Continued study of chromatic; minor scales, theory. Last year each pupil conducts part of class exercise.

#### THE PRACTICE SCHOOLS.

The purpose of these schools is to set forth with children and in actual school work the principles and methods taught in the normal school. They are under the direct supervision of the principal of the normal school. There are ten grades,—kindergarten, three primary and six grammar,—divided into three schools with three grades in each school, and the kindergarten in charge of the teacher of the primary school with a pupil teacher from the normal school. Each school has a teacher in charge, responsible for the instruction and discipline of the pupils. The normal pupils in these schools study the work as to organization, principles and methods; study the children, serve as assistants; teach classes; teach subjects; prepare lessons; teach each school.

#### PRINCIPLES AND METHODS OF WORK.

The end of normal school work is to make the normal student, as far as possible, an educator; to this end he must consider the acquisition of knowledge, the exercises of the school, his own spirit, purpose, manners and conduct from the point of view of the educator. Hence he must know mind, the laws of its development, the predominance of its varied powers, the presentation of facts calculated to stimulate and keep in exercise these various powers. Hence he must be *master* of the subjects to be taught that he may rightly use them in teaching, and that, in teaching, *study* of the *subject* may not hinder his attention to the pupil's mind in learning. The normal student's *study* of subjects must be different from that of the study of the public schools pupils. In these the study is a means to general culture, and is academic study; in the normal schools the subjects must be studied as educational instruments, this is professional study.

The normal student is to be educated for his special work; trained to comprehend and apply the *principles* of education that he may conduct his own school to the education of his pupils; the principles of education are derived from the study of man as body, and man as mind. These principles must determine all his methods, and enable him to call into intense activity his pupils, as mind, and secure the results of such activity, viz.: growth, knowledge, character.

#### METHODS.

The methods are analytic and topical; must analyze the subject for knowledge of its principles; must then present the subject to his own class that he may acquire the power and habit of presentation. The

students thus learn to teach and train by teaching and training, and this teaching by the pupils secures the most careful study, as the student must know the subject in its details and in their logical connection, or he will utterly fail to teach. Hence this constant teaching in the student's own class becomes a most powerful means of securing mastery of the subject. It gives the student command of himself, of his subject, of the class, makes him self-reliant, develops his individuality.

#### GRADUATION, EMPLOYMENT.

The *daily work* in each study must be satisfactory to enable the student to advance to the work of the next class. Diplomas are given to all who complete the two years' course, and special diplomas to all who complete the advanced course. Certificates will be given to all who receive diplomas on application to the principal.

Graduates are in constant demand to fill good places, and the demand exceeds the supply of those fully fitted for the work.

#### TEXT-BOOKS.

The school supplies the text-books used in classes. Students entering are advised to bring all the text-books they may have. They are helpful to the student as books of reference. Each student should bring a Bible and a dictionary, and any works of *standard* literature which he may have.

#### BOARD.

Board in the boarding-house will be from two dollars and seventy-five cents, to three dollars and twenty-five cents per week, two in a room, according to the choice of room, and twenty-five cents additional if student chooses to room alone.

The students furnish their own bedclothes, towels, table napkins and toilet soap. The students take care of their own rooms, make their beds, dust and sweep the rooms; they do not trim their lamps. The students pay for their own private washing. Facilities will be found by the students for doing their own private washing. Bedclothes, towels and napkins will be washed by the house. Some help will be needed in the house, and some students may thus find work to partly pay their expenses.

All wearing apparel and bedclothes, brought to the house, must be clearly and distinctly marked.

Students will be expected to pay half a term's board, at the beginning of the term, and the balance after the middle of the term.

No deduction will be made from the bill for board, for absence less than one week continuously, unless the absence is caused by sickness.

## EXPENSES OTHER THAN BOARD.

Each student is required to pay two dollars and fifty cents at the beginning of each half year as an incidental fee, to pay for text-books, reference books, chemicals and chemical apparatus, physical apparatus, and other school appliances. Pupils furnish their own stationery, note books and drawing books, the cost of which need not exceed five dollars a year. There are no other legitimate *school* expenses.

## INCIDENTAL ITEMS.

Students should bring a dictionary for use in their rooms, a Bible for use in the schoolroom, and all text and reference books which they may have, for use in their own rooms.

Each student should have a waterproof, rubbers, and if possible rubber boots. Students should be provided with good flannel underwear. Every piece of clothing which will be washed, must be distinctly marked with the owner's name. Each student should bring a full set of toilet articles, brushes, combs, etc.

## DISCIPLINE.

Students entering the normal school are supposed to possess such intellectual qualities, and such moral and social habits as will fit them to become teachers; when they show by their conduct lack of such qualities and habits they will be sent from the school.

## REGISTRATION OF GRADUATES.

It is desirable to keep a record of each graduate, where located and what doing. This will enable the principal to communicate promptly with each graduate, and aid very materially in securing a better position.

To help to this desirable result each student before graduating will be asked to sign the following:

"I agree to report to the principal of the Gorham Normal School at least four times a year for three years after graduation, and twice a year thereafter so long as I continue in the profession of teaching, and when leaving the profession, will report the fact to him and the cause thereof."

## EXAMINATIONS.

The first examination at the school building will have place June 20, 1901.

The second examination at the school building will have place September 10, 1901.

Examinations for entrance to the normal schools will be given at the time and places appointed for the examination of candidates for State certificates. Any person wishing to enter either normal school can take the examinations and designate on the papers returned to the examiner, the school which the candidate desires to attend. These papers will be forwarded to the principal of the school named for ranking and report.
