. Cr 3-6.

GYA 300 Archaeology Field School
The summer field school is designed to combine training in research methods of archaeology and geography. Students will receive intensive training in methods of site survey excavation and materials analysis. Several weeks will be spent at selected areas of coastal Maine involved in survey and excavation of sites, mapping sites and landscape features, and investigating potential food resources in site areas. This will be followed by some laboratory analysis of recovered materials. This course may be repeated up to twice with the permission of the instructor. Cr 4-6.

GYA 321 Historic Material Analysis
This lab/discussion course involves the analysis of materials derived from field survey and archaeological investigation of selected historic period North American sites. Activities include the chronological and distributional analysis of ceramics, glass, metal and other artifacts of the historic period. Students are encouraged to pursue specific research topics using documentary sources as well as assist in the curation of artifacts in the Museum of Cultural Change. Cr 3.

GYA 350-351 Internship in Applied Geography-Anthropology
Internships offer the student practical experience in working with public agencies, private firms, and municipalities engaged in applied geographical-anthropological activities including, but not limited to, planning, transportation, delivery of human services, and natural resources.

A written contract will be drawn up by advisor and student for each internship, specifying the number of credits sought and work required for these credits. As a general rule, internships will require at least eight hours of actual work per week. Interns will be expected to meet at least once every two weeks with instructor to discuss experiences and/or problems.

In addition, a major paper will be required from each student intern discussing an aspect of the internship or the work performed during the internship. The paper will be presented by the student at the end of the semester to a departmental seminar on applied geography-anthropology. Prerequisites: junior or senior standing in geography-anthropology. Cr 1-6.

GYA 400 Independent Study in Anthropology or Geography
The department faculty offers independent study in a topic in anthropology for upper-level students (junior and senior status). Individuals wishing to take advantage of this option should secure a faculty sponsor and departmental approval. Variable credits will be offered.

GYA 421 Energy and Society
This course examines the relationship between energy forms and social types, through a unique synthesis of geographic and anthropological approaches. The range from very simple to modern, complex, industrial society is analyzed in terms of energy forms, supplies, and consumption patterns. Special emphasis is given to the evolution of energy use and social forms in the United States, and to possible future alternatives. Prerequisites: introductory courses in geography or anthropology or permission of instructor. Not taught in 1984-85. Cr 3.

**Anthropology**

ANT 101 Anthropology: The Cultural View
This course is a basic introductory survey of cultural anthropology. It examines the differences between cultures as well as cultural universals, and the relationship between social organization, ideology, economics, and
political structure in different types of societies. It reviews the various theoretical approaches in cultural anthropology's attempt to explain human behavior, presenting examples from "primitive," intermediate, and complex cultures through readings and films. This course is required for all majors concentrating in anthropology.

ANT 102 Biological Anthropology
Man's place in nature; the relationship between human biology and culture; the relevance of primate behavior and human evolution to understanding contemporary human society; human biological adaptations, including a discussion of population and nutrition; and contemporary human variation with an evaluation of the concept of race.

ANT 103 Introduction to Archaeology
Introduction to Archaeology describes the methods and theories used by modern archaeologists to uncover information about past human life ways. Attention is given to techniques of survey and excavation of archaeological materials; concepts of space and time in archaeology; and detailed analysis of artifacts and organic residues. Some attention will be given to specific topics such as the archaeology of Maine.

ANT 202 Origins of Civilization
This course traces the evolution of human culture from the origins of farming and domestication, to the development of complex societies. General processes of urbanization and social stratification will be investigated, and examples will be drawn from throughout the Old and New Worlds, including the classical civilizations of the Near East, Southeast Asia, Mexico, and Peru.

ANT 210 Culture Theory
This course is an historical survey of theory in anthropology from the early classical evolutionists to contemporary materialist and idealist approaches. It will examine the various theories in terms of their level of analysis, explanatory value, and relationship to the western society from which they emerged. This course is a requirement for those concentrating in anthropology. Prerequisite: ANT 101 or permission.

ANT 213 Strategies for Survival
This course examines interactions between human societies and their natural environments. Human adaptation is viewed as a problem-solving process, involving the development of strategies for maximizing energy efficiency and reproductive success, for warding off environmental stress, and for reducing conflicts. These management strategies are examined for a number of human societies, and are used to gain insight into modern decision-making processes. Prerequisites: ANT 101 or 102.

ANT 220 North American Indians
This course combines an ethnographic and archaeological perspective on the culture history and traditional cultures of native North Americans. Emphasis is placed on the relationship of aboriginal native cultures to their environments, and the evolution of complex societies in certain regions of North America. Also included is discussion of the fragmentation of Indian societies that followed the European invasion of North America. No prerequisites.

ANT 221 South American Indians
This course presents a survey of the indigenous cultures of South America, from the earliest signs of human population on that continent, through the rise of Incan civilization and the European conquest, to the condition of the contemporary indigenous peoples remaining, primarily, in the Andes highlands and the Amazon tropical forest. No prerequisites.

ANT 222 Peoples of the North
This course is designed as a comprehensive summary of the prehistory, traditional culture, and contemporary life ways of peoples living in the northern hemispheres of both the Old and New Worlds—from Maine to Alaska, and from Siberia to Lapland. Special attention will be given to the origins of these peoples; the problems of living in cold, northern environments; the effects of European contact; and the modern problems that they face ranging from the effects of urbanization to land claim disputes. Prerequisites: ANT 101 or 103 or permission of the instructor.

ANT 232 Women in Cross-Cultural Perspective
Anthropologists have long considered a division of labor and status on the basis of sex a universal practice throughout most if not all of civilization's history. There has, however, been a great deal of controversy regarding the nature, origin, and future of sexual stratification. Is the superior status of men cross-culturally "only in the eye of the beholder"? If not, why does it exist? Are its roots biological or cultural; is it inevitable? This course examines these provocative questions by looking at the range of women's roles in a variety of cultures, through readings, films, and slides. No prerequisites.

ANT 301 Victims of Progress: Primitive Peoples in the Modern World
This course examines the disappearance of simpler societies as a result of the expansion of industrial society, and the implications of such a process for the future of humanity, from
both a scientific and humanistic point of view. It also discusses the role of anthropology in explaining and promoting culture change, and reviews the various philosophies of development exhibited in modern society. Prerequisite: ANT 101.

ANT 302 Medical Anthropology
This course considers the interface between medicine and anthropology in terms of both human biology and society. The course develops concepts of health as effective adaptation to environmental stresses, including infectious disease, nutritional stress, and psychosomatic illness, among others. It traces the history of health and disease in human society from hunter-gatherers to modern urban, industrial communities, and examines the way in which human populations have attempted to deal with various agents of disease. The course examines the diversity of human theories of disease causation, and explores the role of modern medicine in effective health care delivery to persons of different cultural and ethnic backgrounds. Prerequisite: ANT 101 or permission of instructor.

ANT 303 Food and Nutrition: An Anthropological Perspective
The purpose of this course is to examine the relationship between human population and their subsistence base, as a part of the larger study of human ecology. Although the fundamental purpose of the course is to understand prehistoric human diets, much attention will be given to examining dietary variation in modern human societies in order to gain insights into past societies. To that end, biological and demographic as well as cultural adaptations to different dietary regimes will be analyzed. Various human subsistence types will be examined (hunting and gathering, horticulture, pastoralism, etc.), and detailed attention will be given to methods for reconstructing prehistoric diets. Although previous anthropological and/or biological background may be useful, neither are required for mastering the concepts developed in this course.

ANT 305 Models in Archaeology
Using archaeological data, archaeological anthropology tests a wide range of hypotheses about human society. The introduction of the hypothesis testing approach into archaeology is the result of recent expansions in theory and methodology. The literature discussing those theoretical and methodological developments will be critically evaluated by the student. Special attention will be given to reconstruction of prehistoric subsistence and settlement, and application of theory to public (conservation) archaeology. Prerequisite: ANT 103.

ANT 306 Archaeological Laboratory Analysis
Students will be introduced to the analysis of materials collected on an archaeological site. Their work will be centered around the results of previous summers’ archaeological excavations. Research projects will be associated with the same materials. Lecture material will center around environmental archaeology, with special attention given to topics such as faunal analysis. This course may be repeated up to twice with the permission of the instructor. Prerequisite: ANT 103.

ANT 333 Structural Linguistics and Culture (cross-listed with ENG 333)
This course analyzes the language and culture (art, religion, poetry) of pre-literate societies, particularly the American Indian.

ANT 450 Topics in Anthropology
This course is designed to undertake detailed, in-depth analysis of important topics and issues in such subfields of anthropology as sociocultural anthropology, biological anthropology, and archaeology. Topics vary from semester to semester. Research papers are required. Prerequisite: junior standing or permission of instructor.

GEO 101 Principles of Geography
This course applies a problem-solving approach to the learning of basic geographic skills and concepts. Cultural factors are emphasized in presenting man/environment relationships as seen from the geographer’s point of view. The course is a prerequisite for most upper-level geography courses and required for all majors concentrating in geography. It also provides models and concepts useful in many other disciplines.

GEO 102 Physical Geography
This course examines the interrelationships between people and the physical environment. Climate, soil, vegetation, landforms, water and mineral resources are the topics which are covered in this introductory course. This course is required for all majors concentrating in geography.

GEO 102L Physical Geography Laboratory
Laboratory exercises acquaint the student with the materials, methods, and data with which the physical geographer works. Numerical data, climate and topographic maps,
and other forms of field data are employed to solve practical problems of human interaction with the physical environment. Co-requisite: GEO 102.

GEO 104 Cartography I
Mapping the landscape: principles of cartographic design. This is an introductory course in cartography focused on developing basic mapping and graphic communication skills essential to a wide variety of disciplines. The course will be flexible and adjusted to individual needs. Familiarization with basic charting technology and cartographic tools will be included. This course is required for all majors concentrating in geography. Cr 3.

GEO 201 Cultural Geography
This course revolves around such components of culture as religion, art, music, settlement, economy type and their relation to one another. Concepts include spread, integration and landscapes of culture. A problem oriented discussion format is used to relate the ideas of other cultures with our own. Pre-requisite: GEO 101. This course is required for all majors concentrating in geography. Cr 3.

GEO 202 Geomorphology (also GEY 202)
Description and interpretation of landform development in terms of geologic structure, process, and stage. One, possibly two, weekend field trips. Prerequisite: GEY 113 or 114 or permission of instructor. Two hours lecture, three hours lab. Fall semester. Cr 3.

GEO 204 Advanced Cartography (Cartography II)
This course is intended to build upon the basic cartographic skills introduced in GEO 104 and to develop new, more advanced skills in cartographic design and communication. The course will be tailored around individual student's needs and interests, and will include fundamental aspects and use of major types of map projections, statistical mapping, landform representation, and mapping point, volume and linear data. A laboratory fee is required. Prerequisite: GEO 104 or permission of instructor. Cr 3.

GEO 205 Air Photo Interpretation
Deals with the earth as perceived from the air and space. Hands-on analysis of various types of imagery includes basic photogrammetry plus air photo and satellite remote sensing interpretation. Applications to land use planning, archaeology, geology and military science are among the topics covered. Recommended as a companion course to Cartography 204. Cr 3.

GEO 206 Field Camp in Geography (also Farmington GEO 206)
This system-wide offering brings students and teachers of several campuses together to participate in a geographic field experience of regional focus. A University of Maine system host campus is selected on a rotating basis and an appropriate theme developed to integrate the field studies in time and space. Various methods of geographic field analysis, mapping and site interpretation are employed. Recommended for all majors concentrating in geography. No prerequisite. Cr 3.

GEO 209 Introduction to Land Use Planning
This course offers an overview of man/land relationships as they influence contemporary patterns of settlement and use of the land. It will discuss the logic of a planning process as a method of decision making, the formulation of goals and evaluation of alternative courses of action, standards and requirements for specific planning objectives (such as land use, energy, recreation, transportation), and the place of the planning function in government and the role of citizens and private groups. Introduction to basic planning tools and techniques including PERT, aerial photography, and methods of land inventory and classification will be presented. No prerequisite. Cr 3.

GEO 210 Planning Maine Communities: Current Issues and Directions
This course will examine the issues facing Maine communities such as providing affordable housing, maintaining and improving the community's physical facilities such as streets, sewers, playgrounds, etc., disposing of solid and hazardous wastes, stimulating jobs and economic development, providing adequate transportation facilities, and preserving Maine's environment and lifestyle in the face of growth. It will also address how these issues can be addressed through the use of the planning process and sound planning techniques. Cr 3.

GEO 303 Economic Geography
Economic Geography presents an examination of classes of economic activities and explains the reasons for their location. There are two major objectives: to make available to the student the skills which allow him to interpret and understand the present economic landscapes, and to critically evaluate the factors and trends which anticipate the future. Prerequisite: GEO 101 or ANT 101 or permission of instructor. Cr 3.

GEO 311 Spatial Organization
Involves the use of computer algorithms and other simulation devices to help solve various location problems such as where to build a fire station or how to assess health care delivery. Concepts of spatial efficiency, geographic predictive approaches and field plotter techniques are involved. Programs have obvious
real world applications and students are encouraged to relate them to areas of their own interest. Prerequisites: GEO 101 and GEO 102 or permission of instructor. Cr 3.

GEO 325 Lands and Peoples of Asia
The course examines the regions of South Asia and East Asia. Monsoon Asia is regional in approach and all aspects of the environment are presented. Physical, cultural, economic, and political factors are examined in an integrative analysis to allow an understanding of some of the reasons for conditions in this part of the world. Prerequisite: GEO 101 or GEO 102 and ANT 101 or ANT 102 or permission of instructor. Cr 3.

GEO 400 Independent Study in Geography
The department faculty offers independent study in a topic in geography for upper-level students (junior and senior status). Individuals wishing to take advantage of this option should secure a faculty sponsor and department approval. Variable credits will be offered. Cr 1-6.

GEO 401 Food and Hunger
The course will examine agricultural systems in different parts of the world in terms of productivity, trade, economy and ecology. Physical and cultural inputs will be considered for each system. Trends and problems within the United States will be examined, with special emphasis given to the region of New England and the state of Maine. Prerequisite: GEO 101 and GEO 102 or ANT 101 or ANT 102 or permission of instructor. Cr 3.

GEO 402 Urban Geography
Deals with the American city as a type. Urban centers are dealt with at two levels—as whole entities in which location, characteristics, growth, and relations with the countryside are explored, and as complex nodal regions in which the internal variations of the city are examined. Prerequisite: GEO 101 and 201 or permission of instructor. Cr 3.

Geosciences

Chair of the Department: Irwin D. Novak, 112a Bailey Hall, Gorham
Associate Professors: Ayers, Hare, Novak, Pendleton; Assistant Professors: Pollock, Swanson

Courses offered by the Department of Geosciences are grouped under the following headings: Astronomy; Earth Science (including Meteorology and Oceanography); Geology; Physical Science.

Degree programs in earth science and geology are offered in the College of Arts and Sciences. A student majoring in earth science or geology must achieve a 2.0 grade point average and no Ds in the major course.

The Earth Science Programs
Two four-year programs are offered in the department. The earth science major is designed so that upon completion a student may enter graduate school, or seek work in conservation, state and federal parks and planning agencies, and in industry. The Department is considering eliminating the earth science major; consult the department chair. The second is a geology major and is available for those students intending to go to graduate school or to pursue a professional career in geology.

Geology or earth science majors intending to pursue graduate work are urged to determine graduate school foreign language requirements. Students are also encouraged to consider concentrations in allied areas such as biology, chemistry, computer science, economics, geography, and statistics if their interests are in the wider aspects of earth sciences.

Bachelor of Arts in Earth Science
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 72.
A minimum of 6 credits of mathematics selected from MAT 120, 140, 152 or courses with second digit higher than 5.

Of the following courses, Arts and Sciences majors are required to take 29-30 credits, including at least 15 credits of 200 level and 9 credits of 300 level and PSC 498, Independent Study.

AST 103 Astronomy: Experiments and Activities
AST 210 Observational Astronomy
EAS 110 Environmental Science
GEY 116 Environmental Geology
GEY 202 Geomorphology
GEY 203 Mineralogy
GEY 205 Geological Oceanography (also OCE 205)
GEY 206 Paleontology
GEY 301 Structural Geology
GEY 302 Sedimentology
GEY 310 Glacial and Pleistocene
OCE 101 Oceanography Lab
PSC 498 Independent Study

Bachelor of Arts in Geology
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 71.

Chemistry and Physics
CHY 113, 114 Principles of Chemistry I
AND
CHY 115, 116 Principles of Chemistry II
PHY 121, 122 General Physics I
PHY 123, 124 General Physics II

Mathematics
MAT 120 Introduction to Statistics
MAT 152 Calculus A

It is recommended that freshmen in the geology major who lack at least two years of high school algebra and a semester each of geometry and trigonometry, take MAT 140, Precalculus Mathematics.

Geology
GEY 111, 112 Physical Geology
GEY 113, 114 Historical Geology
GEY 202 Geomorphology
GEY 203 Mineralogy
GEY 204 Optical Mineralogy
GEY 206 Paleontology
GEY 301 Structural Geology
GEY 302 Sedimentology
GEY 303 Igneous and Metamorphic Petrology
GEY 491, 492 Senior Thesis in Geology
OR
GEY 498 Independent Study in Geology
GEY 495 Geology Seminar
GEY 496 Special Topics in Geology

Elective Courses: In addition to those courses listed above students are required to take six credit hours from the remaining electives.

GEY 205 Geological Oceanography (also OCE 205)
GEY 304 Sedimentary Rocks
GEY 310 Glacial and Pleistocene Geology
Students planning to attend graduate school are strongly recommended to include a course(s) in computer science, languages, and additional courses in mathematics and chemistry.

To be retained in the geology major program, students are required to maintain a minimum grade point average (GPA) of 2.0 in geology courses.

**Minor in Geology**

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 20.

Required courses: GEY 111/112; GEY 113/114; GEY 203; GEY 301; GEY 202, or GEY 302.

---

**Astronomy**

**AST 100 Astronomy**
A descriptive survey of modern astronomy. Topics include theories about the origin and development of the universe, stellar evolution, the solar system, galaxies, observational methods and recent discoveries. Optional planetarium sessions and optional evening observations with telescopes are included. No prerequisites. Offered fall and spring semesters. Cr 3.

**AST 103 Activities and Experiments**
A one credit course meeting weekly for two hours. May be taken concurrently with AST 100 to fulfill requirements for a science laboratory experience. Includes a study of the moon's orbit, Earth's orbital motion, proper motions of stars, spectral classification, rotation of Saturn's rings, the Crab Nebula, variable stars, pulsars, and Hubble's law. Prerequisite: AST 100. Offered fall and spring semesters. Cr 1.

**AST 105 Astronomy in the Planetarium**
For non-science majors. Includes apparent stellar movement and planetary motions, star names and constellation study, stellar magnitudes, stellar navigation and celestial coordinate systems. No prerequisites. Offered fall and spring semesters. Cr 3.

**AST 210 Observational Astronomy**
Star charts, atlases, binoculars, cameras and telescopes are used to make observations of constellations, sun-spot activity, the moon, the planets and their satellites, star clusters, nebulae, double and variable stars. Prerequisite: AST 100 or equivalent. Fall semester only. Cr 3.

**Earth Science**

**EAS 110 Environmental Science**
A descriptive study of the basic physical relationships between man and the aquatic and atmospheric environment. This will include man's influence on surface and ground water quality to encompass agricultural, domestic, industrial and municipal realms. The atmosphere will be discussed in terms of geologic origin, natural evolutionary changes, global circulation patterns, and the effect of modern industrial society upon its composition and quality. Background in high school chemistry, mathematics and physics is desired. Three hours lecture. Cr 3.

**EAS 140 Energy, Man and Environment**
This course will present a study of man's energy needs, and the alternative energy sources available. In addition, the impact on the environment of the utilization of the various energy sources will be considered. Cr 3.

**EAS 160 Soil Science**
An introductory course delving into the science of soil development, soil classification and soil use. The course is intended to meet the needs of beginning as well as experienced students in the earth sciences and related fields. Topics considered are soil make up and morphology, soil chemical and physical properties, soil genesis, soil organic matter, soil mineralogy, soil ecology land use and Maine soils. Three-hour lecture, two-hour lab. Prerequisites: Physical Geology or permission of the instructor. Cr 4.

**EAS 202 Conservation**
A study of man's use of the environment. Topics include the resources of mineral, soil, forests, water, air, wildlife, and man himself. Consideration is given to the issues and problems developing from the interaction of management of these resources. Weekly field trips when weather permits. Two hours lecture, two hours lab. Cr 3.
EAS 260 Soil Formation and Classifications
The course delves into the macromorphology and micromorphology of the soil body, as well as the overall soil formation processes. Soil Formation and Classifications studies the reasoning behind soil development and soil diversification. Major problem features such as: mottling, pans, organic fraction, clay minerals, etc., are studied in detail. The second portion of the course studies the 7th approximation and the overall world-wide systems for classifying pedons (soil bodies) as a useable, necessary art. Three hour lecture, two hour lab. Prerequisite: EAS 160, one semester of chemistry or permission of the instructor. Cr 4.

EAS 300-301, 400-401 Cooperative Education in Earth Sciences
The student has the opportunity to relate academic knowledge to practical experience in a job situation. The University makes arrangements with certain institutions, businesses, and industries to employ qualified students for specific jobs for a set time period. The student’s work is ordinarily in a related field and the work experiences increase in difficulty and responsibility as the student progresses through the sequence of courses. The experiences are approved on a case-by-case basis by the department. Evaluation is done through a written report done by the student together with the employer and a faculty supervisor. Prerequisite: junior class standing and a major in earth science. Each semester students may take each course only once. Cr 1-5.

Geology

GEY 111 Physical Geology
A study of the ever-changing earth by wind, water, volcanism, crustal movement and glaciation. Three hours of lecture. Each fall and spring. GEY 111 may be taken without GEY 112. Cr 3.

GEY 112 Physical Geology Lab
Identification of common rocks and minerals, introduction to topographic maps, and development of the processes covered in lecture; field trips when weather permits. Each fall and spring. To be taken concurrently with GEY 111. Lab two hours. Cr 1.

GEY 113 Historical Geology
Study of the earth’s history in terms of physical, chemical and biological change from its origin to the present time, stressing the methods of determining chronology and conditions through fossils and structural characteristics. Prerequisites: GEY 111, 112. Two hours of lecture. Cr 4.

GEY 114 Historical Geology Lab

MET 100 Meteorology
A basic introduction to meteorological phenomena. The atmosphere; its characteristics, composition, and structure; cloud types; circulation of air currents and winds; air masses. Analysis of weather reports, weather forecasting, and weather maps. Three hours lecture. Cr 3.

OCE 100 Introduction to Oceanography
Origin and extent of the oceans; nature of the sea bottom; causes and effects of currents and tides; chemical and physical properties of sea water; animal and plant life in the sea. Three hours lecture. Each semester. Cr 3.

OCE 101 Oceanographic Laboratory
A laboratory course in which the student is introduced to some of the techniques and technical processes involved in oceanic measurements and data reduction. Prerequisite: OCE 100 which may be taken concurrently. One two-hour laboratory session each week. Cr 1.

OCE 205 Geological Oceanography (also GEY205)
The origin and structure of the continental shelves and ocean basins. Coastal and oceanic processes; geomorphic development of the marine environment. Special emphasis on the evolution of the New England coast through examination of salt marshes, estuaries, and beaches. Prerequisite: GEY 111, 112 or OCE 100 or permission of the instructor. Three hours lecture. Fall semester. Cr 3.

A study of rocks, minerals and fossils to determine the geological conditions at some ancient time. Introduction to paleogeographic and geologic maps. Field trips. To be taken concurrently with GEY 113. Three hours. Each spring. Cr 0.

GEY 116 Environmental Geology
Application of the science of geology to environmental problems resulting from man’s intense use of the earth and its natural resources. Prerequisites: GEY 111, 112 or permission of the instructor. Two 75-minute lecture sessions. One two-hour lab. Cr 4.

GEY 202 Geomorphology (Also GEO 202)
Description and interpretation of landform development in terms of geologic structure, process, and stage. One, possibly two weekend field trips. Prerequisite: GEY 113, 114. Two hours lecture. Two hours lab. Fall semester. Cr 4.

GEY 203 Mineralogy
An introduction to crystallography and a
study of the physical properties and chemical structures of common rock-forming minerals. Laboratory analysis is an important part of the course. Three hours lecture. Four hours lab. Prerequisite: GEY 111, 112, CHY 113, 114 (may be taken concurrently). Fall semester.

GEY 204 Optical Mineralogy
The principles of crystallography and crystal optics are presented as the basis of a practical approach to the identification of minerals with a petrographic microscope. The laboratory is an important part of the course, providing practical applications of the theory and methods covered in the lecture. Prerequisite: GEY 203. Lecture three hours. Lab four hours. Spring semester.

GEY 205 Geological Oceanography (Also OCE 205)
The origin and structure of the continental shelves and ocean basins. Coastal and oceanic processes; geomorphic development of the marine environment. Prerequisite: GEY 111, 112 or OCE 100 or permission of the instructor. Three hours lecture. Fall semester.

GEY 206 Paleontology
A description and classification of the important phyla of the fossil invertebrates and a survey of their use in biostratigraphic, evolutionary and paleoecologic studies. One weekend field trip. Prerequisites: GEY 113, 114. Two one-hour lectures and one two-hour lab per week. Each fall.

GEY 301 Structural Geology
An introduction to the mechanics of rock deformation, faulting, jointing, top-bottom criteria and metamorphic foliations. The lab includes problems in descriptive geometry, stereonets, the Brunton compass, geologic maps and cross sections, and analysis of polyphase folding. Prerequisites: GEY 111, 112 and GEY 113, 114. Field trips. Two hours lecture, one hour recitation, two hours lab.

GEY 302 Sedimentology
Principles of sedimentation, facies, nomenclature, and sedimentary processes and environments. Students will analyze common problems in applied fields associated with these areas. Prerequisite: GEY 203. GEY 202 recommended. Some weekend field trips. Two hours lecture, three hours lab. Spring semester.

GEY 303 Igneous and Metamorphic Petrology
The study of the origin of igneous and metamorphic rocks. Topics include operational thermodynamics as applied to igneous and metamorphic rocks, crystallization of silicate systems, mineral equilibria and paragenesis. Laboratory studies include work with hand specimens and thin sections. One or more day or weekend field trips. Prerequisite: GEY 204. Two hours lecture; four hours laboratory. Fall semester.

GEY 304 Sedimentary Rocks
A study of stratigraphic principles, facies, paleocurrents and sedimentary basins. The petrology of the sedimentary rocks is considered from burial to the onset of very low grade metamorphism. A field trip of four or five days duration is required. Prerequisite: GEY 204. (May be taken concurrently). One hour lecture; two hours laboratory. Offered spring semester.

GEY 310 Glacial and Pleistocene Geology
Glacial processes; deposits and the stratigraphy of the Pleistocene Epoch. Emphasis on the erosional and depositional features of glacial events in Maine. One, possibly two, weekend field trips. Prerequisite: GEY 202. Two hours lecture, two hours lab. Spring semester.

GEY 350 Geological Field Methods
A course in geological field methods intended to introduce to the student the tools and practical techniques used in collecting, compiling and analyzing geological data. Students will have assignments in the igneous/metamorphic and surficial terrain of southern coastal Maine and sedimentary and volcanic terrain in eastern coastal Maine. Summer. Five weeks. Prerequisites: GEY 111, 112 and GEY 113, 114. GEY 203, GEY 301. Recommended: GEY 302, GEY 303, GEY 202.

GEY 401 Advanced Petrology
The course expands upon material covered in GEY 303 to include a rigorous discussion of thermodynamics and applications to petrology. Topics covered include chemical and experimental petrology, generation and evolution of magmas, physical conditions of metamorphism, geothermometry and geobarometry. Laboratory work stresses petrology of selected igneous and metamorphic rock suites. One or more day or weekend field trips. Prerequisites: MAT 152, GEY 303. Offered spring semester even years or on demand. Two hours lecture, four hours lab.

GEY 402 Ore Deposits
A study of the geologic setting and processes involved in the formation of the major types of epigenetic and syngenetic metalliciferous ore deposits. Prerequisite: GEY 301, 303. (GEY 303 may be taken concurrently). Afternoon and weekend field trips. Three hours lecture.
Program

GEY 405 Tectonics
Major topics include the nature of the earth's crust and interior, continental drift, seafloor spreading and plate tectonics. The evolution of mountain ranges, continents, and ocean basins will be studied on a global scale. Current articles in scientific journals will be discussed. Lab includes graphical and dynamic- clay modeling of plate tectonic processes. Prerequisite: GEY 301 or 303 or permission of instructor. Three hours lecture. Cr 3.

GEY 490/491 Senior Thesis
The Senior Thesis is designed for the senior level student to pursue independent research in geology. The thesis is designed to be a scholarly effort in culmination of the student's baccalaureate program. Cr 3.

GEY 495 Geology Seminar
The seminar is meant to provide the geology major with an overall view of the discipline as well as the opportunity to discuss, read and report about specific topics in the field. Current problems, research and philosophy of geology will be included. Prerequisite: senior standing. Each fall. Cr 1.

GEY 496 Special Topics in Geology
A critical and in-depth investigation of one of various topics and issues in different areas of geology (e.g. petrology, paleontology, tectonics, geomorphology). Prerequisite: senior standing. Each spring. Cr 1.

GEY 498 Independent Study in Geology
To provide juniors and seniors who have demonstrated critical and analytical capability an opportunity to pursue a project independently, selecting a problem and exploring an area of interest in the physical sciences, bringing to it previous experiences and emerging with an intellectually sound, coherent synthesis or technical creation reflecting a high caliber of performance. Cr 1-3.

Physical Science

PSC 498 Independent Study in the Physical Sciences
To provide juniors and seniors who have demonstrated critical and analytical capability an opportunity to pursue a project independently, selecting a problem and exploring an area of interest in the physical sciences, bringing to it previous experiences and emerging with an intellectually sound, coherent synthesis or technical creation reflecting a high caliber of performance. Cr 1-3.

History

Chair of the Department: Eugene P.A. Schleh, 300 Bailey Hall, Gorham
Professors: Cole, Emerson, Hunt, Schleh; Associate Professors: Albee, Bibber, Connick, Dietrich, Eastman, Padula, Ventresco, Whitmore

History remains a venerable and enduring academic discipline because of the nature of time and the human need to gain perspective and direction by recovering a sense of the past. To do this requires the techniques of collecting, evaluating, organizing, and interpreting historical evidence. The history curriculum offers students the opportunity to learn the historian's craft through lectures, discussions, research, and writing.

History is one of the classic liberal arts disciplines that prepares students for a full and satisfying life as well as for careers in business, government, and nonprofit organizations. More particularly, history is widely recommended as preparation for graduate studies in business, law, and library science. Besides teaching, specific careers include service with federal, state, and local governments; archival and library work; social science research; editing of documents; publishing; writing and research for historical presentations on television and radio; and many others.

The Department of History offers a 39 credit-hour major which leads to a bachelor of arts in history; an 18-hour minor for students majoring in other disciplines; and an honors program for outstanding majors, which offers students an opportunity to undertake an independent research project in their junior or senior year under the guidance of a member of the Department. In addition, the Department offers an exchange pro-
gram with King Alfred's College in Winchester, England, and an internship program in cooperation with area historical societies, museums, libraries, and other institutions. Departmental offices have information on all of these programs.

Majors are encouraged to select history electives that focus on a particular country, continent, or era, and to pick courses from other departments which complement this concentration. It is strongly recommended that majors, especially those expecting to undertake graduate study, acquire proficiency in a foreign language.

A history major or minor must achieve at least six credits of B or better grades in history courses. No grade of D will count toward fulfillment of a history major or minor. No required course may be repeated more than once. Unusually well-prepared entering students may, upon passing an examination, gain exemption from any of the required courses. College Level Equivalency Program (CLEP) examinations are available in Western Civilization and United States history, and a Department examination has been prepared for HTY 200 Reference, Research and Report Writing. See the Department chair for details. Majors and minors are reminded that, in addition to Department requirements, they must also meet those of the University Core curriculum.

Other courses in the College of Arts and Sciences have historical interest. Although they do not count for history credit, the major may wish to take some of them as supplementary electives.

Bachelor of Arts in History

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 39.

Elective advanced history courses

Select six 200-400 level courses in consultation with your major advisor.

Minor in History

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 18.

Students majoring in CAS disciplines who desire a concentration in history may develop an 18 credit-hour minor. The program of study must focus on an area, a chronological period, or methodological approach. The program must be developed in cooperation with a member of the history faculty, include the two-semester survey sequence appropriate to the area, period, or topic, and be approved by the chair of the department.

Requirements: appropriate two-semester survey sequence (approved by the advisor and department chair); and elective advanced history courses (four courses approved by advisor and department chair).
with a focus on the institutions it bequeathed to the modern world. The Renaissance and Reformation and the rise of the great nations-states are studied. Throughout the course important individuals are considered such as Alexander the Great, Caesar, Charlemagne, Michelangelo, and Elizabeth I. The course also introduces students to historical method. Cr 3.

HTY 102 Western Civilization II
A basic survey and introduction to the heritage of Western man from early modern times to the atomic age. Particular attention is given to the Enlightenment, the French Revolution, the rise of the industrial era, the growth of nationalism, and the World Wars. Personalities such as those of Napoleon, Hitler, and Stalin are studied. The course also introduces students to historical method. Cr 3.

*HTY 131 United States History to 1877
A basic survey and introduction to the field of American history, covering the political, social, and economic development of the United States through Reconstruction. Cr 3.

*HTY 132 United States History Since 1877
The course is a continuation of HTY 131. A survey of American political, social, and economic development since about 1877. Cr 3.

*HTY 133 American History I
A survey of United States history which examines institutional development and change in major areas of American society and culture before 1900 by means of lecture case studies, a variety of paperbound readings, films, slides, music, and small-group discussions. (This course may not be used to fulfill requirements for major, minor or concentration as of September, 1978). Cr 3.

*HTY 134 American History II
A continuation of HTY 133 which examines institutional change and development in modern American urban industrial society and culture since 1900. (This course may not be used to fulfill requirements for major, minor or concentration as of September, 1976). Cr 3.

*HTY 131-132 and HTY 133-134 are both introductory courses, although their organization and emphasis differ. History majors may take HTY 133-134 only for general elective credit. Cr 3.

HTY 161 Introduction to African History to Partition
A survey of African history from early migrations to the beginning of the Colonial era. The approach is both regional, stressing selected countries representative of their regions, and topical, cutting across political boundaries. Topics include the states of the Sudan, city states of East Africa, Islam, the slave trade, exploration, and partition. Cr 3.

HTY 162 Introduction to African History Since Partition
A survey of the Colonial era, the transformation of African societies, the rise of nationalist movements, wars of liberation, and early years of the new era of independence. Cr 3.

HTY 163 Africa Through Its Literature
An examination of how African history has been portrayed through novels. Both historical re-creation novels and books reflective of the societies which produced them are used, with particular emphasis on English-speaking Africa. (Offered every other year.) Cr 3.

HTY 171 Traditional East Asia
The history and culture of China and Japan from earliest times to about 1700, with emphasis on the composition of the "traditional" societies. Cr 3.

HTY 172 Modern East Asia
China and Japan since about 1700, emphasizing contrasting moves toward modernization in two traditional societies. Cr 3.

HTY 181 Latin America I
This survey outlines the nature of the pre-Columbian Indian civilizations, their conquest by the European powers and the creation of the Hispanic and Portuguese empires in America. Cr 3.

HTY 182 Latin America II
This survey begins with the shattering of Iberian colonialism, and moves rapidly into the 20th century. Special attention is given to Mexico, Brazil, Argentina and Cuba, and their varying solutions to the problem of national development. Cr 3.

HTY 200 Reference, Research and Report Writing
An introduction to research and writing, designed to prepare undergraduates for the requirements of upper-level courses in history and the social sciences with emphasis on practical methods of utilizing a library, locating materials, taking and organizing notes, and writing and rewriting research papers and reports. Cr 3.

HTY 231 Ancient History I
The political, social, and economic history of the civilizations of the ancient Mediterranean world, with Egypt, the Near East, and Greece being studied. (Offered occasionally.) Cr 3.

HTY 232 Ancient History II
A continuation of HTY 231 concentrating upon an examination of ancient Rome. (Offered occasionally.) Cr 3.
HTY 235 Medieval Civilization
Europe from late antiquity through the Carolingian Empire, Islamic Empire, Byzantine Empire, Medieval Church and State and the coming of the Renaissance and Reformation. Prerequisite: HTY 101 or permission.

HTY 241 Renaissance and Reformation
A study of the transformation of European society from the world of the Renaissance to the crisis of the Reformation. The course will concentrate on the development of Italian Humanism and its influence on Northern Europe. The rise of the Reformation will be examined through the personalities of Martin Luther and John Calvin and the intense feelings which engendered the religious wars and the Counter Reformation. Prerequisite: HTY 101 or permission.

HTY 242 French Revolution and Napoleon
The course takes the French Revolution as a climax of major intellectual, political, and social trends in eighteenth-century Europe. Thorough coverage is given to the Old Regime, the Enlightenment and the influence of the American Revolution. There is in-depth analysis of the coming, course and outcome of the French Revolution itself, and its impact outside France. The Napoleonic era is handled as the culminating phase of the revolution and as a major influence on nineteenth-century Europe. Prerequisite: HTY 102 or permission.

HTY 243 Europe at the Turn of the Century (1871-1913)
This course concentrates on the culture and politics of *fin de siècle* Europe. The pre-World War I society will be viewed from a variety of perspectives, and will focus on various individuals who helped shape the times. Of particular interest will be the views and impact of Marx, Darwin and Wagner within the framework of the Industrial Revolution and imperialism. Prerequisite: HTY 102 or permission.

HTY 244 20th-Century Europe
An intensive survey of European developments in the 20th century. The course deals with such intellectual trends as the revolt against positivism, Freudian psychology, expressionism and surrealism in the arts as well as with such phenomena as totalitarianism in its various forms (Nazism, Fascism, Soviet Communism). World Wars I and II and the post-1945 evolution of Europe are thoroughly analyzed. Prerequisite: HTY 102 or permission.

HTY 256 World Wars I and II: European War and Diplomacy
A study of the origins, course, and consequences of the First and Second World Wars.

The questions of inevitability and responsibility, the nature of total war, the workings of alliances, the effect of the military upon politics, the wisdom of the peace settlements, and the impact of war upon European society are among the subjects to be considered. Prerequisite: HTY 102, 132 or permission.

HTY 261 History of England
A survey of England from Anglo-Saxon times to the beginning of the 20th century, with emphasis on the nature of English monarchy, the development of political institutions, and evolving constitutionalism. Particular attention is given to broad movements such as the Reformation, the Industrial Revolution, and Imperialism. Prerequisite: HTY 101 or permission.

HTY 263 Britain in the 20th Century
A study including the Victorian and Edwardian Age, Imperialism, the Monarchy, the Depression, appeasement, the English people in two World Wars, the question of Ireland, and the leadership of Lloyd George and Churchill. Prerequisite: HTY 102 or permission.

HTY 265 Italy, Unification to World War I
A political, intellectual, diplomatic, and social history of Italy from the Risorgimento to the eve of World War I. Considerable emphasis will be given to the role of the Papacy in Italian affairs. Major literary figures to be examined will include Foscolo, Leopardi, Manzoni, Verga, and Carducci. Prerequisites: HTY 101 and HTY 102 or permission.

HTY 266 Fascist Italy
This course examines the development, practice and theory of Fascism. Considerable attention will be centered on Benito Mussolini and his relationship to the Fascist Party, the people, the Catholic Church, and foreign affairs. Italian culture in the fascist era will be explored through literature and the arts. Prerequisite: HTY 102 or permission.

HTY 272 Germany To 1945
A study of the formation of the German Empire, the rise of a powerful industrial state, Weltpolitik and defeat in World War I, the Weimar Republic, Nazism and the Third Reich, Germany in World War II, and the partition of Germany in 1945. The course analyzes nationalism and examines cultural, social, and economic factors which help clarify Germany's role in the modern world. Prerequisite: HTY 102 or permission.

HTY 273 Germany Since Hitler
After intensive analysis of the impact of the Nazi era and World War II on Germans, the course analyzes the two German states in
terms of: (a) their emergence, 1945-1949, and effects of the Cold War and occupation on each; (b) their political, economic, and social development since 1949; (c) the role of the Federal Republic of Germany in relation to the West and the role of the German Democratic Republic in the Communist bloc; (d) their relations with each other; (e) intellectual and cultural developments in both. Prerequisite: six hours of European history or international relations. HTY 272 desirable. Cr 3.

HTY 275 Russia to 1861
A survey of political, social, cultural and economic history of the Russian people to the emancipation of the serfs. The course deals with geographic factors, influence of Byzantine civilization, the impact of invasions, and the development of Russia's unique problems. Prerequisite: one history survey or permission. Cr 3.

HTY 276 Russia Since 1861
A survey of political, social, cultural, and economic history from the emancipation of the serfs to today. The course deals with Tsarist autocracy and its weaknesses, pressures for reform, the intelligentsia, revolutionary parties, the Bolshevik Revolution, and Communist Russia since 1917. Prerequisite: one history survey or permission. Cr 3.

HTY 290 China and Cuba Under Communism
This is a course in comparative history, focusing on developments in China and Cuba since the assumption of power by Communist regimes in 1949 and 1959 respectively. The principal topics dealt with include political events, the organization of power, economic and social development, and relations with the outside world. Cr 3.

HTY 300 History Internship
Professional experience in one of a variety of positions in public and private institutions which utilize the knowledge and research skills of historians. Students work one day per week, keep a journal, write an evaluation, and are visited on the job by a faculty member. Open to selected students; see department chair for details. Graded pass/fail, so does not count for major credit. Can be taken twice. Cr 3.

HTY 301 American Colonial History
The first half of the semester is devoted to the discovery, exploration and colonization of the American colonies. The second half concentrates on the social and political development of these colonies, touching upon various aspects of colonial life and emphasizing the growing maturation of society. Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 302 The American Revolution
A study of the 1763-1789 period, stressing the breakdown of Anglo-American relations; American independence and its ideological underpinnings; the Revolutionary War; the postwar struggle to strike a balance between too much government and too little; and the drafting and ratification of the U.S. Constitution. Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 305 Hamilton and Jefferson
A study of Hamilton and Jefferson including biographical information and the Jefferson-Hamilton political dichotomy and its subsequent influence. Following this, the course will present a general analysis of social, intellectual, political, economic, and diplomatic problems facing the "New Nation" between 1789-1815. Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 306 The Age of Jackson, 1815-1850
A consideration of American political, cultural, social, and economic development in the first half of the 19th century. Specific topics will include the controversies surrounding Jacksonian democracy, the Bank of the United States, internal improvements, the tariff, "Manifest Destiny," and the sectional-slavery issue. Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 307 Civil War and Reconstruction
An examination of the period 1850-1877, dealing with the background and causation of the war; Lincoln and the secession crisis; the military, political, diplomatic, and economic aspects of the Civil War; and the challenges and ultimate failure of reconstruction after 1865. Prerequisite: HTY 131 or permission. Cr 3.

HTY 308 The Gilded Age in America, 1869-1898
The United States in the age of enterprise with emphasis on the development of political and economic radicalism, the commodification of agriculture, the rise of the American city, new directions in social thought, concentration of industrial wealth and financial power, and American foreign policy. Prerequisite: HTY 132 or permission. Cr 3.

HTY 309 Early 20th-Century America, 1898-1938
The United States in the first four decades of the twentieth century with coverage of the Spanish-American War, the progressive movement, American entry into World War I, the Roaring Twenties, the Great Depression, and the domestic programs of the New Deal. Prerequisite: HTY 132 or permission. Cr 3.
HTY 310 America Since 1938
The United States since the Great Depression with coverage of the foreign policy of the New Deal, the background to Pearl Harbor, World War II, the Fair Deal, the Cold War, the Eisenhower years, the New Frontier, and the Great Society. Prerequisite: HTY 132 or permission. Cr 3.

HTY 321 History of Maine
A survey of Maine's social, economic and political life from exploration and early settlement to the present. Cr 3.

HTY 325 History of the American Frontier
The Turner thesis, historiography, and adaptations to the challenges of the environment are considered. Various frontiers from the Atlantic seaboard to the last frontier on the Great Plains are studied. Prerequisites: HTY 131 and 132 or permission. (Offered every other year.) Cr 3.

HTY 331 History of Black Americans
An examination of the interaction of black people with American social, political, cultural, and economic institutions. Major topics include the African heritage, components of slavery, abolitionism, segregation, programs of race advancement, and the modern search for identity. Prerequisites: HTY 131 and 132 or permission. Cr 3.

HTY 333 The American Home
A survey of U.S. domestic architecture, considering the influence of changing tastes, as well as climate and technology, on the buildings in which Americans have lived. Attention will be given to the historical styles as illustrated in the homes of the well-to-do, but attempts also will be made to look carefully at where and how "the people" lived. The approach will include slide-illustrated lectures and on-the-spot observation. Prerequisite: six hours of U.S. history. Cr 3.

HTY 335 American Urban History
A survey of the American city: social, political, intellectual, and cultural components; the changing nature of "community"; the course of urban development; and the emergence of urban life styles. Special attention is focused on the population movement to the city; the development of slums, ghettos, and suburbs; the growth of municipal institutions and services; the relationship of city dwellers and government; and the emergence of "Megapolis." Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 337 American Economic and Business History, 1607-1860
Economic and business developments in the United States from the first settlements to the Civil War. The course covers the British mercantile system, the colonial economy, the transportation revolution, the Southern plantation system, and the beginnings of American industrialization. Prerequisite: HTY 131 or permission. (Offered occasionally.) Cr 3.

HTY 338 American Economic and Business History Since 1860
Economic and business developments in the United States from the Civil War to the present. The course covers the growth of a national market and distribution system, the revolution in agriculture, the rise of big business, the organization of labor, and the growing involvement of the federal government in business and the economy. Prerequisites: HTY 132 or permission. (Offered occasionally.) Cr 3.

HTY 339 American Labor in the Twentieth Century
A chronological examination of the efforts of workers to adjust to our corporate industrial society. Topics will include the emergence of the AFL, labor radicalism, the role of labor leadership, racketeering, labor and the New Deal, and labor theory. The focus will be on unions, but attention will be given to non-union segments of the labor force as well. Prerequisite: HTY 132 or permission. (Offered every other year.) Cr 3.

HTY 341 American Social and Intellectual History I
An analysis of the evolution of American religious, political, economic, social, and scientific thought from the colonial period to 1865. The course examines major principles, assumptions, and values; the relation of American thought to class structure, ethnic and racial associations, mobility, and immigration; and the relation of American thought to contemporary intellectual patterns in the Western world. Prerequisite: HTY 131 or permission. (Offered every other year.) Cr 3.

HTY 342 American Social and Intellectual History II
A continuation of HTY 341 from 1865 to the present. Prerequisite: HTY 132 or permission. (Offered every other year.) Cr 3.

HTY 343 Diplomatic History of the United States I
This course covers the development of key United States foreign policies from the Revolution to the Spanish-American War. Prerequisite: HTY 131 or permission. Cr 3.

HTY 344 Diplomatic History of the United States II
The chief emphasis is placed on the causes and results of World Wars I and II, the nature of the Cold War, and the character of our present commitments. Prerequisite: HTY 132 or permission. Cr 3.
HITY 345 American Character
A course focusing on a particular problem of historical analysis: the interpretation of the national character as revealed in sources ranging from the earliest accounts of foreign travelers to the most recent works of social psychologists. Authors to be considered in discussions, reports, and papers include Tocqueville, Bryce, Adams, Turner, Siegfried, Mead, Potter, Riesman, and others. Prerequisite: HITY 131 or permission. (Offered every other year.) Cr 3.

HITY 346 History of Sport in America
A course for everyone interested in the impact of sport on the American society, it surveys the origin and development of sport from colonial times to the present with emphasis on the years since the Civil War. A major concern will be to examine the way in which sport relates to and reflects major historical themes, issues, and values. Lectures and discussion with a text, readings, reports, and papers. No prerequisite but some history is recommended. Cr 3.

HITY 347 Viewpoints in American History
A seminar involving discussions of selected topics in United States history, with emphasis on varying interpretations of trends and events. Students will read and analyze both traditional and more recent views, noting changes in frames of reference, methodology, and general approach. Prerequisite: 12 hours of U.S. history. (Offered occasionally.) Cr 3.

HITY 348 A History of Religion in America
A history of religion in American society from the colonial era to the present, examining theology, organization, leaders, critics, and the religious contribution to the American heritage. Prerequisites: HITY 131 and 132 or permission. Cr 3.

HITY 349 American Military History
An examination of American military experience from the colonial era to the present. Causes, impact, and conduct of conflicts from the Revolution to Vietnam will be considered as well as roles of the military in American society. Prerequisites: HITY 131 and 132 recommended. Cr 3.

HITY 350 CIA: U.S. Foreign Intelligence Since Pearl Harbor
This course traces the rise of the U.S. intelligence empire with case studies of its information gathering and covert action activities, as well as a consideration of the moral questions and political dilemmas, short and long term, posed by these operations. In effect, it is an examination of the underside of recent U.S. foreign relations. Prerequisite: six hours of history or social science or permission. Cr 3.

HITY 362 Contemporary Africa
An interdisciplinary seminar on contemporary Africa examining literature and the arts, social change, development and adaptation in African politics, economic development, race relations, and international politics. (Offered every other year.) Cr 3.

HITY 371 The United States and Asia
A history of the United States' interests in the Far East from 1789 to the present, considering economic and social contacts as well as diplomatic. Prerequisites: HITY 131 and 132. HITY 172 strongly recommended. Cr 3.

HITY 373 History of Late Traditional China
Before the nineteenth century no Chinese doubted—and few outsiders who saw it disagreed—that the "Middle Kingdom" was the greatest of the world's civilizations. No society was larger, had stronger ties to its past, or had contributed more to the development of human culture. This course will explore the institutions and values of China in the period from 800 to 1800, and its relationships with other societies. Prerequisite: HITY 171 recommended. Cr 3.

HITY 374 History of Modern China
After dealing with the nature of Chinese society and institutions as they existed around 1800, the course will take up problems of modernization, imperialism, revolution, warlordism, Japanese aggression, civil war, and the present communist regime. Prerequisite: HITY 172 recommended. Cr 3.

HITY 376 History of Modern Japan
This course will explore what Japan was like when Perry "opened" it in 1854 and will deal with the rapid social changes which made Japan the outstanding example of modernization among non-Western nations. The problems which this development has created will also be considered. Prerequisite: HITY 172 recommended. Cr 3.

HITY 377 Chinese Thought
Prior to the modern era, the Chinese interpreted their world through traditional idea systems, the most prominent of which were Confucianism, Taoism, and Buddhism. This course will explore these traditions: their assumptions and values, their varieties and internal tensions, and their relationships to the larger social system. Prerequisite: HITY 171 recommended. Cr 3.

HITY 381 Latin America and the United States
A survey of U.S.-Latin American relations with emphasis on the efforts of the U.S. Government and multi-national corporations to adjust to the growth of nationalism, state capitalism, and socialism in Latin America. Cr 3.
HTY 383 The Society and Culture of Latin America
This seminar seeks to examine, through the use of popular novels and films, the principal characteristics of Latin American culture. Such elements as the role of dictators and revolutionaries, of machismo and imperialism, and of great haciendas and folkloric religions will be considered. Cr 3.

HTY 386 Modern War and Its Images
An examination of twentieth-century warfare stressing the ways in which it has been portrayed to mass audiences. Particular use is made of film, both documentary and feature, and continuing attention is given to the uses of film in the study and teaching of history. Fiction, reporting, and survey histories will also be used, as well as occasional participation by guest discussants. (Offered occasionally.) Cr 3.

HTY 392 Problems in Contemporary History
An analysis of a selected controversial and contemporary problem. The topic to be studied and the method of approaching it will be chosen jointly by interested students and the staff. Prerequisite: permission of the instructor. (Offered occasionally.) Cr 3.

HTY 394 Selected Topics in History
An analysis of a selected controversial historical problem. The topic to be studied and the method of approaching it will be chosen jointly by interested students and the staff. Prerequisite: permission of the instructor. (Offered occasionally.) Cr 3.

HTY 403 The European Revolutionary Tradition Since 1789
A seminar analyzing modern European revolutions, revolutionary leadership, and the dynamics of revolution, including the role of the revolutionary crowd. Revolutions analyzed range from the French Revolution to the Bolshevik Revolution and include 20th-century Fascist revolutions. Open to seniors and others by permission. Prerequisite: at least six hours of European history or equivalent in unusual cases. Cr 3.

HTY 412 Totalitarianism: Nazism and Soviet Communism
A seminar which seeks to analyze and understand the 20th-century phenomenon of totalitarianism by in-depth historical case studies of Nazism and Soviet Communism. Such topics as the leader (Hitler/Stalin), the party (Nazi/Communist), the enforcement operation (SS/NKVD), concentration camps and gulag archipelago, propaganda techniques and results, internal administrative organization, and war machines (Wehrmacht/Red Army) will be included. Open to juniors, seniors, and graduate students with background in 20th-century European history and political science. Cr 3.

HTY 415 Recent Literature in European History
A survey of the most important recent literature in the field of European history. Designed to inform the public school teacher and advanced undergraduate of the newest publications and historical controversies. Annotated bibliographies will be prepared. Emphasis will be placed on reading and discussing books and articles which have applicability to secondary education programs. Prerequisite: six hours of European history or permission. (Offered occasionally.) Cr 3.

HTY 445 Recent Literature in United States History
A survey of the most important recent literature in the field of U.S. history. Designed to inform the public school teacher and advanced undergraduate of the newest publications and historical controversies. Annotated bibliographies will be prepared. Emphasis will be placed on reading and discussing books and articles which have applicability to secondary education programs. Prerequisites: twelve hours of U.S. history or permission. (Offered occasionally.) Cr 3.

HTY 493 Independent Study Semester
This is the course designator for students who participate in the History Department's semester abroad exchange program with King Alfred's College in England. Cr 3.

HTY 495 Historiography
A survey of the principal schools of historical writing and of their products, with a detailed analysis of the philosophical principles, specific purposes, and research and writing techniques of selected major historians. Prerequisite: senior history majors only. (Offered occasionally.) Cr 3.

HTY 498 Independent Study in History
To provide juniors and seniors who have demonstrated critical and analytical capability an opportunity to pursue a project independently, charting a course and exploring an area of interest within their major field, bearing upon it previous course experiences, and emerging with an intellectually sound, coherent synthesis reflecting a high caliber of performance. Prerequisite: permission. Cr 1-3.

Other courses in the College of Arts and Sciences have historical interest. Although they do not count for history credit, the major may wish to take some of them as supplementary electives. A current list may be obtained from the history chairman.
The Department of Mathematics and Computer Science offers four-year programs leading to a B.A. in mathematics or a B.S. in computer science. The Department also provides the mathematics major courses for a B.S. in education (see College of Education). All students are reminded that, in addition to meeting departmental requirements for a major, they must also meet the requirements of the school or college involved, as well as the University Core curriculum requirements.

Bachelor of Arts in Mathematics

As a mathematics major, a student may select one of the three options described below. However, as a prerequisite to other courses, all majors are required to complete successfully the calculus sequence (MAT 152, 153, 252), a foundation course (MAT 290), and a computer science course (COS 160). Each student must have an accumulative grade point average of at least 2.0 in major courses before being considered for a baccalaureate degree in mathematics.

Option I
The minimum number of credits (exclusive of the University's Core curriculum) required for this option: 39.

Mathematics majors intending to pursue graduate work should choose this option. Those intending to teach at the secondary level should choose this option or the area major described below. Prospective graduate students are urged to take Real Analysis I and II, Abstract Algebra, Topology, and one year of French or German; those interested in teaching should take Abstract Algebra, College Geometry, Probability and Statistics I. To be eligible for student teaching in secondary mathematics, a student must have completed 30 hours of mathematics courses having a second digit 5 or greater, with an accumulative grade point average of at least 2.0 in these courses and have successfully completed MED 345.

A. Successful completion of one of the courses listed in each of the following areas is required:

1) Algebra
   MAT 382 Abstract Algebra
   MAT 380 Linear Algebra

2) Analysis
   MAT 352 Real Analysis I
   MAT 354 Topics in Advanced Calculus
   MAT 355 Complex Analysis
   MAT 490 Topology

3) Applied Mathematics
   MAT 350 Differential Equations
   MAT 362 Probability and Statistics I
   MAT 364 Numerical Analysis
   MAT 366 Linear Programming
   MAT 460 Mathematical Modeling
   MAT 461 Introduction to Operations Research

4) Geometry
   MAT 370 College Geometry
   MAT 372 Non-Euclidean Geometry
   MAT 371 Projective Geometry
B. Successful completion of at least nine additional hours of approved mathematics courses with second digit 5 or greater.

*Option II*

The minimum number of credits (exclusive of the University's Core curriculum) required for this option: 57.

Those majors intending to enter industry or other applied fields should seriously consider this option or Option III. Majors who plan to prepare for the actuarial profession should be certain to include in their programs Linear Algebra, Probability and Statistics I and II, Numerical Analysis, and the appropriate courses in the School of Business, Economics and Management.

A. Successful completion of:
- MAT 350 Differential Equations
- MAT 362 Probability and Statistics I
- MAT 363 Probability and Statistics II
- MAT 380 Linear Algebra
- MAT 460 Mathematical Modeling

B. Successful completion of two of the following:
- MAT 354 Topics in Advanced Calculus
- MAT 364 Numerical Analysis I
- MAT 366 Linear Programming
- MAT 461 Introduction to Operations Research
- MAT 492 Graph Theory and Combinatorics

C. Successful completion of at least 18 hours in allied disciplines, outside the Department, which utilize mathematical techniques. The particular program of courses must be approved in writing by the Department.

*Option III*

The minimum number of credits (exclusive of the University's Core curriculum) required for this option: 48.

This option is designed for those students who wish to combine mathematical expertise with a knowledge of computer science.

A. Successful completion of five of the following courses:
- MAT 350 Differential Equations
- MAT 354 Topics in Advanced Calculus
- MAT 355 Complex Analysis
- MAT 362 Probability and Statistics I
- MAT 363 Probability and Statistics II
- MAT 364 Numerical Analysis
- MAT 366 Linear Programming
- MAT 380 Linear Algebra
- MAT 450 Partial Differential Equations
- MAT 460 Mathematical Modeling
- MAT 461 Introduction to Operations Research

B. Successful completion of five additional approved computer science courses with second digit 5 or higher.

*Minor in Mathematics*

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 20.

An accumulative grade point average of at least 2.0 in these courses must be maintained, and successful completion of the following courses: MAT 152; MAT 153; MAT 290; COS 160; plus two additional MAT courses with second digit 5 or greater.

*Bachelor of Science in Computer Science*

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 44.

The program in computer science offers a background in digital computing together with special courses designed to prepare the undergraduate for a career in computer programming or for further study in computer science. Each student must have an accumulative grade point
average of at least 2.0 in major courses before being considered for a baccalaureate degree in computer science.

Computer science courses have been made available to visually handicapped or legally blind students. The adapting hardware and software is not braille oriented, per se, but enlarges computer input and output to increase accessibility. Visually handicapped students interested in computer courses or majors must contact the coordinator of handicap services to verify accessibility.

A. Successful completion of the following courses:
   COS 160 Structured Problem Solving - PASCAL
   COS 161 Algorithms in Programming
   COS 250 Introduction to Computer Systems
   COS 280 Discrete Structures
   COS 285 Data Structures
   MAT 152 Calculus A
   MAT 153 Calculus B
   MAT 362 Probability and Statistics I

B. Successful completion of four additional COS courses numbered 300 and above.

C. Successful completion of two additional mathematics courses with second digit 5 or greater, excluding MAT 290.

Double Major in Mathematics and Computer Science

The minimum number of credits (exclusive of the University's Core curriculum) required for the double major: 54.

Each student must have an accumulative grade point average of at least 2.0 in the major courses before being considered for a baccalaureate degree.

A. Successful completion of the following courses:
   MAT 152 Calculus A
   MAT 153 Calculus B
   MAT 252 Calculus C
   COS 160 Structured Problem Solving - PASCAL
   COS 161 Algorithms in Programming
   COS 250 Introduction to Computer Systems
   COS 285 Data Structures
   MAT 290 Foundations of Mathematics
   OR
   COS 280 Discrete Structures (but not both)

B. Successful completion of one course from each of the following areas:
   1) Algebra
      MAT 380 Linear Algebra
      MAT 382 Abstract Algebra
   2) Analysis
      MAT 352 Real Analysis
      MAT 354 Topics in Advanced Calculus
      MAT 355 Complex Analysis
      MAT 490 Topology
   3) Applied Mathematics
      MAT 350 Differential Equations
      MAT 362 Probability and Statistics I
      MAT 364 Numerical Analysis I
      MAT 366 Linear Programming
      MAT 460 Mathematical Modeling
      MAT 461 Introduction to Operations Research
   4) Geometry
      MAT 370 College Geometry
      MAT 371 Projective Geometry
      MAT 372 Non-Euclidean Geometry

C. Successful completion of three of the following computer science courses, to include at least one 400 level course:
   COS 355 Computer Architecture
COS 360 Concepts of Higher Level Programming Language
COS 370 Topics in Computer Science
COS 374 Numerical Analysis (not to be taken in addition to MAT 364)
COS 450 Operating Systems
COS 458 Advanced Data Structures
COS 469 Introduction to Compiler Construction
COS 472 Artificial Intelligence

D. Successful completion of six additional hours of electives in mathematics or computer science with second digit 5 or greater.

Minor in Computer Science
The minimum number of credits (exclusive of the University’s Core curriculum) required for the minor: 18.
A minor in computer science may be obtained by successfully completing the courses listed below with an accumulative grade point average of 2.0 in these courses: COS 160; COS 161; COS 250; COS 280; and two additional COS courses with first digit 2 or greater.

Computer Science and Mathematics for Education Majors
The Department of Mathematics and Computer Science, in cooperation with the College of Education offers an area major of 51 hours of mathematics and computer science courses for students majoring in secondary education; the program consists of the following courses.

I. Successful completion of the following:
   MAT 152 Calculus A
   MAT 153 Calculus B
   MAT 252 Calculus C
   MAT 290 Foundations of Mathematics
   OR
   COS 280 Discrete Structures
   COS 160 Structured Problem Solving

II. Successful completion of one course from each of the following areas:
   Algebra
   MAT 380 Linear Algebra
   MAT 382 Abstract Algebra
   Analysis
   MAT 352 Real Analysis I
   MAT 354 Topics in Advanced Calculus
   MAT 355 Complex Analysis
   MAT 490 Topology
   Applied Mathematics
   MAT 350 Differential Equations
   MAT 362 Probability and Statistics I
   MAT 364 Numerical Analysis I
   Geometry
   MAT 370 College Geometry
   MAT 371 Projective Geometry
   MAT 372 Non-Euclidean Geometry

III. Successful completion of five of the following computer science courses:
   COS 161 Algorithms in Programming
   COS 250 Introduction to Computer Systems
   COS 355 Computer Architecture
   COS 285 Data Structures
   COS 360 Concepts of Higher Level Programming Languages
   COS 370 Topics in Computer Science
   COS 374 Numerical Analysis I (not to be taken in addition to MAT 364)

IV. Successful completion of six additional hours of electives in mathematics or computer science with second digit 5 or greater.

V. The following professional education courses:
A minor in computer science may be obtained by successfully completing 21 hours of the following computer science courses: COS 160; COS 161; COS 280; CSE 345; and two courses from the following: COS 250, COS 285; COS 374, or COS 370.

A minor in mathematics may be obtained by successfully completing 18 hours of mathematics courses in which the second digit is 5 or greater.

Recommended Courses for Non-majors

Students who desire an introductory course to satisfy the Quantitative Decision Making portion of the Basic Competence requirement of the Core curriculum should consider MAT 104. For students majoring in other disciplines, but wishing to develop competency in using mathematics, the following courses are recommended. Individual course descriptions should be consulted to determine prerequisites: MAT 109; MAT 110 (or MAT 152 and MAT 153 for greater depth in calculus); COS 100 (or COS 140 for greater depth in computer programming); or MAT 120 (or MAT 211 and MAT 212 for greater depth in probability and statistics).

Computer Science

COS 100 Computers and Society
A general course designed for students not majoring in mathematics or computer science. Topics will include: history of data processing technology; study of the tools and methods; the application of computers and their economic and social implications; and an introduction to a programming language.

COS 140 Programming in FORTRAN
A study of programming techniques and applications using FORTRAN. Prerequisite: Two years of high school algebra or equivalent.

COS 160 Structured Problem Solving: PASCAL
A study of problem-solving techniques and applications using PASCAL. This course is primarily for students with a computer science major or minor or a strong serious interest in computer science. Prerequisite: two years of high school algebra or equivalent.

COS 161 Algorithms in Programming
The development of algorithms and their implementations in a higher-level programming language, with emphasis on proper design principles and advanced programming concepts. Prerequisite: COS 160 (PASCAL).

COS 230 Programming in COBOL
A study of the programming language used primarily in business. Prerequisite: COS 140 or COS 160.

COS 234 Computer Programming for Elementary Teachers
The course introduces the elementary education major to programming techniques and applications using the BASIC language. No programming skills will be assumed. Prerequisite: MAT 131.

COS 240 Programming in PL/1
A continuation of the study of programming principles through study of the PL/1 language. Prerequisite: COS 140 or COS 160.

COS 250 Introduction to Computer Systems
An introduction to the structure and organization of digital computers and the use of assembly language programming systems. Prerequisite: COS 161.

COS 280 Discrete Structures
Concepts of modern algebra, set theory,
Boolean algebra, elements of graph theory, and their application to computer science. Prerequisite: COS 161. Cr 3.

COS 285 Data Structures
Basic concepts of data, strings, stacks, arrays, and lists. Representations of trees and graphs. Storage systems and structures, searching and sorting techniques. Multilinked structures. Prerequisite: COS 250 and COS 280 or permission of instructor. Cr 3.

COS 355 Computer Architecture
Fundamentals of the design and organization of digital computers. Topics include applications of Boolean algebra to logical design; machine algorithms used in addition, subtraction, multiplication, etc.; types of memory; synchronous and asynchronous operation; minimization of logic circuits. Also, concepts from microprocessors and large parallel computers. Prerequisites: COS 280 or MAT 290 and COS 250. Normally only offered in the spring semester. Cr 3.

COS 360 Concepts of Higher-Level Programming Languages
An examination of basic concepts and special facilities in higher-level programming languages via the consideration of several representative languages. Emphasis on scope of declarations, storage allocation, data structure variety, binding time of constituents, and control organization. Introduction to the formal definition of programming languages. Prerequisite: COS 285. Normally offered only in the fall semester. Cr 3.

COS 370 Topics in Computer Science
Topics to be covered may include philosophy of computers, history of computers, computers and society, simulation, graphics, and other advanced topics. Prerequisite: COS 250 or permission of the instructor. Cr 3.

COS 372 Software Engineering
A study of methods applied to large-scale software development, including topics such as project management, software design, verification and validation. Prerequisite: COS 285. Cr 3.

COS 374 Numerical Analysis I
A study of the theory and application of computational algorithms for interpolation, equation solving, matrix methods, integration; error analysis. Prerequisites: MAT 252, COS 160, and permission of instructor. Cr 3.

COS 375 Numerical Analysis II
(continuation of COS 374) Ordinary differential equations, boundary value problems, interpolation and approximation, error analysis, large-scale linear systems. Prerequisite: COS 374. Cr 3.

COS 380 Introduction to Theory of Computing
Introduction to the basic concepts of finite automata and Turing machines; finite state acceptors and regular sets; linear sequential circuits, complexity results for finite networks, elementary notions of recursive and recursively enumerable sets. Prerequisite: COS 280 or MAT 290. Cr 3.

COS 450 Operating Systems
Computer resource management. Topics include an in-depth study of concurrent cooperating processes; virtual systems; segmentation and paging; I/O device handling; protection and security; deadlock; race conditions. Prerequisites: COS 285, COS 355. Cr 3.

COS 452 Computer Graphics
A study of the techniques involved in computer graphics systems. Topics include: point-plotting and line drawing in two- and three-dimensional space; clipping and windowing; geometric modelling; algorithmic solutions to the hidden line and hidden surface problems. Prerequisite: COS 285. Cr 3.

COS 458 Advanced Data Structures
(continuation of COS 285) Internal tables, external sorting, file organization, database management systems and designs. Prerequisite: COS 285. Cr 3.

COS 469 Introduction to Compiler Construction
Definition of a language, context-free grammars, rigorous definition of a typical small language in BNF, design and implementation of a compiler for programs within this language. Prerequisite: COS 285. Cr 3.

COS 472 Artificial Intelligence
An introduction to the underlying concepts and applications of intelligent systems. Topics include computer representations of knowledge; heuristic search techniques and computer problem solving; learning; game playing; automatic theorem proving; pattern recognition; natural language question-answering. Prerequisites: COS 280, COS 285. Cr 3.

COS 497 Independent Study in Computer Science
An opportunity for juniors and seniors who have demonstrated critical and analytical capability to pursue a project independently, charting a course and exploring an area of interest within their major field. Prerequisites: junior or senior standing and permission of the dept. chairman and instructor. Cr 1-3.

CSE 345 Teaching Computer Science in the Secondary School
Critical study of programs and techniques for teaching secondary school courses in com-
puter literacy, computer organization, and computer programming. Prerequisite: junior or senior standing. Cr 3.

CSO 200-201, 300-301, 400-401 Cooperative Education in Computer Science
The student has the opportunity to relate academic knowledge to practical experience in a job situation. The University makes arrangements with certain institutions, businesses and industries to employ qualified students for specific jobs for a set time period. Students already employed may qualify. The student's work is ordinarily in a related field, and the work experiences increase in difficulty and responsibility as the student progresses through the sequence of courses. The experiences are approved on a case-by-case basis by the department. Evaluation is done with the employer and a faculty supervisor. Prerequisite: open to qualified students, subject to availability of suitable jobs. Course is graded on a pass-fail basis only. Cr 3.

Mathematics

It is expected that students will possess and be able to operate a calculator with memory and with at least the operations of add, subtract, multiply, divide and square root if they enroll in MAT 120, MAT 211, MAT 362, or MAT 363.

*Note that MAT 010 and MAT 011 carry credit only toward the associate degree.

MAT 010 Elementary Algebra
The first course of a two-course sequence designed for students who are deficient in high school algebra. Topics covered include number systems, functions, graphs, the solution of equations, and the solution of problems with a business orientation. No prerequisites. Cr 3.

MAT 011 Intermediate Algebra
A continuation of MAT 010. Prerequisite: MAT 010 or one year of high school algebra. Cr 3.

MAT 100 College Algebra
The real number system, algebraic operations, sets, equations, inequalities and their graphs, functions and relations, quadratic functions, exponential and logarithmic functions, theory of equations, systems of equations, permutations, combinations, probability, sequences and series, matrices and determinants, and mathematical induction. Prerequisite: two years high school algebra. Cr 3.

MAT 101 Trigonometry
Functions of an acute angle, reference angles, graphs of trigonometric functions, identities and fundamental relations, trigonometric equations and inequalities, functions of the sum or difference of two angles, functions of a double angle, inverse trigonometric functions, trigonometry of a triangle, polar form of complex numbers. Prerequisite: two years high school algebra. Cr 3.

MAT 102 Basic Technical Mathematics I
This course, beginning with a review of basic algebra, includes the real number system, metric and British systems of measurements, geometry, and a study of functions. Topics are related to technical applications. Prerequisite: two years high school algebra and one year of geometry. Cr 3.

MAT 103 Basic Technical Mathematics II
A continuation of MAT 102 to include topics from geometry, determinants and matrices, analytic geometry, trigonometry and vector and polar coordinates. Topics are related to technical applications. Prerequisite: MAT 102 or permission of the instructor. Cr 3.

MAT 104 Topics in Mathematics
A general course designed for students not majoring in mathematics or computer science. The emphasis will be on the basic concepts encountered in mathematics as well as the applications of mathematics. The topics presented may be interdisciplinary in nature. A student may enroll twice, with the instructor's permission, for an additional three credit hours not to exceed a total of six credit hours for the course. Prerequisites: two years of high school algebra and one year of geometry. Cr 3.

MAT 109 Linear Systems
An introduction to vectors, matrices, and linear systems of algebraic equations and linear programming. Prerequisites: two years of high school algebra and one year of geometry. Cr 3.

MAT 110 Elementary Mathematical Analysis
A unified treatment of the elementary functions of analysis; their analytical properties including derivatives, integrals, and series; introduction to multivariate calculus; applications. Prerequisites: two years of high school algebra and one year of geometry, and a passing grade on an algebra competency test which will be administered at the first class meeting. Cr 3.

MAT 120 Introduction to Statistics
An introductory course including basic probability, random variables, and their distributions; estimation and hypothesis testing; regression and correlation. Prerequisite: two years of high school algebra. Cr 3.
MAT 131 Number Systems for Elementary Teachers
This is the first course in a three-course sequence in mathematics recommended by the Commission on the Undergraduate Mathematics Program of the Mathematical Association of America for prospective primary and elementary teachers. Major emphasis is placed on an intuitive approach to the real number system and its subsystems. Prerequisites: two years of high school algebra and one year of geometry. Cr 3.

MAT 140 Pre-Calculus Mathematics
A brief review of elementary algebra followed by a study of the algebraic, exponential, logarithmic, and trigonometric functions. Prerequisites: two years of high school algebra and one year of geometry, and a passing grade on an algebra competency test which will be administered at the first class meeting. Cr 3.

MAT 152 Calculus A
This is the first of a sequence of three basic calculus courses covering functions of one or more variables, graphs, limits, derivatives, integrals, optimization, infinite series, vectors, and various applications. Calculus A provides an introduction to the differential and integral calculus of functions of one variable. Prerequisites: two years of high school algebra plus geometry and trigonometry, or MAT 140. Cr 4.

MAT 153 Calculus B
A continuation of Calculus A. Calculus B will usually include infinite series and an introduction to vectors. Prerequisite: MAT 152. Cr 4.

MAT 211 Probability
Common probability laws and distributions of discrete and continuous random variables; matrix operations and applications to probability. Prerequisite: MAT 110 or MAT 152. Cr 3.

MAT 212 Statistics
Sampling distributions; estimation; hypothesis testing; introduction to regression analysis and analysis of variance. Applications primarily in business and economics. Prerequisite: MAT 211. Cr 3.

MAT 231 Algebra for Elementary Teachers
The second course in a three-course sequence in mathematics recommended by the Committee on the Undergraduate Mathematics Program of the Mathematical Association of America for prospective primary and elementary teachers. Emphasis is upon the properties of operations in several different algebraic systems. Equations are studied in finite systems as well as in conventional algebra. Prerequisite: MAT 131. Cr 3.

MAT 232 Geometry for Elementary Teachers
The third course in a three-course sequence in mathematics recommended by the Committee on the Undergraduate Mathematics Program of the Mathematical Association of America for prospective primary and elementary teachers. Emphasis is upon constructions, congruence, parallelism, and similarity. Direct and indirect methods of proof are studied but the main approach is intuitive. Prerequisite: MAT 131. Cr 3.

MAT 233 Probability for Elementary Teachers
An introductory course in probability designed for the elementary and junior high teacher. The course content includes empirical probability through conditional probability, random variables and their distributions, including binomial and normal distributions. Prerequisite: MAT 131. Cr 3.

MAT 235 History of Mathematics for Elementary Teachers
A history of certain topics in number theory, geometry, and elementary algebra. Prerequisite: MAT 131. Cr 3.

MAT 252 Calculus C
Multivariate calculus and vector calculus. Prerequisite: MAT 153. Cr 4.

MAT 290 Foundations of Mathematics
Selected topics in set theory, symbolic logic, and methods of proofs needed in more advanced mathematics courses. Prerequisite: consent of the department. Cr 3.

MAT 291 The Real Numbers
An axiomatic construction of the real number system. Prerequisite: COS 280 or MAT 290 or permission of instructor. Cr 3.

MAT 292 Theory of Numbers
Basic course in number theory, including such topics as divisibility properties of integers, prime numbers, congruences, multiplicative number theoretic functions, and continued fractions. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 350 Differential Equations
A study of various methods for solving ordinary differential equations and initial value problems including transform, numerical, and series methods. Prerequisite: MAT 252. Cr 3.

MAT 352 Real Analysis I
Limits, continuity, differentiation and integration of functions of one or more real variables, infinite series, uniform convergence, and other selected topics. Prerequisites: MAT 252, and COS 280 or MAT 290. Cr 3.

MAT 353 Real Analysis II
A continuation of Real Analysis I. Prerequisite: MAT 352. Cr 3.
MAT 354 Topics in Advanced Calculus
Selected topics on multivariate functions, vectors transformations, line integrals, and surface integrals. Prerequisite: MAT 252, and COS 280 or MAT 290. Cr 3.

MAT 355 Complex Analysis
A study of the complex number system and its applications: differentiation and integration of complex-valued functions, the Cauchy integral theorem and formula, Taylor and Laurent series, singularities and residues, conformal mappings. Prerequisite: MAT 252 or permission of instructor. Cr 3.

MAT 362 Probability and Statistics I
Probability laws, random variables and distributions, estimation and hypothesis testing, regression, correlation, analysis of variance. Emphasis on applications. Prerequisite: MAT 153. Cr 3.

MAT 363 Probability and Statistics II
An analysis of some of the methods used in MAT 362. Topics include moment generating functions, Functions of random variables, limit theorems, principles of estimation and hypothesis testing. Additional topics in regression and non-parametric methods. Prerequisites: MAT 362 and MAT 252. Cr 3.

MAT 364 Numerical Analysis I
A study of the theory and application of computational algorithms for interpolation, equation solving, matrix methods, integration; error analysis. Prerequisites: MAT 252, COS 160, and permission of instructor. Cr 3.

MAT 365 Numerical Analysis II (continuation of MAT 364)
Ordinary differential equations, boundary value problems, interpolation and approximation, error analysis, large scale linear systems. Prerequisite: MAT 364. Cr 3.

MAT 366 Linear Programming
A study of matrix algebra applied to the problem of optimizing a linear function subject to linear inequality constraints, utilizing the simplex procedure. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 370 College Geometry
Selected topics from Euclidean geometry. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 371 Projective Geometry
Synthetic and analytic projective geometry, including finite projective planes. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 372 Non-Euclidean Geometry
A development of one or more of the non-Euclidean geometries. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 380 Linear Algebra
An introduction to the theory of vector spaces and linear transformations. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 382 Abstract Algebra
Algebraic structures, such as groups, rings, integral domains, and fields. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 390 History of Mathematics
The development of mathematics from ancient to modern times. Prerequisites: MAT 152 and COS 280 or MAT 290. Cr 3.

MAT 431 Selected Topics in Mathematics for Elementary Teachers
A course designed to provide enrichment topics for the elementary teacher. The course will include such topics as number theory, motion geometry, topology, projective geometry, graphs, and sets and logic. Prerequisites: junior elementary education major and permission of the instructor. Cr 3.

MAT 432 Selected Topics in Mathematics for Elementary Teachers
A course designed to provide enrichment topics for the elementary teacher. The course will include such topics as awareness geometry, transformational geometry, analysis of shapes, number theory, and measurement. Prerequisites: junior elementary education major and permission of the instructor. Cr 3.

MAT 450 Partial Differential Equations
An introduction to the general properties of partial differential equations followed by solutions of specific equations. The techniques include eigenfunction, expansions, operational methods, and conformal mapping. Prerequisite: MAT 350. Cr 3.

MAT 460 Mathematical Modeling
An introduction to the process of formulating problems in mathematical terms, solving the resulting mathematical model and interpreting the results and evaluating the solutions. Examples will be chosen from the behavioral, biological, and physical sciences. This course and MAT 461 complement each other. Prerequisites: junior or senior standing, some elementary calculus including differentiation and integration, elementary probability, and some computer programming experience. Cr 3.

MAT 461 An Introduction to Operations Research
A study of some of the problem structures facing the decision maker in management and the social sciences and the methodologies used in reaching optimal solutions. Typical topics might be from among: allocation, scheduling, inventory, optimization, conflict resolution, game theory, waiting lines, decisions under uncertainty, simulation. This course and MAT 460 complement each other.
Prerequisites: junior or senior standing, some elementary calculus including differentiation and integration, elementary probability, and some computer programming experience. 

Cr 3.

MAT 490 Topology
An introduction to fundamental concepts in topology, including topological spaces, mappings, convergence, separation and countability, compactness, connectedness, metrization, and other selected topics. Prerequisites: MAT 252 and COS 280 or MAT 290. Cr 3.

MAT 492 Graph Theory and Combinatorics
This course is designed to acquaint students with some fundamental concepts and results of graph theory and combinatorial mathematics. Applications will be made to the behavioral, managerial, and social sciences. Prerequisite: COS 280 or MAT 290. Cr 3.

MAT 497 Independent Study in Mathematics
An opportunity for juniors and seniors who have demonstrated critical and analytical capability to pursue a project independently, charting a course and exploring an area of interest within their major field. Prerequisites: junior or senior standing, permission of the instructor and permission of the department chairman. Cr 1-3.

MAT 498 Topics
Selected topics in advanced mathematics. Prerequisite: permission of instructor. Cr 3.

MEO 200-201, 300-301, 400-401 Cooperative Education in Mathematics
The student has the opportunity to relate academic knowledge to practical experience in a job situation. The University makes arrangements with certain institutions, businesses, and industries to employ qualified students for specific jobs for a set time period. The student's work is ordinarily in a related field, and the work experiences increase in difficulty and responsibility as the student progresses through the sequence of courses. The experiences are approved on a case-by-case basis by the department. Evaluation is done with the employer and a faculty supervisor. Prerequisite: open to qualified students, subject to availability of suitable jobs. Cr 1-5.

Mathematics Education

MED 345 Teaching Mathematics in the Secondary School
Critical study of programs and techniques for teaching and learning mathematics in grades 7-12 for the slow, average and advanced pupil, with the use of instructional media. Prerequisite: junior or senior standing. Cr 3.

Music

Chair of the Department: Jerry L. Bowder, 100 Corbett Hall, Gorham
Professor Bowder; Associate Professor Cole; Assistant Professors: Martin, Maxwell, Russell, Boden; Lecturer Freeman; Portland String Quartet in residence: Keesekemethy, Lantz, Adams, Ross.

Applied Music Faculty Piano: Naydene Bowder, Thomas Bucci, Ronald Cole, Ocy Downs, Robert Glover, David Maxwell, Richard Roberts; Voice: Ellen Chickering, Linda Freeman, Rhonda Martin, Robert Russell, Stewart Shuster; Organ: David Maxwell; Violin: Deidre Clark, Stephen Keesekemethy, Ronald Lantz; Viola: Julia Adams; Cello: Katherine Graffam, Paul Ross; Bass: Katherine Graffam; Flute: Frances Drinker, Rhonda Martin; Oboe: Neil Boyer; Clarinet: Robert Carabja, Eugene Jones; Saxophone: Bill Street; Bassoon: Ardith Freeman; Trumpet: Bruce Hall, John Schnell; French Horn: John Boden, Nina Allen; Trombone: Peter Sexauer; Euphonium: David Winer; Tuba: David Winer; Percussion: Henry Dempsey; Harp: Deidre Carr; Classical Guitar: Christopher Kane, Michael Katz

The Department of Music offers a number of music ensembles open to all students, a number of courses primarily for non-majors, and concen-
trated study in the areas of music history, music theory, performance, and music education. Students majoring in music may earn a baccalaureate degree in education (bachelor of science in music education), in arts and sciences (bachelor of arts in music), or in music (bachelor of music in performance). In addition, minors in music are offered for students majoring in elementary education and in the College of Arts and Sciences. A master of science in education with a music concentration is available through the College of Education Graduate Division.

Music Fees

An applied music fee of $48.00 per semester for hour lessons, or $24.00 per semester for half-hour lessons will be charged all music majors in addition to the University tuition fee. Applied lessons for music majors, beyond those required for the degree, will be subject to a fee of $96.00 for half-hour lessons and $192.00 for hour lessons in addition to the University tuition fee.

For a music minor the University will subsidize the applied music fee, to a maximum of eight credit hours, if the student demonstrates adequate proficiency. The student will pay $48.00 per semester for hour lessons and $24.00 per semester for half-hour lessons in addition to the University tuition fee.

Students other than music majors or minors will be accommodated for applied music lessons if a teacher’s time is available, but will be subject to a fee of $92.00 for half-hour lessons or $192.00 for hour lessons in addition to the University tuition fee.

Students registering for applied music must report to the chair of the Department for assignment to an applied music teacher and scheduling of lessons. All fees must be paid before lessons commence.

Admission Requirements

Admission to degree programs in music, major and minor, will be based on the following criteria: a) the applicant's high school record, including recommendations, and SAT achievement scores; b) an audition, which includes performance on the applicant's major instrument, and tests in aural comprehension, rhythmic recitation, and sight singing which are administered to each applicant individually by a member of the staff; and c) a written standardized musical achievement test.

Students who desire to apply for advanced standing in music curricula should apply to the chair of the Department for a special examination.

Department Standards

Each student enrolled in the performance and music education degree programs will play a jury exam on his or her major instrument at the end of each academic year. The jury panel will determine a level of performance and submit a written evaluation which will be included in the student's file. Students are required to perform at the appropriate level of competence as established by the music faculty.

Each student must earn grades of C or better in all courses which count toward fulfillment of major requirements. D and F grades do not fulfill prerequisite requirements. However, an exception will be made for the following sequence courses: Theory I, II, III, IV; Solfeggio I, II, III, IV; Basic Conducting; Instrumental Conducting; and Vocal Conducting. In these courses a grade of D will allow the student to progress to the next semester in the sequence. If a grade of C or better is earned in this next semester, the preceding semester need not be repeated. If a grade of D or F is earned in this next semester, both semesters must be satisfactorily repeated in proper sequence. No course may be repeated more than once. If a student fails in the second attempt to pass a course with a grade of C or better, he or she will not be allowed to continue as a music major or minor.

Each student must attain a 2.25 minimum grade point average before being admitted to junior or senior level music major courses. Students who fall below academic or applied music standards will be placed on
probation and will be suspended if they do not meet these standards by the end of the following semester.

Music Core Requirements

Each student enrolled as a major in a music degree program will take the following courses during his or her first and second years:

- MUS 120, 121, 210, 221  History of Music
- MUS 130, 131, 230, 231  Music Theory
- MUS 132, 133, 232, 233  Solfeggio

Bachelor of Science in Music Education

The degree of bachelor of science in music education prepares students for careers in music teaching. Students completing this course of study receive public school music certification for kindergarten through high school. Since a person must first be a good musician in order to be a good music educator, the program includes substantial work in music theory, ear training, music history, applied music, ensembles, and conducting, in addition to music education methods courses and field experiences. Students elect (1) instrumental emphasis, (2) vocal emphasis, or (3) a general program which includes major portions of both the instrumental and vocal emphases.

The minimum number of credits (exclusive of the University's Core curriculum) required for the major, instrumental emphasis: 95.5; vocal emphasis: 88.5; or general emphasis: 96.5.

All students are reminded that, in addition to meeting departmental requirements for a major leading to a baccalaureate degree, they must also meet the requirements of the school or college involved, as well as the University's Core curriculum requirements and the College of Education's physical education requirements.

All music education majors are required to take the following 18 hours of professional education courses: EDU 324 Student Teaching; any HBD course; and either EDU 350 Modern Philosophies of Education or EDU 200 Studies in Educational Foundations.

Additionally, all music education majors will meet the following requirements:

1. Fulfillment of minimum requirements in both voice and piano, regardless of major instrument.
2. Beginning with the first semester of enrollment, participation in at least one major instrumental and one major vocal organization each semester. Students who are unable to meet the audition requirements of either Concert Band or Chamber Orchestra will be assigned to Percussion Ensemble. Pianists will satisfy one credit of this requirement through accompaniment of singers or instrumentalists.
3. Successful completion of seven semesters of major applied music lessons.
4. Successful completion of recital class in each semester when registered for major applied lessons.
5. Presentation of a solo recital in the senior year (or junior year with special permission).

Piano Proficiency Requirement

Each student must successfully complete the piano proficiency requirement by the end of the third week of the semester before student teaching. The student must enroll in applied piano each semester until the requirement is met. If the piano proficiency has not been met at the end of four credits of study, the student will continue applied piano at his or her own expense.

New students who feel prepared to meet the requirement may schedule an exam during the orientation period. Thereafter, exams will be offered at the end of each semester and may be taken whenever the student and the applied music teacher feel the student is qualified.

Requirements for the exam are as follows: a) play all major and minor scales (two octaves, hands together); b) play a prepared piece of the student's choice of at least the difficulty of a sonatina by Clementi or Kuhlau; c) offer evidence of study of a representative selection of piano litera-
ture; and d) sight read a melody with chord symbols and a hymn style composition.

**Vocal Proficiency Requirement**  All students in the music education program must complete at least one year of vocal study before student teaching. They must also pass the following requirements in a vocal proficiency examination before graduation:

1. Demonstrate and explain the principles of singing, including posture, breathing, tone production, and articulation.
2. Submit a list of 12 songs, including songs in English and at least one foreign language.
3. Perform from memory six songs, at least one of which is in a foreign language.

If the proficiency is not met after four credits of study, the student will continue to study for no credit at his or her own expense until this standard is met.

**Student Teaching**  Student teaching is the culmination of a comprehensive, preprofessional, required sequence of activities that includes the following:

- **Freshman year:** the equivalent of two days of directed observation of music education in cooperating schools in surrounding areas, as arranged by the Music Department.
- **Sophomore year:** the equivalent of two days of assisting classroom teachers in music, serving in a capacity similar to teacher aides.
- **Junior year:** elementary and secondary methods courses wherein students observe, plan, and teach using actual classroom situations.
- **Senior year:** student teaching that encompasses both elementary and secondary as well as instrumental and vocal areas.

**Professional Education: Music Education Courses**

Courses marked with an asterisk (*) are offered on a rotating basis. Students should work closely with their advisors in planning their courses of study in the music education program.

Music education majors must complete the following courses:

- **MUE 221**  Brass Class
- **MUE 222**  Percussion Class
- **MUE 224**  Woodwinds I
- **MUE 225**  Woodwinds II
- **MUE 320**  String Class-Violin
- **MUE 322**  Elementary General Music Methods

For instrumental emphasis, these additional courses must be completed:

- **MUE 321**  String Class-Viola, Cello and Bass
- **MUE 324**  Instrumental Methods
- **MUE 420**  Marching Band Techniques

For vocal emphasis, the student need select only one from **MUE 221, MUE 222,** and **MUE 224.** Additionally, **MUE 323 Secondary Choral Methods** must be completed.

For general emphasis, these additional courses must be completed:

- **MUE 324**  Instrumental Methods
- **MUE 323**  Secondary Choral Methods
- **MUE 321**  String Class-Viola, Cello and Bass

OR

- **MUS 355**  Vocal Pedagogy

**Area Specialization: Music Courses**

Courses marked with an asterisk (*) are offered on a rotating basis. Students should work closely with their advisors in planning their courses of study in the music education program.

All music education majors must take the following courses:

**Music Core Requirements** (28 credits)

- **MUS 160, 161, 260, 262, 360, 361, 460**  Applied Music
- **MUS 244**  Basic Conducting

127
Recital Class (seven semesters)
Ensembles (seven semesters)

The following courses apply to each specialized music education curriculum.

Instrumental emphasis
MUS 150, 151 Voice Lessons
*MUS 344 Instrumental Conducting
*MUS 240, 340 Instrumental Conducting Lab
*MUS 420 Orchestration

Vocal Emphasis
MUS 150, 151 Voice Lessons (not additionally required of voice majors)
*MUS 255 Guitar
*MUS 345 Vocal Conducting
*MUS 241, 341 Vocal Conducting Lab
*MUS 421 Choral Arranging
*MUS 355 Vocal Pedagogy

General Emphasis
MUS 150, 151 Voice Lessons (not additionally required of voice majors)
*MUS 255 Guitar
*MUS 344 Instrumental Conducting
*MUS 340 Instrumental Conducting Lab
*MUS 345 Vocal Conducting
*MUS 341 Vocal Conducting Lab

Bachelor of Arts in Music

This degree program is designed to provide the opportunity for a scholarly study of music to meet the needs of those who wish to obtain a liberal education with an emphasis on music, and those who plan to do graduate work in music. The program aims to instill a thorough understanding of music and its relationship to contemporary society. The study of music history and theory as it relates to the repertoire is central in this curriculum. Sufficient flexibility is built into the program to allow the individual student to establish areas of emphasis both in music and in the arts and sciences.

The minimum number of credits (exclusive of the University’s Core curriculum) required for the major: 96.

Courses marked with an asterisk (*) are offered on a rotating basis. Students should work closely with their advisors in planning their courses of study in this degree program.

Music Core Requirements (28 credits)
*MUS 320 Seminar in Music History
MUS 330, 331 Form and Analysis I, II
MUS 332 Counterpoint

Applied Music (4 credits)
Performance Ensembles (4 credits)

Music Electives (0 credits)
Electives including language proficiency, but not music electives (40 credits)

Language proficiency means completion of a second year of a language. This may be bypassed by examination for no academic credit.

The University will subsidize up to a total of 16 credit hours of applied music lessons for B.A. music students.
Bachelor of Music in Performance

This degree program is designed to meet the needs of those who wish to prepare for a career in music performance and/or applied music teaching, and those who plan to do graduate work in applied music. The program aims to instill a thorough understanding of music and its relationship to contemporary society. Private lessons; solo, chamber and large ensemble performance; and the study of literature and pedagogy of the major instrument are emphasized. Basic understanding of the standards and opportunities for professional performance leads the student to realistic expectations for a career as a performer or teacher.

The minimum number of credits (exclusive of the University’s Core curriculum) required for the major: 95.

Courses marked with an asterisk (*) are offered on a rotating basis. Students should work closely with their advisor in planning their course of study in this degree program.

Music Electives (9 credits)

Performance Ensembles (6 credits)

Electives in any college (15 credits)

Diction for Singers (MUS 356) is required of voice majors only and may be taken in lieu of three credits of music electives. Voice majors must meet a minimum proficiency in two foreign languages either by exam or through completion of the second semester of the basic course in the Department of Foreign Languages and Classics.

Performance majors must have a minimum of four credit hours of their ensemble requirements in the appropriate major ensemble. A student is expected to be enrolled in the appropriate major ensemble whenever registered as a full-time student. A minimum of two credit hours must be in Chamber Music.

All performance majors are required to pass a piano proficiency examination or to complete successfully two years of piano as a minor instrument. The content of the exam is appropriate to the student’s major. In addition, performance majors must complete satisfactorily a short recital in the junior year and a full recital in the senior year.

Minor in Music Education

The minor program is designed to provide an opportunity for candidates for the degree of bachelor of science in elementary education who demonstrate interest and ability to continue music studies beyond the high school level and to equip them to implement successfully in their classrooms the planned programs recommended by music supervisors.

The number of credits (exclusive of the University’s Core curriculum) required for the minor: 21.

MUS 100; MUS 130, 131; MUS 132, 133; MUE 322; and MUS 150, 151 comprise the minor. Additionally, students must take an elective in music history and other music electives for two credits.

Minor in Music (Bachelor of Arts)

This minor program is designed to provide an opportunity for candidates for the degree of bachelor of arts who demonstrate interest and ability to continue music studies at the undergraduate level.

The minimum number of credits (exclusive of the University’s Core curriculum) required for the minor: 20.

The minor consists of elective courses in music and ensembles. How-
ever, MUS 100, MUS 110, and all MUE courses are not acceptable for the minor. Applied music fees, to a maximum of eight credit hours, will be subsidized by the University only when the student demonstrates adequate proficiency.

**Courses Primarily for Non-Majors**

**MUS 100 Music Appreciation and History**
A survey of music from the Gregorian chant to the modern times, covering musical practices of the renaissance, baroque, classical, romantic, and contemporary periods. Representative works by the outstanding composers of each period. Open to all students. Cr 3.

**MUS 102 Music of the Portland Symphony**
A course designed to increase the student's understanding and appreciation of the music scheduled for the Portland Symphony Orchestra's regular concerts of the semester. Attendance is required at the concerts in addition to regularly scheduled classes. Historical background, biography of composer, musical analysis, rehearsal and performance techniques, and music criticism. Open to all students. Cr 3.

**MUS 103 Introduction to Jazz**
A survey of jazz from its inception to the present day. Involves a study of the origins and stylistic development of jazz. Open to all students. Cr 3.

**MUS 110 Fundamentals of Music**
A background study of concepts and skills essential to an intelligent reading of music. The development of natural music abilities through participating in singing, rhythmic activities, and instrumental work. An appreciation of music through awareness of basic structures. Open to all students. Cr 3.

**MUS 202 Music in America**
A survey of the important trends in music from colonial days to the present. Emphasis will be placed on the role of the native American composer in the development of sacred music, concert music, jazz, musical comedy, and pop music. Open to all students. Cr 3.

**MUS 203 Music in the Twentieth Century**
A study of trends in European and American music from the beginning of the century to the present with emphasis on the literature of the major composers. Open to all students. Cr 3.

**MUS 204 Symphonic Literature**
A survey of music for the symphony orchestra from the pre-classical period of C. P. E. Bach to the present. Open to all students. Cr 3.

**MUS 205 Chamber Music Literature: Portland String Quartet**
A historical survey of the literature for chamber ensembles from the classical period to the present. Recorded and live performances will be studied in class. Open to all students. Cr 3.

**MUS 211 Class Piano**
Practical class piano for the elementary teacher with little or no piano background. Course covers note reading, scales, accompaniment of simple songs, transposition and sight reading. Open to all students. Cr 2.

**MUS 334 Electronic Music I**
Lectures, discussions and exercises in sound generation and processing, with emphasis on voltage-controlled systems. The student's time will be divided between class sessions and actual work in the electronic studio. Open to all students. Cr 3.

**Music Performance Groups**

**Major Ensembles**

**MUS 400 Chamber Orchestra**
A choral group of a hundred students from all departments; specializes in larger choral works with orchestral accompaniment; several campus performances and occasional tours. Cr 0.5.

**MUS 401 The University Chorale**
A choral group of a hundred students from all departments; specializes in larger choral works with orchestral accompaniment; several campus performances and occasional tours. Cr 0.5.

**MUS 402 University Concert Band**
A wind and percussion ensemble open to all University students through audition. The ensemble focuses on the fundamentals of ensemble performance dealing with a variety of literature. The University Concert Band performs at least one major concert per semester and is active in presenting school assembly programs. Cr 0.5.

**MUS 405 The Chamber Singers**
A select group of twenty-five singers specializing in music from the renaissance to the contemporary. Extensive touring throughout the state. Cr 0.5.

**MUS 408 Wind Ensemble**
Cr 0.5.
Small Ensembles

MUS 403 Percussion Ensemble
A percussion ensemble open to all University students through audition. Cr 0.5.

MUS 406 Chamber Music
A performance course open to all qualified students interested in forming chamber groups: duets, trios, quartets, quintets, etc., under faculty supervision. Cr 0.5.

MUS 407 Jazz Ensemble
An instrumental ensemble specializing in the study and performance of jazz for large and small groups from Dixieland to present. Open to all students by audition. Cr 0.5.

Courses for Majors
Music History and Theory

MUS 120 History of Music I
Medieval and renaissance periods: historical development and music practices from the Gregorian chant and early polyphony through the culmination of the madrigal in England. Musical examples of outstanding composers are played, analyzed, and discussed. Music majors only or permission of the instructor. Cr 3.

MUS 121 History of Music II
Baroque period; continuation of MUS 120, from the establishment of opera in Italy and the rise of instrumental music, to the culmination of polyphony in the works of J. S. Bach. Music majors only or permission of the instructor. Cr 3.

MUS 130 Music Theory I
Major and minor scales; intervals, triads, and chord connections; cadences; harmonization of soprano and bass lines utilizing primary triads. Music majors only or permission of the department. Cr 3.

MUS 131 Music Theory II
Triads in first and second inversion; modulatory; non-harmonic tones (passing, auxiliary, appoggiature, suspension, and anticipation); dominant seventh chord (root position inversion, regular and irregular resolutions). Prerequisite: MUS 130. Cr 3.

MUS 132 Solfeggio I
A course in sight singing and ear training. Music majors and minors only. Cr 1.

MUS 133 Solfeggio II
A continuation of MUS 132. Prerequisite: MUS 132. Cr 1.

MUS 220 History of Music III
Classical and romantic periods; historical development and musical practices from the establishment of the sonata, string quartet, and symphony, through program music, music-drama, and the rise of nationalism in music. Representative of outstanding composers are played, analyzed, and discussed. Music majors only or permission of the instructor. Cr 3.

MUS 221 History of Music IV
Contemporary period; continuation of MUS 220, from Impressionism to recent tendencies. Melodic, harmonic, rhythmical, and structural features of twentieth-century American and European music and their relationship to tradition. Music majors only or permission of the instructor. Cr 3.

MUS 230 Music Theory III
Diatonic seventh chords; modulation; expansion of nonharmonic tones; altered chords; Neapolitan sixth; augmented sixth chords; chromatic alterations; chorales and their harmonizations; composition in simple forms of the 18th and the 19th centuries. Prerequisite: MUS 131. Cr 3.

MUS 231 Music Theory IV

MUS 232 Solfeggio III
An advanced course in sight singing and ear training. Prerequisite: MUS 133. Cr 1.

MUS 233 Solfeggio IV
A continuation of MUS 232. Prerequisite: MUS 232. Cr 1.

MUS 320 Seminar in Music History
A concentrated study of selected topics in music history based on individual research. Prerequisites: History of Music I, II, III, and IV. For music majors or minors. Others only with permission of instructor. Cr 3.

MUS 321 Literature of the Major Instrument
A survey of the literature for voice or a specific instrument. Except for piano or voice, which are offered in class sessions when the number of registrants warrants it, this will be scheduled as private study. Normally the piano and voice sessions will be offered in alternate years. For performance majors. Other music majors only with permission of the department. Cr 2.

MUS 330 Form and Analysis I
Study and analysis of music of the classical, romantic, and contemporary periods with emphasis on homophonic forms and styles. Prerequisite: Theory II. Cr 3.

MUS 331 Form and Analysis II
Study and analysis of music of the baroque and contemporary periods with emphasis on contrapuntal forms and styles. Prerequisite: Theory II. Cr 2.
MUS 332 Counterpoint
Tonal counterpoint. The process of invention and fugue as exemplified in the music of the baroque era. Prerequisite: Theory III. Cr 3.

MUS 420 Orchestration
A study of the nature of the various instruments. Practice in scoring for instrumental combinations, orchestra, and band. Prerequisite: MUS 231. Cr 3.

MUS 421 Choral Arranging
A course designed to prepare students to arrange vocal music for a variety of combinations of voices in a variety of musical styles. Prerequisite: MUS 231. Cr 2.

Music Performance

MUS 150 Applied Music for Freshmen I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. One half-hour lesson per week in the minor performance area (1 credit) in fulfillment of applied music requirements. Restricted to freshmen. Cr 1.

MUS 151 Applied Music for Freshmen II
A continuation of MUS 150. Cr 1.

MUS 160 Applied Music for Freshmen I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major performance area (2 credits) in fulfillment of applied music requirements. Restricted to freshmen. Cr 2.

MUS 161 Applied Music for Freshmen II
A continuation of MUS 160. Cr 2.

MUS 170 Applied Music for Freshmen I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major area, with three hours' practice daily, would grant 3 credits for the performance major. Restricted to freshmen. Cr 3.

MUS 171 Applied Music for Freshmen II
A continuation of MUS 170. Cr 3.

MUS 240 Instrumental Conducting Lab
Performance techniques on instruments of primary and/or secondary interest to each student. Principles of ensemble training are exemplified. Cr 0.5.

MUS 241 Vocal Conducting Lab
Emphasizing singing technique and interpretation and an exploration of choral literature of various periods and styles. Principles of choral training are exemplified. The repertoire is varied from year to year so that the course covers a considerable range during a given student's attendance. Cr 0.5.

MUS 244 Basic Conducting
Practical conducting experiences; score reading, basic beat patterns, gestures and interpretation. Prerequisite: MUS 230. Cr 2.

MUS 250 Applied Music for Sophomores I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. One half-hour lesson per week in the minor performance area (1 credit) in fulfillment of applied music requirements. Restricted to sophomores. Cr 1.

MUS 251 Applied Music for Sophomores II
A continuation of MUS 250. Cr 1.

MUS 255 Guitar
An introduction to basic guitar skills. Emphasis is placed upon those skills which lead to playing effective accompaniments. Cr 1.

MUS 261 Applied Music for Sophomores I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major area, with three hours' practice daily, would grant 3 credits for the performance major. Restricted to sophomores. Cr 2.

MUS 261 Applied Music for Sophomores II
A continuation of MUS 260. Cr 2.

MUS 270 Applied Music for Sophomores I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. One hour lesson per week, with three hours practice daily, would grant 3 credits for the performance major. Restricted to sophomores. Cr 3.

MUS 271 Applied Music for Sophomores II
A continuation of MUS 270. Cr 3.

MUS 280 Jazz Improvisation I
A course designed to teach the student to improvise in the jazz idiom. Studies include jazz theory and standard jazz literature. Recommended for instrumental music majors. Prerequisite: MUS 131 or permission of the instructor. Cr 2.
MUS 281 Jazz Improvisation II
A course designed to expand upon the improvisation principles presented in Jazz Improvisation I. Students will learn advanced jazz theory and use that knowledge to perform in the jazz language both in class and in lab situations. Prerequisite: MUS 280 or the equivalent. Cr 2.

MUS 340 Instrumental Conducting Lab
Performance techniques on instruments of primary and/or secondary interest to each student. Principles of ensemble training are exemplified. The repertoire consists of selections from various periods and styles and is varied from year to year in order to cover a considerable range during the student's attendance.

MUS 314 Vocal Conducting Lab
Emphasizing singing technique and interpretation and an exploration of choral literature of various periods and styles. Principles of choral training are exemplified. The repertoire is varied from year to year so that the course covers a considerable range during a given student's attendance.

MUS 344 Instrumental Conducting
Advanced development of non-verbal gestures through the art of instrumental conducting. Score reading analysis, rehearsal techniques and performance preparation. Prerequisite: MUS 244. Cr 2.

MUS 445 Vocal Conducting
Organization, training, and directing of choruses and glee clubs in high schools and junior high schools. Study and practice in rehearsal techniques, problems of diction, and emphasis on repertoire and musical style. Prerequisite: MUS 244. Cr 2.

MUS 350 Applied Music for Juniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. One half-hour lesson per week in the minor performing area (1 credit) in fulfillment of applied music requirements. Restricted to juniors.

MUS 351 Applied Music for Juniors II

MUS 355 Vocal Pedagogy
A study of basic principles of vocal production—breathing, phonation, registration, and resonance—and a discussion of the techniques used to teach voice.

MUS 360 Applied Music for Juniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major performing area (2 credits) in fulfillment of applied music requirements. Restricted to juniors. Cr 2.

MUS 361 Applied Music for Juniors II
A continuation of MUS 360.

MUS 370 Applied Music for Juniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week, with three hours' practice daily, would grant 3 credits for the performance major. Restricted to juniors. Cr 2.

MUS 371 Applied Music for Juniors II
A continuation of MUS 370.

MUS 372 Pedagogy of the Major Instrument
A study of the teaching methods and materials for voice or instruments. Except for piano and voice, which are offered in class sessions when the number of registrants warrants it, this will be scheduled as additional applied music time with an instrumental specialist. Normally the piano and voice sessions will be offered in alternate years. For performance majors. Other music majors only with permission of the department. Cr 2.

MUS 442 Recital Class
Performance in major field, stage deportment, and evaluation of performances. May be repeated for credit. Cr 0.5.

MUS 450 Applied Music for Seniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. One half-hour lesson per week in the minor performing area (1 credit) in fulfillment of applied music requirements. Restricted to seniors. Cr 1.

MUS 451 Applied Music for Seniors II
A continuation of either MUS 450 or MUS 351.

MUS 452 Accompanying
A workshop course in applied accompanying under faculty supervision. One-half credit is awarded for each twenty hours of University-supervised accompanying, with a maximum of two credits in any academic year. Cr 0.5-2.

MUS 460 Applied Music for Seniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major performing area (2 credits) in fulfillment of applied music requirements. Restricted to seniors. Cr 2.

MUS 461 Applied Music for Seniors II
A continuation of either MUS 460 or MUS 361.

MUS 470 Applied Music for Seniors I
May be taken in piano, voice, organ, guitar or any orchestra or band instrument. A one-hour lesson per week in the major area, with three hours' practice daily, would grant 3 credits for the performance major. Restricted to seniors. Cr 3.

MUS 471 Applied Music for Seniors II
A continuation of MUS 470.

Philosophy

Chair of the Department: William J. Gavin, 47 Exeter St., Portland
Professors: Gavin, Grange, F. Schwanaeuer; Associate Professor: Conway; Assistant Professors: Louden, Murphy

"Philosophy unties knots in our thinking; hence its results must be simple, but philosophizing has to be as complicated as the knots it unties."
Ludwig Wittgenstein, Zettel #152

The place of philosophy at the center of any educational endeavor is as true today as it ever was. The perennial questions that philosophy addresses, such as "Who am I as a human being?, How should I act?, What can I know?, What are my obligations to others?, How should society be organized?", are fundamental issues with which education must wrestle and into which it must provide insight. Philosophy is a reasoned pursuit
of fundamental truths. It is a systematic investigation of the key assumptions which underlie our thinking and which ordinarily are taken for granted. Much of what is learned in philosophy can be applied in virtually any endeavor. This is both because philosophy touches upon so many subjects and, especially, because many of its methods and analyses are usable in any field. The study of philosophy is beneficial in terms of achieving the following:

**General Problem-Solving Ability.** The study of philosophy enhances in a way no other activity does one's problem-solving capacities. It helps one to analyze concepts, definitions, arguments, and problems. It contributes to one's capacity to organize ideas and issues, to deal with questions of value, and to extract what is essential from masses of information.

**Communication Skills.** Philosophy provides some of the basic tools of self-expression, namely: skills in presenting ideas through well-constructed, systematic arguments. One learns to build and defend one's own views, to appreciate competing positions.

**Writing Skills.** Writing is an important part of most philosophy courses. Philosophy teaches interpretive writing through its examination of challenging texts, comparative writing through emphasis on fairness to alternative positions, argumentative writing through developing students' ability to establish their own views, and descriptive writing through detailed portrayal of concrete examples: the anchors to which generalizations must be tied.

**The Understanding of Other Disciplines.** Many important questions about a discipline, such as the nature of its concepts and its relation to other disciplines, do not belong to that discipline, are not usually pursued within a discipline, and are philosophical in nature. Philosophy of science, for instance, is needed to supplement the understanding of the natural and social sciences which one derives from scientific work itself. Philosophy of art, social and political philosophy, the philosophy of religion are of similar value in understanding the respective fields of art, sociology, politics, and religion.

**Career Applications**

Philosophers know, of course, that the important question is not what you can do with a field of study but rather what a field of study does with you. Nevertheless, it has been a welcome surprise within recent years to witness how many professions—business, law, nursing, for example, want and reward many of the capacities which the study of philosophy develops: the ability to solve problems, to communicate, to organize ideas and issues, to assess pros and cons, and to reduce complex data. These capacities represent transferable skills. For this reason, people trained in philosophy are not only prepared to do many kinds of tasks, they can also cope with change, or even move into new careers, more readily than others.

**Bachelor of Arts in Philosophy**

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 30.

Each major in philosophy will arrange a program of courses in conference with the chair or a member of the Department assigned by him. The program will be designed in terms of the student's interests, needs, vocational plans, and the year in which the student declares a major. The major will require 30 hours of courses beyond a PHI 100-level course.

All philosophy majors must take four of the following history of philosophy courses offered by the department:

<table>

</table>
In the last year a senior tutorial is required . This tutorial consists of a
major paper on a to pic selected by the student and di rect ed by one mem­
ber of the Department. The student will meet with the men t or on a regu­
lar basis durin g the semest er of the senior t utorial . Upon com plet io n of
the paper, an oral examination will be conducted by the full department.
Every major i n t ending to pursue grad uate study and teach in phil oso­
p hy will be expect ed to take Cerman or French through the intermediate
level. Cerman is p referred to French, al t hough i deall y both sets of courses
should be taken. Any introductory philosophy course is a p rerequisit e to
all other courses in philosophy.

Minor in Philosophy

The minimum n umber of credits (exclusive of the University's Core
curriculum ) required for the m inor: 15.
Students who wish to p ursue a minor in philosophy are required to t ake
five courses beyond t he introduct ory level, that is, any PHI 100 course.
These should include two courses in the h istory of philosophy: PHI
310; PHI 320; PHI 330; PHI 340; PHI 350; PHI 360; PHI 370.
One course which ex a m in es the fo und at ions of philosophical in­
quiry: PHI 150; PHI 200; PHI 210; PHI 270.
Two courses which relate philosophical theories to contemporary
p roblems : PHI 211; PHI 220; PHI 230; PHI 240; PHI 250; PHI 260;
PHI 275; PHI 290; PHI 291 .

PHI 101 Introduction to Philosophy: Man
and His Will
Is there a human will at all? This co urse will
concentrate on t he issue of freedom vs. deter­
minism. The importance of the human will
insofar as it influences views of exp erience,
pol itics, society, et c. , will also be consi dered .
Cr 3.

PHI 102 Introduction to

Philosophy: The
Quest for Certainty
P hilosophr has often been defined as t he at­
tempt to become aware of the hidden as­
sumptions we make in our everyday outlooks
on life. The present course will deal with one
of the most pervasi\·e of these assumptions­
the thesis that hum an beings sh ould pursue
certainty and objectivity at any price. The
h ist ory of philosophy will be utilized to trace
and to crit icize the identification of all true
knowledge wi th certainty. Quest ions will be
r�ised as tc_> whether the quest for certainty is
either feasible or beneficial t o the human per­
son. �n a � al ysis of some 20th-century al­
ternahves, mcl udi ng existentialism and prag­
Cr 3.
m at ism, will be undertaken .

103

PHI
Introduction t'o Philosophy: Human
Alienation
Why does modern ma n picture
himself as
alienated from nature and his fellow
man?
How did the p roblem of aliena
tion come
about? What possibil iti es exist for
overcom­
in g it? This course will deal wit
h these issues
a nd attempt to suggest viable altern
atives.
Cr 3.

in the history of civilization. This course will examine a broad spectrum of problems, issues, and areas of concern including such themes as: Can the existence of God be proven rationally; do the great religions of the world have a common core of experience that unifies them, or are they essentially incompatible; has science made religion obsolete; is religion a matter of faith or reason or both; what is the nature of the mystical experience; what is meant by such terms as God, immortality, soul, karma? Philosophers from both the East and the West will be read in the context of arguments both for and against the need, intelligibility, and meaning of God and religion.

Prerequisite: any PHI 100-level course.

PHI 109 Introduction to Philosophy: Law, Politics and Society
This course considers the place of law in political theory. After addressing the philosophical implications of Plato's and Aristotle's conceptions of law, the emphasis of the course will be on the origins and contemporary role of law in liberal political philosophy: After studying the development of liberal theory in the writings of Locke and Mill, the course concentrates on contemporary legal theory as it bears on the overall question of the role of law in liberal political theory.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 150 Symbolic Logic
Techniques of modern deductive logic; properties of formal systems; logical implications and paradoxes of language.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 200 Metaphysics
An analysis of various theories of reality, together with a critical examination of their conceptual constructs, principles and methodologies. Issues to be discussed include change, time, freedom and necessity, immortality and God, good and evil. Thinkers to be studied include Plato and Aristotle, Spinoza, Kant, Hegel, Whitehead and Heidegger. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 210 Ethical Theories
Critical evaluation of major ethical theories and systems. Extensive reading in original texts. Analysis of contemporary ethical issues. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 211 Ethics in Business
This course will be an investigation of the wide range of ethical issues confronting business. It will study these issues primarily through an examination of specific case studies of business practices. It will also present various philosophical concepts of what constitutes right conduct and will attempt to see whether these concepts can assist the business person in resolving the ethical problems with which business is faced.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 220 Philosophy of Art
Inquiry into the question of whether aesthetic experience is intelligible, or emotional, or both; examination of various theories and interpretations, classic and contemporary. Prerequisite: any PHI 100-level course. Cr 3.

PHI 230 Philosophy of Religion
Analysis of the nature of religious experience, knowledge, and language. Special attention given to problems, classical and contemporary, exhibited in religious experience, and relevant to areas of common concern in the sciences, humanities, and philosophy. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 240 Political Philosophy
Critical evaluation of political philosophies, classical and contemporary; extensive reading in original texts; analysis of contemporary political issues. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 250 Philosophy of Science
Nature of scientific explanation; relationship among facts, laws, and theories; clarification of methods and concepts in science, such as cause, determinism, teleology, theory, law, probability. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 260 Philosophy of Law
This course will deal with the philosophical foundations of law in the West. We will examine in detail the various schools of law beginning with the Greek view of law, mankind, and society, move up to the modern schools of Legal Positivism, Sociological Jurisprudence, and Natural Law, and attempt to delineate the strains of these positions within the American system of law. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 270 Epistemology
An analysis of various theories of knowledge in reference to their methodologies and consequences. Texts to be read include Berkeley, Hume, Descartes, Kant, and Hegel. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 275 Theories of Language
This course examines the nature of language from an interdisciplinary perspective. Philosophy, linguistics, and psycholinguistics will be employed to inquire into the structure and function of language, and its relation to perception and the human mind. Prerequisite: any PHI 100-level course. This course is also offered as COM 275.

Prerequisite: any PHI 100-level course. Cr 3.

PHI 290 Problems in Philosophy
Consideration of selected problems or systems of philosophical significance, including general problems of metaphysics, epistemology, axiology, specialized areas, etc. Prerequisite: any PHI 100-level course.

Prerequisite: any PHI 100-level course. Cr 3.
PHI 291 Death and Dying
Recent success in life-prolonging techniques has resulted in the creation of new disagreements over the proper definition of death. Which definition of death is the most adequate? Some have argued that dying, not death is the vitally important topic. Has the term death changed its meaning from time to time and place to place in human history? This course will deal with these and similar epistemological issues. Prerequisite: any PHI 100-level course. Cr 3.

PHI 310 History of Ancient Philosophy
Philosophic thought from the pre-Socratics to the late Hellenistic period, with major emphasis on Plato and Aristotle. Prerequisite: any PHI 100-level course. Cr 3.

PHI 320 History of Medieval Philosophy
The merger of the philosophic with the religious stream; ideas of Augustine, Thomas Aquinas, Bonaventure, and others critically examined; determining cultural factors explored. Prerequisite: any PHI 100-level course. Cr 3.

PHI 330 History of Early Modern Philosophy
Main currents of rationalism and empiricism are explored, as developed in major writings from Descartes to Hume. Prerequisite: any PHI 100-level course. Cr 3.

PHI 340 History of Late Modern Philosophy
Development of German idealism; emergence of social and scientific philosophies; contributions of Kant, Hegel, Marx, Schopenhauer, Nietzsche, Feuerbach, and others. Prerequisite: any PHI 100-level course. Cr 3.

PHI 350 American Philosophy
History and background of the origin of philosophical ideas in America; particular emphasis given to Peirce, James, Royce, Dewey. Prerequisite: any PHI 100-level course. Cr 3.

PHI 360 Existentialism
An examination of the historical development and basic themes of existentialism as found in the writings of its major representa-
tives: Kierkegaard, Nietzsche, Heidegger, Sartre, Buber, Marcel, and others. Prerequisite: any PHI 100-level course. Cr 3.

PHI 370 Analytic Philosophy
A historical approach to twentieth-century linguistic philosophy. This course will begin with logical atomism, continue through the era of logical positivism, and end with ordinary language analysis. Extensive reading of primary sources and major commentators. Prerequisite: any PHI 100-level course. Cr 3.

PHI 398 Independent Study
Independent study undertaken under the mentorship of a professor in the department. Prerequisite: a minimum of two (2) 300-level philosophy courses plus written permission of the instructor involved. Cr 3.

PHI 400, 401, 402 Seminar in Philosophy
These numbers are used to indicate seminar courses dealing with a specific topic or person in philosophy. Topics or individual philosophers will change from year to year and may or may not be repeated. The prerequisite for any 400-level seminar course is two (2) 300-level courses in philosophy, or permission of the instructor. Cr 3.

PHI 409 Senior Seminar
A research seminar designed to provide senior-level students an opportunity to participate in the research efforts of individual faculty and collaborate with each other in the design, methodology and completion of their tutorials. Prerequisite: advanced standing as a philosophy major, and permission of the department. Cr 3.

PHI 410 Senior Tutorial
Designed to furnish senior philosophy majors with extensive training, under tutorial supervision, in analysis of a philosophical problem or system or philosopher, with a view to producing and presenting a senior paper for oral defense. Prerequisites: advanced standing as a philosophy major, and permission of the department. Cr 3.

Physics and Engineering
Chair of the Department: Robert Coakley, 270 Science Building, Portland
Associate Professors: Armentrout, Coakley, Walkling

The engineering section of the Department of Physics and Engineering coordinates and offers a first-year basic program that is applicable to continuing studies at the University of Maine at Orono (UMO) campus leading to degrees in various engineering curricula. All USM engineering stu-
GEE 101 Introduction to Engineering Design I  
Principles of graphic science with illustrative exercises in multiview drawing using freehand and instrumental techniques; lettering styles; charts and graphs. Not offered in 1983-84. Cr 3.

GEE 102 Introduction to Engineering Design II  

MEE 212 Thermal Engineering  
Elementary thermodynamics, mechanical apparatus, power plant equipment; engineering calculations relative to heat, power, work, and mechanical and electrical energy. Prerequisites: physics and chemistry one year each. Cr 3.

MEE 221 Materials Science  
The principles of materials science as applied to the metallurgy of ferrous and non-ferrous metals and alloys with emphasis on the relationship between structure and properties and their control through composition, mechanical working, and thermal treatment. Prerequisites: PHY 121, CHY 113, MEE 255, or equivalent. Cr 3.

MEE 255 Statics and Strength of Materials  
The basic principles of statics and their applications to strength of materials. Equilibrium of various systems including bridge trusses. Centroids and moments of inertia. Stresses and deformations of axially and transversely loaded members, connections, pressure vessels, shafts, beams, and columns. Prerequisites: MAT 153 and PHY 121. Cr 3.

PHY 101 Introduction to Physics  
A simple approach to the study of mechanics, heat, electricity, and light, intended for the student who desires a one-semester introduction to physics. Students in the industrial arts program must register concurrently in PHY 102. This course is not recommended for students majoring in any of the natural sciences. Prerequisite: high school algebra. Cr 3.

PHY 102 Introduction to Physics Laboratory  
Laboratory experiments and additional material designed to supplement the topics considered in PHY 101. Prerequisite: concurrent registration in PHY 101 or permission of the instructor. Cr 1.

PHY 105 Acoustics and Noise  
A semi-descriptive course on sound, with em-
phasis on applications of interest to the scientist and non-scientist alike. Discussion will cover the questions: what is sound, how is it perceived, how is it measured, what are its benefits and liabilities? Particular topics may include: the ear and hearing, sound waves, musical acoustics, building acoustics, noise and the environment, legal aspects of noise, underwater sound, biological aspects of sound, and ultrasونics. Consideration will be given to the interests of the members of the class. Three hours of lecture and demonstration. Occasional laboratory or field experience may be provided. Prerequisite: a course in high school algebra. Cr 3.

PHY 109 Radiation: Problems and Effects
An introduction to several current topics of vital importance such as the use of nuclear fission and fusion in power generation, radioactive materials and x-rays in medical diagnosis and treatment, measurement of radiation, safety considerations, and biological effects. Intended to aid the understanding of the non-scientifically trained citizen. Student participation and discussion will be encouraged. Lecture with demonstration and occasional student use of radiation-related equipment, and maximum use of external resources. Text: Offprints, articles, pamphlets, references, government documents. Prerequisites: None; high school physics and chemistry helpful. One two and one-half hour session per week. Cr 3.

PHY 111 Elements of Physics I
An introduction to the fundamental concepts of mechanics, sound and heat. Lectures, problem solving, demonstrations, laboratory exercises and visual aids will be used to develop an understanding of physical phenomena. Prerequisites: high school algebra. Lecture three hours, lab two hours, recitation one hour. Not offered in 1983-1984. Cr 4.5.

PHY 112 Elements of Physics II

PHY 121 General Physics I
An introduction to the fundamental concepts of mechanics, sound and heat, using calculus where necessary at a level appropriate to the background of the student. This course is recommended for students who plan further study in science, mathematics, or engineering. It should be taken with PHY 122. Prerequisite: prior or concurrent registration in MAT 152 or equivalent experience. Three hours of lecture and two hours of recitation per week. Cr 4.

PHY 122 General Physics II
Experiments designed to illustrate the concepts studied in PHY 121. Prerequisite: concurrent registration in PHY 121 or permission of the instructor. Two hours per week. Cr 1.

PHY 123 General Physics II
A continuation of PHY 121, introducing the concepts of electricity, magnetism, light, and atomic physics, using calculus where necessary at a level appropriate to the background of the student. This course is intended for students who plan further study in science, mathematics, or engineering. It should be taken with PHY 124. Prerequisite: PHY 121 or equivalent and one semester of calculus. Three hours of lecture and two hours of recitation per week. Cr 4.

PHY 124 General Physics Laboratory II
Experiments designed to illustrate the concepts studied in PHY 123. Prerequisite: concurrent registration in PHY 123 or permission of the instructor. Two hours per week. Cr 1.

PHY 211 Introductory Modern Physics
A discussion of the more important topics which show the departure of physics from its classical roots, namely, the nature of atomic particles, methods of determining particle properties, the concept of quantization, atomic and nuclear structure, and radioactivity. Prerequisite: PHY 123, 124, and MAT 152. Cr 3.

PHY 212 Modern Physics Laboratory
A laboratory course designed to accompany PHY 211. The experiments will illustrate the determination of particle properties, spectroscopy, fundamental constants, radioactive decay, and safe methods of handling radioactive materials. Concurrent registration in PHY 211 is required. Cr 1.

PHY 221 Intermediate Mechanics
An intermediate treatment of classical mechanics and wave motion. Prerequisite: PHY 121, 122, and MAT 153. Cr 3.

PHY 222 Mechanics Laboratory
A laboratory course designed to accompany PHY 221. The experiments will illustrate linear and rotational accelerated motion, conservation of energy and momentum, oscillations, and evaluation of the gravitational constant. Concurrent registration in PHY 221 is required. Cr 1.

PHY 223 Intermediate Electricity and Magnetism
An intermediate treatment of static and current electricity and magnetism, leading to Maxwell's Equations and their applications. Prerequisite: PHY 123, 124, and MAT 153. Cr 3.
PHY 224 Electricity and Magnetism Laboratory
A laboratory course designed to accompany PHY 223. The experiments will illustrate the fundamental concepts of electrostatics, circuits, instruments, and electromagnetism, and will establish the values of the fundamental constants. Concurrent registration in PHY 223 is required. Cr 1.

PHY 390 Independent Study in Physics
A laboratory research investigation of an approved topic in physics, using the facilities of the University laboratories and/or those of industrial and professional laboratories. Pre-requisite: consent of the instructor. Cr 3.

Political Science

Chair of the Department: Richard J. Maiman, 38 Chamberlain, Portland
Associate Professors: Coogan, Fisher, Maiman, Roberts, Massaro, Woshinsky

Political science is the systematic study of politics and government and is widely recognized as one of the core disciplines within the liberal arts curriculum. The study of political science does not prepare students directly for any specific career, but it does provide substantive and analytic background which can lead to a variety of professions. Most obviously it serves those with an interest in entering politics and government. Political science majors go on to become town managers, city planners, budget specialists, foreign service officers, policy researchers, and hold a variety of management positions in local, state, national, and international organizations. Beyond government, a political science degree leads naturally to law school or other graduate training. Many journalists and broadcasters were political science majors. Business has recognized the analytic and management skills obtained through training in political science. Indeed, some studies have estimated that perhaps one-third of undergraduate majors undertake careers in business. Political science training is also useful in other rapidly developing fields such as polling, communications, campaign management, consulting, private and public interest group activity, and data analysis. College teaching has also been a traditional career for the political scientists. Demographics now suggest that entering freshmen can look forward to good job prospects by the time they have completed their graduate educations.

Bachelor of Arts in Political Science
The minimum number of credits (exclusive of the University’s Core curriculum) required for the major: 36.
Each major must complete POS 101, 102, and 103. A grade of C minus or better is required to receive major credit in the department. Each major must select the balance of required courses from the following, taking at least one course from each of the following five areas of the department:

Judicial Process: POS 283; POS 284; POS 286; Comparative Political Systems: POS 235; POS 236; POS 237; POS 238; POS 240; POS 245; POS 259; POS 332; Political Theory: POS 289; POS 290; POS 292; International Politics: POS 104; POS 239; POS 274; POS 275; POS 387; POS 388; American Political System: POS 120; POS 201; POS 210; POS 233; POS 251; POS 252; POS 257; POS 258; POS 357; POS 358.
Upper-level political science courses all require either POS 101 or POS 102 or the permission of the instructor. Note that POS 101 is not a prerequisite for POS 102.

In special cases the requirement of POS 101 may be waived if the student successfully completes an examination administered by the Department. In rare cases the Department may also grant credit for other political science courses. Students who wish to obtain the POS 101 waiver or receive credit for other departmental courses should petition the Department through its chair.

The Political Science Department offers students an opportunity to pursue a concentration in world affairs by selecting interdisciplinary courses from a recommended list. See the Department chair for details.

The Department administers an elaborate, carefully structured internship program, open to majors and non-majors alike. Political science majors are especially encouraged to take advantage of the variety of internship opportunities as part of their undergraduate program.

The Political Science Department strongly urges its majors to take courses in economics, history, sociology, and computer science. For a number of majors, courses in geography-anthropology, psychology, philosophy, and communication would also be useful. All political science majors are encouraged to undertake at least one year of university level, foreign language study. Additional language study is recommended for those majors with an interest in comparative or international politics and for those considering graduate school.

All students are reminded that, in addition to their meeting departmental requirements for a major leading to a baccalaureate degree, they must also meet the requirements of the school or college involved, as well as the Core curriculum requirements.

Political science courses are normally offered on the following schedule:

- Every semester: POS 101, 102 and internships.
- Yearly: (Fall) POS 104, 233, 283, 289. (Spring) POS 274, 284, 290. (Either semester) POS 103, 235, 236, 237, 251, 307, 357, 358.

Note: POS 307 Statistical Methods for Social Research may be applied toward the Department's 36-hour major requirement, but may not be used to satisfy the distribution requirement.

Minor in Political Science

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 18.

Students who wish to complete a political science minor should take the following courses: POS 101 and POS 102; three additional courses, to be selected so that three of the five fields within the discipline are represented (see above for the listing of courses within each field); and one additional course in political science.

POS 101 Introduction to American Government

This course focuses on the political institutions, processes, behavior, and problems of government in the United States. The national government is emphasized. Key topics include: the Constitution, Supreme Court, Congress, Presidency, political parties, public opinion, and interest groups. Cr 3.

POS 102 People and Politics

This course introduces the student to modern political analysis. It centers on basic questions in the study of political behavior: how people learn about politics, what kind of political system they adopt and support, who does and who does not participate in politics, how political conflict is expressed and resolved in various societies. The course aims at familiarizing the student with major approaches or methods which political scientists have found helpful for understanding real political behavior. Note: POS 101 is not a prerequisite for POS 102. Cr 3.
POS 103 Political Science Research Methods
An introduction to the way political scientists conceive and carry out research projects. Students will learn the scientific method: how to formulate theories, gather data, and test hypotheses. They will be taught how to find political science sources in the library, how to document sources in footnotes and bibliography, and how to conduct legal research in a law library. Students will eventually complete a major research project. This course is required for all political science majors; they are strongly urged to take it during their first or second semester after entering the Department. Cr 3.

POS 104 Introduction to International Relations
Examination of the relationships of nations in their efforts to deal with each other from differing political, economic, and cultural bases. Cr 3.

POS 120 Government and Politics of Maine
This course concerns Maine State Government, including legislative, executive and judicial programs and powers as exercised within the system of Maine values, political parties, and interest groups. Open to political science majors and as an elective or special interest to the student who has an interest in the programs and politics of the state of Maine. Cr 3.

POS 201 Women and Politics
An introduction to the way gender affects political behavior. Special attention will be given to the social, psychological, and legal factors which, over the years, have inhibited women from engaging in full-scale political activity. Special consideration will also be given to the way the women's movement and the ideas of feminism have encouraged growing rates of political participation by women. The course will include a thorough review of the different behavior patterns of women and men in politics. Prerequisites: POS 101, POS 102, or permission of the instructor. Cr 3.

POS 210 Power and Change in American Society: Inter-governmental Relations
This course examines attempts to bring about social and economic changes through governmental action. Functional and dysfunctional aspects of the political, economic, and social systems are considered. Attempts at intervention are examined through selected case studies in inter-governmental relations. Cr 3.

POS 233 The American City
The city in American political life; types of municipal governments; developments in inter-governmental relations; metropolitan area problems; the future of the city. Students will participate in a task force on a selected urban program. Prerequisite: POS 101 or 102. Cr 3.

POS 235 Democratic Governments of Europe
An introduction to the parliamentary system, through a study of the governmental operations and politics of Britain, France, and the Federal Republic of Germany. Other topics covered: the Common Market and prospects for European integration; relationship of democratic Europe with communist Europe. Prerequisite: POS 101 or 102. Cr 3.

POS 236 Communist Governments
This course offers a survey of existing communist social systems. The following topics will be considered: variation in political parties and state systems, the problem of nationalism, economic management, and cultural policy. Special attention will be given to a comparative survey of current communist ideology and the question of the "socialist commonwealth." Prerequisites: 101 or 102. Cr 3.

POS 237 The Politics of the Soviet Union
An introduction to the USSR: Russian and Soviet political history; Marxism-Leninism; the party and state structures; the socialist economy; the impact of the regime on the individual. Cr 3.

POS 238 Canadian Government and Politics
An introduction to political life in Canada. Primary topics to be covered in the course: Canadian political culture, voting behavior, the parliamentary system, federalism, political parties, and interest groups. The place of Quebec and French-speaking Canadians within the Canadian political system will be given special emphasis. Prerequisite: POS 101 or 102. Cr 3.

POS 239 Soviet Foreign Policy
A survey of Soviet foreign policy as a continuation of Tsarist policies and as a world movement. Major topics include: the Comintern and the Popular Front: impact of World War II; the emergence of the USSR as a superpower; and post-Stalin modifications. Case studies in contemporary foreign problems, including relations with the Communist world. Cr 3.

POS 240 The Politics of Developing Nations
An examination of the thrust towards modernization in the Third World. Economic development, relationships with the world community, the role of the military, and various theories about the nature of the relationship between the Third World and the Communist and non-Communist industrial worlds are considered. POS 101, 102 or 104 are recommended. Cr 3.

POS 245 British Politics
A survey of the contemporary Constitution of Great Britain. The workings of Parliament,
the government, and the parties. Principal stress is on the main issues current in British politics.

POS 251 Public Administration
An examination of national, state, and local bureaucracies, including their processes of decision making, communications, leadership, internal and external political relationships. A continuing question will be, "How can those institutions be made responsive to the public?" Prerequisite: POS 101. Cr 3.

POS 252 Budgets and Politics
A comparative examination of the budgetary processes of municipalities, states, and nations. The budget is the critical point at which goals intersect with resources. Students who complete the course will have a working understanding of various budgeting techniques (such as PPBS, zero-based budgeting, and incremental budgeting) as well as an appreciation of their effectiveness, their impact on expenditures, and their political consequences. Prerequisite: POS 251 or permission of the instructor. Not taught in 1984-85. Cr 3.

POS 257 Political Parties
Development and present organization and operation of the American party system. Nature and function of major and minor parties, sectionalism, nominating system, presidential and congressional elections, the electorate, finance, interest groups. Prerequisite: POS 101. Cr 3.

POS 258 Political Opinion and Electoral Behavior
The role of public opinion in the American political system; definition and measurement; sociological and psychological influences; mass media; linkages to government; the role of public opinion in other nations; voting and presidential elections. A major segment of the course will be devoted to the construction, implementation, and analysis of a public opinion poll. Prerequisite: POS 102. Cr 3.

POS 259 Psychology and Politics
This course is an introduction to the psychological roots of political behavior. It will examine various theories of personality and motivation which explain why people act as they do in politics. It will focus on such questions as: Can "national character" explain political differences among nations? What are the psychological causes of political extremism and mass movements? Are there "authoritarian" and "democratic" personalities? What are the needs or drives which lead people into full-time political activity? The bulk of the course will focus on elite, rather than mass, behavior. Prerequisite: POS 102. Cr 3.

POS 274 Contemporary International Affairs
An analysis of contemporary world problems with emphasis on the interdependence of nations versus their viability as individual nation states. Cr 3.

POS 275 United States Foreign Policy
A detailed evaluation of U.S. foreign policy focusing on such topics as: identification of U.S. policy; governmental agencies and personalities in the formulation and implementation of policy; the role of non-governmental influences. The course is designed to evaluate current policy goals and practices within the context of long-range goals. Cr 3.

POS 283 The American Judicial System
The role of the judiciary in American politics, with emphasis on the United States Supreme Court. A series of case studies will cover such topics as economic regulation, civil rights, reapportionment, and war powers. Attention will also be given to the impact of judicial philosophies on decision-making. Prerequisite: POS 101. Cr 3.

POS 284 American Civil Liberties
An analysis of judicial interpretations of Bill of Rights guarantees and their effects on political processes in the United States. Topics include church and state, freedom of speech and press, the rights of the accused and the convicted. Prerequisite: POS 283. Cr 3.

POS 286 Administrative Law
The law made by and for administrative agencies. Topics include delegation, standing judicial review, and the merits and demerits of "discretionary justice." Prerequisite: POS 101. Cr 3.

POS 289 Political and Social Thought I
An intensive study of ancient political and social philosophies. A textual criticism of the works of Plato and Aristotle is emphasized. Prerequisite: junior or senior standing. Cr 3.

POS 290 Political and Social Thought II
A study of selected political theories from Machiavelli to modern political philosophers. The basic approach is historical, but an attempt is made to relate theories of politics to the environments in which they developed. Prerequisite: junior or senior standing. Cr 3.

POS 292 American Political Thought
An examination of American historical and contemporary thinking on a variety of political topics including equality, revolution, liberty, property, war, and individualism. Prerequisite: consent of the instructor. Cr 3.

POS 307 Statistical Methods for Social Research
Emphasis on uses of statistics in the organiza-
tion, interpretation, and presentation of research data. Measures of association and correlation; testing of hypotheses, probability, and sampling. Includes one hour per week of laboratory exercises. Also listed as SOC 307. Prerequisite: POS 102 or SOC 100. Cr 4.

POS 332 Comparative Political Behavior
This course will introduce students to major approaches and concepts in comparative politics. Emphasis will be placed on using theoretical concepts to understand practical politics in a variety of nations (primarily those modern industrial states of Western Europe and North America). Major topics for study; public opinion, political parties, legislative behavior, bureaucracy. Prerequisite: POS 235 or 236, or permission of the instructor. Cr 3.

POS 351 Federal Executive Internship
Provision may be made to gain professional experience in a department or agency of the federal government located outside of Washington, D.C. The course is open only to selected students. Participation in a seminar is required. Cr 6.

POS 352 Internship in Private and Semi-Public Organizations
Provision may be made to gain professional experience in administration and research. The course is open only to selected students; see department chairman for details. Students will meet for a series of internship seminars, for which readings and reports will be required. Cr 6.

POS 353 Municipal Administration Internship
Provision may be made to gain professional experience in a local government. The course is open only to selected students; see department chairman for details. Students will meet for a series of internship seminars. Readings and research reports are required, focusing on the management, financial control and administration of modern American cities, with emphasis on administration of personnel and finance, the city plan and line functions; public safety, transportation, health, welfare and housing. Cr 6.

POS 354 State Internship
Provision may be made to gain professional experience in a department or agency of state government. The course is open only to selected students; see department chairman for details. Students will meet for a series of internship seminars, for which readings and research reports are required. The state government internship is available under the Maine State Government Internship Program. Cr 6.

POS 355 Congressional Internship
Provision may be made to gain professional experience in the local offices of Maine's U.S. Congressmen and Senators. The course is open only to selected students; see department chairman for details. Students will meet for a series of internship seminars, for which readings and research reports are required. Cr 6.

POS 356 Internship in Washington, D.C.
Provision may be made to gain professional experience in a congressional office, an agency of the national government, or with a private or semi-public organization in Washington, D.C. The course is open only to selected students; see department chairman for details. Readings and research reports are required. Cr 6.

POS 357 The American Presidency
This course examines the development of the modern presidency; the scope and exercise of presidential decision-making in domestic and foreign policy; and standards for assessing presidential performance. Prerequisite: POS 101. Cr 3.

POS 358 The American Congress
The role of the national legislature in American politics is considered. The course undertakes a study of the men and women who reach Congress, the internal norms and procedures on national decision-making. Among topics covered are the committee system, leadership patterns in the Senate and the House, the public's influence on Congress, Congress and the Presidency, and Congressional policy-making in selected areas. Prerequisite: POS 101 or 102. Cr 3.

POS 359 International Law
An analysis from the political perspective of the sources, limitations and institutions of international law as they relate to the search for peace and world order. Cr 3.

POS 388 International Organization

POS 395 Independent Study I
A concentrated program of research or study on a particular subject of the student's selection. The topic will be chosen with the advice and under the direction of a faculty member. Admission by permission of the political science faculty. Cr 3.

POS 396 Independent Study II
A concentrated program of research or study on a particular subject of the student's selection. The topic will be chosen with the advice and under the direction of a faculty member. Admission by permission of the political science faculty. Cr 3.
POS 400 Seminar in Political Science I
A seminar focusing on some aspect of political science. Prerequisite: permission of the instructor. Cr 3.

POS 401 Seminar in Political Science II
A seminar focusing on some aspect of political science. Prerequisite: permission of the instructor. Cr 3.

Psychology

Chair of the Department: William F. Gayton, 512 Science Building, Portland
Profs: Bishop, Paradise, Saldanha; Associate Professors: Hears, Sanborn, Gayton, Sytma

The Department of Psychology offers a four-year program for students majoring in psychology. It also includes courses for students majoring in allied fields, as well as for students wishing an orientation to the field of psychology as part of their general education. Courses are designed to create an awareness of the fundamental principles of psychology, psychological research, and the means by which psychological knowledge is acquired. The emphasis is upon the scientific inquiry into basic phenomena and principles of behavior, not upon the development of professional skills.

Programs and Requirements

Bachelor of Arts in Psychology
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 40.

Required Courses:
PSY 101 and 102 General Psychology (3 credits each semester) to be taken as a two-semester sequence
PSY 201 Statistics in Psychology
PSY 205 Experimental Methodology
PSY 223 Child Development
PSY 330 Social Psychology
PSY 333 Psychopathology
PSY 350 Psychology of Learning
PSY 351 Learning Laboratory
PSY 361 Sensation and Perception
PSY 365 Physiological Psychology
PSY 371 History and Systems

Other courses offered by the Department can be taken as electives to complete the 40-hour minimum. PSY 101 and 102 are prerequisites for all additional psychology courses.

In addition, successful completion of the following three non-psychology courses is required for certification as a psychology major. These courses should be completed by the end of the sophomore year:
MAT 100 College Algebra (Prerequisite for PSY 201)
BIO 105 Biological Principles
BIO 211 Human Anatomy and Physiology (Prerequisite for PSY 365)

Psychology 101 and 102 should be elected no later than the sophomore year by students who plan to major in psychology. All majors are required to elect PSY 201 and PSY 205 no later than their junior year. PSY 201 may be taken concurrently with PSY 102. No grade of D in any departmental course will count toward fulfillment of the major requirement.

All students are reminded that, in addition to meeting departmental
requirements for a major leading to a baccalaureate degree, they must also meet the requirements of the school or college involved, as well as the Core curriculum requirements.

The Department recommends that students who wish to take a more extensive program or who plan to enter graduate school elect, in consultation with their major advisor, further courses in psychology and also include in their programs study in related fields, such as mathematics, biology, philosophy, sociology, anthropology, and computer programming.

PSY 101 General Psychology I
An introduction to the study of behavior as a natural science. Among the topics covered are: method of inquiry, physiological foundations of behavior, sensation and perception, motivation and emotion, learning and thinking. This course is a prerequisite for all courses in the department. Cr 3.

PSY 102 General Psychology II
A continuation of Psychology 101. It deals with complex psychological processes such as ability testing, personality, conflict, behavior disorders and therapy, and social and industrial behavior. Prerequisite: PSY 101. Cr 3.

PSY 201 Statistics in Psychology
A general introduction to the techniques of descriptive, predictive, and inferential statistics. Emphasis is placed on measures of central tendency and variability, correlation, hypothesis testing, and simple analysis of variance. Prerequisites: PSY 101 and MAT 100 or permission of the instructor. Cr 3.

PSY 205 Experimental Methodology
Emphasis on the principles, methods, and techniques of experimental psychology. Applications of general methodology and specific techniques to the design of experiments in behavioral research. Prerequisite: PSY 201. Cr 3.

PSY 220 Developmental Psychology
A study of the factors in human psychological growth traced from genetic predisposition through the prenatal and postnatal periods, childhood, adolescence, adulthood and aging to death. The major theorists relevant to each developmental period are considered. Prerequisites: PSY 101 and 102. NOTE: This course does not count toward major credit. Cr 3.

PSY 223 Child Development
A systematic study of the behavior and psychological development of children during infancy, preschool and school-age periods. Analysis of the genetic, prenatal, and postnatal influences on physical, cognitive, and personality development. Prerequisites: PSY 101 and 102. Cr 3.

PSY 224 Adolescent Development
A systematic study of the behavioral and psychological development of the adolescent. The adolescent personality and problems of adjustment in relation to the family, the school and the community. Prerequisites: PSY 101 and 102. Cr 3.

PSY 232 Psychology of Adjustment
A study of the development of personality patterns, modes of behavior, life styles, and coping mechanisms considered normal in this society. Consideration of their value to individual functioning. Prerequisites: PSY 101 and 102. NOTE: This course does not count toward major credit. Cr 3.

PSY 235 Psychology of Women
Psychology of women and psychological literature relevant to men and women. Some topics include physiological and personality differences between the sexes, sex-role development, role conflict, women and traditional therapy. NOTE: This course does not count toward major credit. Prerequisites: PSY 101 and 102. Cr 3.

PSY 311 Industrial Psychology
Critical treatment of research methods in personnel selection and evaluation and current theories of individual behavior in complex organizations such as government and business. Prerequisites: PSY 101 and 102. Cr 3.

PSY 320 Psychology of Personality
Consideration of current issues and findings in personality. Current research in such areas as locus of control, anxiety, field dependence, interpersonal trust, repression-sensitization, sensation-seeking, authoritarianism, need for achievement, and extraversion. A group research project is required. Prerequisites: PSY 101 and 102. Fall semester only. Cr 3.

PSY 330 Social Psychology
The psychological principles which enter into the social behavior of the individual. Areas of consideration include perception, communication, attitude formation, interpersonal attraction, and group behavior. Prerequisites: PSY 101 and 102. Fall semester only. Cr 3.
PSY 333 Psychopathology
The etiology, development, and manifestation of the major forms of mental illness with particular emphasis upon the neuroses and psychoses. Psychological, social, and biological factors which contribute to maladjustment are examined. Prerequisite: PSY 101 and 102. Spring semester only. Cr 3.

PSY 335 Deviations of Childhood
Intensive readings and discussion of the etiology and manifestation of deviant patterns of behavior and functioning in children. Problems relating to the identification and management of such deviations are considered. Prerequisites: PSY 101 and 102 or permission of the instructor. Spring semester only. Cr 3.

PSY 338 Theories of Personality
A survey of the major contemporary approaches to the study of personality. Different theories are compared, their impact upon current thinking evaluated, and their research contributions assessed. Prerequisites: PSY 101, 102, and 320, or permission of the instructor. Cr 3.

PSY 340 Behavior Modification
An introduction to the principles of operant conditioning with emphasis on the application of operant techniques in educational, correctional, and therapeutic situations. Prerequisites: PSY 101 and 102. Cr 3.

PSY 343 Psychological Test Theory
The theoretical and statistical concepts underlying the development of various psychological tests. Individual and group tests of intelligence, personality, aptitude, and interest are examined and evaluated in terms of these concepts. Uses and abuses of psychological tests are considered. Prerequisite: PSY 201 or instructor's permission. Fall semester only. Cr 3.

PSY 350 Psychology of Learning
Experimental findings on the fundamental principles that underlie the acquisition and retention of new behavior. Emphasis is placed on operant and respondent conditioning and the experimental analysis of behavior. Prerequisites: PSY 101 and 102. Cr 3.

PSY 351 Learning Laboratory
An introduction to laboratory experiences designed specifically to demonstrate the basic principles of behavior conveyed in PSY 350. Topics include positive reinforcement, extinction, shaping, discrimination, schedules of reinforcement, generalization, and others. Prerequisites: PSY 101 and 102. PSY 350 must be taken either prior to or concurrently with PSY 351. Cr 1.

PSY 352 Psychology of Motivation
A survey of theory, research methods, and experiential findings related to the search for the determinants of human and animal behavior. The course requires a research paper on a topic of interest to the student, and the planning of an experiment growing out of that interest. Laboratory. Prerequisites: PSY 101 and 102. Cr 3.

PSY 355 Research in Personality
Examination of current research in personality. Intensive experience in designing, executing, reporting, and evaluating research in personality. This will include a research project. Prerequisite: PSY 320 or permission of instructor. Spring semester only. Cr 3.

PSY 360 Cognitive Processes
Experimental findings and theoretical analyses of the acquisition, retention, and transfer of verbal behavior and a critical survey of theories and research on such topics as problem solving, creative thinking, reasoning, concept formation, decision making, thought and language, and related topics. Prerequisites: PSY 101 and 102. Cr 3.

PSY 361 Sensation and Perception
An examination of perceptual processes in selected sensory systems. Emphasis on experimental methodology, research findings, and theoretical interpretations. Prerequisites: PSY 201 and 205. Cr 3.

PSY 365 Physiological Psychology
Basic neuroanatomy, neurophysiology, and endocrinology, and the relationships between nervous system functioning and behavior. Physiological analysis of sensory function, motivation, and learning. Prerequisites: BIO 101 and 111; PSY 101, 102. Cr 3.

PSY 371 History and Systems of Psychology
A survey of the history of psychological thought from its beginnings in Greek philosophy to modern times. Special attention will be given to the influence of philosophy and natural science on the development of contemporary psychology. The course concludes with a survey of the major systems. Prerequisite: 15 hours in psychology and/or instructor's permission. Cr 3.

PSY 380 Psychology and the Law
This course represents an intensive study of the role of psychology in the legal process with particular emphasis upon the insanity defense, competency to stand trial, and involuntary commitments. Also considered are those psychological factors which relate to such topics as jury selection and deliberation, eyewitness testimony and credibility, and courtroom strategy. A term paper is required of all students. Prerequisites: PSY 101, 102, 333 and/or permission of the instructor. Spring semester only. Cr 3.
PSY 385 Contemporary Psychotherapies
A survey of contemporary psychotherapies including Gestalt therapy, logotherapy, bioenergetics, reality therapy; transactional analysis, and rational-emotive therapy. Seminar format. This course is designed for advanced psychology majors planning to go on to graduate school in clinical or counseling psychology. Prerequisite: permission of the instructor. Fall semester only. Cr 3.

PSY 390 Selected Topics in Psychology
A critical in-depth investigation of one of various topics and issues in different areas of psychology (e.g., experimental, social, clinical, child-developmental, etc.) Each student is expected to complete a research project on the topic for the semester. Consult the Psychology Department for topics offered. Prerequisite: permission of the instructor. Cr 3.

PSY 400 Research in Psychology I
This course is open to qualified majors in psychology who wish to engage in independent readings on selected topics or conduct research projects. With permission of departmental chairman. Cr 3.

Social Welfare

Chair of the Department: Joseph D. Kreider, 7 Chamberlain Ave., Portland
Professor: Steinman; Associate Professors: Dreyer, Kreider, Lazar, Rich; Assistant Professor: Lieberman; Field Work Coordinator: Asen

The program in social welfare prepares the student for the professional practice of social work at the entry level.

The social welfare curriculum of the Department is accredited by the Council on Social Work Education. Students who receive a degree from an accredited undergraduate program in social welfare may apply to selected graduate schools of social work for advanced standing. If accepted the student may complete an M.S.W. degree program in one year instead of two.

Admission to the Social Welfare Department is initially on a provisional basis. Formal admission occurs after the student has completed the Department's admission application and has had an admission conference with his other faculty advisor. This normally takes place in the second semester of the sophomore year. Transfer students, who select social welfare as their major, should meet with their faculty advisor as soon as possible after they are admitted to the University.

Included in the social welfare course requirements are two semesters of Community Lab. During these two semesters the student puts in 480 hours in his or her field assignment. This field assignment takes place in a community agency. A large number of social and community agencies in the Greater Portland area and in cities and towns of southern Maine have been most generous in their cooperation with the Department and in making available field instruction resources including supervision for students of the Department.

In planning their program, provisional and admitted students must regularly consult with their faculty advisor. Such consultation is designed to help the student explore career objectives, review departmental requirements, design the best possible combination of required courses and electives, and to facilitate a productive relationship between the student and the Department.

The students of the Department have organized a Social Welfare Majors Association. The organization seeks to facilitate communication between students and faculty, ensure student involvement in departmental deliberations, provide for professional growth, and act on issues and
problems in the community. Student representatives attend faculty meetings and serve as full members on the Department's personnel and curriculum committees.

The Social Welfare Department has a policy of awarding credits for work experience to students when a thorough review of their work experience in the human services reveals that they have attained a level of competence equivalent to that expected of students in selected practice-oriented courses. See Department policy statement, "Advanced Credit Procedures for Community Lab." When credits are awarded for work experience they are assigned the following course designation: SWE 251 Community Laboratory in Social Welfare; credit for work experience.

Bachelor of Arts in Social Welfare
The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 40.

The major in social welfare consists of 40 credits in required social welfare courses. In addition, 40 credits of foundation courses must be completed in other departments. Some of these foundation courses may also be used to satisfy the Core curriculum requirements as appropriate.

Required Social Welfare Courses
SWE 101 Introduction to Social Welfare
SWE 102 Introduction to Social Work
SWE 351 Human Services and the Consumer
SWE 352 and 353 Methods of Social Work Practice I and II
SWE 354 and 355 Community Laboratory in Social Welfare I and II
SWE 370 Human Development and Social Welfare
SWE 433 Social Welfare Research
SWE 450 Social Problems and Social Welfare Policy
SWE 456 Issues in Social Welfare and Social Work

Required Foundation Courses in Other Departments

Substitutions for, or waivers of any of these courses, require the written approval of a student's advisor.

ENG 100 College Writing
ECO 201 Principles of Economics I
BIO 101 Biological Foundations
BIO 102 Biological Principles
POS 101 Introduction to Government
OR
POS 102 People and Politics
PHI (Any introductory philosophy course)
FSY 101 and 102 General Psychology I and II
SOC 100 Introduction to Sociology
SOC 371 Sociology of Minorities

Four other advanced level sociology and/or psychology courses

These four other courses are selected with the advice and approval of the student's advisor.

Students are expected to achieve a grade of C- or better in all Department of Social Welfare and required foundation knowledge courses.

SWE 101 Introduction to Social Welfare
Seeks to define a perspective within which to understand the needs, problems, and potential of humans as individuals and in groups. Describes and analyzes social welfare systems and social work practices as they currently respond to social needs, and as they might better facilitate the development of human potential. Cr 3.

SWE 102 Introduction to Social Work
An introduction to the practice of social work focusing on the nature of intervention, the roles and functions of social workers in the delivery of services in various settings and beginning practice skills. The course enables a student to make a more informed decision about his/her entry into the field. Prerequisite: SWE 101. Cr 3.
SWE 265 Women—Social Change
Examines the ways our culture affects and is affected by women in the areas of physical and mental health throughout their lifespan. Emphasis will be placed on an assessment of the problems women face in today's world as well as personal and political approaches to these problems. Cr 3.

SWE 266 Concept of Self and the Handicapped Person
To enhance effective interaction and communication with handicapped persons, issues are examined from the perspectives of society and of the individual (handicapped and non-handicapped). Topics include basic human needs and self-image, independence-dependence, anger- frustration, failure, the power of guilt and shame. All students participate in sensory exercises. Cr 3.

SWE 267 Relating Professionally to Homosexuality
Provides an understanding of varying concepts of homosexuality. Employs recent theoretical, empirical and clinical literature to assess attitudes toward homosexuality. Examines motivation and skills to achieve constructive interaction between the professional and the homosexual. Cr 3.

SWE 274 Aging and Social Policy: A Cross-Cultural View
Examines similarities and differences between simple and complex societies in their treatment of processes of aging. Against this background the position of older Americans is considered in relation to various social institutions, together with the origin and implementation of social policies affecting them. Cr 3.

SWE 275 Developmental Services to the Aging
Policy, administration, and implementation of human services to older people are studied from a developmental standpoint. Examines implications of age bias (and its modification) for the nature of service. SWE 274 recommended but not required. Cr 3.

SWE 278 Professional Practice with Older People
Enhances skills in human service practice with older people. Analyzes the sources and manifestations of both healthy and problematic aging. Applies concepts drawn from the behavioral and social sciences, and from clinical and community practice. Translates a developmental rather than a custodial view into everyday direct service. Cr 3.

SWE 279 Skills for Serving the Frail Elderly
Enhances values and skills for guiding families to plan with (rather than for) older relatives; for performing periodic, differential functional assessments of clients’ remaining strengths as well as their limitations; for utilizing the network of community supports; for discerning appropriate institutionalization and for discharge planning; and for advocacy and assertiveness with and on behalf of the frail elderly. Cr 3.

SWE 288 Substance Use and Abuse: Alcohol and other Drugs
Examines the use and abuse of psychoactive substances: street drugs, prescription drugs, alcohol, caffeine, and nicotine. Consideration of the history, pharmacology, and physical and psychological affects of each substance. Exploration of prevention and treatment models, with special reference to those in use locally. Cr 3.

SWE 351 Human Services and the Consumer
Provides a series of concepts for the study and critical evaluation of the bureaucracies, professions, and consumers of social work and other services. Examines a range of approaches to rendering human services more responsive to client needs. This course is offered one semester each academic year. Prerequisite: SWE 101 plus junior standing or permission of instructor. Cr 3.

SWE 352 Methods of Social Work Practice I
An introduction to basic concepts and skills in social work interviewing and in the problem-solving approach within the framework of systems theory. Study of the values and knowledge base of social work skills. Class discussion and assignments based on community lab experience (SWE 354) which must be taken concurrently. Prerequisite: SWE 101. Cr 3.

SWE 353 Methods of Social Work Practice II
A continuation of SWE 352 covering application of basic social work skills to areas of practice such as community organization, crisis intervention, group work. Class discussions and assignment based on community lab experience (SWE 355) which must be taken concurrently. Cr 3.

SWE 354 Community Laboratory I
For social welfare majors: a required internship in an agency placement, designed to provide an opportunity to relate social work theory to practice. Prerequisites: SWE 101; 352 (concurrent). Cr 6.

SWE 355 Community Laboratory II
A continuation of SWE 354. Prerequisites: SWE 352 and 354; SWE 353 concurrent. Cr 6.

SWE 364 Comparative Social Welfare Systems
A study of social welfare programs in advanced industrial and in developing societies.
in market and non-market economies and in democratic and authoritarian political systems. Prerequisite: SWE 450 or permission of instructor. Cr 3.

SWE 365 Social Work with Minority Groups
An exploration of issues in social welfare policy and social work practice as they are related to the status of minority groups and their movement for self-determination. Prerequisites: SOWT 371 and six hours of social welfare. Cr 3.

SWE 370 Human Development and Social Welfare
A study of the implications of research and theory related to human development for social welfare policy and social work practice. Prerequisites: at least six hours of social welfare courses. This course is offered one semester each academic year. Cr 3.

SWE 380 Child Welfare
A study of the process of growing under handicapping social conditions and the implications for social services and institutional change. Prerequisite: SWE 101 or permission of the instructor. Cr 3.

SWE 397 Department Projects
Individual or group projects, requiring independent study or field work in some aspect of social welfare, to be selected by students in consultation with faculty. Prerequisite: department permission. Cr 3.

SWE 433 Social Welfare Research
A study of the implications of social welfare research for social policy and social work practice. Students practice applications of concepts and methodology by means of projects. Prerequisite: SWE 101 plus senior standing or permission of instructor. Cr 4.

SWE 450 Social Problems and Social Welfare Policy
A critical examination of social welfare institutions, the social problems and social needs to which they are addressed, and the policy decisions which determine the organization and direction of social welfare programs. Prerequisite: SWE 101. This course is offered one semester each academic year. Cr 3.

SWE 452 Methods of Social Work Practice III
Provides further exploration of the theoretical knowledge and practice skills involved in utilization of particular interventive methods (e.g., child advocacy, organizational change and/or the more focused knowledge, methods, and skills needed for effective intervention with a particular population at risk: adolescents, the frail elderly, substance abusers). Prerequisite: permission of instructor. Cr 3.

SWE 453 Methods of Social Work Practice IV
A continuation of SWE 452. Cr 3.

SWE 454 Community Laboratory III
An advanced field experience in human services. Prerequisites: SWE 354 and 355 or permission of the instructor. Cr var.

SWE 455 Community Laboratory IV
A continuation of SWE 454. Cr var.

SWE 456 Issues in Social Welfare and Social Work
Senior seminar for social welfare majors that seeks to integrate class and field experience. Open to others by permission only. Must be taken in student's final semester. Cr 3.

Sociology

Chair of the Department: S. Henry Monsen, 120 Bedford St., Portland
Professors: Giguere, Lacognata, Monsen, Beirne; Associate Professors: Ansbach, Fullam, Grzelkowski, Lehman; Assistant Professor: Preston

Sociology is the study of social life and the social causes and consequences of human behavior. Sociology's subject matter ranges from the intimate family to the hostile mob, from crime to religion, from the divisions of race and social class to the shared beliefs of a common culture, from the sociology of work to the sociology of sport. Although teaching remains the dominant activity among the more than 15,000 sociologists today, other forms of employment are growing. An undergraduate major in sociology offers valuable preparation for careers in social work, social...
research, politics, public administration, law, business and education.

Students majoring in sociology may choose between two areas of concentration offered by the Department: general sociology and social policy. Requirements for each concentration are listed below.

In addition to the major, the Department also offers a minor in sociology. The minor is intended for those students with a major other than sociology but who wish to broaden their educational experience in a formally designated program of study. The minor program may be of particular interest to students in the schools of Nursing and Business, the College of Education, and non-social science disciplines in the College of Arts and Sciences.

Criminology Degree
The Department of Sociology also offers a bachelor of arts degree in criminology. This program provides an integrated and coherent academic program focusing on the structures, institutions, and activities that define certain social behavior as criminal in modern society. For more information please see the catalog entry for Criminology or contact the Department.

Alpha Kappa Delta
Juniors and seniors who have demonstrated an interest and involvement in sociology, who have completed at least four sociology courses and who have accumulated at least a 3.0 grade point average in sociology courses at the University are eligible for nomination to Alpha Kappa Delta, the national sociology scholarship and honor society.

Student Involvement
Student involvement is a high priority for the Sociology Department. Students are involved in the research projects of the Department as well as the everyday administrative and advising life of the Department. Members of the Sociology Student's Association are involved in all departmental activities and decisions as full voting members of the Department. These student members are elected by students each April, although vacancies sometimes occur during the year. Students who are interested in this kind of involvement are encouraged to talk to departmental faculty.

Internships and Work Experience
The Department of Sociology has begun a new and expanded internship and work experience program. The expanded program helps place students in community agencies and organizations, including neighborhood organizations and a variety of agencies dealing with youth services. Credit internships actively seek to bring together student academic work and community involvement. Students interested in an internship or work experience placement are encouraged to meet with Professor Grzelkowski, internship coordinator.

Colloquia
The Department of Sociology sponsors a colloquium series which seeks to bring together faculty and students in active discussion around a variety of topics. Several colloquia are scheduled each semester with faculty, students, and occasional visiting scholars, making presentations which serve as the focus of discussion. A schedule of current colloquia is available from the departmental office.

All students are reminded that, in addition to their meeting departmental requirements for a major leading to a baccalaureate degree, they must also meet the requirements of the College of Arts and Sciences, as well as the University's Core curriculum.
Bachelor of Arts in Sociology

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 47.

All students must complete 41 hours of coursework in sociology, and must also satisfy a cognate requirement consisting of 6 hours above the introductory level in a related discipline. All concentrations share a common core of 20 hours of required coursework.

Majors are encouraged to complete their courses in Methods of Social Research (SOC 205), Sociological Theory (SOC 300) and Statistical Methods (SOC 307) relatively early in their academic careers. Students should note that Sociological Theory II is a prerequisite for Senior seminar.

General Sociology Concentration

Common Requirements
SOC 100 Introduction to Sociology
SOC 205 Methods of Social Research
SOC 300 Sociological Theory I
SOC 301 Sociological Theory II
SOC 307 Statistical Methods for Social Research

One seminar from those numbered SOC 400-SOC 405

Concentration Requirements (three hours from each of the following areas)
SOC 310-319 Social Processes
SOC 330-339 Social Institutions
SOC 350-369 Units of Social Life
SOC 370-379 or SOC 215 Social Problems

Electives in Sociology (9 hours)
Students in general sociology may satisfy their cognate requirement with any six hours above the introductory level in any of the following areas: anthropology; biology; criminology; economics; geography; history; mathematics; philosophy; political science; psychology; social welfare; computer science.

Social Policy Concentration

Common Requirements
SOC 100 Introduction to Sociology
SOC 205 Methods of Social Research
SOC 300 Sociological Theory I
SOC 301 Sociological Theory II
SOC 307 Statistical Methods for Social Research

One seminar from those numbered from SOC 400-SOC 405

Concentration Requirements
SOC 312 Class and Inequality
SOC 352 Population Dynamics
SOC 376 Society and Social Policy
One of: SOC 310, SOC 350, SOC 355, SOC 356
One of: SOC 374, SOC 375

Sociology Electives (6 hours)
Students in social policy satisfy their cognate requirement by taking ONE of the following clusters:

a. Six hours above the introductory level in social welfare to include one of the following: SWE 350 or SWE 351.

b. Six hours above the introductory level in political science, to include one of the following: POS 210 or POS 233.

Minor in Sociology

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 19.

Ten credit hours are required courses; the remainder are electives.

Required Courses: SOC 100; SOC 205; SOC 300 or SOC 356; sociology electives**

**Each student minoring in sociology elects a minimum of three upper-division courses from those offered by the Department. These courses, chosen in consultation with the minor advisor, reflect the professional or other interests of the student.

Note: Advisor to sociology minors: Professor David Fullam.
**Major Credit and Grade Policy**

There are prerequisites for most major credit courses. See the departmental course listings for particulars. Courses to be taken for major credit at other institutions must be approved in advance. Grades of C- or better must be achieved in all courses for major or minor credit. Courses taken pass/fail are not acceptable.

---

**Introducing the Discipline**

SOC 100 Introduction to Sociology

The fundamental concepts, principles, and methods of sociology; analyzes the influence of social and cultural factors upon human behavior; evaluates effect of group processes, social classes, stratification, and basic institutions on contemporary society. Cr 3.

SOC 200 Social Issues

Application of a sociological frame of reference to selected contemporary issues. Guides the student toward an understanding of why and how issues develop, how particular social groups are affected by them, and what is involved in dealing with them. Specific topics considered vary from term to term, and from section to section. Descriptions of current topics are available in the sociology department office. Students should consult these descriptions before registering for the course. Course may be taken only once for credit. Does not count for credit towards the sociology major or minor. Prerequisite: SOC 100 or permission of instructor. Cr 3.

**Tools of the Discipline**

SOC 205 Methods of Social Research

Conceptualization and research design, data collection and analysis, logic of inquiry and research techniques. Includes one hour per week of laboratory exercises. Prerequisites: SOC 100 or permission of instructor. Offered each semester. Cr 4.

SOC 206 Computers and Social Science

An introduction to the problems, processes, and techniques of computer use in the analysis of social science data. The course will acquaint students with general computer use and processing; with some of the basic concerns and problems of social science data management and analysis; and with the actual use of some of the most common programs and statistical packages in social science. Emphasis will be on use of the Statistical Package for Social Sciences (SPSS). This course assumes little or no prior computer knowledge. Prerequisite: SOC 100 or permission of instructor. Not open to freshmen. Cr 1.

SOC 300 Sociological Theory I

Critical evaluation of selected classical and contemporary models of the social world. Includes consideration of the foundations of sociological thought, the content of major classical theories and theory groups, and the socio-cultural settings within which they developed. Prerequisite: SOC 100 and two other SOC courses, or permission of instructor. Offered fall semesters. Cr 3.

SOC 301 Sociological Theory II

An investigation of contemporary sociological theory. Traces descent of the classical statements through to the present, and identifies both linkages and discontinuities in sociological analysis. Attention is also given to the socio-cultural settings within which various schools of sociological theorizing presently flourish. Prerequisites: SOC 300 and two additional SOC courses, or permission of the instructor. Offered spring semesters. Cr 3.

SOC 307 Statistical Methods for Social Research

Emphasis on the uses of statistics in the organization, interpretation, and presentation of research data. Measures of association and correlation; testing of hypotheses, probability and sampling. Includes one hour per week of laboratory exercises. Prerequisites: SOC 205 or permission of instructor. Offered spring semesters. Cr 4.

**Social Processes**

SOC 310 Social Change

Analysis of sociocultural factors related to social change and the dynamics of the change process. Prerequisite: SOC 100 or permission of instructor. Offered spring 1986. Cr 3.

SOC 312 Class and Inequality

A systematic assessment of structured social inequalities in wealth, power, and status in industrialized societies. Emphasis is placed on assessing social policies employed to reduce, ameliorate, or sustain such inequalities. Prerequisite: SOC 100 or permission of instructor. Offered spring semesters. Cr 3.
SOC 315 Self and Society
A sociological examination of theory and research in major areas relating personality and social systems; attitudes and behavior; socialization; social perception; bureaucratic structure and personality; etc. Emphasis on issues involved in relating two theoretical levels of analysis. Prerequisite: SOC 100 or permission of instructor. Offered fall 1985. Cr 3.

SOC 316 Sex Roles
An examination of sex roles in a sociopolitical and cultural context focusing on the sexual division of labor in American society. Prerequisite: SOC 100 or permission of instructor. Offered fall semesters. Cr 3.

Social Institutions

SOC 330 Sociology of the Family
A sociological approach to the study of the family, including the structure of social relationships, the modern American family as a social institution, the cultural background of the family, and the impact of social change. Prerequisite: SOC 100 or permission of instructor. Offered fall 1984 and spring 1986. Cr 3.

SOC 331 Sociology of Education
An examination of the historical and sociopolitical development and structure of public and private education in contemporary American society. Topics include education as a bureaucratic enterprise, as a vehicle of social control, as a vehicle of social change and systems as a reflection of social consensus, dissension and conflict. Prerequisite: SOC 100 or permission of instructor. Offered spring 1985. Cr 3.

SOC 332 Industrial Sociology
Social factors involved in the development of industry; social consequences of technological change; social organization within industry; problems encountered within the social structure(s) of industry. Prerequisite: SOC 100 or permission of instructor. Not offered 1984-86. Cr 3.

SOC 333 Sociology of Medicine
A consideration of the socio-cultural dimensions of disease, responses to disease, and social mechanisms which are developed to prevent, treat, and otherwise deal with disease. Particular attention is paid to the historical development of understandings of health, disease, and care. Prerequisite: SOC 100 or permission of instructor. Offered fall semesters. Cr 3.

SOC 334 Sociology of Religion
Review and critique of classical and contemporary sociological interpretations of religion, with emphasis on the changing character of religious expression in the twentieth century. Prerequisite: SOC 100 or permission of instructor. Offered spring 1986. Cr 3.

SOC 336 Law and Society
An examination of the interrelationships between law and society, focusing on law, custom, and morality as well as law in relation to social goals. Specific examples of how law functions in the context of the social structure will be used to highlight the major theoretical models used traditionally in this area. Prerequisite: SOC 100 or permission of instructor. Offered fall semesters. Cr 3.

SOC 337 Juvenile Justice
Examination and analysis of the philosophies, processing, and treatment of juvenile offenders with an emphasis on historical and comparative materials. Prerequisite: SOC 100 or permission of instructor. Offered spring 1986. Cr 3.

Units of Social Life

SOC 350 Sociology of Urban Life
A descriptive and analytical approach to the study of city life. Emphasis is placed on environment, social organization, the ecological processes, population areas, housing, and maladjustment. Prerequisite: SOC 100 or permission of instructor. Offered fall 1984 and spring 1986. Cr 3.

SOC 352 Demography
Fertility, mortality, and migration as they impact on every aspect of life whether political, economic, or social and the reciprocal impact of these on the population variables. Specific applications include: the relationship of population growth and aging; population growth and the status of women; population growth and urbanization; food and population policy; population growth and economic development; population characteristics and life changes; population characteristics in marketing; crime and the age structure; fertility changes and the labor market and the impact of immigration. Students are encouraged to explore their participation as population actors, making decisions which affect fertility, mortality and migration and being in turn affected by these population variables. Offered fall semesters. Cr 3.
SOC 353 Social Movements
The rise and developments of social movements emphasizing structuring and institutionalization. Social movements and sociopolitical change. Prerequisite: SOC 100 or permission of instructor. Cr 3.

SOC 355 Politics and Society
Possibilities and limitations of political democracy in industrial, bureaucratic society. Capitalism and socialism, their underlying ideologies, and the resulting political structures will be contrasted. Emphasis on current American politics with comparative perspective when relevant. Prerequisite: SOC 100 or permission of instructor. Cr 3.

SOC 356 Order and Control
An examination of basic processes involved in creation, maintenance and development of social order, with specific emphasis on the role of social control mechanisms and institutions in the larger issue of order. The course will include both structural/institutional and micro-sociological analysis. A comparative element will be introduced through examination of selected non-Western cultures and non-capitalist socio-political systems. The issue of the future forms of social order and control will conclude the course. Prerequisite: SOC 100 or permission of instructor. Cr 3.

SOC 371 Minority Groups
Considers the factors which produce and maintain structural social inequality based on minority status, and the social consequences of such inequality. Includes analysis of selected minorities both in the U.S. and cross-culturally. Prerequisite: SOC 100 or permission of instructor. Offered fall semesters. Cr 3.

SOC 374 Mental Health and Mental Illness
An examination of theories of the "causes" of "madness" and the treatment of the mentally ill. Particular attention on the influence of culture on the definition of illnesses, the relationship between social factors and illness, and the social context of treatment. Prerequisite: SOC 100 or permission of instructor. Offered spring semesters. Cr 3.

SOC 375 Sociological Perspectives on Deviance
The origin and nature of socially disapproved behavior. Analysis of societal interpretations and responses to the deviant. Prerequisite: SOC 100 or permission of instructor. Offered spring semesters. Cr 3.

SOC 376 Society and Social Policy
This course has three objectives: to familiarize students with the policy implications of various sociological theories; to introduce the political and ideological underpinnings of differing approaches to social policy; and to apply these ideas in the analysis of specific social policies. Prerequisite: SOC 100 or permission of instructor. Offered fall semesters. Cr 3.

SOC 400 Seminar in Sociology of Sociology
Focusing on synthesis, the seminar is meant to provide the sociology major with an overall view of the discipline and its perspective as well as an opportunity to consider current issues and the future of sociology. Prerequisite: senior standing in sociology. Cr 3.

SOC 401 Seminar in Sociological Classics
An in-depth study of selected seminal works in sociology. Aimed at the identification of major concepts and propositions. Prerequisite: SOC 300 or permission of instructor. Cr 3.
SOC 402 Seminar in Contemporary Marxism
A survey of issues and debates within Marxist political, social, and economic theory. Specific topics examined include: law and the modern state; power and political process; the crisis of hegemony in late capitalism. Prerequisite: SOC 300 or permission of instructor. Not offered 1984-1986. Cr 3.

SOC 403 Seminar in Social Thought
Analyses of contemporary social issues, ideas, and attitudes characterizing American society. Independent library research projects to be emphasized in concert with seminar dialogues. Prerequisites: juniors and seniors only and permission of instructor. Not offered 1984-1986. Cr 3.

SOC 404 Seminar in Theory Construction
The vocabulary and logic of theory construction; from assumptions and isolated propositions to systematized theory. The course aims at enabling the student to understand the utility of theory and its relevance for empirical research. Prerequisite: senior standing in sociology. Not offered 1984-1986. Cr 3.

SOC 405 Research Seminar
Focus on the actual conduct of sociological research. Students will formulate a research problem, develop a research design, collect and analyze data and report their findings. Prerequisites: SOC 205, SOC 307 and senior standing. Not offered 1984-86. Cr 3.

SOC 390 Individualized Instruction I
Independent reading and/or research for juniors and seniors. Apply to department chair. Prerequisite: 15 hours in sociology. Cr var.

SOC 391 Individualized Instruction II
Continuation of independent reading and/or research for juniors and seniors. Apply to department chair. Prerequisite: SOC 390. Cr var.

SOC 395 Internship
The course is designed to provide work/action experience and insight into professional roles in a variety of community agencies and organizations. The primary emphasis of the internship is the application of the social science perspective, substantive knowledge, and methodology to understand and illuminate a particular organizational situation. Thus, the internship can be understood as a participant observation experience within the context of social science research. It is primarily designed as a field experience/reflection opportunity for upper-level social science majors with substantive background/coursework in the area of internship placement. In addition to field placement, students are expected to meet for a series of internship seminars, for which reading and reports will be required. Offered each semester. Contact departmental internship coordinator for details. Cr 3 or 6.

Theatre

Chair of the Department: Thomas A. Power, Russell Hall, Gorham Professors: Stump, Rootes; Associate Professors: Duclos, Power, Steele, Kading

The Theatre Department offers a four-year program leading to a B.A. degree in theatre. Students may choose to emphasize a particular area such as acting or directing or a more general curriculum. An undergraduate degree in theatre offers valuable preparation for careers in the theatrical activities on an educational or professional level, as well as other non-related disciplines.

All students are reminded that, in addition to meeting departmental requirements for a major, they must also meet the requirements of the College of Arts and Sciences as well as the Core curriculum requirements.

Bachelor of Arts in Theatre

The minimum number of credits (exclusive of the University's Core curriculum) required for the major: 30.

Incoming freshmen may declare their intent to major. For those declaring their intent to become a theatre major, the following courses are required:

Programs and Requirements

158
THE 101 Introduction to Drama
THE 120 Fundamentals of Acting: Movement and Improvisation
THE 121 Fundamentals of Acting: Scene Work
THE 135, Stage Craft
THE 290 Oral Interpretation

Students who have declared an intent to become majors are then identified as candidates for matriculation in the Department of Theatre. They may request status as a major when the above requirements have been completed. When the request for major status is submitted, the Department will review the student’s past record in terms of academic and practical potential for success. Notification of admittance or rejection will be issued. The student may appeal any rejection if desired.

A total of 30 credits in theatre, not to include those hours selected for major preparation, is required for graduation.

The following courses are required:

THE 136, Stage Craft II
THE 210 Play Analysis
THE 220 Acting III: Voice for the Actor
THE 221 Advanced Scene Work

OR

THE 320 Acting V: Contemporary Acting Methods
THE 330 Stage Lighting (or THE 331 Scene Design)
THE 340 History of the Theatre I (or THE 341 History of the Theatre II)

Any one course:

THE 361 Late 19th Century Drama of the Western World
THE 362 20th Century Drama of the Western World
THE 363 Contemporary Avant-Garde Drama
THE 460 American Drama

In addition to the above, a total of nine credits must be selected from the following allied areas, unless otherwise approved by the Department:

Art
ARH 273 Film as Image and Idea
ART 141 Fundamental Design I
ART 151 Fundamental Drawing I

English
ENG 260 Shakespeare I
ENG 261 Shakespeare II
ENG 246 British Drama to 1642
ENG 366 Restoration and 18th Century Drama
ENG 352 Medieval Drama

Foreign Languages and Classics
CLA 252 The Tragic Hero in Ancient Literature
FRE 264 Avant-Garde Theatre in France
FRE 303 French Theatre in the 20th Century

Music
MUS 401 The University Chorale
MUS 403 A Cappella Choir
MUS 405 The Chamber Singers

Education
EDU 499 Photography for Classroom Use

Industrial Arts
ITT 210 Electronics Technology
ITT 241 Graphic Arts Technology
ITT 444 Photographic Reproduction
Theatre Department Production Requirements

A. All theatre majors must participate in a minimum of five Theatre Department productions according to the following guidelines: (1) work performed on a minimum of two of these productions must be in the areas of tech/design;* (2) work performed on a minimum of two of these productions must be in the areas of acting/performing;* (3) these productions must be "in-house" Theatre Department productions; (4) these productions may be part of the requirements of a formal Theatre Department course; (5) students may receive work-study or unrestricted funds for this production work if Theatre Workshop credit is not received (THE 130, 131, 132, 133); (6) students may enroll in Theatre Workshop (THE 130, 131, 132, 133) for these productions if they are not receiving work-study or unrestricted funds as compensation for their production work.

*In the event that a student repeatedly auditions or requests tech positions for Department productions but is not given a role or a crew position, this effort will be considered a good faith effort on the part of the student and may fulfill the acting or tech/design minimum production requirements.

B. All theatre majors must enroll in four units of Theatre Workshop (THE 130, 131, 132, 133).

The Department will meet at least once a semester to review each major's progress and to call to the attention of the student any departmental concern.

Minor in Theatre

The minimum number of credits (exclusive of the University's Core curriculum) required for the minor: 18.

THE 101 Introduction to Drama
A lecture-discussion course designed to provide students with a conception of the development of the theatre and its literature. The course consists of a survey of Greek medieval, Elizabethan, French neo-classic, and 18th, 19th and 20th century theatre and drama.

Cr 3.

THE 120 Acting I—Fundamentals of Acting: Movement and Improvisation
This is a practical course designed to introduce the student to basic procedures necessary to experience the creative process in acting. The course is designed to cultivate the student's sense of both physical and mental self by increasing his imagination, creative, and technical abilities. Course utilizes movement, sensitivity, mime, and improvisational exercises. (Taught spring and fall semesters.)

Cr 3.

THE 121 Acting II—Fundamentals of Acting: Scene Work
This is a practical course designed to introduce the student to basic skills of acting through stage movement, projection, characterization and scene work. Emphasis made on internal preparation by developing a role and on external techniques for projecting that role. (Taught spring and fall semesters.)

Cr 3.

THE 122 Contemporary Dance I
Contemporary Dance I is designed for beginning dancers with no formal dance training or no dance training in recent years. This class introduces basic contemporary dance skills and vocabulary. The class is divided equally into two areas of study. Physical and technical development are learned through strengthening and stretching exercises and body isolations. Proper body alignment is stressed for the most energy-efficient and injury-free movement both in and out of class. Dance phrases are designed to teach rhythmic and locomotor skills. Equal time will be devoted to studying choreographic techniques wherein students will learn how dances are created by creating their own. The Art of Making Dances by Doris Humphrey, plus selected writings by more contemporary choreographers will be used in the class. The class will be expected to attend several local dance performances during the semester. Prerequisite: THE 120 or THE 121 or permission of the instructor.  

Cr 3.
THE 123 Contemporary Dance II  
A continuation of THE 122.  
Cr 3.

THE 124 Intercollegiate Forensics  
A course designed to acquaint students with intercollegiate competition. Students will compete at various forensic tournaments throughout the East. Permission of instructor is required.  
Cr 1.

THE 125 Intercollegiate Forensics  
A continuation of THE 124.  
Cr 1.

THE 126 Intercollegiate Forensics  
A continuation of THE 125.  
Cr 1.

THE 127 Intercollegiate Forensics  
A continuation of THE 126.  
Cr 1.

THE 130 Theatre Workshop I  
A course designed to give students practical application of theatre practices in the fields of acting, design, scene construction, costuming, properties, lighting, management, and directing. A laboratory course.  
Cr 1.

THE 131 Theatre Workshop II  
A continuation of THE 130. Prerequisite: THE 130.  
Cr 1.

THE 132 Theatre Workshop III  
A continuation of THE 131. Prerequisite: THE 131.  
Cr 1.

THE 133 Theatre Workshop IV  
A continuation of THE 132. Prerequisite: THE 132.  
Cr 1.

THE 135 Stagecraft I  
A lecture/discussion/lab course in technical theatre and related topics relevant to technical direction. Specific areas of emphasis will include: theatre/stage terminology and organization; scene shop practices and use of shop tools; basic methods of construction, rigging, and moving scenery for the stage. The lecture portion of the course will be supplemented by actual construction, painting and mounting of a major University theatre production. (Concurrent enrollment in THE 137 Stagecraft Lab required.)  
Cr 3.

THE 136 Stagecraft II  
A lecture/discussion/lab course in basic theatrical drafting/graphic practices relating to theatrical construction and design techniques. The primary emphasis of the course will be the execution of various types of theatrical design and construction, painting and mounting of a major University theatre production. (Concurrent enrollment in THE 137 Stagecraft Lab required.) Prerequisite: THE 135 or instructor consent.  
Cr 3.

THE 137 Stagecraft Lab  
A lab course allowing practical application of theory discussed in THE 135, 136. (Concurrent enrollment in THE 135 or 136 required.)  
Cr 1.

THE 138 Make-up  
The course will emphasize the fundamentals of design and application of theatrical make-up. Specific areas of study will include the use of painted highlight and shadow to alter facial features; the relationship of colored light and make-up; the basic approach to theatrical make-up design. Primary emphasis of the course will be the actual application of make-up, giving the student the opportunity to practice realistic and abstract make-up techniques. An additional 30 hours of production work will be required of each student providing the opportunity to apply classroom techniques to the actual performance experience.  
Cr 3.

THE 170 Public Speaking  
An introductory course in the fundamentals of public discourse. Primarily a lecture-performance course, students will learn the basics of informative, persuasive, and entertaining speaking, as well as the processes of problem-solving and informative discussion. Emphasis is upon conception, analysis, structure, and modes of proof.  
Cr 3.

THE 210 Play Analysis  
Representative dramas for the stage are read, discussed and criticized using the Aristotelian elements of plot, character, thought, diction, music, and spectacle as analytical tools.  
Cr 3.

THE 220 Acting III—Voice for the Actor  
This is a practical course designed to develop the actor's speaking voice through emphasis on breath control, articulation, and enunciation. Prerequisites: THE 120, 121. (Fall semester only.)  
Cr 3.

THE 221 Acting IV—Advanced Scene Work  
This is a practical course designed to develop advanced characterization techniques through the use of scene work. Emphasis will be placed on both serious/comic acting and on methods for preparing auditions. Prerequisite: THE 120, 121, or 220 or permission of instructor. (Spring semester only.)  
Cr 3.

THE 222 Contemporary Dance II  
Contemporary Dance II is for a more experienced dance student. Expertise in executing basic dance skills (proper alignment, parallel and turned out positions, slides, triplets) and knowledge of dance vocabulary are assumed. Through practicing more complicated movement exercises and dance patterns students will increase their technical dance skills and understanding of kinesiology. Entire dances or portions of contemporary choreography will be taught in this class. Choreographic work will consist of movement character development using the effort-shape system of movement analysis. This study of movement qualities will be taken from Cecily Dell's work in A Primer for Movement Description.
Students will be expected to attend several dance performances during the semester. Prerequisite: THE 122 or permission of instructor. Cr 3.

THE 223 Mime
Class instruction emphasizes mime technique, basic illusions, body graphics, and silent character studies. Solo and group work integrates elements of these four (4) major areas of study. In addition, students gain an understanding of the historical perspective of classical mime and its influence on contemporary approaches to the art form. Prerequisites: Fundamentals of Acting (THE 120 or THE 121) or permission of the instructor. Fall semester only. Cr 3.

THE 230 Creative Dramatics
Study of problems in introducing young people to theatre as a total art form. Course to include the development of children’s plays through improvisation as well as traditional children’s literature. Work with children in various community settings will provide practical experience for the student. Cr 3.

THE 234 Directing I
A basic course providing background and experience in play production including such topics as play analysis and selection as influenced by cast and faculty options, rehearsal schedules, blocking action and related stage business. This course is particularly valuable for the classroom teacher. Practicum required. Prerequisites: 101, 120, 121. Cr 3.

THE 240 Costuming I
The course will consist of an introduction to costuming; including basic design, basic construction and an introduction to the materials used in millinery, wig-making and special costume problems (armor, footwear, etc.). The major emphasis will focus on design and construction. Additional hours of production work will be required providing a practical application of classroom theory. ( Concurrent enrollment in THE 137 is required.) Cr 3.

THE 274 Journalistic Drama Criticism
This course will provide the student with a comprehensive analysis of the role of the writing critic in professional, community, educational, and amateur theatre. Stress will be placed upon development of a workable writing style. A minimum of five plays will be seen from which reviews will be generated. Prerequisite: THE 234 or by permission. Cr 3.

THE 290 Oral Interpretation
A course in the assimilation and analysis of literary material (poetry, prose, drama) with emphasis on the techniques used in reading written material aloud to an audience. Designed to stimulate an understanding and responsiveness to literature and to develop the ability to convey to others, through oral reading, an appreciation of that literature. Cr 3.

THE 320 Acting V—Contemporary Acting Methods
This is a practical course designed to broaden the basic skills of the actor through the use of new contemporary acting techniques and approaches. The course will include a continuation of audition preparation. Prerequisites: THE 120, 121, 220, 221, or permission of instructor. (Fall semester only.) Cr 3.

THE 321 Acting VI—Acting Styles
This course deals with specific problems in interpretation of Shakespeare and classical and neo-classical tragic and comic styles. Emphasis will be placed on language and characterization, and on audition work. Prerequisites: THE 120, 121, 220, 221 or permission of the instructor. (Spring semester only.) Cr 3.

THE 330 Stage Lighting
Introduction to stage lighting design, elements of electricity, color, light sources, instrumentation, and control systems. Student will participate in lighting projects in practical. Prerequisites: THE 135, THE 136. Cr 3.

THE 331 Scene Design
Lecture and practicum in stage scenic design. Emphasis on the visual art and drafting of designs. Prerequisites: THE 135 and THE 136, or permission of instructor. Cr 3.

THE 334 Directing II
Designed to train directors in theatrical organization and rehearsal techniques. Encompasses composition, picturization, movement and rhythm. Course involves both contemporary theory and practical application. Prerequisites: THE 101, 120, 121, 234, 135, 221 and 320. Senior or junior with permission. Cr 3.

THE 335 Playwriting
A lecture-practicum course designed to acquaint the student with playwriting principles. Emphasis is placed on the one-act play form. Students will be required to complete a series of creative exercises culminating with writing of a one-act play. Prerequisites: THE 101 and THE 361 or 362 or 363. Cr 3.

THE 340 History of the Theatre I
A study of the development of the drama, the physical theatre, and the modes of production from the ancient Greek period through to 1640. Prerequisite: THE 101. Cr 3.

THE 341 History of the Theatre II
A study of the development of the drama, the physical theatre, and the modes of produc-
THE 362 20th-Century Drama of the Western World
This course is designed to acquaint the theatre major and non-major with a broad range of dramatic literature of the early 20th century. Representative plays of Ibsen, Strindberg, Chekhov, Shaw, and others which exemplify the literary, social, political, and philosophical aspects of the age will be studied. Prerequisite: THE 101. Cr 3.

THE 363 Contemporary Avant-Garde Drama
This course is designed to acquaint the student of theatre with the new voices in contemporary dramatic literature. Focus is upon such playwrights as Beckett, Genet, Pinter, Albee, Leroi Jones, and representative plays from Off-Broadway Theatre. Prerequisite: THE 101. Cr 3.

THE 390 Advanced Oral Interpretation

THE 391 Reader's Theatre
A study of principles and techniques utilized in the performance of a literary work in the Reader's Theatre style. Emphasis is on providing new insights into the material through oral performance. Cr 3.

THE 398 Theatre Internship
Students will assume a full one-semester internship with a professional theatre or Reader's Theatre Company. Students will be involved in management, acting, directing, or technical theatre as a member of the company. Each student will be assigned a faculty advisor who will make a biweekly evaluation of ongoing work. Participants will be required to keep a diary and/or portfolio to be reviewed by the faculty of the Theatre Department at the conclusion of the internship. All creative work done by the student will be evaluated by the advisor and at least one other or if possible all members of the department. Prerequisite: permission of the Theatre Department. Cr 3-15.

THE 399 Independent Study
The student will submit a written proposal defining the scope and the limitations of his/her study, and must submit the project for independent study to the faculty one month prior to the completion of the semester preceding study. This deadline should be published at least one month prior to the student's deadline. The faculty must approve and determine the credits given to the independent study. If the faculty does not meet before the semester is concluded, the student will not be eligible to do the study until the coming semester. The student will choose a supervisor. It will be the duty of this instructor to closely supervise, advise, and recommend to the student and assure that each will receive a copy of the proposal before the meeting at which the student's proposal will be presented to the entire faculty. At the completion of the independent study the student will take an oral examination conducted by the entire faculty and chaired by the advisor (Review Board). At the completion of the oral examination the faculty will advise the student's advisor as to their determination of a grade. The advisor will then determine the grade and submit the grade to the Registrar's Office. A student, generally, should not embark on a study until he/she has taken and completed all of the available coursework that is necessary to do the study in depth. Each theatre student is entitled to take six units in either Independent Study or Theatre Projects, or a combination of both not to exceed six units unless the specific proposal is unanimously approved by the theatre faculty. Cr 3.

THE 433 Project I
Investigation of special topics, or execution of special projects which fall within the purview of theatre. Students may select an interior or intra-departmental committee of three professors to approve, assist, and oversee the project. Prerequisites: Juniors and seniors only; precise definition of project and unanimous permission of committee. Students must obtain rules for this course from the department chairman. Credit hours arranged.

THE 460 American Drama
College of Education

Acting Dean: Dorothy D. Moore, 119 Bailey Hall; Acting Assistant Dean: Bruce A. Allen
Chair, Department of Industrial Education and Technology: Arthur Berry; Chair, Department of Professional Education: John Deady; Chair, Department of Human Resource Development; John Sutton, Jr.; Director of Graduate Education: Miriam Clasby; Director, Center for Professional Development: George Lyons; Director, Office of Clinical Experiences: Melissa Costello

Department of Professional Education

Professors: R. Costello, Downey, Hodgdon, Neuberger, O'Donnell, Phillips; Associate Professors: Allen, Amoroso, Bouchard, Chronister, Clasby, Cohen, Colucci, M. Costello, Deady, Gorman, Lyons, Milbury, Morritt, Silvernail, Smith; Assistant Professors: Davis, Foster, Wood; Instructors: Drew, Field, Turlo

Department of Human Resource Development

Professors: Callender, Southworth; Associate Professors: D. Moore, Sutton; Assistant Professors: Campbell, Davis, Lapointe, Williams; Instructor: Sandberg

Department of Industrial Education and Technology

Professor: Berry; Associate Professors: Anderson, Carter, Faulkner, Kirk, W. Moore, Nannay, Zaner; Assistant Professor: Bazinet

The College of Education is organized into three departments. The Department of Professional Education offers an undergraduate degree in elementary education, as well as graduate degrees in reading, professional teacher, and educational administration. The Department of Human Resource Development offers an early childhood intern option, and graduate degrees in counselor education and adult education. The Department of Industrial Education and Technology offers undergraduate degrees in industrial arts education, vocational/occupational education, industrial technology, and vocational technology. Additionally, undergraduate degree programs are offered with the College of Arts and Sciences in art education, music education, and secondary mathematics education.

The three departments are supported by the Office for Clinical Experiences, which coordinates field experiences such as practica, internships, and student teaching. The Educational Placement Office provides professional assistance in preparing students for employment opportunities.

The Professional Development Center serves undergraduate students, graduate students, and community educators. Services include maintenance of a resource laboratory which houses commercial education materials for examination and loan, specialized teaching resources, and a workshop area for teacher production of classroom materials; sponsorship of conferences and workshops responsive to the needs of educators;
support of curriculum reviews by local schools through consultation and material provision; assistance in planning and implementation of field-based noncredit, recertification credit, and in-service graduate credit experiences; and assistance in securing other University, regional, and statewide staff development resources.

The Office of Graduate Education administers graduate programs in the College of Education. Information about these programs is available in the office (408 Bailey Hall) and the University’s graduate catalog.

General Information

Admission to an undergraduate program in the College of Education is initiated through the Admissions Office. Candidates for admission must be graduates of approved secondary schools or hold the high school equivalency diploma. A detailed description of the admissions procedure appears on page 9 of this catalog.

Education majors are assigned an advisor during the first semester they are enrolled in the College. Responsibility for successfully completing the requirements of a program resides with the student. It is, therefore, necessary that students carefully read the catalog section which describes program requirements, and confer at least once each semester with their advisor for approval of their programs.

All baccalaureate programs in the College of Education lead to a bachelor of science degree and require a minimum of 126 semester hours, with the exception of the Industrial Education and Technology programs, which require a minimum of 125 semester hours.

Grade Point Average Students must earn an accumulative grade point average (GPA) of 2.0 for their complete baccalaureate program. Students must achieve a GPA of 2.5 for their liberal arts sequence. No more than one D grade will count toward fulfillment of the liberal arts sequence.

Students majoring in the elementary education and industrial arts programs must achieve a grade point average of at least 2.5 in their professional educational requirements (EDU courses) prior to student teaching. No grades of D will count toward the fulfillment of the professional requirements.

Pass/Fail Option An undergraduate in the College of Education may register for a total of 18 hours of pass/fail credits. Required courses in the Core curriculum and the student’s major may not be taken pass/fail.

Independent Study Junior and senior students may elect independent study in their major for one to six credits. Normally, no more than three credits may be earned in a semester. The student submits to a faculty sponsor an independent study application which includes a detailed description of the proposed program of study. Approval by the appropriate department chair is required. No University credit may be earned for courses described in the catalog taken through independent study. The approved independent study form is filed with the Registrar during the registration period.

Graduate Course Enrollment for Undergraduate Students An undergraduate student may be permitted to enroll in graduate courses if the following conditions are met:

1. The student is a junior or senior in an approved undergraduate program.
2. The student has an earned GPA of 3.0.
3. The student has met all course prerequisites.
4. The student has received prior approval to enroll in the course from his/her advisor, course instructor, and the Director of Graduate Education.
5. The student is not displacing a graduate student in the course; that is, an undergraduate student may enroll in a course only after all qualified graduate students have had an opportunity to enroll in the course.
6. The student may not enroll in courses that are restricted to matriculated graduate students only.
Intern Programs A teaching internship is a cooperative teacher education program for elementary majors that the College of Education shares with participating school districts. In addition to being assigned to classroom teachers who help interns integrate theory and practice, the interns receive instruction on-site by University and public school personnel. Internship programs generally are designed as two-semester programs where the interns may earn up to 30 academic credits.

Exchange programs with King Alfred's College, Winchester, England and Whitelands College, London, England are also available. Students may elect to complete a semester of study, including student teaching, through this option.

Elementary Education

The elementary education curriculum prepares graduates to teach in grades K-8. Details are provided in the following pages of this catalog.

Early Childhood/Intern Option (competency-based)

The early childhood intern curriculum is specifically designed for the student (intern) who is employed in a preschool classroom and at the same time is studying for a baccalaureate degree. Since each intern is working full-time, it is estimated that it will take six years to complete the program. The curriculum qualifies the graduate to teach preschool through grade eight. Interns study how children learn and how adults in the home, school, and community can foster this learning. Special emphasis is placed on the child from infancy to eight years of age. Details appear in the following pages under the heading for the Department of Human Resource Development.

Inquiries about this program may be directed to the Maine Children's Resource Center located on the Gorham campus.

Secondary Education Mathematics Program

The secondary education program offers a major in mathematics. Graduates of this program are certified to teach mathematics in grades 7 through 12. Students enrolled in this secondary education program are also required to complete an 18-semester hour minor of a subject commonly taught in the secondary schools. Details are provided in the following section.

Art Education Program

Completion of a bachelor of science degree in art education certifies the graduate to teach or supervise art programs in all grades, K-12, of the public schools in the state of Maine. Admission to this program is through the Admissions Office and is described on p. 57 of this catalog.

The program is made up of three components: (1) the University's core curriculum described on p. 35, (2) the art major, outlined on p. 58, and (3) the professional sequence which is listed on p. 59.

Music Education Program

The aim of the music education program is to develop individual potential in the areas of musicianship and scholarship, as well as to present the most recent trends in the fields of music education. Upon satisfactory completion of the four-year program, graduates receive a bachelor of science degree with a major in music education and are certified by the state of Maine to teach music in grades one through twelve. The program qualifies graduates to teach or supervise all phases of vocal and instrumental music. Details are provided on page 126.

Industrial Arts Education

The industrial arts curriculum prepares students for the teaching of industrial arts in elementary and secondary schools. It is the only college program in the state of Maine in this specialized field. Details are provided on p. 179.
Programs and Requirements

Vocational Technical Education Program
This is a part-time evening and summer program leading to a B.S. degree with a major in vocational/occupational education, vocational technology, or in industrial technology. Details are provided on p. 184.

Graduate Programs
The College of Education also offers a master of science degree in education, with a variety of major concentrations. Please refer to the graduate programs page in this catalog, and to the Graduate Catalog.

Department of Professional Education

The Department of Professional Education is primarily responsible for the development of the curriculum for elementary education majors. The Department also offers courses in the professional education sequence for persons majoring in art education, or music education, and offers a secondary education program in mathematics. A Certificate Program in Athletic Coaching for men and women is available through the physical education unit which is associated with the Department of Professional Education.

Programs and Requirements

Elementary Education
Completion of the Elementary Education curriculum qualifies graduates to teach in all grades kindergarten through eighth in the public schools of the state of Maine. Students completing the prescribed program will be awarded a bachelor of science degree in elementary education.

Admission to the elementary education program is through the University of Southern Maine’s Admissions Office. Admissions procedures appear on p. 9 of this catalog. Upon formal acceptance by the Admissions Office, students are designated pre-education candidates.

During the first semester of their matriculation, candidates are assigned advisors in the College of Education who will make recommendations for appropriate course selection. During the first two years of study pre-education candidates usually complete the Core curriculum prescribed by the University, described on p. 35. They also begin a liberal arts program of courses, and enroll in selected education courses.

Applications for admission as an elementary education major are accepted after pre-education candidates have successfully completed 45 semester hours of baccalaureate level coursework. Applications may be obtained from advisors who will guide pre-education candidates through this process. The essential criteria for acceptance as an elementary education major are as follows:

A. Completion of the University's Core curriculum (No more than one D grade will count toward the fulfillment of the Core curriculum.)
B. An accumulative grade point average of 2.50
C. At least two recommendations
D. Completion of the following courses from the College of Arts and Sciences and the College of Education:
   EDU 100 Exploring Teaching as a Profession
   EDU 210 Theoretical Foundations of Learning
   EDU 360 Microcomputers
Applications are reviewed by an Admissions Committee within the Department of Professional Education and forwarded with appropriate recommendations to the Dean of the College of Education. Applicants are advised of their acceptance or rejection prior to pre-registration for the next semester.

The program for elementary education majors is made up of three components: (1) the University’s Core curriculum—34 semester hours; (2) an approved concentration of liberal arts courses—at least 36 semester hours; and (3) a sequence of professional education courses—15 semester hours of pre-service education courses and a 30 semester hour internship.

The University Core curriculum described on p. 35 of this catalog is a set of courses selected by category that involves 34 semester hours of coursework. It should be noted that in some cases one course may be taken that will satisfy simultaneously two categories. Specifically, an interdisciplinary course (COR) may also satisfy a Methods of Inquiry/Ways of Knowing requirement; HRD 333 Human Growth and Development will satisfy a Social Science requirement, while at the same time satisfying a requirement of the professional education sequence; and MAT 131 Number Systems for Elementary Teachers will satisfy a Quantitative Decision requirement, while at the same time completing one of specified mathematics requirement of the Department of Professional Education.

A concentration of courses featuring a liberal arts specialty may be completed in one of several ways.

(1) A liberal arts major as described in the College of Arts and Sciences section of this catalog.
(2) A self-designed major of at least 36 semester hours which is first approved by a College of Education advisor and then approved by the Faculty Council for Interdepartmental Majors in the College of Arts and Sciences.
(3) An interdisciplinary program of courses of at least 36 semester hours approved by College of Education advisor featuring a liberal arts specialty. Some interdisciplinary themes might include: humanities and/or fine arts; mathematics and computer science; natural sciences and/or physical sciences; social sciences.

The professional education sequence is composed of two parts (1) pre-service education courses and (2) an internship.

During the final semester of the elementary education program students must complete their liberal arts component and participate in the Senior Seminar prescribed in the University’s Core curriculum.

**Secondary Education Program in Mathematics**

Completion of a secondary education program in mathematics leads to
a bachelor of science degree in mathematics and a teaching certificate
from the state of Maine qualifying the graduate to teach mathematics in
grades 7 through 12. Admission into the program is through the Universi-
ity's Admissions Office; that procedure is described on p. 9 of this cata-
log.

The program is composed of the following components:
A. Core Curriculum (see p. 35) 34 credits
B. Mathematics Major (see p. 115) 39-51 credits
C. Minor approved by advisor (see note below) 18 credits
D. Professional Sequence (as follows) 30 credits

EDU 100 Exploring Teaching as a Profession 3
EDU 200 Studies in Educational Foundations 3
HRD 333 Human Growth and Development 3
MED 345 Teaching Mathematics in the Secondary School 3
EDU Electives approved by advisor 6
EDU 324 Student Teaching 12

Note: Teacher certification requirements require that a candidate suc-
cessfully complete a concentration of 50 hours or a major of 30 semester
hours and a minor of 18 hours of subjects commonly taught in the second-
ary schools.

Computer Science and Mathematics for Education Majors

The Department of Mathematics and Computer Science in cooperation
with the College of Education offers an area major of 51 hours of mathe-
matics and computer science courses for students majoring in secondary
education. The program is described on p. 118.

Certificate Program in Athletic Coaching for Men and Women

This program is designed to prepare students for certain coaching re-
sponsibilities in schools and recreational programs. The curriculum in-
cludes an introduction to the organization and administration of athletics
as well as practical work in assisting coaches in selected sports. Attention
is also given to the prevention and care of the most common injuries oc-
curring in athletic programs.

A certificate will be presented to students completing the minimum 15-
hour program. In addition, the proper notation will be made on the
student's official transcript indicating proficiency in the area of athletic
coaching as determined by the certificate program.

Course of Study in Athletic Coaching (15-credit program)

Required
PHE 203 Athletic Training
PHE 302 Coaching Philosophy and Fundamentals
PHE 314 Organization and Administration of Athletics
PHE 391 Field Experience in Coaching

Electives

PHE 332 Coaching Tennis, Philosophy and Methods
PHE 334 Coaching Cross Country, Philosophy and Methods
PHE 335 Coaching Baseball and Softball, Philosophy and Methods
PHE 389 Advanced First Aid
EDU 100 Exploring Teaching as a Profession
This course provides an introduction to the College of Education program for all elementary and secondary mathematics majors during the first year. The course is designed around lectures and seminars coordinated with field-based experiences in a school setting. The purpose is to enable students to make a valid career decision through an examination of the diversity of facets of education including teacher roles, educational settings, and curricular methods.

EDU 151 Preprofessional Field Experience
(For International Exchange Students)
This section is designed primarily for international exchange students. It allows an expanded preprofessional experience (requiring a minimum of four full days per week in schools). Students are expected to participate in teaching activities as well as classroom management during this placement.

Cr 6.

EDU 200 Studies in Educational Foundations
This course provides an introduction to the study of American education. Problems and issues in contemporary education are examined from several perspectives, including the social, historical and philosophical.

Cr 3.

EDU 210 Theoretical Foundations of Learning
An interdisciplinary approach to the study of the learning process. Explores origins and domains of learning theories. Analyzes how major theories view the learning process. Applies theoretical content to motivation, concept development, classroom management, methodology and evaluation.

Cr 3.

EDU 300 Introduction to Teaching in the Early Elementary Grades
This basic course is designed to provide an overview of curriculum, methods and materials utilized in early elementary education. Emphasis will be placed on teaching learning theory, learning styles, approaches to school and classroom organization, parent involvement, the teacher as a human being and the hidden curriculum. Students will work independently in a modular approach for one segment of this course.

Cr 3.

EDU 301 Elementary School Curriculum
This course is designed to provide an overview of the influences, methods, and materials that affect curriculum designs in the intermediate grades. Emphasis is given to four factors affecting curriculum development: (1) goals and objectives; (2) sources of content; (3) teaching strategies; and (4) evaluation. Prerequisite: HRD 333.

Cr 3.

EDU 303 Developmental Reading I
A basic course encompassing the developmental reading program. Content includes the major stages of reading progress, specific instructional methods and materials and informal diagnostic techniques. Students are exposed to the characteristics of reading at different levels. Case studies are used to highlight instructional practices.

Cr 3.

EDU 304 Practicum in Elementary School Mathematics
A field-based course conducted primarily in the setting of actual elementary school classes. After several mathematics workshop sessions, the students will prepare and then teach several lessons in elementary school math classes. All planning and teaching will occur with guidance of the professor and the public school cooperating teacher. Prerequisites: MAT 131, HRD 333, and EDU 301.

Cr 3.

EDU 305 Methods of Teaching Elementary School Mathematics
The content of this course will focus on developing techniques for teaching mathematics to elementary grade pupils. The course will be conducted mainly in the setting of a mathematics resource center, featuring manipulative devices appropriate to teaching mathematics concepts. Prerequisites: MAT 131, HRD 333, and EDU 301.

Cr 3.

EDU 307 Practicum in Elementary Science
A field-based methodology course conducted primarily in an elementary school. After several science workshop sessions students prepare and teach sequential lessons in the actual K-6 classroom setting under the supervision of University staff and cooperating public school teachers.

Cr 3.

EDU 308 Science for Children
An alternative to EDU 307. This course is conducted in a University science resource center and provides opportunities for students to apply learning theory by exploring current science curricula. Emphasis is on content analysis and comparison and on implementation in public classrooms. A field experience is included whenever possible. Recommended prerequisite: HRD 333 or 335.

Cr 3.

EDU 310 Preparation of Classroom Instructional Materials
This lecture-laboratory course involves students in the creation of instructional mate-
EDU 322 Remedial Reading
The course presents typical reading disabilities, including methods for diagnosing and planning corrective strategies. Consideration is given to methods and techniques appropriate for general classroom use. Prerequisite: a basic course in reading. Cr 3.

EDU 323 Independent Study in Education
To provide juniors and seniors who have demonstrated critical and analytical capability an opportunity to pursue a project independently, charting a course and exploring an area of interest within their major field, bearing upon it previous course experiences and emerging with an intellectually sound, coherent synthesis, or an artistic or technical creation reflecting a high caliber of performance. May not be used as a substitute for currently described courses. Cr Var.

EDU 324 Student Teaching
Full-time student teaching during the senior year is provided for one semester under direct supervision in off-campus situations for all who meet requirements. Opportunities for student teaching include: preschool, early elementary, elementary, secondary mathematics, art, music, industrial arts, and vocational education. Prerequisites vary according to major field of study. See curriculum listing in catalog. Applications due in the office of the Director of Clinical Experiences by February 1 each year. Cr 12.

EDU 325 Internship
Year-long internship during the junior and senior year is provided under direct supervision in off-campus teaching/learning centers for all who meet requirements. Professional courses are offered concurrently with internship. Opportunities for internship are available for preschool, early elementary, and elementary majors only. Cr 18.

EDU 326 Seminar in Elementary Education
A study of issues in elementary education: school law; professional and ethical procedures; organization of student teaching; and teacher relationships with schools, community, and state. Visiting lecturers participate. Concurrent: enrollment in EDU 324 or EDU 325. Cr 3.

EDU 330 Teaching Strategies
This course features the instructional approaches and techniques that will enable a teacher to translate the content of a curriculum into teaching/learning activities for the classroom. Emphasis will be placed on developing teaching strategies with respect to planning, modes of instruction, classroom management, grouping schemes, utilization of resources, and evaluation. Cr 3.

EDU 335 Exceptional Students in the Classroom
This course shall serve as an introduction to the unique characteristics and needs of exceptional students in grades K-8. Legislation and its implications, roles and responsibilities of the regular classroom teacher, resources and characteristics of exceptional students shall be discussed. Cr 3.

EDU 336 Children's Literature
This course emphasizes a creative, interdisci-
plenary approach to children's books, an understanding of the interests and developmental tasks of the child, and, by precept and example, methods of individualizing reading. The student will be expected to read children's books widely and in depth. Cr 3.

EDU 340 Language Acquisition
This course focuses on the development of language acquisition, 0-5 years; factors which affect language acquisition process; brief introduction to deviations in early language and speech function; and materials, methods, and skill development for facilitating language and speech development. Cr 3.

EDU 342 Theories and Practices in Early Childhood Education
In addition to familiarizing the student with the historical perspective of early childhood education, this course is designed to acquaint the student with the underlying philosophical bases of a wide variety of early education models and with the approaches for implementing these models. Content will be presented by means of films, filmstrips, recordings, guest speakers, group discussions, student presentations, and lectures. Cr 3.

EDU 344 Teaching the Child Under Six
Philosophy, curricula, methods, and materials of the preschool child and teachers. Extensive observation and field experience are integral parts of the course. Prerequisite or corequisite: EDU342. Cr 3.

EDU 346 Exceptionality and the Preschool Child
This course is designed primarily for students interested in exceptionality and the preschool child. It is intended to be a practical introduction to the field of exceptionality. Topics covered will include: definitions, labels, brief history of special education, the law, integration, attitudes, diagnosis and prescription, materials, and community resources. Cr 3.

EDU 348 Cooperative Experiences in Early Childhood Education
This course is designed exclusively for early childhood education majors who are currently contributing to a preschool or K-3 program in a public or private school. Seminars and on-site visits by the instructor will be an integral part of the experience. Prerequisites: EDU 100 and instructor approval of the cooperative experience site. Cr 3.

EDU 360 Microcomputer Applications in Education
This course is designed to orient the pre-service teacher with the terminology, operation, evaluation, and applications of microcomputers, hardware, and software, as related to American educational systems. Additionally, the course will deal with traditional electronic and electro-mechanical media as related to modern learning processes. Cr 3.

EDU 363 Emotional Problems of Exceptional Children
This course is designed to offer a cross-categorical view of exceptionality with emphasis on disabilities in the affective domain. Origins, detection, prevention, and strategies of intervention will be treated. Cr 3.

EDU 366 Practicum in Learning Disabilities
This course is designed to provide students with an advanced pre-professional experience with learning-disabled children. This experience is served cotermionously by a seminar which provides leadership in discussion activities to assist students in reflecting on experiences and viewing them from various perspectives. Prerequisite: EDU316. Cr 3.

EDU 368 Introduction to Communication Disorders
The common speech and language disorders found in school children will be discussed. For each disorder the probable causes, symptoms, and methods diagnosis and remediation will be covered. The course will also include the basic principles of articulatory phonetics. Cr 3.

EDU 399 Methods and Materials for Teaching Learning Disabled
This course reviews approaches and materials concurrently used for teaching children with learning problems. Remediation methods for perceptual, motor, cognitive, communication, and academic skills will be covered as well as ways to modify existing curriculum to meet existing needs. Prerequisite: EDU316. Cr 3.

EDU 442 Organizing and Directing the Preschool
Comprised of a series of discrete modules, this course will focus on the implementation, organization, and continued functioning of the preschool. Equipment, daily routines, health and safety, licensing regulations, parent involvement, and funding will be among the topics explored. Students will spend considerable time while participating in this course. Cr 3.

EDU 499 British Exchange
A cooperative program between the College of Education of USM and King Alfred's and Whitelands Colleges in England. Students may elect to take up to 15 credits per semester with prior USM departmental approval. Cr Var.
PHE 198 Physiology of Health Fitness
The purpose of this course is to provide the student with a scientific background in exercise physiology and health concepts in order to develop and maintain a lifetime program of high level physical fitness and quality health. Satisfies PHE requirement. Cr 3.

PHE 201 Conditioning and Therapeutic Exercise
Discussions in practical application of various theories of athletic conditioning and therapeutic exercise, i.e., progressive resistance, circuit training, isometrics, interval training, aerobics, calisthenics, etc. Also, analysis of body alignment and how functional problems can be corrected with reconditioning exercises.

PHE 202 Current Health Issues
The aim of this course is to help students grow in scientific health knowledge, develop desirable health attitudes, improve health practices, and solve individual and group health problems.

PHE 203 Athletic Training
Care and prevention of athletic injuries; the use of proper field equipment, support methods, therapeutic modalities, pharmacology in athletics, and training techniques.

PHE 207 Gymnastics
A basic course in tumbling and gymnastics including use of apparatus for men and women.

PHE 208 Folk and Square Dance
Fundamental and traditional dance steps, folk and square dances, and cultural background of the folk dances of other nations will be covered. Open to beginners and beyond.

PHE 209 Officiating Basketball
Study and discussion of the rules with limited practical experience in the techniques of officiating basketball. Course is designed to prepare student for the National Federation Examination.

PHE 210 Officiating Field Hockey
Study and discussion of the rules of field hockey as well as practical experience in the techniques of officiating. Practical and written tests will be given. Opportunity to become a rated official.

PHE 211 Officiating Soccer
Study and discussion of the rules of soccer as well as practical experience in the techniques of officiating. Practical and written tests will be given. Opportunity to become a rated official.

PHE 212 Officiating Baseball/Softball
Study and discussion of the rules of baseball and softball as well as practical experience in the techniques of officiating. Practical and written tests will be given. Opportunity to become a rated official.

PHE 215 Posture and Figure Control
The course includes individual postural appraisal, corrective exercises, and recognition of postural deviations. Recommended for prospective teachers.

PHE 302 Coaching Philosophy and Fundamentals
This course covers various approaches to planning, organizing, and implementing practice sessions in preparation for athletic competition. The psychological and emotional aspects of coaching are also investigated. One segment of the course will be concerned with society's view of coaching as illustrated by today's literature.

PHE 303 Coaching Basketball, Philosophy and Methods
Emphasis on the methods of teaching and coaching basketball. Offense and defense, coach-player relationship, team selection, planning of practice sessions, and game situations will be areas of concentration.

PHE 305 Coaching Track and Field, Philosophy and Methods
Coaching experience on the field with analysis of the form and technique of the various events. Selection of candidates, training, conditioning, diet, organization and promotion of track will be covered.

PHE 311 Coaching Soccer, Philosophy and Methods
Emphasis on the methods of teaching and coaching soccer. Offense and defense, player-coach relationship, team selections, planning of practice sessions, and game situations will be areas of concentration.

PHE 312 Coaching Football, Philosophy and Methods
Emphasis on the methods of teaching and coaching football. Offense and defense, player-coach relationship, team selections, planning of practice sessions, and game situations will be areas of concentration.

PHE 314 Organization and Administration of Athletics
This course covers the principles and practices of athletic administration as related to middle schools, junior and senior high schools.
PHE 315 Coaching Field Hockey, Philosophy and Methods
Analysis of the techniques and methods of coaching field hockey with emphasis on stick work, team strategy, and practice organization. Cr 2.

PHE 316 Coaching Volleyball, Philosophy and Methods
Fundamentals of individual skills, team strategy, practice organization, and team play are emphasized. Cr 1.

PHE 318 Coaching Gymnastics, Philosophy and Methods
Analysis of skills fundamental to competitive gymnastics with emphasis on techniques of coaching floor exercise, uneven parallel bars, vaulting, and balance beam. Judging skills are also developed. Cr 2.

PHE 331 Coaching Golf, Philosophy and Methods
Course content includes methods of team selection, fundamentals of golf, types of competition, and practical experience. Cr 1.

PHE 332 Coaching Tennis, Philosophy and Methods
Course content includes skill development strategies, drills, conditioning principles, and team management. Cr 1.

PHE 334 Coaching Cross Country, Philosophy and Methods
Course content includes the techniques of training and conditioning, the operation of meets, course layouts and running techniques. Cr 1.

PHE 335 Coaching Baseball and Softball, Philosophy and Methods
Emphasis on the methods of teaching and coaching baseball and softball. Offense and defense, player-coach relationship, team selection, planning of practice sessions, and game situations will be areas of concentration. Cr 2.

PHE 391 Field Experience in Coaching
Practical field work in a coaching area. The student will be assigned as an assistant coach in a sport for a season. Supervision, evaluation, and guidance of the student will be provided by a staff member who is responsible for that coaching area. Prerequisite: PHE 203, PHE 302, PHE 314. Restricted to students with coaching certificate. Cr 1-3.

Physical Education Leadership Courses

PHE 216 Analysis of Human Movement
A study of major skeletal bones and muscle groups; posture appraisal, development, and correction; and application of the principles of mechanics to body movement. Cr 3.

PHE 218 Games and Activities
An introductory course in non-competitive games for school age children. The course follows the growth of the New Games Foundation and has a practical teaching experience with school age children. Cr 1.

PHE 298 First Aid and Safety
A multi-media approach to the utilization of techniques of first aid as prescribed by the American Red Cross. Various aspects of safety will be discussed. Successful completion of the course requirements will lead to Red Cross certification. Cr 2.

PHE 300 Camp Leadership
A leadership course for the elementary school teacher to direct an outdoor education program. The course includes the skills, attitudes, and appreciations necessary for the intelligent use of the outdoors and outdoor pursuits. Many of these are often considered a part of physical education and recreation programs but they have significance in other subjects which cut across all areas of the school curriculum. Cr 3.

PHE 304 Health and Physical Education for Elementary Teachers
A basic course for prospective teachers to develop knowledge and skills to acquaint them with essentials for sound program planning in the various areas of health and physical education. Topics include teaching methods and materials, curriculum, class organization, and lesson planning and evaluation in health and physical education. Observation and practical experience with children will be included. Cr 2.

PHE 306 Movement Education in the Elementary School
A course is designed to help the prospective teacher plan instructional programs which will give children an opportunity to be creative and to participate in the planning. Activities based on movement skills-movement exploration are stressed. Children from grades one to six are part of the experience. Cr 3.

PHE 308 Physical Education for the Atypical Child
This course is planned to help students understand adaptive physical education for the physically and mentally handicapped child. Emphasis will be placed on educable mentally retarded and learning disabled children. An investigation into the causes of men-
tal retardation and learning disabilities is also included. Cr 3.

PHE 309 Rhythms and Motor Activities
Preparation of classroom teachers with necessary knowledge to provide an understanding of sound mechanical principles that ensure the proper application of force and the attainment of accuracy and balance through the learning of basic motor skills. Also to provide comprehensive dance experiences for students through the introduction to the meaning and areas of dance, teachers of techniques, skills, aids to teaching, and the use of rhythm in accompaniment. Cr 3.

PHE 310 Experiential Learning in Outdoor Education
Ropes/Initiative Course Construction and Use
Participants can expect to gain first-hand knowledge and experience through actual participation in all phases of initiative course construction and operation. Of primary importance will be the understanding one receives from the experience for constructing a similar course in his/her own educational program.

Mountaineering
Designed to gain knowledge in technical mountaineering and to improve capabilities in technical rock climbing.

Orienteering
Designed to gain knowledge in expedition planning and route finding. Cr 3.

PHE 389 Advanced First Aid and CPR
This course will cover the topics prescribed by the American Red Cross and the advanced first aid and emergency care course, including respiratory emergencies, artificial respiration, wounds, poisoning, water accidents, drugs, burns, emergency child birth, emergency rescue and transfer, and CPR. Successful completion of the course requirements will lead to Advanced Red Cross First Aid and CPR certification. Cr 3.

PHE 398 Independent Study in Physical Education
Provides students who have demonstrated critical and analytical capability an opportunity to pursue a project independently, charting a course and exploring an area of interest, bearing upon it previous course experience and emerging with an intellectually sound, coherent synthesis reflecting a high caliber of performance. Restricted to students in the PHE Leadership minor. Prerequisite: permission of instructor. Cr 1-3.

PHE 401 Practicum in Physical Education Leadership
Provides opportunity for a seminar approach to group thinking and discussion of problems of the beginning teacher. Areas of emphasis include organization, administration and conduct of programs of physical education, intramurals, and recreation in the elementary and secondary school. Opportunity for each student to gain leadership experience in local area schools or recreational agencies under the supervision of qualified teachers/leaders and a University instructor. Prerequisite: previous experience with children or permission of instructor. Cr 3.

Department of Human Resource Development

The Department is responsible for courses in human development and family studies, and for an undergraduate early childhood intern program. In addition, it provides graduate programs in adult education and counselor education. For information regarding graduate programs, please see the Graduate Catalog.

Maine Children's Resource Center

The Maine Children’s Resource Center has served early childhood programs throughout Maine since 1968. University courses, an intern program, workshops, technical assistance, and consultation are provided to Head Start and Day Care staff serving children from infancy to eight years of age. The Center is also funded to deliver similar services to staff.
who work with young children with special needs, including those at privately run facilities and the early public school grades, and to parents of children with special needs.

A resource library of books, pamphlets, and audiovisual materials and equipment is maintained at the Center. Materials are distributed through a "mailbag library" approach; however, staff are encouraged to visit the Resource Center whenever possible.

**Early Childhood Intern**

The early childhood intern curriculum is specifically designed for the student (intern) who is employed in an early childhood classroom while at the same time studying for a baccalaureate degree. Since each intern is working full-time, it is estimated that completion of the program will take six years. The curriculum is designed to prepare the graduate to teach preschool through the early grades. Home, school, and community can foster this learning. Special emphasis is placed on teaching the child from infancy to eight years of age.

Students enrolled in the intern program participate in the following nine courses, some of which are held on site. The instructor/child development specialist observes the intern’s teaching competence and recommends individual learning experiences for improving teaching skills. The balance of the courses are held in the more traditional classroom format.

In the series of field teaching experience courses (HRD 301-309) listed below, the intern focuses on teacher competencies outlined by the Child Development Associate Consortium (CDA).

<table>

Field teaching experiences (HRD 301-309) may be substituted for EDU 324 Student Teaching.

**Professional Education Courses**

In addition to the field teaching experience courses interns are required to complete the following early childhood courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDU 200</td>
<td>Studies in Foundations of Education</td>
</tr>
<tr>
<td>HRD 333</td>
<td>Human Growth and Development</td>

<tr>
<td>EDU 336</td>
<td>Children’s Literature</td>
</tr>
<tr>
<td>HRD 226</td>
<td>Topics in Early Childhood Education</td>
</tr>
</tbody>
</table>

**HRD 226 Topics in Early Childhood Education**

This is a one-credit modular course designed to allow students to explore a specific subject area. Topics for study will be proposed by faculty in response to student interest, and will vary from semester to semester. (The course may be taken as many as three times per semester and may be taken for credit up to six times.)

**HRD 301 Directed Classroom Observation**

This course explores the role of a preschool teacher. After investigation of competency-based assessment, this introductory course will address methods of how a teacher can foster the child’s physical, social, emotional, and intellectual development. Through observing teachers in action, outside readings, and discussing alternative styles, necessary teaching skills will be explored. Students will be helped to determine their own levels of competence and explore alternatives for continued growth and learning.
HRD 302 Directed Classroom Participation—The Role of the Teacher
This course is designed for the intern with little academic background in the field of early childhood education. Assumptions, methods, and implications of the early childhood teacher’s role in a classroom will be examined. Cr 2.

HRD 303 Safe, Healthy Learning Environments
The intern focuses on the physical environment of the classroom, such as learning center organization and safety, light, heat, and ventilation requirements. Time schedule requirements and emergency health measures are studied. It is expected that the intern will obtain a First Aid Certificate as a course requirement. Cr 2.

HRD 304 Advancing the Child’s Physical and Intellectual Competence
The intern studies and implements methods of fostering the child’s creativity, as well as physical, cognitive, and language growth. Cr 2.

HRD 305 Building the Child’s Self-Concept and Individual Strength
The intern studies how children build a sense of self and how adults influence whether or not this concept is positive or negative. Techniques for building individual strengths are stressed in the classroom. Cr 2.

HRD 306 Positive Functioning of Children and Adults in the Classroom
The intern studies how children develop social skills necessary to work and play cooperatively in a group. The intern helps children respect the feelings, rights, and property of others and creates an atmosphere in the classroom where feelings may be expressed. Techniques of group management are studied and implemented. Cr 2.

HRD 307 Coordination of Home and School
The intern studies ways to support, encourage, and provide opportunities for parents to get involved in center activities. The intern studies the ethnic cultures represented in the classroom and reflects this knowledge in classroom planning. Methods of communicating with parents are explored in order to exchange information about the child’s individual needs and progress. Cr 2.

HRD 308 Preschool Administration
Systems of record keeping and program planning are explored. The intern works with other center staff members to maintain records of each child’s growth and development and to plan and record center activities. Cr 2.

HRD 309 The Competent Teacher
The University advisor guides the intern through the Child Development Associate credentialling process and serves as the “trainer” on the local assessment team. Cr 3.

HRD 331 Group Dynamics
An experimental study of the nature of group process and one’s own functioning in a group. The developing awareness of self in relation to others in a group will be of primary importance. Specific techniques will include reading and participation in a seminar planned to aid in the exploration of self and others. Prerequisite: upperclass or graduate status and permission of the instructor. Cr 3.

HRD 332 Psychology of the Self
An exploration into the development of the self, primarily as an issue of personal growth. Topics might include alienation, loneliness, and verbal/non-verbal communication. Learning techniques center around readings, common class experience, and intensive small-group interaction. Prerequisite: permission of instructor. Cr 3.

HRD 333 Human Growth and Development
This course introduces developmental theory and research which encompasses the entire lifespan. Emphasis will be on prenatal development through adolescence, with an overview of adult development. A multidisciplinary view of human development will be taken which considers stability as well as change throughout the life cycle. The interaction of hereditary and environmental factors will be considered in studying physical, cognitive, and psychosocial development. Cr 3.

HRD 335 Educational Psychology
Basic principles, techniques, and research in educational psychology. A special consideration given to the learning process, perception, motivation, individual differences, and measurement, with reference to the facilitation of effective teaching and learning. Prerequisite: upperclass status. Cr 3.
Industrial Education and Technology

Technology is the study of the creation and utilization of adaptive systems including tools, machines, materials, techniques and technical means, and the relation of the behavior of these elements and systems to human beings, society, and the civilization process. Technological concepts are presented through a variety of approaches including the lecture, technical laboratories, field experiences, industrial visitations, and cooperative programs.

The curricula of the Department of Industrial Education and Technology provide a blend of cultural, technical, and professional courses designed to prepare individuals for teaching or industrial positions. Recognition is given to prior learning, where appropriate. Four degree programs are offered.

The undergraduate program in industrial arts education is designed to prepare students to organize, manage, and teach programs of industrial arts in elementary and secondary schools. Laboratory courses in energy and transportation, graphic communication, and manufacturing and construction provide a technical/conceptual background.

Vocational/occupational education recognizes prior learning and skill obtained through occupational experience. It is designed to prepare students for teaching in vocational/technical education or other occupational training programs and requires a minimum of three years of occupational experience as a prerequisite for the degree program. Emphasis is placed on the development of cultural and professional education.

Industrial technology is a management-oriented curriculum designed to prepare an individual for supervisory/technical/managerial roles in industry. Two options are available. For the individual without technical skills, shop/laboratory experiences provide for development of technical proficiency. For those with prior learning through occupational training/experience, trade and technical competencies are evaluated and credit granted. Both options, in cooperation with the School of Business, Economics and Management, provide a basic preparation in business administration. Students may concentrate in one of seven areas to prepare themselves for future employment.

The vocational technology program is an occupationally oriented curriculum designed for individuals who desire to prepare for managerial/supervisory roles. The program recognizes nontechnical occupational experience, assesses prior learning, and offers four areas of concentration in business management. A minimum of three years of occupational experience is required as a prerequisite for the degree program.

Admissions Requirements

Applicants for industrial arts education, or those without occupational experience desiring to pursue the industrial technology program, must visit the Industrial Education Center for a tour of the facility, interviews with the faculty, and testing of spatial relationships. Applicants will be notified of the appropriate procedure to follow and the dates available for on-campus visits.

Applicants with a minimum of three years of occupational experience who desire to pursue the industrial technology, vocational/occupational education, or vocational technology programs must submit evidence of a minimum of three years of occupational experience and appear for a personal interview. Candidates should contact the Department office for an appointment to discuss the evaluation of prior work experience in the vocational/technical field.

Bachelor of Science in Industrial Arts Education

The number of credits (including the University's Core curriculum) required for the degree: 125.
Core Curriculum (40-49 credits)

Basic Competence 0-9

Methods of Inquiry/Ways of Knowing
a. Fine Arts 6
   1. Performance-centered
   2. History-centered
b. Humanities 6
   1. Literature
   2. Other Times/Other Cultures
c. Social Sciences 6
   (Students must take HRD 333 Human Growth and Development in addition to another Social Science course.)
d. Natural Sciences 10

Interdisciplinary course 3

In addition, students must take 9 credits of electives.

Technical (54 credits)

Required courses
ITP 300 Modern Industry
ITT 102 Introduction to Technology
ITT 211 Electronics Technology
ITT 221 Power Technology
ITT 231 Technical Technology
ITT 241 Graphic Arts Technology
ITT 251 Metal Technology
ITT 261 Wood Technology
ITT 271 Plastics Technology
ITT 311 Communications Electronics
ITT 323 Energy and the Consumer
ITT 331 Engineering Design Graphics
ITT 342 Photo Offset Lithography
ITT 351 Machining and Fabrication
ITT 361 Production Manufacturing in Wood

Technical Electives (select any three)

Energy and Transportation
ITT 312 Computer Technology
ITT 313 Electrical Construction
ITT 321 Automotive Systems
ITT 322 Automotive Diagnosis and Tuneup
ITT 413 Instrumentation
ITT 414 Digital Electronics
ITT 423 Fluid Power
ITT 424 Fluid Power Systems

Graphic Communication
ITT 332 Architectural Drawing and Design
ITT 334 Energy Efficient Residential Design
ITT 343 Communication Design
ITT 434 Industrial Production Illustration
ITT 435 Systems Analysis and Design
ITT 444 Photographic Reproduction
ITT 445 Color Reproduction Theory

Option #1: This course option is designed to permit attendance at an approved industry-sponsored school or seminar for the purpose of providing the student with advanced related occupational or technical training. Courses provided by organizations such as General Motors Training Centers or International Typographical Union qualify under this option.

Option #2: Approved employment with a company may qualify a student under this option. Arrangements must be approved by the advisor in advance. The experiences should provide opportunities for updating occupational technical skills and knowledges. Credit will be determined on the basis of one credit for each three full weeks of employment with a maximum of three credits for each period of approved continuous full-time employment. A daily log, summary, report, and evaluation by a supervisor will constitute part of this option.

For additional information concerning either option of ITP 440, consult your advisor.

ITT 102 Introduction to Technology
An introductory study of industry and technology and their impact on our culture. Emphasis on the role of industrial education in developing an understanding of basic concepts and functions of industry and technology is stressed. The conceptual areas of energy and transportation, manufacturing and construction, and graphic communication are defined and developed. Required for all entering program majors. Lecture and lab. Cr 3.

ITT 211 Electronics Technology
A study of the fundamental concepts of electronics. Laboratory experiences with typical circuits found in power supplies, amplifiers, and receivers. Use of test equipment including meters, the oscilloscope, signal generators and component checkers. Opportunity to practice soldering and printed circuit development is also provided. Cr 3.

ITT 221 Power Technology
Power Technology is designed as an introduction to the broad field of power. Power is examined from the standpoints of generation, transmission, and application. Emphasis will be placed on understanding through study and manipulative experiences in the power laboratory. Experiences will include assembly and disassembly procedures, design and construction, testing, diagnosis, service, power measurements and safety considerations as applied to heat engines. Cr 3.
ITT 231 Technical Graphics
Concepts of spatial relationships and visualizations with related techniques. Basic skill development and understanding taught through freehand illustrations as well as conventional instruments and devices. Multi-view projections, pictorial techniques, primary and secondary auxiliaries, detail and assembly working drawings, and reproduction techniques. Contemporary industrial practices and processes. Cr 3.

ITT 241 Graphic Arts Technology
A study of the common reproduction systems with significance in the graphic arts industries and technology. Designing, composing, reproduction, assembling, and finishing of printed materials utilizing conventional reproduction techniques. Emphasis on letter press, offset lithography, and screen printing, with related experiences in rubber stamp making, block printing, embossing, and photo enlarging. Cr 3.

ITT 251 Metal Technology
A study of metal manufacturing industries. Introduction to concepts of designing, planning, fabrication, finishing, and distribution as they pertain to these industries. Selection, use, and care of equipment. Safety practices. Cr 3.

ITT 261 Wood Technology
A basic course in wood technology, including wood properties, basic hand and machine tool processes, assembly and finishing. Cr 3.

ITP 300 Modern Industry
Evolution and contemporary structure of American industry and its impact upon the social, economic, and cultural environment. Major areas and functions of industry explored include: personnel administration, research and development, production, finance, marketing, and service. Industrial visitations and reports. Cr 3.

ITT 311 Communication Electronics
A detailed study of communication circuits and applications; including receivers, transmitters, antennas, and satellites. Opportunity provided to obtain an Amateur Radio license. Prerequisite: ITT 211 or permission of instructor.

ITT 321 Automotive Systems
Automotive Systems is an extension of the basic concepts of power technology as they are applied to the automobile. Automotive technology is examined through analysis, operation, and service of electrical and fuel systems. Experiences include testing and measurement as well as overhaul procedures. Includes theory of design, construction, and operation of basic systems in automotive products. Prerequisite: ITT 221 or permission of instructor. Cr 3.

ITT 322 Automotive Diagnosis and Tuneup
Automotive Diagnosis and Tuneup is designed as an in-depth study of automotive ignition and carburetion systems. Theory, operation, and testing of ignition, carburetion, and pollution control systems is included. Opportunities for independent research and problem solving are provided. Prerequisite: ITT 321 or permission of instructor. Cr 3.

ITT 323 Energy and the Consumer
Designed as an introduction to the efficient use of energy from the consumer standpoint. Areas explored include the use of energy to condition homes, commercial structures and other buildings, as well as the use of power in motive devices. Activities include analysis, testing and owner maintenance of these energy using devices. Prerequisite: ITT 221 or permission of instructor.

ITT 331 Engineering Design Graphics
Engineering Design Graphics will expose the student to contemporary industrial practices and techniques of advanced spatial and dimensional theory utilizing orthographic and pictorial techniques. Emphasis will be on design criteria selection and implementation employing standard scientific procedures. Both individual and team assignments will be used. Prerequisite: ITT 231 or permission of instructor.

ITT 332 Architectural Drawing and Design
Basic architectural design and drawing as related to residential and light construction. A detailed set of plans for a single home will be executed. Construction techniques, environmental considerations, building materials, specifications, costs and financing, codes and zoning, schedules, and architectural models. Prerequisite: ITT 331 or equivalent or permission of instructor. Cr 3.

ITT 342 Photo Offset Lithography
Theory and practice in lithographic and photo-offset printing with emphasis upon
camera work, stripping, platemaking, presswork, and finishing. Photographic conversion of line and halftone copy and copy preparation are also included. Prerequisite: ITT 241 or permission of instructor. Cr 3.

ITT 343 Communications Design
An introduction to the principles of layout and design in preparing camera copy for graphic reproduction. Emphasis on design elements and fundamentals, manuscript, and illustration preparation, graphic and photographic techniques, and production specifications. Prerequisite: ITT 241 or permission of instructor. Cr 3.

ITT 351 Machining and Fabrication
A study of metal industries concerned with electric and gas welding and machining techniques. Emphasis on process engineering. Individual and group problems. Laboratory and maintenance practices. Prerequisite: ITT 251 or permission of instructor. Cr 3.

ITT 352 Fabrication and Forming
Concepts, principles, and activities in TIG welding, sheet metal fabrication, and casting techniques as they relate to the manufacturing and construction industries. Group and individual problems and activities. Prerequisite: ITT 351 or permission of instructor. Cr 3.

ITT 361 Production Manufacturing in Wood
Production and wood manufacturing problems including production planning, mass production, jigs, fixtures, special machine operations, and advanced finishing techniques. General maintenance procedures on production equipment. Group and individual research assignments and related technical problems. Prerequisite: ITT 261 or permission of instructor. Cr 3.

ITT 362 Residential Construction
A study of the residential construction industries including construction principles; layout, foundation, framing, exterior covering, and finish. Related areas of services, plot planning, earth-moving principles considered in research activities. Group and individual problems. Prerequisite: ITT 261 or permission of instructor. Cr 3.

ITT 363 Wood Science
Wood anatomy and identification experiences leading into a study of the properties of wood, wood-liquid relations, bonding and finishing of wood, and machining as they relate to the manufacturing processes. Prerequisite: ITT 261 or permission of instructor. Cr 3.

ITT 300 Crafts Technology
Design and manufacture of products utilizing ceramics, leather, plastics, art metals, and other craft materials. Examination of artistic crafts for leisure-time activities and for adult programs. Individual and group research and problem solving. Prerequisite: ITT 251 and 261, and permission of instructor. Cr 3.

ITT 271 Plastics Technology
A study of plastics as a material and the basic industrial process used to produce plastic products. Included are basic polymer chemistry, injection molding, extrusion, blow molding, compression and transfer molding, thermoforming, roll forming, laminating, casting, expansion, thermofusion, fabrication and bonding, product applications, mold design and construction. Cr 3.

ITT 413 Instrumentation and Process Control
A study of instruments and sensing devices used to observe and/or control processes in our industrial society. Laboratory and field experiences to research and/or construct an instrument of interest to the student. Prerequisite: ITT 211 or permission of instructor. Cr 3.

ITT 414 Digital Electronics
A study of the fundamentals of digital logic and logic systems. Laboratory experiences with typical circuits using semiconductor devices, including diodes, transistors and integrated circuits. Prerequisite: ITT 211 or permission of instructor. Cr 3.

ITT 423 Fluid Power

ITT 424 Fluid Power Systems
Application of fluid power and fluidic systems to manufacturing and construction industries. Prerequisite: ITT 423 or permission of instructor. Cr 3.

ITT 434 Industrial Production Illustration
Principles and techniques employed by contemporary industry to graphically describe industrial products, technical concepts, and service information. The media range will include chalk, ink, pencil, charcoal, water color, tempera, pressure sensitive transfer symbols, and various methods of graphic reproduction. Engineering and architectural problems. Prerequisite: ITT 331 or permission of instructor. Cr 3.

ITT 435 Systems Analysis and Design
Research applied to solving basic engineering problems. Contemporary systems of analysis and design. Economic factors, resource utilization, planning, design, model construction, follow-up studies and evaluation tech-
Prerequisites applied to specific practical problems. Prerequisite: ITT 331 or permission of instructor. Cr 3.

ITT 444 Photographic Reproduction
Photographic concepts, processes, and techniques utilized in graphic reproduction. Experience in contact printing, continuous tone enlarging, duotones, posterization, and color separation. Prerequisite: ITT 241 or permission of instructor. Cr 3.

ITT 452 Metallurgy and Metrology
The technology of metallurgy and metrology. Heat treatment, powdered metals, machining and inspection of metal parts. Individual and group activity. Prerequisite: ITT 251 or permission of instructor. Cr 3.

ITT 482 Materials Testing
Industrial techniques involved in the analysis of the physical properties of materials and their utilization in the manufacturing and construction industries. Emphasis on research and experimentation. Individual and team activities. Prerequisite: ITT 361 or 351 or permission of instructor. Cr 3.

ITT 490 Special Problems in Industrial Arts
Provides upper-level students an opportunity to pursue independently a topic, project, or experiment of interest. Students will prepare a contract or proposal for study to be conducted and, upon completion, submit findings in a scholarly report or other evidence of merit. Cr 3.

IEA 190 Preprofessional Field Experiences
Provides an exploratory opportunity in public/private school or educative agencies to assist students in becoming acquainted with the teaching profession and to examine various options in the field of industrial arts. Cr 2.

IEA 290 Contemporary Teaching in Industrial Education
This course is designed to develop verbal communication skills in the field of industrial arts. Basic understanding of related terminology in industrial education will be emphasized. Students will become knowledgeable of contemporary industrial arts programs at the elementary, junior high, and senior high school levels. Prerequisites: IEA 190. Cr 2.

IEA 380 Curriculum Materials in Industrial Arts
Development of curriculum materials for contemporary programs in industrial arts. Emphasis on unit preparation, performance-based objectives, and task analysis essential for identifying content and an effective instructional delivery system. Individualized and class instruction. First of a two-course sequence prior to student teaching. Prerequisites: 100/200 level technical core, ITP 300, 2.5 GPA, and recommendation of faculty. Cr 3.

IEA 381 Methods of Teaching Industrial Arts
Utilization of prepared plans for micro- and participation-teaching. Instructional media preparation and utilization. Audio and video tape presentations and critiques. Introduction to criterion-referenced evaluation techniques. Safety principles and classroom control stressed. Basic organization and administration procedures for implementing a modern program of industrial arts. Orientation to student teaching. Prerequisites: 100/200 Level Technical core, ITP 300, 2.5 GPA, and recommendation of faculty. Cr 3.

ITP 360 Motion and Time Study
A study of techniques to utilize available resources (men, material, machines and facilities) in the most effective and economical manner giving full recognition to the human factors involved in engineering work methods and time measurements. Cr 3.

ITP 310 Plant Layout and Material Handling
A study of materials flow, layout production, assembly and service departments, manufacturing, buildings, service departments, handling equipment, and packaging techniques. Cr 3.

ITP 320 Occupational Safety
Theory of industrial safety with emphasis on fundamental concepts in the industrial environment. Emphasis will be placed on the psychological, sociological, and physiological aspects of industrial safety. Consideration will be given to OSHA and its impact on the work environment. Cr 3.

ITP 330 Production Control
Production control as a system, types of process organization, planning and scheduling, inventory control, forecasting production control and production planning. Some of the techniques developed in Operational Research will be used to solve problems in Production Control. Cr 3.

ITP 340 Quality Control Fundamentals
An overview of fundamental concepts and principles of quality control. The course will cover techniques utilized from the simplest products test to process control engineering and will include incoming material control, inspection sampling and quality control management. The course will cover practical application for installing quality control systems using actual case studies developed by participants. Cr 3.

ITP 370 Occupational and Trade Analysis
Identification of occupational or trade fields,
units, operations, and items of related information. Cr 3.

IEV 305 Curriculum Development in Vocational Education
This course is concerned with developing specific course content from an occupational analysis. The identification of educational needs and objectives precedes the selection and organization of relevant matter. Prerequisite: ITP 370. Cr 3.

IEV 310 Methods and Materials of Instruction in Vocational Education
This course treats the general and specific materials and methods of teaching vocational courses. Deals with both the theoretical and practical aspects. Prerequisites: ITP 370 and IEV 305. Cr 3.

IEV 312 Teaching Students With Special Needs
A course designed for vocational educators who need to learn how to serve handicapped, disadvantaged and gifted youth. It is structured to aid vocational teachers in working with special education personnel and to provide skills needed in planning instruction for students with special needs. Cr 3.

IEV 315 Learning and Programmed Instruction
The first application of the laboratory and scientific study of the learning process, including the principles of learning which are derived from experimental study and which have provided a foundation for advances in the techniques of learning. Cr 3.

IEV 320 Coordination of Cooperative Education
The role of the coordinator in organizing and conducting a program of work-study experience in high school. Introduction to cooperative half-time training, community survey, advisory committees, laws and regulations; and examination of the responsibilities and activities of the coordinator. Cr 3.

ITP 350 Conference Leading
A course in philosophy and techniques of organizing and conducting successful conferences. Each participant will assume the responsibility of planning and leading a simulated conference. Cr 3.

IEV 330 Principles and Practices of Vocational Guidance
Discussion and study with the intent to develop a better understanding of principles and objectives of vocational guidance. Cr 3.

IEV 331 Practicum—Vocational Guidance
Field experiences in identification of content and relevant information for vocational counseling. Individual and group activity, visitations, tours, and career counseling techniques. Cr 3.

IEV 340 Shop Organization and Management
Basic principles of planning, organizing, and managing an industrial or technical shop or laboratory. Selection and arrangement of equipment including specification writing. Control of personnel for efficient shop management. Prerequisite: IEV 310. Cr 3.

IEV 350 Philosophy of Vocational Education
A survey of the history and philosophy of vocational education in the United States with emphasis upon recent developments. Cr 3.

IEV 382 Preparation of Instructional Materials
A lecture-laboratory series which involves students in the creation of instructional materials. Techniques include the dry mounting of flat pictorial materials, cloth backing of pictorial materials, professional-quality lettering, rudimentary photography and processing (including use of the darkroom), and the production by several techniques of transparent projectuels. Cr 3.

ITT 400 Trade Experience, Verified (see ITT 440, Option No. 2 below)
Credits will be determined by rating plan. Cr 3.

IEV 411 Measurement and Evaluation in Vocational Education
The construction, selection, and use of achievement and performance tests in industrial-technical education. Skill in writing test items is developed. Elementary statistics for the industrial-technical instructor, including grading, are stressed. Prerequisites: ITP 370 and IEV 310. Cr 3.

IEV 420 Trends in Vocational Education
Identification, analysis, and discussion of major problems and trends in vocational education. Cr 3.

ITT 440 Related Occupational Experiences
Two options, total credits to be no more than the difference between those granted for ITT 400, and 45 credits.

OPTION NO. 1
This course option is designed to permit attendance at an approved industry-sponsored school or seminar for the purpose of providing the student with advanced related occupational or technical training. Courses provided by organizations such as General Motors Training Centers, or International Typographical Union, qualify under this course option.

OPTION NO. 2
Approved employment with a company may qualify a student under this option. Arrangements must be approved by the advisor in advance. The experiences should provide opportunities for updating technical skills and
knowledge. Credit will be determined on the basis of one credit for each two full weeks of employment with a maximum of five credits for each period of approved continuous full-time employment. A daily log, summary report and evaluation by an industrial supervisor will constitute part of this option.

For additional information concerning either option of IEV 440, consult your adviser.

IEV 450 Local Administration and Supervision of Vocational Education
Procedure and practices utilized in establishing, promoting, coordinating, supervising, controlling vocational programs on the local level. Cr 3.

IEV 455 Development of Technical Education Programs
Planning and development of technical education programs including the determination of needs and organization of programs for secondary and post-secondary schools. Cr 3.

IEV 460 Independent Study in Vocational Education
An opportunity to pursue independently, a topic, project, or experiment of interest. Students will prepare a contract or proposal for study to be conducted and, upon completion, submit findings in a scholarly report or other evidence of completeness. Permission of advisor. Cr 3.
School of Business, Economics and Management

Dean: Duane R. Wood
Assistant to the Dean: Margaret Palmer-Wright; Staff Associate for Undergraduate Advising: Ronda Bridges; Director, Center for Real Estate Education: Charles Coit

Department of Business Administration

Chair: Richard J. Clarey, 615 Research Center, Portland
Professors: Findlay, Miaoulis, Neveu, Sturner, Wood; Associate Professors: B. Andrews, Chandler, Clarey, Hodson, Houlihan, Jagolinzer, Assistant Professors: Boyle, G. Parsons, H. Parsons, Sanders

Department of Associate Business Administration

Chair: Jean E. Gutmann, 118 Bedford Street, Portland
Professor: McKeil; Associate Professors: Aiello, S. Andrews, Gold, Gutmann, Purdy; Assistant Professors: Bauer, Coit, Kim, Lohmeyer, Westfall

Department of Economics

Chair: Robert C. McMahon, 227 Bonney Hall, Portland
Professor: Durgin; Associate Professors: Bay, McMahon, Phillips; Assistant Professor: Medley

The School of Business, Economics and Management offers a number of different programs to meet student needs. The School offers a two-year program in business administration leading to an associate of science in business administration degree. Four-year undergraduate programs leading to the degree of bachelor of science in business administration or economics are available in three areas of study: accounting, business administration, and economics. The School also provides a graduate program leading to the degree of master of business administration (see Graduate Catalog for information).

Associate of Science in Business Administration

The associate program in business administration is designed to prepare students who wish to complete their education in two years for employment in junior management positions in several different careers and to provide a sound foundation for those students who perform well and who wish to transfer to a baccalaureate program in business administration at this University or other institutions. Associate degree graduates are equipped for employment at the junior management level in many fields of business. Some fields of business that graduates have entered are accounting, bookkeeping, business computers/data processing, sales, retailing, banking, finance, real estate, hospitality services, and management trainee programs.
While the program emphasizes business, it contains courses in liberal arts including English, fine arts, social science, humanities, and mathematics. Options within the associate program include accounting; business computer programming; management; marketing; hotel, motel and restaurant; and real estate. Also available is a transfer track option for those students planning to enter a baccalaureate program in business administration immediately after completion of the associate degree program.

The hotel, motel, and restaurant option is a cooperative, two-year program developed jointly by Southern Maine Vocational Technical Institute and the A.B.A. program. The fourth semester is offered on the SMVTI campus in their Culinary School. Students are enrolled at the University but attend at SMVTI and must provide their own transportation.

Admission Requirements

Any high school student may seek admission to the two-year associate degree program. A college preparatory background, while desirable, is not necessary. Applicants should complete the University of Maine application and specify the associate in business administration program. Candidates also must complete the Scholastic Aptitude Test.

Students admitted to the University will enter the School of Business, Economics and Management as associate degree students. However, in order to be admitted to one of the options in the associate business program, to complete the degree requirements a student must complete: (1) at least 23 semester hours with a minimum accumulative grade point average of 2.00, and (2) the following set of courses with a minimum accumulative grade point average of 2.00: ABU 101; ABU 102; ABU 111; ABU 112; MAT 010 or MAT 011 or MAT 100 or MAT 110; ENG 100.

An application for admission to the associate degree program should be completed and returned to the Dean's Office, School of Business, Economics and Management. An official transcript of credits earned at the University of Southern Maine and/or a copy of the transfer credit evaluation from other colleges or universities must be submitted with the application.

Although actual admission will not be approved until completion of at least 23 semester hours, required prerequisites, and required grade point averages, students may apply and be admitted pending completion of the semester's work in which they will have earned 23 or more credits. These students will be allowed to register early for the following term. If admission requirements are not completed, their admission will be revoked and any enrollments in 200-level or above courses in the School of Business, Economics and Management will be cancelled.

Students who have not been admitted to an associate degree program within the School will be allowed to enroll in associate business courses on a space-available basis according to the following criteria: they have declared a major which required the course in its curriculum; they are admitted to a baccalaureate program within the School of Business, Economics and Management (baccalaureate students will not receive credit for these courses toward their major requirements except by prior approval of the Dean); they are admitted to the University as degree candidates (baccalaureate students will not receive credit for these courses toward their major except by approval of their Dean); they are non-degree students.

Associate of Science in Business Administration

The minimum number of credits required for the degree is 60.

General Elective (3)

Hotel, Motel and Restaurant Option SMVT I Semester
ABU 220 Business Finance I
ABU 240 Principles of Management
ABU 260 Marketing
HMR 101 Food Fundamentals
HMR 104 Hotel Law
HMR 200 Food and Beverage Management
HMR 201 Quantity Food Preparation
HMR 202 Front Office Management

Real Estate Option
ABU 220 Business Finance I
ABU 221 Principles of Real Estate
ABU 222 Real Estate Law
ABU 224 An Introduction to Appraising Real Property
ABU 226 Principles of Real Estate Finance
ABU 240 Principles of Management
ABU 260 Marketing
General Elective (3)

Transfer Track Option
This option is designed for those associate degree students who desire to enter a baccalaureate program in accounting or business administration immediately upon completion of their associate degree.

ABU Program Electives (6)
Select two from the following: ABU 100, ABU 211, ABU 212, ABU 221, ABU 222, ABU 224, ABU 226, ABU 291, ABU 292, ABU 294, ACC 202, BUS 190, BUS 290

Mathematics (6)
Select two courses from the following sequence depending upon mathematics courses taken to satisfy Basic Requirements above: MAT 110, MAT 211, MAT 212 (Students who complete MAT 110, MAT 211, and MAT 212, in their first nine hours of mathematics should select a course to fulfill the Core curriculum requirement in Reasoning.)

From courses approved for Core curriculum (12)
It is strongly advised that students in the Transfer Track Option take a COR designated course (e.g., COR 101, COR 102 etc.) to fulfill a Fine Arts, Humanities, or Social Science requirement below.
1. Natural Science with Lab
2. Social Science
3. Humanities from either a) Literature or b) Other Times/Other Cultures
4. Fine Arts from either a) History-Centered or b) Performance-Centered

ABU Program Electives
To fulfill the ABU electives required in the above options, students may select from the following courses:
ABU 100 Introduction to Business
ABU 211 Financial and Managerial Accounting I
ABU 212 Financial and Managerial Accounting II
ABU 221 Principles of Real Estate
ABU 222 Real Estate Law
ABU 224 Introduction to Appraising Real Property
ABU 226 Principles of Real Estate Finance
ABU 227 Investment Management
ABU 243 Problems in Small Business
ABU 253 Human Relations in Business
ABU 264 Retailing
ABU 267 Sales Management
ABU 291 COBOL I: Application and Documentation
ABU 292 COBOL II: Advanced Programming Application
ABU 294 RPG Programming
ABU 295 Data Design and Handling
ABU 296 Business Information Systems
ACC 202 Principles of Management Accounting
ACC 301 Intermediate Accounting I
BUS 190 Personal Finance
BUS 290 Introduction to Computers in Business
MAT 109 Linear Systems
MAT 110 Elementary Mathematical Analysis
MAT 211 Probability
MAT 212 Statistics
Baccalaureate Programs in Business Administration and Economics

The primary objective of the undergraduate baccalaureate program in business administration is to develop the student's abilities to assume the responsibilities of management. The program aims at developing skills and an attitude of mind that will enable the student to cope successfully with the changing problems of management in the years ahead.

The program is implemented in three phases. First, the student acquires broad training in the arts and sciences for the necessary foundation upon which his or her future education will build. Second, the student pursues a program of study designed to provide an understanding of the major functional areas common to most business operations and knowledge of certain fields which are particularly relevant to the study of management. Third, the student undertakes to acquire a deeper knowledge of the selected major field, either accounting or business administration. This is accomplished by taking 21 credit hours beyond the common requirements in business and economics.

The undergraduate program in economics provides a broad preparation for a variety of careers as well as for graduate study in economics, business administration, or law. Economics is a social science and as such must be studied in the perspective of a broad training in the liberal arts and sciences. Within the economics program, courses are available in such fields as: economics analysis, quantitative methods, international economics, and the economics of monetary and fiscal policy.

Applied Studies

Within the four-year programs in accounting, business administration, and economics, the following opportunities are available.

Internship/Cooperative Education Program The School of Business, Economics and Management offers an Internship/Cooperative Education Program in which students, while working in business or industry, may earn academic credit. This program combines the efforts of employers and educators forming educational experiences in areas including accounting, marketing, finance production, management, and human resources development. Firms involved with the Internship/Cooperative Education Program represent such fields as public accounting, internal auditing, banking, securities and investments, retailing, and manufacturing. Frequently opportunities with non-profit organizations also are available. Students who desire further information should contact the director of the Internship/Cooperative Education program.

Small Business Institute The School of Business, Economics and Management, through the Small Business Development Center, sponsors a program called the Small Business Institute. Juniors and seniors are selected to provide management counseling to the area's small businesses. Under the program, students counsel and advise, in cooperation with a faculty advisor and representatives of the Small Business Administration, various businesses within southern Maine. The program provides an opportunity for relevant practical application of academic principles. Students may be involved in such areas as accounting, finance, management, marketing, and production. The course carries three hours of academic credit.

Double Majors Students may elect to complete the requirements for a double major in accounting and economics or in business administration and economics. Students may not seek a double major in accounting and business administration.

Admissions Requirements

Students admitted to the University will enter the School of Business, Economics and Management as baccalaureate degree students. However, to be admitted to a baccalaureate major within the School of Business, Economics and Management, a student must have completed at least 53 semester hours with a minimum accumulative grade point average of 2.00, and have completed one of the following sets of courses, depending upon the designated major, with a minimum accumulative grade point average of 2.00.
Accounting Major: ACC 201, ACC 301, BUS 280, BUS 290, ECO 201, ECO 202, MAT 110, MAT 211

Business Administration Major: ACC 201, ACC 202, BUS 280, BUS 290, ECO 201, ECO 202, MAT 110, MAT 211

Economics Major: ACC 201, ECO 201, ECO 202, MAT 109 and MAT 110 or MAT 152 and MAT 153

In addition, a student majoring in accounting or business administration must complete MAT 212 before enrolling in a 300-level ACC or BUS course, except that accounting majors may take ACC 301.

An application for admission to the baccalaureate degree program in the School of Business, Economics, and Management should be completed and returned to the Dean's Office. An official transcript of credits earned at the University and/or a copy of the transfer credit evaluation from other colleges or universities must be submitted with the application.

Although actual admission will not be approved until completion of at least 53 semester hours, the required set of courses and achievement of required grade point averages, students may apply and be admitted pending completion of the semester's work in which they will have earned 53 or more credits. These students will be allowed to register early for the following term. If admissions requirements are not met, their admission will be revoked and any enrollments in 300-level or above courses in the School of Business, Economics, and Management will be cancelled.

Students who have not been admitted to a baccalaureate major within the School will be allowed to enroll in 300-level or above courses on a space-available basis according to the following priorities: they have declared a major which required the course in its curriculum; they have been admitted to the minor in business administration or the minor in economics (applies to Economics courses only); they are juniors or seniors admitted to the University as degree candidates; they are non-degree students.

Transfer from an Associate to a Baccalaureate Program

To be admitted to a baccalaureate major within the School of Business, Economics, and Management from an associate degree program, a student must have: completed at least 53 semester credit hours with a minimum accumulative grade point average of at least 2.40 in all associate business (ABU) courses and in all associate-level courses, and at least a 2.00 in all baccalaureate-level courses.

The student must also have completed one of the following sets of courses or their equivalents depending upon the desired major:

Accounting Major: ACC 201, ACC 301, BUS 280, BUS 290, ECO 201, ECO 202, MAT 110, MAT 211

Business Administration Major: ACC 201, ACC 202, BUS 280, BUS 290, ECO 201, ECO 202, MAT 110, MAT 211

Economics Major: ACC 201, ECO 201, ECO 202, MAT 109 and MAT 110 or MAT 152 and MAT 153

In these sets of courses, all baccalaureate courses (not associate business, ABU, or associate level) must be completed with at least a 2.00 accumulative grade point average. Associate business (ABU) courses must be completed with a minimum grade of C- to be considered equivalent to ACC 201, ACC 202, BUS 280, BUS 290, ECO 201, and ECO 202.

To be admitted from an associate degree program to baccalaureate status within SBEM, an individual must have completed at least 15 semester credit hours and no more than 53 semester credit hours with an accumulative grade point average of at least 2.40 in all associate business (ABU) courses and in all associate level courses and at least a 2.00 in all baccalaureate level courses.

For those baccalaureate courses (not associate business, ABU, or associate level) listed below which have been completed, at least an accumulative grade point average of 2.00 must be earned. Associate business (ABU) courses must be completed with a minimum grade of C- to be considered equivalent to ACC 201, ACC 202, BUS 280, BUS 290, ECO 201, and ECO 202.
From the time of admission to baccalaureate status within SBEM, an individual must fulfill the remaining criteria for admission to a major in the same manner as any other baccalaureate student.

Degree Requirements
All students must complete at least 120 credit hours of coursework. To be eligible for the B.S. degree, a student must have attained an accumulative grade point average of 2.00 or higher in all courses taken in baccalaureate programs at the University and in all baccalaureate courses in accounting (ACC), business (BUS), and economics (ECO).

Bachelor of Science in Business Administration
The minimum number of credits (including the University's Core curriculum) required for the degree: 120

Core Curriculum Requirements (28-31 credits)
Basic Competence
1. English Composition (3)
   Students who fulfill the English Composition Competence of the Core curriculum without earning credits must complete 3 credits of electives from CLA, ENG, FRE, GER, GRE, LAT, or SPA courses.
2. Skills of Analysis/Philosophy (3)
3. Quantitative Decision Making
   This requirement will be fulfilled by taking the mathematics courses stipulated below under the supplementary requirements.

Methods of Inquiry/Ways of Knowing
1. Fine Arts
   a. Performance-centered arts (3)
   b. History-centered arts (3)
2. Humanities
   a. Literature (3)
   b. Other Times/Other Cultures (3)
3. Social Science (not to include ECO courses) (6)
4. Natural Science (4)
   Interdisciplinary COR course. May be double-counted to fulfill the fine arts, humanities or social science requirements.

Supplementary Requirements
1. Mathematics (9)
   a. MAT 110 Elementary Mathematical Analysis
   b. MAT 211 Probability
   c. MAT 212 Statistics
2. Social Science (6)
   To be selected from ANT, CRI, COM, GEO, HTY, POS, PSI, SOC, and SWE courses.

Basic Requirements for Accounting and Business Administration (18)
ACC 201 Principles of Financial Accounting
BUS 280 Business Law
BUS 290 Introduction to Computers in Business
ECO 201 Principles of Economics I
ECO 202 Principles of Economics II
ECO elective (300-level or above)

Major in Accounting or Business Administration
1. Common Courses (18)
BUS 320 Business Finance
BUS 340 Principles of Management
BUS 360 Marketing
BUS 371 Operations Research/Management Science

Or

B. Business Administration (18)
ACC 202 Principles of Management Accounting
BUS 327 Investment Management
BUS 452 Organizational Behavior
Nine credits from ACC, BUS, ECO electives (300-level or above)

General Electives (17-23)

Minor in Business Administration
In order to be admitted to the minor in business administration, a student must have completed at least 24 credit hours with a grade point average of 2.50 (A=4.00 scale) or higher. For admission to the minor the student must have completed MAT 110 or MAT 152 with a grade of C or higher. The student must also complete MAT 211 and MAT 212, or MAT 362, before taking any 300 level business course (BUS 320, BUS 340, BUS 360).

A student majoring in business administration or accounting in the School of Business, Economics and Management may not minor in business administration; nor may a student with an associate degree in business earn a minor in business administration.

To fulfill the requirements for a minor in business administration, a student must complete the following courses with an overall average of at least a 2.00. A minimum of four of the following seven courses required for the minor must be taken at the University of Southern Maine.

ACC 201 Financial Accounting 3 credits
ACC 202 Financial and Managerial Accounting 3 credits
ECO 201 Principles of Economics I 3 credits
ECO 202 Principles of Economics II 3 credits
BUS 320 Business Finance 3 credits
BUS 340 Principles of Management 3 credits
BUS 360 Marketing 3 credits

Bachelor of Science in Economics

The minimum number of credits (including the University’s Core curriculum) required for the degree: 120

Core Curriculum Requirements (28-31 credits)

Basic Competence

1. English Composition (3)
   Students who fulfill the English Composition Competence of the Core curriculum without earning credits must complete 3 credits of electives from CLA, ENG, FRE, GER, GRE, LAT, or SPA courses.

2. Skills of Analysis/Philosophy (3)

3. Quantitative Decision Making
   This requirement will be fulfilled by taking the mathematics courses stipulated below under the supplementary requirements.

Methods of Inquiry/Ways of Knowing

1. Fine Arts
   a. Performance-centered arts (3)
   b. History-centered arts (3)

2. Humanities
   a. Literature (3)
   b. Other Times/Other Cultures (3)

3. Social Science (not to include ECO courses) (6)

4. Natural Science (4)

Interdisciplinary COR course. May be double-counted to fulfill the
fine arts, humanities or social science requirements.

Supplementary Requirements (12)

MAT 109 Linear Systems
MAT 110 Elementary Mathematical Analysis
MAT 211 Probability
MAT 212 Statistics

An optional, more rigorous mathematics sequence is available to those students who desire it. They may take MAT 152 Calculus A and MAT 153 Calculus B instead of MAT 109 and MAT 110, but these students must still take MAT 211 and MAT 212.

Basic Requirements for Economics (9)

ACC 201 Principles of Financial Accounting
ECO 201 Principles of Economics I
ECO 202 Principles of Economics II

Major in Economics

ECO 301 Macroeconomic Analysis (3)
ECO 302 Microeconomic Analysis (3)
ECO electives which may include GEO 303 and HTY 338 (21)

General Electives (41-44)

A less mathematics-oriented B.A. degree with a major in economics is offered by the Department of Economics through the College of Arts and Sciences. (See p. 78.)

Minor in Economics

A minor in economics is available to students in any major within the University. A description of requirements follows.

To gain admission, students must be in good standing at the University and submit a signed Economics Minor Authorization Form to the Dean of the School of Business, Economics and Management. The 21 credit hours below must be completed with at least a 2.00 accumulative grade point average: ECO 201; ECO 202; ECO 301; ECO 302; either MAT 120, or MAT 212, or MAT 362; and six additional credits of 300-level or above ECO electives.

Minor in Mathematics

In cooperation with the Department of Mathematics and Computer Science, a minor in mathematics is available to all economics majors. The optional mathematics minor is: 21 credit hours (not to include statistics courses), with 12 of the credit hours in MAT 152, 153, and 252. The remaining 9 credit hours are to be selected from the following: MAT 290, MAT 352, MAT 354, MAT 366, MAT 380, MAT 460; COS 260.

Master of Business Administration

The School offers a master of business administration degree. For those interested in this program a separate brochure is available at the School of Business, Economics, and Management office. Please refer to the Graduate Catalog for further information.

Associate Degree Program

ABU 100 Introduction to Business

An examination of the significant relationships between business and the social, political, and economic environment of our society for the purpose of evaluation of goals, values, ethics, and practices in the business world. Historical development of business and capitalism is covered. The industrial and commercial structures and functions in our society are described. Social relationships internal to the firms are explored. Special problems concerning mass production, automation, and employment are discussed along with other current and future issues and problems related to business and our society.

Cr 3.

ABU 101 Principles of Economics I

A theoretical analysis of the basic characteristics, institution, and operational activities of a modern capitalistic economy which is in-
volved in the transformation of scarce economic resources into the goods and services demanded by consumers. Topics discussed include inflation, unemployment, government monetary and fiscal policy to achieve full employment, and economic growth. (Cannot be applied toward Core Curriculum Requirement in Social Science) Cr 3.

ABU 102 Principles of Economics II
A theoretical analysis of the firm, and its role in the transformation of scarce economic resources into the goods and services demanded by consumers. Special attention is focused on the development of a market mechanism for the exchange of goods, services, and resources within a capitalistic economy. Topics discussed include consumer preferences and consumer behavior, production theory and production costs, the monopoly firm, and resource pricing. (Cannot be applied toward Core Curriculum Requirement in Social Science) Cr 3.

ABU 111 Principles of Accounting I
An introduction to the accounting cycle, working papers, and financial statements. A practical emphasis on accounting methodology with coverage of inventory control, cash control, depreciation of plant assets and payroll.

ABU 112 Principles of Accounting II
A study of the procedures of accounting for owner’s equity, long-term investments and the cost of manufacturing goods. The proprietorship, partnership, and corporation accounting techniques are developed in a practical approach. Prerequisite: ABU 111. (not for SBEM baccalaureate) Cr 3.

ABU 190 Introduction to Computers in Business
This course focuses on the role of the computer as an aid in managerial decision making. Computer operation and programming fundamentals including flowcharting and program writing are covered in one of the common computer programming languages emphasizes business applications. Provides a basic knowledge of computer concepts; “hands on” problem solving with the computer; and the impact of computers on the business world.

ABU 211 Financial and Managerial Accounting I
A detailed study of such accounting topics as special journals, subsidiary ledgers, voucher register, financial statements, inventory, depreciation, payroll and computer applications with an emphasis upon the practical aspect of accounting procedures. Prerequisites: ABU 111, ABU 112. Cr 3.

ABU 212 Financial and Managerial Accounting II
The course deals with the uses of accounting data for financial and management control. Topics include the analysis of costs, the preparation of comprehensive budgets, and the study of decision-making processes. Prerequisites: ABU 211. Cr 3.

ABU 220 Business Finance I
A study of the promotion, organization, and financing of the single proprietorship, partnership, and corporation. Such topics as fund flows, ratio analysis, breakeven analysis and leverage, time value of money concepts, cost of capital and capital budgeting are examined. Prerequisites: ABU 101, ABU 102, ABU 111 and ABU 112. Cr 3.

ABU 221 Principles of Real Estate
An overview of real estate fundamentals, including rights and interests in land; forms of ownership; contracts; records, and forms; taxes and assessments; appraisals; insurance; brokerage; property management; and land use control.

ABU 222 Real Estate Law
A study of real property law in general and Maine law in particular, land titles, acquisition and transfer, methods of ownership, rights of husband and wife, rights of landlord and tenant, easements, fixtures, land descriptions, mortgages, deeds, taxes, contracts, legal elements of brokerage relationship, selected environmental and land use regulations, coastal island registry, physical regulations of subdivisions, zoning and selected federal laws. (Completion of this course with a grade of 75, or better, provides one-third of an approved course of study for those who wish to prepare for the State of Maine real estate brokers’ license examination.) Offered only in the evening.

ABU 224 An Introduction to Appraising Real Property
This is an intensive course covering all real property appraising concepts and the technical skills employed in their applications to residential property. The course is designed for the beginning appraiser, real estate broker, lender, builder, and assessor. Included is a summary introduction to real estate economics and urban land studies. This is the first of three courses accepted by the Society of Real Estate Appraisers for credit toward a professional designation. Offered only in the evening.

ABU 226 Principles of Real Estate Finance
Methods of financing various types of real es-
tate including sources of funds, analysis of lenders, risks, types of loans, government influences and participation, financing instruments, loan processing, defaults and foreclosures. Offered only in the evening. Cr 3.

ABU 227 Investment Management
Provides the planning and management of investment programs for all types of investors. Evaluates the various media of investments in terms of their risks and profits. The functions of the stock market and its behavior are examined. Prerequisites: ABU 101, ABU 102, ABU 111, and ABU 112. Cr 3.

ABU 240 Principles of Management
A comprehensive survey of all phases of the management of industrial and business enterprises. The influence of industrial relations is interspersed with the treatment of management's technical problems. Prerequisites: ABU 101, and ABU 102. Cr 3.

ABU 243 Problems in Small Business
A study of the aspects of management that relate most specifically to the management of small business. The course covers areas of business planning, development, and operation which the prospective owner/manager must consider seriously early in his/her thinking. During the course each student will develop a comprehensive small business plan. Prerequisites: ABU 102, ABU 111, ABU 112, ABU 260. Cr 3.

ABU 253 Human Relations in Business
Introduction to the behavioral sciences, emphasizing typical behavioral problems faced in business by employees and management. Lectures, case analysis, and outside readings are supplemented by involving the student in role playing and analyzing collected data. Prerequisite: ABU 240. Cr 3.

ABU 260 Marketing
A study of the marketing organization with a focus on product policies, distribution policies, promotional and pricing policies. Market research is implemented by getting students involved in casework, controversial issues, and local business community projects. Prerequisites: ABU 102. Cr 3.

ABU 264 Retailing
Study of the retail distribution structure and of the problems involved in successful store operation under current conditions. Prerequisites: ABU 260. Cr 3.

ABU 267 Sales Management
Analysis of the problems facing marketing management in formulating sales policy and in managing the sales organization. Prerequisites: ABU 260. Cr 3.

ABU 280 Business Law
This course, an introduction to the study of business law, includes origins of the law, the conduct of a civil lawsuit, contract, agency, and property law, the law of negotiable instruments and secured transactions, and an overview of partnership and corporation law. Cr 3.

ABU 291 COBOL I: Applications and Documentation
An introduction to programming in the COBOL language, it includes practice in the structure, rules, and vocabulary of COBOL using exercises in structured problem analysis, program specification techniques, and coding. Programs will focus on simple business problems and generally accepted business procedures. Prerequisites: ABU 111, ABU 190 or permission of the Dean. Cr 3.

ABU 292 COBOL II: Advanced Program Applications
It emphasizes applying the techniques for developing and documenting a complete business program. Major focus will be on data design, structured programming, output formats, and program optimization. Prerequisites: a 3.1 accumulative grade point average in ABU 190 and ABU 291 or permission of the Dean. Cr 3.

ABU 294 RPG Programming
An introduction to programming in the RPG language, its focus is on the use of RPG to manipulate files in the process of producing necessary business reports. Programming assignments will focus on report specifications, file handling, and editing. Prerequisites: ABU 111, ABU 190 or permission of the Dean. Cr 3.

ABU 295 Data Design and Handling
This course covers the techniques for the effective management of data in a business information system. Content includes I/O hardware, file formats, access methods, fixed and variable fields, searching, sorting sequencing, labeling, directories, and data base concepts. Prerequisite: ABU 292. Cr 3.

ABU 296 Business Information Systems
The purpose of this course is to develop an understanding of the interrelationships and requirements for an integrated business data processing system in order to provide accurate and timely management information. It examines the most common business applications. Prerequisites: ABU 240, ABU 292 or permission of the Dean. Cr 3.
Baccalaureate Program

ACC 201 Principles of Financial Accounting
An introduction to accounting principles and concepts. Emphasis is placed on understanding financial statements and the accounting for assets, liabilities, equities, revenue, and expenses. Cr 3.

ACC 202 Financial and Management Accounting
This course is designed for non-accounting majors. It deals with the selection and preparation of information which will serve to support and assist management in planning and controlling a firm's operations. The emphasis is on information needs for management decision making. Included are analysis of financial statements, changes in financial position, cost-volume-profit analysis, budgeting, income tax considerations, and quantitative techniques integrated with more traditional approaches. Prerequisite: ACC 201. Cr 3.

ACC 301 Intermediate Accounting I
A study of accounting theory including the conceptual framework, financial statements, the accounting for cash, temporary investments, receivables, and inventories. (Sophomores may enroll on a space-available basis.) Prerequisite: ACC 201. Cr 3.

ACC 302 Intermediate Accounting II
The study of accounting theory including property, plant and equipment, intangible assets, current liabilities, long-term corporate capital, income tax allocation, and earnings per share. Prerequisite: ACC 301. Cr 3.

ACC 303 Intermediate Accounting III
The study of accounting theory and practice relating to pension liabilities, leases, interim reporting, segment reporting, accounting changes, price level and current value accounting, statement of changes in financial position, and income tax allocation, other topics. Prerequisite: ACC 302. Cr 3.

ACC 305 Cost Accounting
Concepts and analytical procedures necessary to the generation of accounting data for management planning and control and product costing. Emphasis is on job costing, process costing, standard costs, and variance analysis and direct costing. Prerequisite: ACC 202 or ACC 301. Cr 3.

ACC 313 Federal Tax Reporting
An overview of federal tax laws as they affect individuals, partnerships, corporations, and related topics. Prerequisite: ACC 201. Cr 3.

ACC 401 Advanced Accounting I
The study of accounting principles and theory relating to mergers and consolidations, not-for-profit organizations, and foreign currency. Prerequisite: ACC 303. Cr 3.

ACC 402 Advanced Accounting II
The study of accounting principles and theory related to partnerships, estates and trusts, installment sales, consignments, franchises, receiverships, retail land sales, and other miscellaneous advanced topics. Prerequisite: ACC 303. Cr 3.

ACC 410 Auditing
A study of auditing philosophy and theory relative to the examination of financial statements and other data. Coverage includes internal control, auditing standards and procedures, and the legal and ethical responsibilities of the independent auditor. Prerequisite: ACC 303. Cr 3.

ACC 420 Senior Seminar in Accounting
A review of APB opinions, FASB statements, SEC role in accounting, and other current issues. Prerequisite: ACC 303 and senior standing, or permission of instructor. Cr 3.

BUS 190 Personal Finance
In dealing with the problems of managing personal finances, primary emphasis is placed on methods of measuring and evaluating expenditures to assure optimal benefit from the income. It includes an evaluation of typical occupations and incomes; of life insurance with the various types, investments and mutual funds; of the borrowing of money and use of credit; of taxes and estate planning. The course work will be a series of readings with brief case problems in each of the major areas. (When taken by business or accounting majors, this course will give general elective credit.) Cr 3.

BUS 280 Business Law
This course, an introduction to the study of business law, includes a thorough survey of the preparation for and conduct of a civil lawsuit, a brief discussion of criminal law, and a broad overview of contracts, agency, negotiable instruments, partnerships, corporations, secured transactions, labor law, and bankruptcy. This course is intended to provide a broad overview of business law and the Uniform Commercial Code. Cr 3.

BUS 281 Business Law II
An opportunity to continue the study of business law, includes a thorough survey of the preparation for and conduct of a civil lawsuit, a brief discussion of criminal law, and a broad overview of contracts, agency, negotiable instruments, partnerships, corporations, secured transactions, labor law, and bankruptcy. This course is intended to provide a broad overview of business law and the Uniform Commercial Code. Cr 3.

BUS 280 Business Law
This course, an introduction to the study of business law, includes a thorough survey of the preparation for and conduct of a civil lawsuit, a brief discussion of criminal law, and a broad overview of contracts, agency, negotiable instruments, partnerships, corporations, secured transactions, labor law, and bankruptcy. This course is intended to provide a broad overview of business law and the Uniform Commercial Code. Cr 3.

BUS 280 Business Law II
An opportunity to continue the study of business law, includes a thorough survey of the preparation for and conduct of a civil lawsuit, a brief discussion of criminal law, and a broad overview of contracts, agency, negotiable instruments, partnerships, corporations, secured transactions, labor law, and bankruptcy. This course is intended to provide a broad overview of business law and the Uniform Commercial Code. Cr 3.

BUS 290 Introduction to Computers in Business
The role of the computer as an aid in mana-
gerial decision making. Computer operation and programming fundamentals including flow charting and program writing in one of the common computer program languages emphasizing business applications. Cr 3.

BUS 320 Business Finance
This course introduces the student to the theories and techniques of managing capital sources and uses within the framework of shareholder wealth maximization. Lecture, problems, cases. Prerequisites: ECO 201, ECO 202, ACC 201, ACC 202 or ACC 301, MAT 110, MAT 211, MAT 212. Cr 3.

BUS 327 Investment Management
Provides the planning and management of investment programs for all types of investors. Evaluates the various media of investments in terms of their risks and profits. The functions of the stock market and its behavior are examined. Prerequisite: BUS 320. Cr 3.

BUS 340 Principles of Management
A comprehensive survey of all phases of management in public and private sectors. The influences of human, social, and political factors are interspersed with the treatment of management's structural and technical processes. Analyses focus on such themes as planning, decision making, organizational design, supervisory skills, communications, and information systems. Prerequisites: ECO 201 and ECO 202. Cr 3.

BUS 346 Personnel Management
The selection, training, and management of personnel in private and public sectors, including elements of wage and salary administration, testing, training, and labor relations. Designed for the student interested in administration, office management, or personnel work in education, business, engineering, public service, and other fields. Prerequisite: BUS 340 or permission of instructor. Cr 3.

BUS 345 Industrial Relations
A study of industrial relations patterns in the U.S. Major focus is on the relationship between management and labor (organized and unorganized), and the bargaining, administration, and interpretation of contracts, the problem of dispute settlement, and a comparison of methods used in the U.S. and abroad. Attention is also given to industrial relations in unorganized firms and in the Civil Service. Prerequisite: BUS 340 or permission of instructor. Cr 3.

BUS 349 Women and Management
For both men and women in business, education, and the social services, etc. It explores the changing business and organizational environment created by the increase of women in professional and managerial positions. The course examines theoretical concepts, pertaining to women in management. Both women and men who are or aspire to be managers will benefit from this course. Prerequisites: BUS 340 or permission of the instructor. Cr 3.

BUS 360 Marketing
An introduction to the field of marketing normally through the use of a computer simulation game. The concepts of market segmentation, marketing mix strategy, and market systems development are presented along with an analysis of consumer behavior and the need for marketing research. Prerequisites: ACC 201, ECO 201, ECO 202, BUS 290, MAT 110, MAT 211. Cr 3.

BUS 363 Advertising
Students will explore the evolution of advertising; forms and medium used and their relationship to the product, the climate, the target market, all within the framework of the marketing concept. Prerequisite: BUS 360. Cr 3.

BUS 367 Managerial Marketing
Students gain experience making marketing decisions as managers of a computer-simulated firm. The emphasis is on applying a "systems" approach to marketing decision making and on integrating knowledge gained in the other functional business areas into a strategic market planning framework. Prerequisites: BUS 360, BUS 371. Cr 3.

BUS 369 Marketing Research
Consideration of market research as a management planning and evaluative tool. Emphasis on problem formulation, exploratory research, research design, basic observational and sampling requirements, data analysis, interpretation and sampling. Prerequisites: BUS 360 and MAT 212. Cr 3.

BUS 371 Operations Research/Management Science
A survey of quantitative methods and tools which are commonly used in sophisticated managerial decision making. Mathematical models are constructed and applied, with the computer's aid, to a wide range of real world business situations. Topical coverage includes decision analysis, inventory models, network analysis, simulation, queuing models, applied stochastic processes, dynamic programming and non-linear programming. Prerequisites: BUS 290, MAT 110, MAT 211, MAT 212. Cr 3.

BUS 375 Production/Operations Management
An introduction to the problems and topics associated with the management of production operations and the delivery of services. The primary emphasis is upon the design of model-based planning and control systems.
Specific applications of such systems are used to illustrate general concepts as well as implementation difficulties. Prerequisite: BUS 371. Cr 3.

BUS 391 Computer-Based Decision Modeling and Simulation
A more in-depth examination of the role of the computer as an aid in managerial decision making. Emphasis is placed upon strengthening the student’s ability to build and properly utilize computer-based decision models and simulation for problem solving in the public and private sectors. Prerequisites: BUS 290 or COS 160, MAT 211, MAT 212. Cr 3.

BUS 395 Cooperative Education/Internship — Business Administration I
The student has the opportunity to relate academic knowledge to practical experience in the business world. The University can make arrangements with certain institutions and/or industries to employ students to fill specific jobs on a semester basis. The student’s work is in a related field, and the work experience increases in difficulty and responsibility as the student progresses through the academic curriculum. The work experiences are approved in advance by the director. Open to second-semester juniors and seniors in the School of Business, Economics, and Management with permission. Cr 1-5.

BUS 396 Cooperative Education/Internship — Business Administration II
Open to seniors in the School of Business, Economics and Management with permission. Prerequisite: BUS 395. Cr 1-5.

BUS 397 Cooperative Education/Internship — Business Administration III
Open to seniors in the School of Business, Economics and Management with permission. Prerequisite: BUS 396. Cr 1-5.

BUS 445 Compensation Administration
It provides a basic understanding of the tasks, responsibilities, and objectives of compensation and managing compensation programs. Techniques for determining wages, salaries, and benefits and their application to actual situations in order to design, develop, and administer compensation programs will be covered. The implications of process and policies on parties internal and external to the organization will be investigated. Prerequisites: BUS 346 or permission of the instructor. Cr 3.

BUS 450 Business Management and Policy
Administrative practice at the higher levels of business management through case analysis and discussion. The course attempts to coordinate the background of business majors in the formulation and administration of sound business policy. Prerequisites: BUS 320, BUS 340, BUS 360, BUS 371. Cr 3.

BUS 452 Organizational Behavior
An analysis of the interplay between individual and group behavior, leadership styles and the culture of an organization. The findings of behavior science are applied to such processes as motivation, influence, the structure of work, organizational design, leader-group relations and organizational change. Models, case studies, simulations, and applications. Prerequisites: BUS 340 or permission of instructor. Cr 3.

BUS 490 Independent Readings and Research
Selected topics in the various areas of accounting, finance, management, and marketing may be studied and researched on an independent basis. Prerequisite: senior standing and permission of the instructor and chair of the department. Cr 1-6.

BUS 491 Small Business Institute
This course is designed to allow the student to apply the concepts of business administration, economics, and accounting to operational problems in the field. Assignments are arranged by the School of Business, Economics and Management in conjunction with agencies such as the Small Business Administration for an off-campus consulting experience in a business firm or other appropriate institutional setting. Prerequisites: open to qualified juniors and seniors with approval. Cr 3.

BUS 499 Special Topics in Business and Management

EDC 300 Economic Concepts and Research Materials for Educators
A study of the simplification of economic concepts for presentation at elementary and secondary grade levels; also the study and preparation of various resource materials used in presenting economic concepts at these levels. Prerequisite: permission of the instructor. Cr 3.

ECO 201 Principles of Economics I
A theoretical analysis of the basic characteristics, institutions, and operational activities of a modern capitalist economy which is involved in the transformation of scarce economic resources into the goods and services demanded by consumers. Topics discussed include inflation, unemployment, government monetary and fiscal policy to achieve full employment and economic growth. Cr 3.

ECO 202 Principles of Economics II
A theoretical analysis of the firm and its role in the transformation of scarce economic resources into the goods and services demanded.
by consumers. Special attention is focused on the development of a market mechanism for the exchange of goods, services, and resources within a capitalistic economy. Topics discussed include consumer preferences and consumer behavior, production theory and production costs, the monopoly firm, and resource pricing.

ECO 301 Macroeconomic Analysis
A theoretical analysis of the basic forces that cause inflation, growth, and fluctuations in economic activity. The effects on employment and other factors are thoroughly treated. Stabilization policies are examined and evaluated. Prerequisites: ECO 201, ECO 202.

ECO 302 Microeconomic Analysis
Price, income, and employment theory as tools in the study of economics. Prerequisites: ECO 201, ECO 202.

ECO 305 Mathematical Economics
This course will cover the development and application of contemporary quantitative methods to the analysis of economic theory. Primary emphasis will be placed upon optimization theory and techniques for solving systems of simultaneous equations. These tools will be developed within the framework of economic models. Prerequisites: ECO 201, ECO 202; MAT 109 and 110 or MAT 152 and MAT 153.

ECO 306 Econometrics
Econometrics is a special field of economics in which models are used to test the validity of hypothesized theoretical relationships against actual data. Topics covered include: the bivariate linear regression model, heteroscedasticity, multicollinearity, serial correlation of errors, and two-stage least squares. Econometric forecasting and simultaneous equation estimation will be discussed. Prerequisites: ECO 201, ECO 202, MAT 212.

ECO 310 Money and Banking
This course examines the structure and operation of the financial system with major emphasis on commercial banking; reviews the structure of the Federal Reserve System and analyzes the tools of policy; develops alternative monetary theories; and discusses major issues in monetary policy. Prerequisites: ECO 201, ECO 202.

ECO 320 Labor Economics
This course emphasizes the application of economic analysis and concepts to a variety of labor problems such as the supply and demand for labor, labor markets, wage determination, wage differentials and structures, and wages and inflation. In addition, there will be a brief review of the evolution of the American labor movement and public policy toward labor. Prerequisites: ECO 201, ECO 202.

ECO 340 History of Economic Thought
A survey of the development of basic economic principles and theories from pre-industrial times to the present. Major emphasis is on the Classical School (Smith, Ricardo, and Malthus), and its critics, the development of the Austrian School, the synthesis of Neo-Classicism, and the emergence of Macro-economics. Prerequisites: ECO 201, ECO 202.

ECO 350 Comparative Economic Systems
The structures and operating principles of the major contemporary economic systems are examined and compared. Prerequisite: ECO 201.

ECO 351 Economic Systems of the Soviet Union

ECO 360 Economic Development
The theories and practices of interregional and international economic development. Special attention is given to developmental problems of emerging nations. Prerequisite: ECO 201.

ECO 370 International Trade
The principles and practices of international trade and finance are thoroughly treated. Special emphasis is given to current trends in the international economy and to United States commercial policy. Prerequisites: ECO 201, ECO 202.

ECO 380 Public Finance and Fiscal Policy
Public expenditure theory; principles of taxation; the federal budget and alternative budget policies; federal tax policy; fiscal policy for stabilization, federal debt. Prerequisites: ECO 201, ECO 202.

ECO 381 State and Local Public Finance
Development of the federal system; fiscal performance; intergovernmental fiscal relations; state and local revenue systems; budgetary practices; state and local debt. Prerequisites: ECO 201, ECO 202.

ECO 390 Energy Economics
The purpose of this course is to assist the student in analyzing the "energy crisis" from an economic perspective. Topics to be covered include: the concepts of energy and efficiency, the role energy plays in the U.S. economy, stocks of energy resources and the role of the government in creating and/or curing the crisis. Various energy related policies will
be reviewed. Some time will be devoted to an analysis of alternate energy sources and technologies. Prerequisites: ECO 201, ECO 202. Cr 3.

ECO 450 Readings in Economics
A series of readings and discussions of important books of a socio-economic and politico-economic nature—books with which the well-informed economics major should be familiar but which, due to time constraints, have not been integrated into the student's formal course work. Prerequisite: nine hours of economics. Cr 3.

ECO 490 Independent Readings and Research in Economics
Independent study and research of various student selected areas of economics. Prerequisites: senior standing and a completed independent study form (available from Registrar). Cr 1-3.
University of Southern Maine School of Nursing

Acting Dean: Nancy P. Greenleaf; Acting Associate Dean: Sallie Ullman

Faculty in Nursing
Associate Professors: Burson, Cotton, Dorbacker, Drew, Dubowick, Fournier, Jensen, MacPherson, Normandeau, Shoobs, Tryon, Tukey; Assistant Professors: Bailow, Bergstrom, Connors, Czupryna, Greenleaf, Healy, Henderson, Peake-Codin, Stowell, Tiffany, Ullman; Instructors: Beaulieu, Dyer, Elliott, Ellis, Heidema, Perry, Roche, Rodgers, Stone, Vezina

Assistant Dean, University of Southern Maine School of Nursing, Orono campus: Marjorie Keller
Program Coordinator, University of Southern Maine School of Nursing, F. Kent campus
Director, University of Southern Maine School of Nursing Learning Resource Laboratory: Sarah Whitney
Adjunct Faculty: Mary Ann Rost

Faculty in Therapeutic Recreation
Coordinator, Therapeutic Recreation Programs: James V. Sullivan
Professor: Sullivan; Associate Professor: Meyer; Assistant Professors: Martin, McCullough, Willard

The University of Southern Maine School of Nursing offers programs in nursing and therapeutic recreation. These include a baccalaureate program which leads to the bachelor of science degree with a major in nursing, a graduate program which leads to a master of science degree with a major in nursing, an associate degree program leading to an associate of science degree in therapeutic recreation, and a baccalaureate degree program leading to a bachelor of science degree in therapeutic recreation.

Summary of the School of Nursing Philosophy
The philosophy of the School of Nursing incorporates these beliefs:
Professional nursing practice focuses upon assisting individuals, families, and communities to achieve a state of optimal health. The maintenance of optimal health involves a dynamic interaction among the individual, family, community and the environment. Optimal health includes a state of positive biological, psychological, social and cultural growth throughout the life cycle. The roles of the professional nurse are in the areas of health promotion, maintenance, and restoration. Within each of these roles, there need be an application of the nursing process, and skills in leadership, advocacy, research and collaboration.

Learning is a process of interaction between the individual and the environment which results in affective, cognitive and psychomotor changes. The learning relationship between the teacher and student requires a shared commitment to clearly identified program objectives. The learner has an opportunity to develop personal learning objectives within the framework of the program and to select learning experiences in order to meet program objectives. Throughout the entire learning process, evaluation is shared by the teacher and learner.

The graduate of the program will be prepared to practice professional nursing with all age groups in a variety of settings; collaborate with consumers and health professionals to improve health care delivery; and contribute to the improvement of the practice of professional nursing.
Baccalaureate Program in Nursing

The School of Nursing offers a baccalaureate nursing program with an upper-division major for professional study. The aims of the program are to: provide a baccalaureate education in nursing; prepare a beginning professional nurse for practice in a variety of settings; prepare a beginning professional nurse who can respond to the health needs of consumers and the community; and provide a foundation for graduate study in nursing.

Each nursing student must complete a minimum of 121-126 credits which include nursing, core competencies, general education, liberal arts and sciences, and other supporting courses. Upon successful completion of the program the student is awarded a bachelor of science degree with a major in nursing, and is eligible to take the State Board Examination for R.N. licensure. The School of Nursing is approved by the Maine State Board of Nursing and is accredited by the National League for Nursing.

Admission Policy

Students interested in pursuing a bachelor of science with a major in nursing first must be admitted to the University, and upon admission will be designated as pre-nursing candidates. Admission to the University of Southern Maine is through the Admissions Office of the University, and prospective students should refer to the sections in this catalog on admissions policy required by the University. Admission of pre-nursing candidates to the School of Nursing is determined by the School of Nursing Undergraduate Admissions Committee. In addition to applying to the School of Nursing, pre-nursing candidates must apply to the University of Maine campus at which they intend to take the upper-division nursing major if it is different from the campus at which they are completing prerequisites. Pre-nursing candidates will be evaluated for admission to the School of Nursing based on the completed application, grade point average, letters of reference, a personal interview, and successful completion of all prerequisites (62-67 credits) as outlined on page 211. Recent, standardized test scores may be requested by the School of Nursing Undergraduate Admissions Committee.

Admission Procedure

Applicants for admission to the School of Nursing must: a) have successfully completed a minimum of 30 credits in the prescribed prerequisites; b) file an application with the School of Nursing by December 15 of the year prior to desired admission to the upper-division nursing major; and c) apply to the University of Maine campus where the applicant intends to take the upper-division major if different from the campus where prerequisites are completed.

To complete the application file, the following documents must be received by the School of Nursing Undergraduate Admissions Committee prior to January 28 of the year in which admission to the School of Nursing is desired: a completed application form, official transcripts of all college courses completed, and three letters of reference.

Courses from other colleges or universities are evaluated by the University of Southern Maine Office of Transfer Affairs. Applications cannot be processed until the above documents have been received.

After receipt of all the appropriate documents, the School of Nursing Undergraduate Admissions Committee reviews the applicant’s credentials. A personal interview may then be scheduled. When the committee has acted upon an application and forwarded a recommendation to the Dean of the School of Nursing, the applicant is advised of the decision prior to pre-registration for the fall semester. All admissions to the School of Nursing are contingent upon successful completion of all prerequisites with a minimum grade point average of 2.25.

Prerequisites for the Nursing Major

Prerequisite courses to the upper-division nursing major consist of competencies (English Composition, Quantitative Decision Making, Skills of Analysis/Philosophy), physical and behavioral sciences, humanities, and
fine arts. Pre-nursing candidates must achieve a minimum of 2.25 cumulative grade point average in order to be eligible to apply for admission to the upper-division nursing major. D grades or below are not acceptable in the prerequisite areas except in a general elective course.

**Note:** Upon applying to the upper-division nursing major, pre-nursing candidates must have completed their science requirements within the last eight years.

### Prerequisite Requirement Areas

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Composition Competence</td>

<td>6</td>
</tr>
<tr>
<td>Fine Arts (must be from 2 different departments: one history-centered course and one performance-centered course preferred)</td>
<td>6</td>
</tr>
<tr>
<td>†General Electives (any area but nursing)</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>62-67</td>
</tr>
</tbody>
</table>

*Fulfills the Quantitative Decision Making Competency
†Only 3 credits may be in physical education or therapeutic recreation. No more than 3 credits of pass/fail in general elective credits will be accepted.

Pre-nursing candidates taking prerequisite courses at the University of Southern Maine campus must meet Core curriculum requirements of that campus. Please refer to Core curriculum section of this catalog.

### Upper-Division Nursing Major

The upper-division nursing major (junior and senior years) is offered by the University of Southern Maine School of Nursing and consists of clinical nursing courses, courses supportive of nursing content, and elective courses. Clinical nursing courses are organized in a manner that facilitates the integration of nursing and other disciplines. These courses focus on the use of the nursing process to promote, maintain, and restore the health of clients. Students have experiences which involve assessment, planning, implementation, and evaluation of care for individuals of all ages, families, groups of clients, and communities on all spectra of the health continuum. Inpatient and outpatient hospital settings, community health agencies, community experiences, nursing homes, schools, and industries are used for clinical experience.

Nursing majors are required to have the Medical History and Physical Examination Form completed and on file at the University of Southern Maine Student Health Services before enrolling in clinical nursing courses.

Nursing majors must purchase uniforms before entry into the junior year. Information regarding uniforms will be forwarded to students after notification of acceptance. In addition, a $15.00 fee per semester (junior
and senior years) is required as a clinical fee. Cost for books is approximately $150.00 per semester. Clinical learning experiences take place in a variety of settings and geographic locations. It is the student's responsibility to provide his/her own transportation for junior and senior clinical experiences. Professional liability insurance and health insurance are strongly recommended for students in the School of Nursing. Cardiopulmonary resuscitation (CPR) is required prior to entry into clinical experiences.

**Note:** Six credits of general elective credit and three credits of nursing elective credit are required during the upper-division for graduation with a major in nursing. No more than 3 credits of pass/fail in general elective credit will be accepted.

For further information regarding the challenge process, credit, times, and fees, contact the University of Southern Maine School of Nursing.
Challenge Sequence

Course  
1. NFS 352  
   Human Nutrition  
   (Prerequisite course challenged prior to S.O.N. admission)
2. Support Courses:
   A. BIO 345  
      Pathophysiology
   B. NUR 302  
      Pharmacology
   C. NUR 303  
      Patterns of Emotional Disorders
3. Clinical Nursing Courses:
   A. NUR 300  
      Nursing Process I
   B. NUR 305  
      Nursing Process II
   C. NUR 400  
      Nursing Process III

Credit Process  
1. NFS 352  
   Credit Process  
   Time
   3 examination  
   Fall semester before Admission into University of Southern Maine School of Nursing
2. Support Courses:
   A. BIO 345  
      Pathophysiology  
      Spring semester
   B. NUR 302  
      Pharmacology  
      Spring semester
   C. NUR 303  
      Patterns of Emotional Disorders  
      Spring semester
3. Clinical Nursing Courses:
   A. NUR 300  
      Nursing Process I  
      First Summer Session
   B. NUR 305  
      Nursing Process II  
      July and/or August
   C. NUR 400  
      Nursing Process III  
      July and/or August

   9 student must take and successfully complete this course
   8 student sequentially challenges these two courses via paper-pencil examinations, clinical performance evaluation & other required written work

   After the above process has been successfully completed the students are required to take the remaining clinical nursing, support and elective courses required for graduation.

Academic Policies—Upper-Division Nursing Major

Retention/Progression: It is expected that students remain with their class. To do so, the student must maintain class standing with a cumulative grade point average of 2.00. The clinical courses in the nursing major are sequential and must be passed with a minimum grade of C before progressing to the next level. All support courses (Pathophysiology, Patterns of Emotional Disorders, Pharmacology, Health-Related Research, Community Health), general electives and nursing electives taken at the upper-division must be passed with a minimum grade of C or above. A student who is unable to maintain class standing with a cumulative grade point average of 2.00 will be withdrawn from the School of Nursing and either suspended from the University in accordance with University policies or required to change his or her major to a different program.

A student who receives a D grade in a clinical nursing course or a D/F grade in a support course but is able to maintain a cumulative grade point average of 2.00 will be allowed to repeat the course one time when that course is offered again. A student who receives a D grade in a clinical nursing course or a D/F grade in a support course and is unable to maintain a cumulative grade point average of 2.00 will be withdrawn from the School of Nursing and either suspended from the University in accordance with University policies or required to change his/her major to a different program.

A student who receives an F grade in a clinical nursing course; or who receives an F grade in more than one support course; or whose cumulative grade point average falls below 2.00 will be withdrawn from the School of Nursing.

Grading System:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
<td>90-100</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
<td>86-89</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>80-85</td>
</tr>
</tbody>
</table>

213
Incomplete Grades: A temporary grade may be given by the faculty when a student, because of extraordinary circumstances, has failed to complete course requirements in a nursing course. The clinical courses in the nursing major are sequential; therefore, the incomplete grade in a clinical nursing course must be replaced by a letter grade before progressing to the next level. Failure to progress sequentially in the program will result in withdrawal from the School of Nursing and either suspension from the University in accordance with University policies or a requirement to change the major to a different program.

Leave of Absence: A leave of absence may be granted to a student who is experiencing a health or other personal problem. The student must request a leave of absence. Such a leave may also be recommended by the faculty. If granted, the leave of absence will be for a period of no longer than one year. To request a leave of absence, the student must submit a letter to the Dean who will decide on the student's request. To return, the student must submit to the Dean a written request for reinstatement. If the request for reinstatement is granted, the Academic Standing Committee determines the reinstatement status within the nursing program. If the student does not initiate a request for reinstatement within one year, the student will be automatically withdrawn from the School of Nursing and either suspended from the University in accordance with University policy or required to change his or her major to a different program.

Withdrawal: Withdrawal from a clinical nursing course interrupts progression in the nursing program. Reinstatement into the program need be initiated by the student within one academic year and reviewed by the Academic Standing Committee. The Academic Standing Committee determines the reinstatement status within the program. If the student does not initiate a request for reinstatement within one academic year, the student will be automatically withdrawn from the School of Nursing. If the student withdraws or is withdrawn from the School of Nursing, the student will either be suspended from the University in accordance with University policies or required to change his or her major to a different program.

Administrative Withdrawal: A student may be withdrawn from the School of Nursing for other than academic reasons.

Graduation Requirements: To be eligible for graduation with a bachelor of science degree with a major in nursing, the student must have successfully completed all requirements, and a minimum of 121-126 credit hours with a cumulative grade point average of at least 2.00.

Student Appeal Policy: A student who feels there is a just cause for an academic grievance regarding final course grades or discrimination may initiate an academic appeal. A copy of the policy and procedure is available in the Dean's office.

University of Southern Maine School of Nursing Baccalaureate Program at Extended Sites
The University of Southern Maine School of Nursing offers the upper-division nursing major at the University of Maine at Orono and the University of Maine at Fort Kent. The University of Southern Maine School of Nursing prerequisites, admission policies and procedures, academic policies and procedures, and degree requirements will apply to all nursing majors at University of Maine at Orono and University of Maine at Fort Kent extension sites. For further information, contact the University of Southern Maine School of Nursing Undergraduate Admission Committee.

Graduate Program in Nursing
The School of Nursing offers a master of science degree (M.S.) program.
in nursing. The aims of the School of Nursing's graduate program are to:

1. prepare professional nurses for roles of leadership in nursing practice, education and administration.
2. provide a foundation for doctoral study in nursing.

The program offers students a research component, an advanced practice clinical component focusing upon families in crisis and a choice of a functional role component in either education, administration or primary care. The following are integral elements of the master's degree program in nursing: advanced health assessment; communication, health promotion and leadership skills; organizational and system analysis skills with application to health care facilities and educational institutions; emphasis on social, political and economic factors influencing health and health care delivery; research and theory development in nursing; and an holistic, multidisciplinary approach to learning and practice. For further information, refer to the University of Southern Maine Graduate Catalog.

NUR 300 Nursing Process I
Introduces the student to basic cognitive, affective, and psychomotor skills fundamental to nursing practice. Utilization of nursing process is emphasized to assist individuals to promote and maintain optimal health. Concepts and selected theories provide a basis for understanding the factors which facilitate and/or inhibit the growth and development of human beings. Didactic classroom and experiential learning in the Learning Resource Lab provides the opportunity to practice and develop basic skills which will be applied in selected clinical settings. Prerequisites: junior level standing in the School of Nursing. Concurrent: BIO 345, NUR 303. Cr 9.

NUR 302 Pharmacology
Basic concepts in pharmacology including major drug categories, drug interactions, the use of the nursing process in the therapeutic administration of drugs, legal implications, and the physical and psychological effects of drugs on various age groups will be emphasized. Prerequisites: Human Anatomy and Physiology, BIO 345. Concurrent: NUR 305. Open to other than nursing students with permission of faculty. Cr 3.

NUR 303 Patterns of Emotional Disorders
Emotional disorders are examined in relation to various bio-psycho-social and cultural factors. Traditional and contemporary treatment models will be discussed. Prerequisites: Growth and Development, General Psychology. Concurrent: NUR 300. Open to other than nursing students with permission of faculty. Cr 3.

NUR 305 Nursing Process II
Utilizes the nursing process in promoting, maintaining, and restoring the health of individuals and families experiencing short-term alterations in health which do not significantly disrupt potential but do require nurs-
munity health. Emphasis is on population aggregates in the community as the unit of service. The epidemiological process is stressed in surveying current major health issues. Must be taken during the senior year. Open to other than nursing students with permission of the faculty. Cr 3.

**NUR 407 Leadership and Issues in Professional Nursing**

Theories of leadership, organizations, and planned change are presented. The student will analyze systems and methods of health care delivery and identify factors and strategies which inhibit or facilitate change. Professional and ethical issues, legislation, and emerging role in nursing will be analyzed. An experiential component is required and varies with the student's learning objectives and interests. Prerequisites: NUR 400. Concurrent: NUR 405, 401 or 406. Cr 5.

**Nursing Elective**

Study of a selected area in nursing. Open to other than nursing students with permission of faculty. Cr 3.

**NUR 495 Nursing Independent Study**

Individualized study in an area of nursing with the permission of the instructor. Cr 1-3.

**NFS 352 Human Nutrition**

A course designed to show how the given nutrients serve to meet the metabolic processes required for life. A physiologic and biochemical approach is used. Prerequisites: Anatomy and Physiology; General and Organic Chemistry; Biochemistry. For challenge information of NFS 352, contact the School of Nursing. Challenge arrangements must be made by October 1. Cr 3.

**Therapeutic Recreation Programs**

The School of Nursing offers two degree programs for students interested in pursuing careers in therapeutic recreation. The associate degree program in therapeutic recreation consists of 60 credit hours. Upon completion of the degree requirements, the student may seek employment as a therapeutic recreation assistant and is eligible for certification by the National Council for Therapeutic Recreation Certification.

The baccalaureate degree program in therapeutic recreation consists of 122.5 credit hours. Upon completion of the degree requirements, the student may seek employment as a therapeutic recreation specialist and is eligible for certification by the National Council for Therapeutic Recreation Certification.

In addition to the two degree programs, a wide selection of professional recreation and leisure courses, as well as activity classes, is available. Students are encouraged to pursue recreation and leisure course offerings as appropriate to their academic program.

**Associate Degree Program in Therapeutic Recreation**

The minimum number of credits required for the degree: 60.

The two-year program in therapeutic recreation consists of the following courses leading to the associate of science degree:

**A. General Foundation Courses**

Transfer from the Two-Year Degree Program in Therapeutic Recreation to the Four-Year Degree Program in Therapeutic Recreation

Students in the associate degree program in therapeutic recreation who have a 3.5 cumulative average or a 3.0 average in selected courses may transfer to the four-year therapeutic recreation program providing space is available. Students interested in this option should meet with their advisor and then apply in writing to the Baccalaureate Degree Program Coordinator for transfer.

Baccalaureate Degree Program in Therapeutic Recreation

The minimum number of credits required for the degree: 122.5.

In satisfying Core curriculum requirements, students are urged to take MUS 110 Fundamentals of Music, for the fine arts performance-centered arts section. PSY 101 Introduction to Psychology and SWE 101 Introduction to Human Services are recommended for fulfilling the social sciences requirement. BIO 105 and 106 Biological Principles are recommended for the natural sciences requirement.

The four-year program in therapeutic recreation consists of, in addition to the Core requirements, the following courses leading to the bachelor of science degree.

- THE 122 Contemporary Dance I

REC 100 Recreation and Leisure Activities  
Cycling; Horsemanship; Karate. Two-hour laboratory. 1 credit per activity.

101 Tennis; 102 Volleyball; 103 Wallyball; 105 Racquetball; 106 Lifeline-Walk/Jog; 107 Lifeline-Aerobic Dance; 108 Lifeline-Aquatics; 109 Lifeline-Weight Training. 1 credit per activity. These courses provide the
student with the opportunity to learn and participate in one of the above activities. With reference to the Lifeline fitness activity courses, a student must attend a minimum of 25 class sessions out of a ten-week session.

REC 110 Introduction to Recreation and Leisure Services
Concepts of leisure and recreation and play are covered from historical to contemporary societies. Leisure awareness and all the intricacies of the leisure/recreation experience and how these experiences relate to concepts of time and work are included. Cr 3.

REC 113 Pre-Professional Field Experience
This course will provide students with the opportunity to observe, analyze, and evaluate therapeutic recreation programs in various settings. Students will visit the Center for the Blind, the Baxter School for the Deaf, the Cerebral Palsy Center, two nursing homes, Maine Medical Center's Department of Rehabilitation, and the Woodford's West Educational Center. Written reports on each one of these visitations will be required. In addition, students will be expected to read four articles relating to therapeutic recreation and write summary reports on each of the articles read. Prerequisite: REC 110. Cr 2.

REC 120 Introduction to Therapeutic Recreation and Disabilities
Concentrated study of recreation service to the disabled. Inquiry into the elements of therapeutic recreation and a clinical study of selected disabilities is included. Cr 3.

REC 130 Introduction to Therapeutic Recreation Services
Examination of the development of therapeutic recreation in treatment and community settings. Concentrated study of the elements of therapeutic recreation service stressing rehabilitation, leisure education, and diversional recreation. Examination of interaction problems between special population members and members of the nondisabled public. (Four-year majors only). Cr 3.

REC 211 Programming Leadership in Recreation
This course provides the student with the principles of program planning. In particular, the course addresses the process of identifying the problems that exist in recreation, setting goals and objectives, selecting and implementing the program design, and developing an evaluation procedure. In addition, the student learns many of the detailed technical skills that are essential to achieve positive results in programming. Prerequisite: REC 110. Cr 3.

REC 215 Social Recreation
Techniques of leadership, participation, planning for recreation in social settings for all ages—parties, programs, special events. Repertoire—mixers, dances, games, songs, and skits. Creativity stressed. Cr 3.

REC 216 Advanced First Aid and Emergency Care
This course will cover the topics prescribed by the American Red Cross in their advanced first aid course, including respiratory emergencies, artificial respiration, wounds, poisoning, water accidents, drugs, burns, emergency childbirth, emergency rescue and transfer, and other topics. Successful completion of the course requirements will lead to advanced Red Cross first aid certification. Cr 3.

REC 217 Small Boat Handling and Seamanship
The objective of this course is to inform the student on all phases of boating. Information of purchasing, annual and continual maintenance, equipment, safety, rules, piloting, and navigation. All of this should insure the student's full enjoyment of this popular recreational pursuit. Two hours lecture. Cr 2.

REC 219 Personal Fitness
This course is intended to help the student understand the basics of health/physical fitness and the importance of it in relation to total lifestyle. In addition to lecture/discussion, all students will go through a fitness evaluation and be expected to attend exercise lab three times per week. Offered both semesters, 90-minute lecture, three hours lab. Cr 3.

REC 221 Development and Utilization of Therapeutic Resources
This course is designed to provide basic instruction in audiovisual and media production techniques for people working with the handicapped and in homes for the elderly. It will include the basic operation of audiovisual equipment such as 16mm projectors, slide projectors, and tape recorders. Hands-on preparation of visual displays, bulletin boards, schedule boards, lettering techniques, duplication and mimeo techniques. The course will focus on locally available resources for program planning for the handicapped. Prerequisite for associate degree candidates: REC 120. Cr 3.

REC 222 Recreation for Special Populations
An overview of recreation activity classifications and curricula. Examination of activities for special populations including movement and dance, music, drama, arts and crafts, and adapted sports and games. Cr 3.

REC 223 Dance in Recreation/Leisure
Students will be given an opportunity to learn how to plan, organize, and administer
various types of dance and movement programs as they pertain to both regular and special populations. Cr 3.

REC 226 Leadership in Recreation/Leisure Activities
Students will learn a variety of recreation activities through participation. Classroom sessions cover the rules and techniques of the sports as well as efficiency of movement. Cr 3.

REC 230 Methods and Materials in Therapeutic Recreation
Philosophy, motivational techniques, utilization of equipment, methods of instruction, and organizing materials and groups relating to special populations. Prerequisite for associate degree candidates: REC 120. Cr 3.

REC 231 Arts and Crafts for Special Populations
This course will explore and assist students in learning how to make various crafts in a laboratory setting. Examples of crafts that students will be taught to make are hooked rugs, macrame, and other appropriate projects. Prerequisite for associate degree candidates: REC 120. Cr 3.

REC 232 Methods in Therapeutic Recreation Program Design
Emphasis on therapeutic processes and the development of individualized rehabilitation programs utilizing recreational activities. Assessment and evaluation methods, goal-setting strategies, activity analysis, and task analysis are examined as well as the contents of selected activity programs. (Four-year majors only). Prerequisite: REC 130. Cr 3.

REC 233 Environmental Recreation
Overview of basic environmental and outdoor education concepts and teaching strategies as they apply to resource-based recreation. Examination of selected resource-based recreation activities for general and special population members. Participation in outdoor learning experiences is required. Prerequisite for associate degree candidates: REC 120. Cr 3.

REC 235 Urban Recreation
A course designed for those interested in exploring contemporary urban life in an experimental manner. Students will participate in a variety of field investigations, lectures, and discussions which address the problem of orienting oneself to new urban environments, and will explore the values held by each student that might affect their ability to meet the leisure-time needs of urban residents. Cr 3.

REC 241 Leadership and Supervision in Recreation
This course provides students with a basic knowledge of the theories, supervisory skills, techniques, and specific communication skills for effective leadership and supervision in recreation. Prerequisite: REC 110. Cr 3.

REC 250 Adapted Aquatics
This course is designed for therapeutic recreation majors who are interested in organizing swimming programs for the handicapped and for experienced swimming instructors desiring to update their background in this field. It will offer all the necessary skills and techniques for teaching handicapped people how to swim and to discover the joys of participating in water activities. Cr 3.

REC 270 Perspectives on Aging and Human Kinetics
Study of prevalent aging theories and the physical, psycho-social, and medical changes associated with the aging process with implications for recreation program planning. Examination of community-based and institutional recreation services and programs for older adults. Cr 3.

REC 277 Weight Training: An Approach to Strength, Health, and Fitness
Designed for both men and women, this course will examine various methods and routines of weight training for the development of muscular strength, endurance, cardiovascular benefits, and weight control. The course will consist of both theory and practical application. Cr 3.

REC 290 Organization and Administration of Recreation
This course acquaints students with the need for, and nature of, recreational programs, with special consideration given to skills and techniques necessary to organize and administer recreation programs. Prerequisite: REC 110. Cr 3.

REC 294 Pre-internship
In this course students will develop objectives for Internship (REC 295) and complete all business necessary to secure an Internship placement. This must be taken immediately prior to Internship. Cr 1.

REC 295 Internship
Preprofessional assignment in appropriate recreation settings (e.g., nursing homes for the aged, institutions, agencies, halfway houses, hospitals, parks, camps, playgrounds, schools for the handicapped, penal
institutions, and rehabilitation centers). Faculty supervision and guidelines provided. Prerequisite: REC 113, 294, and 30 credit hours. Cr 9.

REC 314 Leisure Counseling Methods and Techniques
The intent of this course is for students to study and learn how to help people plan for and find enjoyment in leisure. Theories and techniques of counseling will be included. Students will also study problems which individuals and groups encounter in their search for recreation and leisure experiences which have intrinsic value and give meaning to their lives. Prerequisite: REC 110 or permission of the instructor. Cr 3.

REC 343 Perceptual-Motor Learning
An introduction to motor development and motor learning including psychological theories and implications for skill instruction and research. Cr 3.

REC 357 Parks and Recreation Facilities and Design
An introduction to the general principles of modern design and maintenance of recreation and park facilities at the federal, state, municipal, and commercial levels. Resource people, field trips, and films are an integral part of this course as well as a written project. Cr 3.

REC 370 Therapeutic Recreation and Mental Health
A psycho-social analysis of the determinants and sequences of leisure behavior as related to mental health. This course introduces the student to the broad perspectives of leisure in relation to mental health, then focuses upon specific uses of recreation as a behavioral change agent for people with mental health problems. Prerequisites: REC 130, REC 232. Cr 3.

REC 380 Therapeutic Recreation and Physical Disabilities
The psycho-social aspects of physical disabilities with specific reference to planning, implementing, and evaluating leisure activities. Various approaches to human growth and development, and to ways in which experiential exercises will facilitate the learning process. Prerequisites: REC 130, REC 232. Cr 3.

REC 390 Therapeutic Recreation and Developmental Disabilities
An analysis of the motor and psycho-social behavioral dimensions related to developmental disabilities. The specific and direct uses of recreation as a rehabilitation agent will be examined. Classroom and practical exercises will provide experience in supervision and programming techniques. Prerequisites: REC 130, REC 232. Cr 3.

REC 398 Independent Study in Recreation Leisure
This course is intended to provide students with an opportunity to pursue a project independently, to chart a course and explore an area of interest bearing upon it based on previous course experiences. A course outline must be prepared by the student and a final written paper is required. Prerequisite: permission of the instructor. Cr 3.

REC 399 Management and Supervision in Therapeutic Recreation
Examination of management roles in therapeutic recreation settings stressing supervisory functions with an emphasis on the leadership and training of professional and non-professional personnel. Class discussions and projects will relate directly to the students' internship experiences. Prerequisites: REC 290, REC 494, REC 495. Cr 3.

REC 490 Senior Seminar in Therapeutic Recreation
Small-group research and discussion of selected health and rehabilitation related issues which can affect the delivery of therapeutic recreation services in community and treatment settings. Students will be required to view their discipline of study through the examination of the research and literature of other disciplines. Prerequisites: REC 494, REC 495. Cr 3.

REC 494 Pre-internship
In this course students will develop objectives for Internship (REC 495) and complete all business necessary to secure an Internship placement. This must be taken immediately prior to Internship. Cr 1.

REC 495 Internship
This course is to be taken in the senior year. Students are required to work a minimum of 32 to 40 hours a week at a camp, recreation department, school, agency, hospital, institution, or nursing home. Students are expected to select three different experiences, approximately five weeks at each, when possible, and must keep a daily log of their experiences to be passed in to the instructor at the end of the semester. A University supervisor will visit and evaluate each student at least three times during the internship. Prerequisite: REC 494. Cr 9.
Division of Basic Studies

Director: George P. Connick
Director, Learning Assistance Systems: Robert Lemelin; Acting Coordinator, Off-Campus Counseling Services: Susan Silvernail; Program Developer, Instructional Television: Caroline Hendry; Programming Coordinator for Cable Television: Barbara Eberhardt

The Division of Basic Studies, an academic unit of the University established in 1973, has responsibility for offering courses and administering associate degree programs at a number of off-campus locations in Maine as well as delivering courses via television and newspaper. The Division sponsors or co-sponsors off-campus centers in Bath, Saco, Sanford, and downtown Portland (Intown Center). Each of these centers offers comprehensive academic counseling services to assist students who wish to take courses or to pursue associate degree programs. Also available are selected courses that meet the needs of baccalaureate students.

Instructional Television (ITV)

Beginning in September 1984, credit courses will be offered for the first time on the University of Southern Maine’s new Instructional Television (ITV) system. Initially, courses will originate “live” on color television from a broadcast classroom on the Gorham campus. The “live” classes will be transmitted simultaneously to the Portland campus and the Sanford Center of USM. Students in Portland and Sanford will be able to hear and see the class in session in the Gorham classroom and, using a specially developed microphone system, they will be able to talk to the instructor during class.

Between 1984 and 1986, plans call for the ITV system to be expanded to sites in Saco, Intown Portland, and Bath, and to be connected to local cable systems.

Information about the ITV system may be obtained by contacting George Connick at the Division of Basic Studies.

Programs of Study

Associate Degree Offerings

Through the Division of Basic Studies, students may pursue a variety of associate degree programs at locations that are geographically convenient. Specific degree offerings include:

- Selected Studies (A.S.)
- Liberal Arts (A.A.)
- Business Administration (A.S.) (with options in accounting, business, computer programming, management, marketing, and real estate)
- Human Services (A.S.) (with options in gerontology, mental health, and developmental disabilities)

General Admission Requirements

Students desiring to pursue any associate degree program through the Division of Basic Studies are required to meet the admissions requirements as outlined under the specific degree program. Students questioning their qualifications should contact an academic counselor at the off-campus center of their choice to discuss possible alternatives.

Changing to a Baccalaureate Degree Program

Students desiring to change to one of the University’s baccalaureate degree programs are advised to consult with an academic counselor regarding the process and the applicability of coursework toward their intended program.

Developmental Studies

The Developmental Studies Program provides students with courses designed to help them achieve proficiency in writing (ENG 009) and in mathematics (MAT 009, MAT 010, MAT 011). Prior to enrollment in any of these courses, students will be administered the Writing Placement Examination and the Mathematics Placement Examination.
Off-Campus Locations

Bath Center
The University of Maine at Augusta and the University of Southern Maine (through the Division of Basic Studies) coordinate course offerings at the Bath Center. A full range of counseling and student services is provided. Classes are held in local facilities in the towns of Bath, Wiscasset, and Topsham both during the day and evening. USM degree program offerings include associate degree programs in selected studies and business (with options in accounting, management, marketing, business computer programming and real estate). Those desiring information about counseling services, financial aid, courses, and degree programs should contact: Bath Center; Rt. 1, Woolwich Commons; Woolwich, Maine 04530; (207) 442-7070.

Intown Center
Two programs, Selected Studies and Human Services (with options in gerontology, developmental disabilities, and mental health), are offered at the Intown Center located at 68 High Street, in downtown Portland. Intown Center offerings meet the needs of persons who might otherwise find the doors to higher education closed to them. Support services are provided and a program in writing and mathematics has been carefully worked out to meet the needs of students who wish to strengthen their academic skills. For more information about the Intown Center and programs contact: Intown Center; 68 High Street; Portland, Maine 04101; (207) 780-4115.

Saco Center
Located at Thornton Academy (Fairfield Street), the Saco Center offers a variety of associate degree offerings as well as a range of courses that meet the needs of baccalaureate students. Associate degree programs currently available at the Saco Center are liberal arts, selected studies, business (with options in accounting, business computer programming, management, marketing, and real estate) and human services (with options in gerontology, developmental disabilities, and mental health). Courses are offered in the day and evening for the convenience of students who work or wish to attend college part-time. All courses are held on site at Thornton Academy with library resources available at nearby Dyer Library. In addition, a full range of student services is provided. For more information about programs, financial aid, or other academic counseling services contact: Saco Center; Fairfield Street; Saco, Maine 04072; (207) 282-4111.

Sanford Center
The University, through the Sanford Center, offers degree program opportunities in liberal arts, selected studies, and business (with options in accounting, business computer programming, marketing, management, and real estate). Additionally, selected courses which satisfy requirements of most two- or four-year programs are available. Computer science, chemistry, biology, math, and English are examples of curriculum diversity. Courses meet at a variety of times to accommodate part-time or full-time students. Persons interested in more information (academic, admissions, financial aid, registration, career counseling, veterans advising, etc.) should contact: Sanford Center; 195 Main Street, Sanford, Maine 04073; (207) 324-8012.

Other Locations
The Division of Basic Studies also offers courses at a variety of other locations. For information, contact the Division office at 780-4470.

Selected Studies
Selected Studies is a program which leads to an associate degree. Students may design their own programs, thereby ensuring maximum flexibility in course scheduling. This program is often used by students who
desire other associate or baccalaureate degree programs but who do not meet the requirements for admission to that program. In addition, to assist students who may later wish to transfer to a baccalaureate program, the selected studies program requirements are closely akin to the University Core curriculum requirements. As a part of the selected studies curriculum, students enroll in courses designed to develop basic educational competence in writing and mathematics and acquire academic skills to help ensure their future success in college.

**Admission Requirements**

1. New Students: open to persons holding a high school diploma or equivalent. Entering students are required to take the University Placement Examinations prior to initial registration.
2. Transfer Candidates: Transfer candidates are eligible to apply for admission. Upon admission, students are required to take the University Placement Examinations prior to initial registration.

The minimum number of credits required for the degree: 60.

**Required Courses**

*ENG 100 College Writing*
*MAT 010 Beginning Algebra or above*
*FRS 100 Freshman Seminar*

**Humanities Elective**

**Fine Arts Elective**

**Social Science Elective**

**Natural Science Elective**

**Electives**

*Prior to enrollment in Writing and Mathematics, students are administered the Writing Placement Examination and the Mathematics Placement Examination. Students are placed in the course that most closely coincides with their skill level.

**Academic Progress**

In addition to the policies outlined in the USM catalog regarding minimum grade and academic suspension, by the end of the second semester of enrollment after matriculation, to continue in the Selected Studies Program, students must have successfully completed or otherwise satisfied all of the following: ENG 009, MAT 009, and FRS 100.

**Change from Selected Studies to Another Major/School/College**

To be eligible to change from the Selected Studies Program to another associate degree program of the University, a student must meet the following requirements:

1. A grade point average of at least 2.00
2. Completion of the English Composition requirement of the Core Curriculum (see page 35 for ways of meeting this requirement).
3. Completion of at least nine semester hours of graded coursework, not including courses taken on a pass/fail basis.
4. Completion of any other requirements called for by the program to which the student wishes to change.

To be eligible to change from the Selected Studies Program to a baccalaureate degree program in the College of Arts and Sciences, College of Education, to the pre-nursing program in the School of Nursing, or to the associate degree program in the School of Business, Economics and Management, a student must meet the following requirements:

1. A grade point average of at least 2.00
2. Completion of the English Composition requirement of the Core Curriculum (see page 35 for ways of meeting this requirement).
3. Completion of at least 15 semester hours of graded coursework, not including courses taken on a pass/fail basis.
4. Completion of at least three courses in different areas of the Methods of Inquiry/Ways of Knowing section of the Core curriculum or courses required by the program to which the student wishes to change.
5. Completion of any other requirements called for by the program to
which the student wishes to change.

Students wishing to change to associate or baccalaureate level programs in other schools or colleges of the University are urged to see the dean of that school or college to discuss the intended transfer.

**Liberal Arts**

This two-year program is offered in conjunction with the College of Arts and Sciences. Graduates may change to a baccalaureate degree program with a maximum transferability of credits.

**Admission Requirements:** Admission is based upon the candidate’s academic background and is consistent with admission requirements for the University’s baccalaureate programs in the College of Arts and Sciences. Details of this program may be found on p. 50 of this catalog.

**Business Administration**

The associate program in business administration is offered off-campus in conjunction with the School of Business, Economics and Management and is designed to serve two purposes: to prepare students who wish to complete their education in two years for employment in junior management positions in several different careers; and to provide a sound foundation for those students who perform well and who wish to transfer to a baccalaureate program in business administration at this University or another institution.

While the program emphasizes business, it contains liberal arts courses including composition, fine arts, social sciences, humanities, and mathematics. Options within the associate program offered off-campus include accounting, business computer programming, management, marketing, and real estate.

**Admission Requirements:** Any high school graduate may apply for admission to the two-year associate degree program. A college preparatory background is not necessary. On their application, students should specify the associate in business administration program. Candidates must also take the Scholastic Aptitude Test. Details of this program may be found on p. 193.

**Human Services (with options in Developmental Disabilities, Mental Health, and Gerontology)**

The human services program (offered through the University and extended from the University of Maine at Orono) is designed to provide liberal arts education and professional courses, including supervised practica in the area of the student's program option. Graduates will be prepared for entry and middle-level positions within the human service delivery system. The human services programs are approved by the National Council for Standards in Human Service Education.

The curricula below are recommended for students interested in full-time study. However, the program is designed to accommodate all students, both full- and part-time. Students are encouraged to consult with an academic counselor.

**Admissions Requirements:** Candidates for admission must demonstrate the ability to do college-level academic work and be committed to a career working in the human service profession.

**Developmental Disabilities Curriculum**

The developmental disabilities option is designed to prepare individuals to work primarily in direct service under professional supervision within an area of specialization, such as: mental retardation, cerebral palsy, epilepsy, autism, or other handicapping conditions.

The minimum number of credits required for the degree: 62

Mental Health Curriculum
The mental health program is designed to meet the needs of the middle-level workers in the field. It provides the graduate with skills to work, under professional supervision, in a variety of mental health settings—mental health institutes, comprehensive mental health centers, and public and private human service community agencies.

The minimum number of credits required for the degree: 62.

HUS 045 Resource Awareness and Utilization

Gerontology Curriculum
This program is designed to prepare the graduate for a number of existing and new entry-level jobs in community-based and institutional programs for the elderly.

The minimum number of credits required for the degree: 63.

Semester I
HUS 023 Human Service Practicum
Elective (Psychology or Sociology)
SOC 200 Social Issues
PSY 333 Psychopathology
DBS 016 Biosurvival
This course presents material to help the individual develop basic skills and knowledge for a greater enjoyment of the out-of-doors and, if necessary, a better chance of survival. The course consists of lectures, demonstrations, student participation and individual projects. Besides written exams, students will be expected to participate in a cooking demonstration involving common wild edibles. A 48-hour survival experience will be offered as an optional part of the work. Examples of topics covered are: alternatives in making fire, shelter and clothing, traps and tracks, survival tools and first aid. There is a strong emphasis on the proper identification and use of wild plants for food. Cr 3.

DBS 017 Marine Biology of the Southern Coast of Maine
This course, a basic though intensive introduction to the animals and plants commonly found along the Maine coast, will emphasize field collections and laboratory identification. Trips to rocky coast, mud flat, sand beach and tidal marsh habitats are planned. This will permit students to collect, describe, identify and compare the organisms found in several distinct marine habitats. In this way, students will develop an understanding of how different environmental characteristics select the different animal and plant communities found. Classroom discussions, audio-visual presentations and lab exercises will supplement the field work where appropriate. Car-pooling for field trips will be arranged in class. Cr 3.

ENG 009 Developmental English
This course is designed to help students who need to develop writing proficiency to enter ENG 100, College Writing. This course is taken on a pass/fail basis. All students are given a diagnostic test prior to enrollment to determine their basic skills. Credit earned in ENG 009 does not apply or accumulate for any degree program at the University of Southern Maine. Students may register for this course more than once. Cr 3.

ENG 019 Written Business Communication
Training in the writing of effective business reports, letters, and related material. All students are given a diagnostic test at the initial class session to determine their basic skills. Cr 3.

FRS 100 Freshman Seminar
An orientation to the University emphasizing its purpose, programs, and services. Basic academic skills, expectations, career planning and other topics will be covered. Pass/fail; this course may be counted for elective credit only. Enrollment open only to freshmen with less than 25 credits. Cr 3.
HUS 010 Group Processes
Directed to an understanding of group functioning and leadership, this course considers factors involved in group cohesions and group conflict. Attention is given to communication systems, emotional styles, and role functions in groups. Techniques of role playing, psychodrama, and socio-drama are considered. During the laboratory experience, the small group studies itself and puts communication and sensitivity skills into practice. Prerequisite: PSY 101. Cr 3.

HUS 012 Interviewing and Counseling
An examination of and practice with the techniques of psychological interviewing for the purposes of gathering data and/or modifying human behavior. Current theories and techniques of counseling and psychotherapy will be studied and experience with interviewing and counseling techniques will be gained under professional supervision. Cr 3.

HUS 013 Introduction to Gerontology
An introduction to the theory and practice of gerontology. This course will (1) trace the historical, legal, and political aspects of services to the elderly; (2) consider the economic, physiological, psychological adjustments of older persons, as well as the transportation, communication, learning, and social aspects; (3) give consideration to the unique cultural, social, and communication needs of ethnic minorities, and (4) provide understanding of the role and function of a gerontology specialist. Cr 3.

HUS 014 Behavioral Research Methodology
An introduction to the nature, methods, principles, and techniques of behavioral research. Emphasis is placed upon understanding the journal reports of research and the potential application of research to human services. Cr 3.

HUS 015 Physiology and Pathology of Elderly
This course is designed to familiarize the student with the developmental, physiological process of aging and commonly occurring pathophysiology of the elderly. The signs and symptoms, diagnosis, treatment, and prognosis of geriatric illnesses are presented. Emergency treatment procedures and referral mechanisms are discussed. Cr 3.

HUS 020 Practicum in Human Service
This course offers experiential learning in three of the functional human service areas (e.g. mental health, mental retardation, gerontology, chemical addiction, child development, etc.). The student begins to practice skills of objective observing, reporting and recording, interpersonal relationships, interviewing, and other helping relationship skills under professional supervision. In a small weekly group seminar with the course instructor, each student should acquire an in-depth understanding of the human service delivery system, and explore topics such as confidentiality, ethics, professionalism, values, and human rights and dignity. Each student will spend five weeks within three different agencies. Prerequisites: open only to students who are HUS degree candidates; HUS 011 and permission of the instructor. Lec. 2, 8 hours field experience per week. Cr 4.

HUS 021 Practicum in Human Service
This second practicum course is designed to offer students experiential learning within the human service options of their choice. This course begins a specialization within a functional area (e.g., gerontology, chemical addiction counseling, mental health). Students are exposed to the delivery system of their human service options with consideration to four elements of the system: prevention, non-residential care, residential care, and after care services. Within this context students continue to refine helping relationship skills and acquire functional specialization. A weekly conference will provide interaction sessions in which students will share experiences, and demonstrate acquisition of helping skills. Students will be assigned to two human service agencies within their service option. Prerequisites: open only to students who are HUS degree candidates, HUS 020 and permission of the instructor. Lec. 2, 8 hours field experience per week. Cr 4.

HUS 023 Practicum in Human Service
This is the third sequential experiential learning practicum course. Students spend the entire semester in a human service agency related to their chosen functional area. Students gain a deeper understanding of the delivery system within their specialty area and an increased sophistication in helping relationship skills. A weekly seminar provides interaction sessions in which the student will share experiences and demonstrate the acquisition of the helping and change-agent skills. Prerequisites: open only to students who are HUS degree candidates; HUS 021 and permission of the instructor. Lec. 2, 16 hours field experience. Cr 6.

HUS 025 Activity/Recreational Leadership
This course introduces the student to the procedures, practices, and aids for organizing and conducting programs to maintain the physical, social, and emotional functioning of the elderly. A variety of existing programs sponsored by a range of public and private agencies, organizations, and community groups will be examined in order to under-
stand the underlying goals that guide those in position to direct and influence services provided for the elderly. Prerequisite: HUS 013 or permission of the instructor. Cr 3.

HUS 030 Senior Seminar
Students select from a series to be arranged by the coordinator each spring semester. Topics may include such specialties as behavioral engineering, community service methods, mental health methods, activity therapies, corrections. Professionals with specialties in topic area will teach the seminars. Reading, discussions, and practical experience integrated in the seminar. Prerequisite: open to program majors, or with permission. Cr 3.

HUS 041 Nature and Needs of the Developmentally Disabled
An overview of developmental disabilities. The physiological, psychological, educational, and familiar characteristics of developmental disabilities. Mental retardation, cerebral palsy, epilepsy, autism, and other handicapping conditions closely related to mental retardation. The historical development of treatment for the developmentally disabled. Current definitions and concepts. The practicum site will be used to assist in the identification and knowledge of the developmentally disabled. Prerequisite: HUS 060 and/or permission of instructor. Cr 3.

HUS 043 Methods of Working with the Developmentally Disabled
Methods to improve physical, social, educational, and perceptual-motor skills of the developmentally disabled. Recreational and leisure time resources within the community. Social adjustment of the developmentally disabled. Basic tenets of personal and social guidance. Students expected to directly apply course content to their practicum setting. Prerequisite: HUS 041 and/or permission of instructor. Cr 3.

HUS 044 Behavior Modification Techniques
Concepts and techniques of behavior modification as it applies to the developmentally disabled. The practicum site supplemented by classroom experience. Identifying and recording behavior, outlining consequences, and identifying and implementing procedures to modify behavior. Students expected to develop modification program which could effectively be used at their practicum site. Cr 3.

HUS 045 Resource Awareness and Utilization
Community, regional, state, and federal resources discussed with the goal of establishing a better awareness of resource utilization. Interrelationships between public and private programs, development of program financing, and discussion of program models. Current provisions and programs relative to educational planning. Development of an in-depth awareness of sheltered workshop and boarding home programs. Guest lecturers from local and state agencies. Open discussion. Cr 3.

HUS 050 Introduction to Human Services
A non-theoretical course designed as an orientation to the national, state, and local human service delivery system. The human service specialty areas, the service models, and the human service profession will be presented. Interrelationships within all human service and health professions will be discussed in addition to professional ethics, confidentiality, and relevant professional terminology. Basic helping skills will be presented and practiced. This course is designed to afford the student more confidence entering the practicum situation and is a prerequisite to all practicum placements. Cr 3.

MAT 009 Developmental Mathematics
The Math Lab is a course designed for students who need to review math fundamentals. Instruction takes into consideration the individual differences people have in learning. This course is offered in a self-paced format with a great deal of individual assistance. All students are given a diagnostic test prior to enrollment to determine their basic skills. Credit earned in MAT 009 does not apply or accumulate for any degree program at the University of Southern Maine. Students may register for this course more than once. Cr 3.

MAT 010 Elementary Algebra
The first course of a two-course sequence designed for students who are deficient in high school algebra. Topics covered include number systems, functions, graphs, the solution of equations, and the solution of problems with a business orientation. No prerequisites. Cr 3.

MAT 011 Intermediate Algebra
A continuation of MAT 010. Prerequisite: MAT 010 or one year of high school algebra. Cr 3.

MAT 140 Pre-Calculus Mathematics
A brief review of elementary algebra followed by a study of the algebraic, exponential, logarithmic, and trigonometric functions. Prerequisites: two years of high school algebra and one year of geometry, and a passing grade on an algebra competency test which will be administered at the first class meeting. Cr 3.
Reserve Officers Training Corps

Professor: Lieutenant Colonel Gary S. Willison (U.S. Army)

Army ROTC Army ROTC offers male and female students of the University an opportunity to earn a commission in the United States Army while pursuing a bachelor’s degree. Students register for military science courses as part of their regular undergraduate curriculum. For information, contact the ROTC office at 780-5255 or visit the office at 51 College Avenue, Gorham campus.

Curriculum

The ROTC program consists of a basic course and an advanced course. Normally, the basic course is taken during the student’s freshman and sophomore years. However, other students may enroll in the basic course by receiving permission from the professor of military science. Students who have received previous military training (veterans, military academies, Junior ROTC, etc.) may be granted credit for the Basic Course or portions thereof as determined by the professor of military science. ROTC Basic Camp may be taken in lieu of the Basic Course as outlined in the course descriptions.

Students who complete or receive credit for the basic course may apply to the professor of military science for admission to the advanced course. If admitted, the student receives $100 per month during his/her junior and senior years. Students who complete the advanced course are appointed second lieutenants in the United States Army, and can be commissioned in the National Guard, the Army reserve, or the active Army.

Scholarships Army ROTC scholarships for 2 and 3 years are available on a competitive basis. The scholarships are awarded annually. They defray the cost of tuition, books, lab fees, and school supplies. You can receive more information on these scholarships by calling 780-5255 or by visiting the ROTC office at 51 College Avenue, Gorham campus.

The Basic Course

To complete the basic course, the student must complete the core curriculum or the student must complete ROTC Basic Camp (MIS 29). The core curriculum consists of MIS 111, 112, 221, and 222. The student may enter the basic course by taking any of the courses listed below, provided the course is listed in the schedule of classes for the semester concerned.

MTL 000 Leadership Laboratory
Leadership Lab is a requirement for all ROTC cadets. The purpose of Leadership Lab is to provide an environment wherein cadets can develop and improve their military leadership skills. Counseling and periodic evaluation of cadet performance are the primary methods used. (In case of class conflicts, an alternate Leadership Lab will be arranged to meet student requirements.) Cr 0.

MIS 111 Introduction to ROTC and the U.S. Army
The purpose and organization of the ROTC Program. The role of officers. The development of military customs, courtesies and traditions. An overview of the defense establishment is presented. The importance of the Reserve Components (U.S. Army Reserve and Army National Guard) is outlined; the future direction of the U.S. Army is discussed. Student participation in Leadership Laboratory is required. Cr 1.

MIS 112 National Security
Soviet and United States principles of war are presented. Technological advances are highlighted and their influence on warfare. The organization of the U.S. Army and the national defense structure are discussed. Factors and instruments of national power and the attainment of national objectives. Participation in Leadership Laboratory is required. Cr 1.

MIS 221 Map Reading and Squad Tactics
Reading and interpreting maps and aerial photographs is taught. Marginal information, map grid coordinates, scale and distance, directions, use of the compass,
intersection/resection, elevation and relief, GM angle, and map substitutes are a part of the map reading instruction. Squad organization, movement techniques, and actions are taught and practiced in a field environment. Student participation in Leadership Laboratory is required. Cr 2.

MIS 222/HTY 349 American Military History
Development of the United States military system from colonial times to present. Examination of the principles of war and how they impact on military organizations and tactics are discussed. Student participation in Leadership Laboratory is required. Cr 2.

MIS 229 ROTC Basic Camp
A six-week summer camp conducted at Fort Knox, Kentucky. The student receives pay, and travel costs are defrayed by the Army. The environment is rigorous, and is similar to Army Basic Training. The training includes the role and mission of the U.S. Army, map reading and land navigation, first aid, marksmanship, leadership, physical training, drill and parades, and tactics. Completion of MIS 29 satisfies all basic course requirements. Six different cycles offered during the summer. Basic course applicants are accepted during the spring semester. Students apply for enrollment to the professor of military science. Selection for attendance is based on qualifications and merit. Cr 6.

MIS 331 Leadership
Exposure to the branches of the Army. The development and conduct of military instruction is outlined. Exposure to the various leadership theories and to the leadership environment are discussed and experienced. Fundamentals of leadership, human behavior, communication, and contemporary human problems are reviewed and practiced. Student participation in Leadership Laboratory is required. Cr 3.

MIS 332 Advanced Tactics
Exposure to military equipment and military tactics at the squad, platoon, and company level. Advanced Camp prerequisites are completed. Student participation in Leadership Laboratory is required. Cr 2.

The Advanced Course
The courses listed below are required for completion of the advanced course. In addition, students are required to attend a six-week ROTC Advanced Camp at Fort Bragg, North Carolina between their junior and senior year. In exceptional cases, ROTC Advanced Camp may be deferred by the professor of military science until the student completes the senior year. Selected students may attend Ranger School in lieu of ROTC Advanced camp.

MIS 441 Military Management
Students are exposed to military law. An analysis of legal problems facing small unit leaders is conducted. The Code of Conduct, management theory, motivation theory, training, personnel, and logistics management practices are taught. Management by Objective (MBO) and Organizational Effectiveness (OE) theories are discussed. A framework of ethical actions are discussed and practiced. Student participation in Leadership Laboratory is required. Cr 3.

MIS 442 Operations Seminar
Students are exposed to larger unit operations at the brigade and battalion level. The sequence of command and staff actions and the problem-solving process are taught. The organization of the division, the brigade, and the battalion is outlined. Preparation of combat orders is taught and practiced. A discussion of current military problems in the leadership/management area is conducted. Student participation in Leadership Laboratory is required. Cr 3.

MIS 499 Independent Study
A concentrated program of research or study on a particular subject of the student’s selection. The topic will be chosen with the advice and under the guidance of a faculty member. Cr 1-6.

Special Courses
Special courses are available to individuals in the ROTC program on a competitive and voluntary basis. Those courses are: Airborne School, Ranger School, Air Assault School, the Northern Warfare Training School, and Jungle School. Information on these courses is available through the Army ROTC office. Cr 0.
Graduate Programs

Associate Provost: Stephen J. Reno, Office of Graduate Affairs
209 Deering Ave., Portland, 780-4386

The following graduate programs are available at the University of Southern Maine. The programs are described in the Graduate Catalog.

College of Arts and Sciences: Computer Science; College of Education; Adult Education, Counselor Education, Educational Administration; Exceptionality; Instructional Leadership, Reading, School of Business, Economics and Management; Business Administration; School of Nursing; Nursing; Inter-College Program: Public Policy and Management; and in cooperation with The University of Maine at Orono: Electrical Engineering.

University of Maine School of Law: Law (Juris Doctor)

School of Law

Dean: L. Kinvin Wroth
Associate Dean: Martin A. Rogoff
Professors: Cluchey, Delogu, Gregory, Loper, Potter, Rogoff, Ward, Wroth, Zarr; Associate Professors: Brett, Carson, Freehling, Friedman, Kandohan, Lang, Seibel; Lecturers: Morris, Priest, Remmel, Rieser, Wernick; Adjunct Professor: Petruccelli

The University of Maine School of Law is a small school that has long offered a high quality of legal education to a carefully selected student body. With a fine faculty, excellent library resources, and a nationally oriented curriculum strong in basic legal courses, the Law School takes pride in educating men and women who will become capable and motivated attorneys.

The academic program is rigorous and demanding. Thanks to the School’s size, however, its students have the benefit of small classes, frequent and informal contact with the faculty, and a friendly atmosphere. These factors do much to ease the strains attendant upon entry to an exacting profession.

The School averages 75-80 students per class, of whom approximately 40 percent are women; the number of students in the School is about 240, making it one of the smallest in the country. The student body is varied in age, professional and academic experience, and background.

The School’s faculty consists of 14 full-time and a number of part-time instructors. It is drawn from many specialties and represents a diversity of backgrounds and interests.

The School is fully accredited by the American Bar Association and is a member of the Association of American Law Schools.

Established at Portland in 1961, the Law School is the successor to the University of Maine College of Law which existed in Bangor from 1898 to 1920. It is an administrative unit of the University of Southern Maine, but has responsibilities to the statewide University system. The school is located in a modern building, fully accessible for handicapped students, that provides excellent facilities for classroom and seminar discussion, library research, moot court participation, clinical practice, legal publications, and student activities. The Law School shares the building with the University of Southern Maine’s Center for Research and Advanced Study and the University administration.
Summer Session

_Director:_ Joseph F. Hearns

During the summer the University offers over 250 credit and noncredit courses, and a number of institutes and programs. The Stonecoast Writers' Conference, an Elderhostel program, and a music camp for talented high school musicians are some of the special offerings. Over 8,000 people attend summer conferences held in University facilities, in addition to the 3,000 students who enroll in academic courses. Cultural events such as musicals, concert series, and poetry readings are also featured. Classes are held days and evenings in several schedule formats. The Gorham campus offers dormitory accommodations at reasonable rates.

For further information, contact the Summer Session Office, University of Southern Maine, 228 Deering Avenue, Portland, Me. 04103 or telephone 780-4076.

Center for Research and Advanced Study

_Director:_ Robert J. Goettel

The purpose of the Center for Research and Advanced Study is to contribute to the development of Maine's economic, social, and environmental well-being through applied research and advanced study. The Center serves and assists governments, industries, institutions and the people of Maine to solve policy, operational, organizational, and employee problems. The staff of the Center and associated faculty work in interdisciplinary teams to address issues related to economic development, the formation and management of business enterprises, health and human services, education, marine resources, and state and local governance. Since the Center’s inception in 1972, projects have been supported by numerous state and local agencies in Maine, other New England states, the federal government, private foundations, and the business community.

Staff of the Center come from a wide range of research and leadership roles in state, local, and federal governments, private business, not-for-profit organizations and institutions, research and development organizations, and university appointments. The academic fields in which Center staff have been trained include economics, sociology, psychology, political science, biomedicine, business administration, public administration, law, education, health, social work, communications, and counseling.

The Center for Research and Advanced Study is organized in three cooperating institutes.

Human Services Development Institute

_Director:_ Stephen P. Simonds

The Human Services Development Institute's (HSDI) research program focuses on policy, management, employee, and training issues in order to improve the effectiveness and efficiency of public and private human service systems. Health care; services for children, youth, aging and families; special needs of the handicapped; and alcoholism are among the areas targeted for research and technical assistance. Interdisciplinary teams are assembled to carry out activities supported typically
by state and federal grants and contracts. Special expertise in HSDI has developed in program evaluation, research methodologies, data collection and analysis, financial and cost analysis, literature searches, production and communication technologies.

Marine Law Institute

Director: Alison Rieser

The Marine Law Institute is committed to research and education in the field of coastal and ocean resource law and policy. Its research considers interjurisdictional problems in marine resource management, the use of scientific knowledge in marine law, and issues affecting the resources of the Gulf of Maine. The Institute is jointly sponsored by the University of Maine School of Law and the Center for Research and Advanced Study. It is a component of the Center for Marine Studies of the University of Maine at Orono.

New Enterprise Institute

Director: Jay C. Lacke

The New Enterprise Institute was formed in 1974 as a business development and research project in the Center for Research and Advanced Study. Its purpose is to help strengthen the Maine economy and improve the material well-being of Maine people by setting in motion events which will stimulate business and industrial enterprise in the state. Supported by both public and private sources, the New Enterprise Institute provides management counseling to entrepreneurs, business owners and executives; offers graduate courses in entrepreneurship and executive development through the School of Business, Economics and Management; organizes technical and marketing programs and seminars for trade and professional associations; and provides business, financial, and market information and assistance through the Enterprise Information Service and the Small Business Development Center.

In addition to the three institutes the Center provides research and development services in several program areas including economic studies and organized camping.

Division of Public Service

Director: William G. Mortensen
Administrative Associate: Ellen M. Corkery

The Division of Public Service is responsible for the development, coordination, and support of the University's noncredit programs. It offers a wide range of noncredit activities to meet the professional and personal needs of the residents of southern Maine. During 1983-1984, over 30,000 persons participated in conferences, seminars, workshops, short courses, symposia, briefings, and certificate programs sponsored by the Division.

CEU Award System The Division administers the Continuing Education Unit (CEU) Award System. One CEU is awarded for 10 hours of participation in an approved program of continuing education. Students completing professional courses receive CEU awards rather than semester hour credit on grade sheets and permanent records. The CEU is a nationally accepted unit of measurement applicable to noncredit continuing education. CEU courses are generally designed for a specific audience and are often used for professional development in a particular
industry or profession. The CEU permits the individual to participate in many kinds of programs while accumulating a uniform record available for future reference.

The following information indicates the variety and scope of the University's noncredit activities. Specific inquiries about these programs should be directed to the appropriate department. General inquiries should be directed to the Division of Public Service at 96 Falmouth Street, Portland, Maine 04103, 780-4092.

**Department of Continuing Education for Business and Industry**

*Director:* William G. Mortensen; *Program Coordinator:* Dana R. Darling

The Department of Continuing Education for Business and Industry (CEBI) assists southern Maine employers by offering a variety of seminars, courses, and programs to meet identified needs. Through its advisory boards, the department involves business and industry representatives in the planning, implementation, and evaluation of its offerings. Those individuals represent nearly all sectors of the regional economy as well as small, medium, and large firms.

CEBI's instructional staff consists of faculty and staff from USM and individuals from business and industry. The expertise represented by these extensive resources covers nearly every potential topic of interest to area organizations.

All offerings of the department are noncredit and carry CEUs when they meet the requirements of certificate programs.

**Certificate Program in Quality Control** This program is planned to benefit all personnel engaged in controlling quality and maintaining quality assurance, including working crew leaders, as well as supervisory personnel and managers. Courses will be of special benefit to manufacturing and product engineers, purchasing agents, production control personnel, material expediters, inspectors, and operators interested in improving their skills and contributing to the manufacture of quality products.

Courses are designed to be flexible and practical. Topics are selected to provide basic tools and techniques for setting up new quality assurance systems, or improving the effectiveness of already existing programs. The class size in all subjects is limited depending upon the type of course offered.

Representatives of business, industry, and nonprofit organizations desiring more information about the department's programs or services should contact Dana R. Darling, Department of Continuing Education for Business and Industry, University of Southern Maine, 96 Falmouth Street, Portland, Me. 04103; telephone 207-780-4092/93.

**Department of Conferences**

*Director:* Kevin P. Russell; *Conference Specialist:* Beth Gleason

The Department of Conferences provides planning and coordination to groups wishing to use the University's conference facilities and services. The Department occasionally provides workshops and seminars which bring together qualified individuals to share new information and ideas, upgrade professional skills, or to impart new techniques.

The Department's conference planning and management services are extended to professional and trade associations, government agencies,
private business and community groups and organizations. Programs can be conducted on either campus, or off-campus wherever an appropriate meetingsite can be arranged.

An experienced conference staff is available to plan, coordinate, and facilitate the delivery of programs of virtually any size or duration. By using the University’s conference services, the program initiator is free to concentrate fully on program content.

During the summer and, to a lesser extent, during the academic year, the University’s classrooms, auditoriums, recreational facilities, and dining services are available for use by conference groups. Residence halls are also available for housing during the period mid-May to end of August. All meetings are within easy reach of major educational facilities on both campuses. Two libraries allow conference participants ready access to reference materials. The University also maintains two well-equipped audio-visual departments, as well as a print shop.

Conference fees are determined by the Department of Conferences with the assistance of the conference sponsor’s planning committee. While program costs will vary with the number of participants, duration of program, and special requirements, program fees are kept reasonable by utilizing University facilities and services whenever possible. The staff prepares a budget for each conference or workshop and presents to the sponsor a financial statement at the successful completion of the program.

Each summer the Department of Conferences offers a number of camps for junior and senior high school age students. Offerings for the summer included Soccer School, “SWISH” Basketball Camp, “STIX” Field Hockey Camp, Southern Maine Music Camp, and the Computer Camp. The Department also offers Elderhostel each summer for people over 60 years of age.

For information about these and other conference services at USM please call 207-780-4074.

Department of Continuing Education for Nursing and Health Professions

Director: Mary Ann Rost

The Department of Continuing Education for Nursing and Health Professions develops, offers, and evaluates noncredit programs in a variety of formats to meet the learning needs of nurses and other health professionals at locations throughout the state of Maine. Programs offered by the Department are held at college campuses, in health facilities, and other appropriate locations and include workshops, seminars, conferences, and courses. Programs are available either on a fee basis or through specifically designed contracts with health care agencies.

Programs offered by the Department of Continuing Education for Nursing and Health Professions are conducted in cooperation with health agencies, health care officials in the state of Maine, or at the request of a group or individual. Examples of groups served are: nurses, pharmacists, dieticians, physical therapists, occupational therapists, and social workers.

All programs are awarded CEUs and are approved by professional associations including The Maine State Nurses Association, and Maine Commission of Pharmacy. The following are examples of programs recently offered by the Department: Computers in Health Care Management; Anorexia Nervosa and Related Eating Disorders; Nutrition for High-Level Wellness; Bringing About Change: Facing Death; Medical-Surgical Nursing Update; Communicating Effectively; Physical Assessment Skills.
Department of Community Programs

Director: Joanne Spear
Program Specialist: Nancy Viehmann; Administrative Staff Associate: Lucille Sheppard

The Department of Community Programs offers a wide range of programs including professional development in selected areas, personal enrichment, and career and skill enhancement. The Department seeks to bring the University and community closer together through the development of timely and relevant noncredit programs. Community Programs are generally designed for adults with full-time home and career responsibilities who desire practical courses which meet a specific need and which are offered at convenient times and locations.

Courses are taught by full-time and part-time instructors who are recognized experts in their fields. Instruction is usually personalized so that participants can apply the knowledge and skills obtained to their specific problem.

Because of the rapidly changing programs within the personal enrichment category, only professional certificate programs are described in this catalog. Please contact the Department of Community Programs at 780-4045 for specific information regarding programs and courses of study in both categories.

Personal Enrichment Areas of Study: career development; interpersonal skills; creative skills; self-help; arts; parapsychology; women’s issues.

Certificate Program for Legal Assistants This paraprofessional program will provide a sequence of training leading to a certificate in the broad range of legal services known as general practice, in addition to more in-depth study in several areas of specialization.

The Legal Assistant Program is designed primarily for part-time students and courses are offered either twice a week in the evenings or in a one- or two-day seminar format.

Those wishing to obtain the certificate must apply for acceptance to the program and meet admission requirements. Those who do not plan to earn the certificate but wish to take selected courses need not apply for formal admission but will be enrolled on a space-available basis. The curriculum for the beginning level includes the following courses.

Level I: Introduction to Law and Paralegalism; Legal Research and Source Materials; Litigation; Estates, Wills and Trusts; Real Estate; Business Organizations; Bankruptcy/Secured Transactions; Domestic Relations; Legal Writing. Required seminars: Orientation to the Legal Assistant Profession, Interpersonal Skills and Interview Techniques.

Advanced courses in several areas of specialization may be offered on a demand basis. Internships are also available with the approval of the Program Coordinator.

Computer Resource Center The department has a Computer Resource Center in which to teach computer literacy and more advanced user skills. Participants in the Center’s programs get hands-on experience with IBM personal computers or Texas Instruments TI-99/4A home computers in order to become quickly familiar with a variety of business software and gain practical, usable skills. The courses offered use a “Computer Driver’s Education” approach which allows people to use computers, much as they use automobiles, to accomplish a goal, rather than become experts on the computer’s architecture. Some courses offered recently are “Introduction to Word Processing Using Microcomputers,” “Making a Computer Work for You,” “Introduction to VisiCalc,” and “Database Management Programs.”
Lifeline Program

Director: Robert Folsom
Assistant Director: Thomas Downing; Admissions Coordinator: Marcia Libby; Exercise Specialists: Len Jordan, Jerie Bugbee, Marjorie Podgajny; Exercise Counselor: Nick Branch; Medical Director: Peter K. Shaw, M.D.

The Lifeline Adult Fitness Program is a comprehensive approach to cardiovascular disease prevention, intervention, and rehabilitation. Thousands of members of the University community as well as Greater Portland participate in numerous Lifeline activities.

Lifeline also promotes adult learning through noncredit courses in stress management, smoking cessation, and nutrition/weight control. All Lifeline activities are designed to promote positive healthy lifestyles through education and exercise. Many of the fitness activities require medical clearance. Application to all programs should be made well in advance. All inquiries are welcome at 780-4170.

Admissions Process As part of the initial entry into most Lifeline programs each person participates in a comprehensive admissions process. This includes exercise counseling, health risk appraisal, a full fitness evaluation including treadmill, and computerized exercise prescription. This experience is designed to meet the individual needs of the participants as they prepare to enter a formalized exercise program.

Aerobics Program
Walk/Jog is a program designed for the sedentary person who, for one reason or another, is not in good physical condition. It is essentially a routine of walking/jogging, calisthenics, stretching, and relaxation techniques. Exercise begins slowly and progresses each week. At the end of ten weeks, one may elect to go into the intermediate program.

Aquatics is a cardiovascular exercise program for those who prefer swimming. Non-swimmers may also participate, as many of the exercises can be performed in the shallow end of the pool. A combination warmup/water calisthenics routine is followed by a peak exercise period where heart rates are elevated to improve cardiorespiratory endurance. The exercise session will end with a cool down period of slow walking and swimming and final stretch downs on the pool deck.

Aerobic Dance is a choreographed exercise program focusing on aerobic conditioning, muscular endurance, postural flexibility, and relaxation. Simple dances ranging from slow stretching warm-ups to strenuous rhythmical routines are followed by mat work to improve muscle tone, strength, and flexibility. The program develops proper body alignment and maximum range of motion. The final movements of each class are devoted to explore various relaxation techniques.

Bodyshop helps people improve their posture and strength in a supervised program of weight training. A complete assortment of weight training equipment is available including Nautilus, Universal, and free weights. The Bodyshop Program is a sensible approach to progressive resistance weight training for improving body tone, muscular strength, power, and endurance. Individually prescribed programs of exercise are designed to meet the particular goals and needs of each participant.

Each applicant will be interviewed. At this time a body assessment will be conducted which includes height, weight, flexibility, strength, body composition, blood pressure, and girth measurements as well as an evaluation of respiratory function. Objectives and goals of each individual are also discussed at this time.

Employee Health/Fitness can assist a company in the development, implementation, and evaluation of multi-faceted programs based on the
needs of both the company and its employees. Such tools as corporate health profiles, employee needs assessments, and health risk appraisals are available to aid in this process. Employee health/fitness programs can be instituted at both large and small companies.

Senior Lifeline is designed for persons over 60 years of age, including those who require a low level of exercise. Cardiovascular conditioning, determined by individual age-predicted heart rates, includes stationary bike riding, walking, or a combination of walking and jogging. Emphasis is placed on flexibility and postural muscle strength, accomplished through slow stretches and muscular improvement of specific muscle groups. Senior Lifeline should be considered a maintenance exercise program where individuals progress at their own rate.

Heartline is a program of cardiac rehabilitation for post-coronary and high risk individuals. This is a physician-supervised class, utilizing walking, jogging, and swimming to recondition persons who need close supervision while exercising. All participants must be referred to Heartline by their personal physician. While Heartline provides medical supervision during the exercise session, it is not intended to replace the role of the primary physician. Throughout the program, periodic reports are sent to the primary physician and all significant events are promptly reported. Heartline is intended to improve communications between the participant and his or her personal physician. All necessary forms are provided by the Heartline office. All participants must enter the program at the start of a new session.

The Heartline Cardiac Rehabilitation Program provides exercise three times a week for twenty weeks. Exercise progresses from low-level stretching calisthenics and walking during the first ten weeks, to moderately vigorous developmental calisthenics and perhaps jogging during the second ten weeks. Although done in a group, all exercise is individually prescribed and suited to each individual's functional capacity.

Pulmonary Rehabilitation is a comprehensive, intensive program of exercise, education, and proper medical management for patients with chronic obstructive pulmonary disease. This is accomplished by increasing their awareness of their disease and its management, and through participation in a progressive cardiopulmonary exercise program, thereby enabling adaptation to improve lifestyles. Participants are enrolled in the program only after referral from their primary care physician.

This program provides the opportunity for patients and their families to have instruction in anatomy and physiology of respiration; the conditions that interfere with normal respiration; medications; diet; breathing exercise; relaxation; and respiratory hygiene. Personal counseling and community resources are made readily available to all participants. Because Lifeline believes that learning is active rather than passive, patients are considered as part of the involved team and are expected to share responsibility for their care. Class and activities are planned so that the patient has an opportunity to practice skills, integrate knowledge, and be involved in individualizing his or her home program. Participants who are accepted into this program should express a need for help, offer personal goals, and quit smoking or be willing to attend non-smoking classes.

Low Back Pain is a six-week program consisting of progressive low-level exercise routines combined with periodic educational sessions. Emphasis is placed upon the improvements of postural and muscular strength and endurance, body flexibility, and relaxation techniques. Along with the exercise sessions specific time is devoted to topics relating to low back problems. Such items as body anatomy and physiology, causation factors, body mechanics, and nutrition will be integrated into the ten-week program. Medical clearance is required for all participants regardless of age. Appropriate medical forms will be provided for your physician to sign.
Food and Fitness is a program designed for those individuals who are overweight and have limited exercise experience. Classes consist of individualized exercise routines and support group discussions. There are also lecture presentations on nutrition and weight control skills. Medical clearance is required of all participants.

Youth Weight Training/Conditioning Program is a supervised training program for boys and girls 14 to 17 years of age. Courses are offered throughout the year utilizing the Lifeline Bodyshop. The program is designed to teach proper conditioning values and techniques; increase muscular strength and endurance; increase flexibility; and increase cardiovascular conditioning.

Lifeline Leisure Learn Program provides group activities, leagues, clinics, and physical fitness opportunities for its members. Leisure-Learn offers participants activities and equipment for racquetball, handball, squash, volleyball, basketball, weight training, sauna baths, badminton, jogging, tennis, table tennis, dance, and many others.

Lifeline Lifestyle Courses

Stress and Lifestyle is a four-week course which deals with stress theory and management. Physical, psychological, and socio-cultural dimensions of stress will be discussed. Methods of stress management will be presented for discussion and experimental involvement. Topics will include relaxation training, aerobic exercise, and personality factors.

Weight Reduction is a nine-week course using a many-sided approach to weight reduction. The primary emphasis is on the individual identification and solution to problem eating behaviors which may lead to or maintain overweight conditions. Proper nutrition and eating plans are emphasized and developed for participants, along with discussion on the value and myths of exercise.

No-Smoking—"I Quit" This course, offered for four weeks, two times per week, is designed to assist the smoker in making the decision to stop smoking and does not offer false hopes of 100 percent success. The primary purpose is to help the smoker identify reasons for smoking and through group support make some decisions about possibly stopping.

Note: Certain Lifeline programs may be taken for academic credit. Information on these courses may be found in the course registration outline.

University of Southern Maine Alumni Association

Director: Anne M. Theriault

The University of Southern Maine Alumni Association enrolls more than 18,000 active members representing alumni of Gorham Normal School, Gorham State Teachers College, Portland Junior College, Portland University, University of Maine in Portland, Gorham State College, Gorham State College of the University of Maine, University of Maine at Portland-Gorham, and the University of Southern Maine.

The Association is governed by a 16-member Board of Directors and a 30-member Advisory Council.

The Alumni Association of USM works to expand the tradition of service both to the alumni and the USM community; carrying on a tradition established some 90 years ago at the Gorham campus, and more recently
at the Portland campus. Students are urged to visit the Alumni House and
to get acquainted with the personnel and programs of the Alumni Asso-
ciation before graduation. All students, as well as former students, are
cordially welcomed.

The Alumni Office is located in Alumni House on the Portland cam-
pus. The land surrounding the Portland campus was first cleared for set-
tlement during the lifetime of George Cleeves, who obtained it from Sir
Ferdinando Gorges in 1637. Eventually the land, known as the Back
Cove Farm, was transformed into a businessman's country estate under
the ownership of James Deering in 1802. The land was acquired in 1946
for Portland Junior College, a predecessor to the University of Southern
Maine and the Alumni House is now the only remaining building of that
original property.

Administration of the
University of Southern
Maine

Administrative Organization as of June 1, 1984

President: Robert L. Woodbury, 228 Deering Avenue, Portland tel: 780-
4480
Provost: Helen L. Greenwood, 228 Deering Avenue, Portland tel: 780-
4485
Executive Assistant to the President: William B. Wise, 228 Deering Ave-
ue, Portland tel: 780-4482
Executive Director for Budget and Institutional Research: Samuel G.
Andrews, 209 Deering Avenue, Portland tel: 780-4484
Executive Director for Employee Relations: Beth I. Warren, 102 Corthell
Hall, Gorham tel: 780-5486
Executive Director for University Relations: Alyce S. O’Brien, 602 Re-
search Center, Portland tel: 780-4440

Administrative Staff of the President
Administrative Assistant to the President: Virginia L. Emery, 228
Deering Avenue, Portland tel: 780-4480
Director of Intercollegiate Athletics: Richard A. Costello, 108 Hill Gym-
nasium, Gorham tel: 780-5430
Director of the University of Southern Maine Alumni Association: Anne
M. Theriault, Alumni House, Portland tel: 780-4110

Administrative Staff of the Provost
Associate Provost: Stephen J. Reno, 228 Deering Avenue, Portland tel: 
780-4487
Assistant to the Provost and Director of Summer Session: Joseph F.
Hearns, 228 Deering Avenue, Portland tel: 780-4076
Dean of College of Arts and Sciences: Robert J. Hatala, 118 Bailey Hall,
Gorham tel: 780-5376
Acting Dean of College of Education: Dorothy D. Moore, 119 Bailey
Hall, Gorham tel: 780-5371
Dean of School of Business, Economics and Management: Duane R. Wood, 113 Bonney Hall, Portland tel: 780-4020
Dean of School of Law: L. Kinvin Wroth, 105 School of Law, Portland tel: 780-4344

Mortensen, William G. (1965) Director of Public Service; University of Maine, B.S., 1961; M.S., 1966

Murphy, Julie (1984) Assistant Professor, Philosophy Department; Northern Illinois University B.A., 1977; DePaul University, M.A., 1980; Ph.D., 1982

Najarian, Haig H. (1966) Professor of Biology; University of Massachusetts, B.S., 1948; Boston University, M.A., 1949; University of Michigan, Ph.D., 1953

Neuberger, Harold T. (1957) Professor of Science Education; Iowa-Wesleyan College, B.S., 1952; University of New Mexico, M.S., 1953; Boston University, E.D., 1964

Newell, Alma H. (1969) Assistant to the Director, Maine Children's Resource Center

Normandeau, Jeanne G. (1968) Associate Professor, School of Nursing; Boston College, B.S., 1964; M.S. 1967

Novak, Irwin D. (1971) Associate Professor of Geology; Hunter College, A.B., 1966; University of Florida, M.S., 1968; Cornell University, Ph.D., 1971

O'Mahoney-Damon, Patricia M. (1977) Assistant Professor of Biology; Long Island University, B.S., 1971; State University of New York at Buffalo, M.A., 1974; Ph.D., 1977

Otter, Marlene (1983) Assistant Professor of Biology; University of Michigan, B.A., 1972; University of Wisconsin, Ph.D., 1975; Indiana University School of Medicine, Ph.D., 1979

Padula, Alfred L. (1972) Associate Professor of History; College of the Holy Cross, B.S.
1957; University of the Americas (Mexico City), M.A., 1961; University of New Mexico, Ph.D., 1975
Palmacci, Viola (1966) Coordinator, Portland Student Health Center/Family Nurse Practitioner; Maine Eye and Ear Infirmary, R.N., 1944; University of Southern Maine, F.N.P., 1972
Papa, Joseph D. (1980) Director of Facilities Management; University of Rhode Island, BSEE, 1973
Paradise, Noel E. (1967) Professor of Psychology; University of Maryland, A.B., 1948; University of Michigan, Ph.D., 1960
Parsons, Gregory L. (1983) Assistant Professor of Business Administration; University of Minnesota, B.S., 1974; Purdue University, Ph.D., 1980
Parsons, Henry L. (1983) Assistant Professor of Production/Operations Management; Michigan State University, B.S., 1960; University of Oregon, M.S., 1968; Ph.D., 1974
Peake-Godin, Helen (1980) Assistant Professor, School of Nursing; Spalding College, B.S., 1969; Emory University, M.N., 1979
Pendleton, James W. (1967) Associate Professor of Physical Science; Keene State College, B.Ed., 1959; Oregon State University, M.S., 1963
Perry, Caryn (1983) Instructor in Nursing; University of Maine at Portland-Gorham, B.S., 1978; Certificate/Adult Nurse Practitioner
Phillips, William A. (1980) Associate Professor of Economics; Florida State University, B.S., 1961; M.S., 1975; Ph.D., 1979
Pollock, Stephen G. (1979) Assistant Professor of Geology; Bucknell University, A.B., 1968; University of Maine, M.S., 1972; Rutgers University, Ph.D., 1975
Potter, Judy R. (1972) Professor, School of Law and Director, Clinical Practice Program; Cornell University, B.A., 1960; University of Michigan Law School, J.D., 1967
Powers, Kathleen (1977) Research Assistant, Human Service Development Institute, Center for Research and Advanced Study; University of Maine, B.A., 1969
Pranger, Eugene B. (1973) Assistant Director for Management and Finance, Center for Research and Advanced Study; Indiana University, B.S., 1971
Purdy, Warren (1980) Associate Professor of Associate Business Administration; Director, Small Business Development Center and Fellow, New Enterprise Institute, Center for Research and Advanced Study; Bethany College, B.A., 1970; Fordham University, M.B.A., 1974
Quinn, Cynthia (1976) Manager, USM Bookstores; University of Maine, B.S., 1975
Rakovan, Lawrence F. (1967) Associate Professor of Art; Wayne State University, B.S., 1967; Rhode Island School of Design, M.A., 1969
Rand, Steven (1972) Director, Computer Centers; University of Maine at Presque Isle, B.S., 1970
Reno, Stephen J. (1980) Associate Provost; St. John's College, A.B., 1965; University of California (Santa Barbara), M.A., 1968; Ph.D., 1975
Rich, Barbara (1974) Associate Professor of Social Welfare; Columbia University, M.S.W., 1970
Riciputi, Remo H. (1965) Associate Professor of Biology; University of New Hampshire, B.A., 1954; M.S., 1958
Rieser, Alison (1980) Director, Marine Law Institute, Center for Research and Advanced Study and Lecturer, School of Law; Cornell University, B.S., 1973; George Washington University, J.D., 1976
Roberts, James W. (1967) Associate Professor of Political Science; San Diego State College, B.A., 1954; University of North Carolina, Ph.D., 1973
Roche, Mildred A. (1982) Instructor, School of Nursing; Boston College, B.S.N., 1960; Catholic University, M.S.N., 1966; F.N.A., 1972
Rodgers, Marianne W. (1981) Instructor, School of Nursing; University of Maine, B.S.N., 1967; Boston University, M.S., 1981
Rogers, Paul C. (1965) Professor of Mathematics; College of the Holy Cross, B.S.N., 1945; Boston University, M.A., 1948
Rogoff, Martin A. (1972) Associate Dean and Professor, School of Law; Cornell University, B.A., 1962; University of California, Berkeley, M.A., 1963; Yale Law School, LL.B., 1966

Rolf, Frederick B. (1966) Associate Professor of French; Bowdoin College, A.B., 1946; Middlebury College, A.M., 1948

Ross, Paul (1978) Artist in Residence, Music; Juilliard School of Music, B.M., and Performers Degree, 1960

Rost, Mary Ann (1975) Assistant Dean and Professor of Conferences; University of Idaho, B.S.; Director, Center and Instructor in Education; Brandeis University, B.A., 1968; Wheelock College, M.S., 1977

Santry, Robert T. (1979) Assistant Manager, Portland Bookstore; University of Southern Maine, B.A., 1979

Sanders, John J. (1982) Assistant Professor of Accounting; Plymouth State College, B.S., 1972; University of Southern Maine, M.B.A., 1977

Sayers, Frances (1981) Assistant Professor of Communication; Auburn University, B.G.S., 1974; M.A., 1977; Florida State University, Ph.D., 1980

Schiferl, Ellen (1980) Assistant Professor of Art; Grinnell College, B.A., 1971; University of Minnesota, M.A., 1974; Ph.D., 1980

Schroff, Roger (1982) Associate Professor of Computer Science; Kansas University, B.A., 1966; M.A., 1978; M.S., 1979; Ph.D., 1980

Schwanauer, Francis (1962) Professor of Philosophy; Technical University of Stuttgart, Dr.Phil., 1959

Schwanauer, Johanna (1963) Lecturer in German; Wellesley College, B.A., 1957

Schwincke, Lotte (1969) Associate Professor of Biology; University of Tubingen, Dr. rer. nat., 1956

Seibel, Robert F. (1981) Associate Professor, School of Law; Bowdoin College, A.B., 1968; Northeastern University, J.D., 1971

Selkin, Michael (1970) Associate Professor of English; Columbia College, A.B., 1961; Cornell University, M.A., 1963; Columbia University, Ph.D., 1975

Shedletsky, Leonard (1979) Associate Professor of Communication; Brooklyn College, B.A., 1965; San Francisco State College, M.A., 1968; University of Illinois, Ph.D., 1974

Sheppard, Lucille T. (1972) Administrative Staff Associate, Department of Community Programs

Shoobs, Dorothy S. (1973) Associate Professor, School of Nursing; New York University, B.S., 1953; M.A., 1960; Ph.D., 1973

Silkman, Richard Harris (1983) Associate Professor of Public Policy and Management; B.S., Purdue University, 1972; M.A., Yale University, 1975; M. Phil, 1975; Ph.D., 1980

Silvernail, David L. (1977) Director of Academic Testing, Assessment, Student Tracking (Title III), and Associate Professor of Education; Indiana University, A.B., 1969; M.S., 1975; Ed.D., 1977

Silvernail, Susan M. (1977) Acting Coordinator, Off-Campus Counseling Services and Coordinator, Intown Center; Ball State University, B.S., 1975; University of Southern Maine, M.S., 1980

Simonds, Stephen P. (1971) Director, Human Services Development Institute, Center for
Research and Advanced Study; University of New Hampshire, A.B., 1948; University of Chicago, M.A., 1953

Sinclair, Gail M. (1978) Professional Nurse; Student Health Services; Maine Medical Center, R.N., 1963

Small, William U. (1967) Associate Registrar; Bowdoin College, A.B., 1949; Columbia University, M.B.A., 1951

Smith, Alan G. (1967) Professor of Chemistry; Mount Allison University (New Brunswick), B.S., 1949; University of New Brunswick, M.S., 1951; University of Maine, Ph.D., 1966

Smith, Charles F. (1969) Associate Professor of Education; Western State College, B.S., 1960; University of Massachusetts, M.S., 1963; Ed.D., 1969

Sottery, Theodore W. (1956) Professor of Chemistry; Dartmouth, B.N.S., 1949; University of Maine, M.S., 1956; Ph.D., 1966

Soychak, Anthony G. (1965) Assistant Professor of Mathematics; University of Maine, B.S., 1959; Bowdoin College, M.A., 1963

Spear, Joanne (1977) Director, Department of Community Programs; University of Maine, B.S., 1974; M.S., 1977

Stebbins, Richard G. (1963) Assistant Professor of Chemistry; Wesleyan University, B.A., 1965; Texas A & M University, Ph.D., 1970

Steele, William P. (1967) Associate Professor of Theatre; University of Maine, B.S.Ed., 1964; M.A., 1967

Steinman, Richard (1966) Professor of Social Welfare; University of Missouri, B.A., 1949; Columbia University, M.S., 1952; Brandeis University, Ph.D., 1968

Stone, Deborah, (1983) Instructor, School of Nursing; University of New Hampshire, B.S.N., 1977; Boston University School of Nursing, M.S.N., 1983

Stout, Elizabeth (1979) Administrative Manager, New Enterprise Institute

Stowell, Elizabeth (1980) Assistant Professor, School of Nursing; University of Vermont, B.S.N., 1972; University of North Carolina, M.P.H., 1976

Stump, Walter R. (1968) Professor of Theatre; San Diego State College, B.A., 1959; M.A., 1960; Indiana University, Ph.D., 1974

Sturner, William (1978) Professor of Management; Fordham College, B.S.S., 1957; University of Wisconsin, M.A., 1960; Fordham University, Ph.D., 1966; Certificate, Gestalt Institute of Cleveland, 1978

Sullivan, James V. (1959) Coordinator and Professor, Therapeutic Recreation Programs and Director of Employee Health and Recreation; University of Maine, B.S.Ed., 1951; University of Delaware, M.Ed., 1954; Boston University, Ed.D., 1971

Swanson, Mark T. (1983) Assistant Professor of Geology; Northeastern University, B.S., 1975; Lehigh University, M.S., 1979; State University of New York at Albany, Ph.D., 1982

Sytsma, Donald (1972) Associate Professor of Psychology; Arizona State University, B.A., 1965; University of Waterloo, Ph.D., 1971

Talbot, Franklin (1963) Reference Librarian; University of Maine, B.A., 1946; Columbia University, M.S., 1949

Tibbetts, Kathie (1979) Assistant Law Librarian for Public Service, School of Law; University of New Hampshire, B.A., 1975

Tiffany, Julia (Jill) (1983) Assistant Professor, School of Nursing; University of Washington, Seattle, B.S., 1962; Rutgers, The State University, M.S., 1967

Tizon, Judy (1972) Associate Professor of Anthropology; University of Illinois, B.A., 1965; University of California, M.A., 1969; Ph.D., 1975

Tryon, Phyllis A. (1965) Associate Professor, School of Nursing; Boston University, B.S., 1958; Yale University, M.S.M. and C.N.M., 1962

Tucker, Frances M. (1970) Registrar, School of Law

Tukey, Geraldine M. (1970) Associate Professor, School of Nursing; Mercy College of Detroit, B.S., 1957; Boston University, M.A., 1964

Turlo, Kathleen E. (1980) Instructor, College of Education; University of Maine, B.S., 1974; M.S., 1980

Uban, Juris K. (1968) Professor of Art; Director, Art Gallery; Syracuse University, B.F.A., 1966; Pennsylvania State University, M.F.A., 1968

Uban, Mara (1970) Associate Professor of German; Indiana University, A.B., 1960; University of Southern California, M.A., 1962; Ph.D., 1975

Ullman, Sallie C. (1980) Acting Associate Dean and Assistant Professor, School of Nurs-
ing; University of Delaware, B.S.N., 1973; University of Pennsylvania, M.S.N., 1979
Veazie, Carl E. (1977) Senior Economist, Center for Research and Advanced Study; Whitmore College, B.A., 1943; Columbia University, M.B.A., 1948
Ventresco, Fiorello B. (1966) Associate Professor of History; Boston University, A.B., 1959; University of Michigan, M.A., 1961
Walkling, Robert A. (1969) Associate Professor of Physics; Swarthmore College, B.A., 1953; Harvard University, M.S., 1954; Ph.D., 1962
Warren, Beth I. (1978) Executive Director for Employee Relations; Wheaton College, B.A., 1959; Simmons College School of Social Work, M.S.W., 1963
Webster, Maureen MacDonald (1983) Associate Professor of Public Policy and Management; Dip. Com. Hons., Scottish College of Commerce, 1951; B. Com. Hons., University of London (England), 1952; A.M., Syracuse University; Ph.D., 1971
Welty, Charles (1979) Associate Professor of Computer Science; University of California at Berkeley, B.S., 1967; M.S., 1968; University of Massachusetts, M.A., 1977; Ph.D., 1979
Wescott, Madeline H. (1956) Staff Associate for Payroll
Westfall, James R. (1983) Assistant Professor of Associate Business Administration; Dartmouth College, A.B., 1967; Amos Tuck School of Business Administration, M.B.A., 1968
Whitney, Sarah F. (1973) Director, Nursing Resource Laboratory, School of Nursing; Catherine Spaulding College, B.S.N., 1960; Catholic University of America, M.S.N., C.N.M., 1964
Willard, Nancy L. (1969) Assistant Professor of Physical Education and Recreation; Russell Sage College, B.S., 1958; State University College, Plattsburg, N.Y., M.S., 1967
Williams, Michael C. (1979) Assistant Professor of Education; San Jose State College, B.A., 1966; University of Arizona, Ph.D., 1972
Wise, William B. (1966) Executive Assistant to the President; University of Maine, B.S., 1961; University of Maine at Orono, M.Ed., 1971
Wood, Margo (1980) Assistant Professor of Education; Vassar College, B.A., 1961; University of Southern Maine, M.S., 1979
Woodbury, Robert L. (1979) President; Amherst College, B.A., 1960; Yale University, M.A., 1962, Ph.D., 1966
Worsham, Jill (1983) Resident Director/ Counselor; University of Maine at Farmington, B.S., 1979; University of South Carolina, M.S., 1983
Woshinsky, Oliver H. (1971) Associate Professor of Political Science; Oberlin College, B.A., 1961; Yale University, M.A., 1967; M. Phil., 1968; Ph.D., 1971
Wright, James L. (1977) Vocational Education In-Service Staff Developer and Assistant Professor of Vocational Education; Boston University, B.S., 1950; Bridgewater State College, M.Ed., 1956; University of Maine at Orono, Ed.D., 1973
